Editorial Comment.

The Exposition Directors have asked the Board of Supervisors to direct the Advisory Board of Architects to prepare plans for the $1,000,000 auditorium to be erected in the Civic Center in accordance with the resolution wherein they had voted that sum for the purpose. This is good work and commendable expedition in taking steps to consummate the plans immediately after the City Hall award.

The resolution provides that the plans for the Auditorium shall fit into the general scheme for the Civic Center and be a part of an harmonious program for the erection of the municipal buildings. It further provides that as soon as the plans are approved by the Board of Supervisors that contracts shall be let by the Exposition Company and the work will begin.

This is the right spirit and moving along the right line. The time should soon come when the end of each month will report progress and work done for the period much the same as the Panama Canal. Let the good work go on!

Progress on the Panama Canal is being reported with satisfactory regularity. The last report shows that the spillway on Gatun dam is 88 per cent completed and for the system of three twin locks at Gatun over 93 per cent of the concrete is in place. At Pedro Miguel over 94 per cent of the concrete is done, and over 66 per cent of the concrete has been laid at Miraflores.

At the Gatun locks the first of the upper guard gates has been completed in the last chamber and has been recently swung into position and has been satisfactorily operated. The gate weighs 448 tons, is 64 feet high, 65 feet long and 7 feet thick. In spite of its great weight it was shut and opened noiselessly without jar or vibration, and at all times was under perfect control.

The great work goes on with the regularity of a machine. The Panama Canal will be a monument to the great engineer who superintended its construction and organized and systematized its working force to a constructive organization that has overcome all difficulties.

The San Francisco City Hall competition has been held in record time and the award has been made on its merits. The conditions of the competition were in many respects rigid, the time was short and the award was made in record time by the judges. This was done agreeably to the rules of competition established by the American Institute of Architects and the holding of this competition is another monument to the merits of fair competitions.

To the Mayor, the Board of Supervisors and the Advisory Board of Architects much credit is due for the expeditious and honest manner in which the competition has been conducted throughout. No breath of scandal has touched any part of the proceedings. If the building is erected before the Fair in an equal expeditious and honest manner San Francisco will have redeemed herself in the eyes of the world from a city of municipal graft to a city of honesty and civic pride.

About as sad a spectacle of the commercialism of the present day as one can witness is to see the production of some able newspaper man in print, voicing the sentiment of the selfish scoundrel that has hired him, or pondering to the greed of the corporations that control the great daily newspapers and the press generally throughout the country.

Time was when the newspaper man like the stateman, was a power within himself and the people waited for his opinion on public questions because they knew that he wrote what he thougnt and his paper gave expression to his honest opinion. But the days of Greely and Prentice have passed with the days of Webster, Calhoun, and Clay, and now the advertising columns and big business dictate, the editorial utterances and color the news as well. Bryan and Roosevelt have successfully thrown their hats in the ring to fight this juggernant of commercialism and a few newspapers owned and edited by militant progressives have steadily battled for individuality and human rights.

Alfred Henry Lewis and the special writers on the Hearst papers usually write what pleases Hearst. Elbert Hubbard usually speaks and writes what he thinks will suit his hearers or readers. As a general thing nobody knows what the writer or editor thinks, whether they are his opinions or are simply the paid utterances of a hired man. As a result they are given about as much consideration by thinking people as a paid advertisement.

Ill fares the land, to hastening ills a prey,
Where wealth accumulates and men decay;
Princes or lords may flourish, or may fade—
A breath can make them, as a breath has made;
But a bold peasantry, their country's pride,
When once destroyed can never be supplied.

—Goldsmith's "The Deserted Village."

Unit-Costs For Concrete Industrial Buildings.

Estimating Data for Various Types of Reinforced Concrete. Industrial Buildings Based on Experience of Actual Costs of Construction.

By Chester S. Allen.
With Lockwood, Greene & Company, Engineers, Boston, Mass.
(From a paper read before the National Association of Cement Users.)

Unit-costs are harmless when used with judgment and prudence, but likely to bring remorse and anguish where employed promiscuously. Rare and talented indeed is the man who possesses the experience, judgment, and intuitive sense to know when, where, and how properly to modify any tables or statements of unit-costs to meet the peculiar conditions of each individual case. While the figures given in this paper are all taken from structures erected during the past two years under the writer's supervision, the wide range of territory, local conditions, and different seasons of the year under which the various pieces of work have been executed, is so great as to render the information given of value only in a very general way.

As a general proposition, we have found that reinforced concrete is the lowest-priced fireproof material suitable for factory construction; and while it is true that its first cost will generally run from 5 to 20 per cent higher than first-class mill construction, we have recently had several instances where, with lumber at a high price, reinforced concrete has worked out cheaper than brick and timber. It is especially adapted to heavy construction; and for heavy loads of 200 pounds per square foot and over, where the spans are 18 to 20 feet centers, not even timber can compete with it.

The unit-costs of projected or completed buildings are commonly figured either at so much per cubic foot or so much per square foot of area occupied.

While no coal pockets are included, it has been our experience that above 3,000 tons capacity reinforced concrete elevator coal pockets cost from $5.50 to $7.00 per ton of capacity. Standpipes, exclusive of the foundations, average from 2½ to 3 cents per gallon of capacity.

On much of the reinforced concrete work which has been done under our supervision, it has been possible, owing to the contract being either on a percentage or on a cost-plus-a-fixed-sum basis for us to obtain quite accurate and comprehensive cost data. This data, of course, is only of particular value where all the local color of each specific case is known, but the average results are at least interesting.

The average unit-cost of the 1:2:4 concrete in the floors, including the beams, girders and slabs was $6.10 per cubic yard placed for the columns, $6.70 per cubic yard. Where 1:1½:3 mixture was used in the columns, the average cost was $6.80 per cubic yard. This cost was made up of the items of cement, sand, stone, gravel, labor and plant. The latter, of course, varied greatly with the locality but the average net cost was $2.00 per barrel, including 3 cents for bags. The sand averaged 80 cents per cubic yard and the crushed stone, $1.10 per cubic yard. The cost of labor of unloading the materials, and mixing and placing the concrete, varied from 85 cents to $2.00 per cubic yard. The cost of plant, consisting of freight, depreciation, or rental of mixing and hoisting towers, erection of same, power and coal, and losses and waste on the small tools, ranged from 50 cents to $1.50 per cubic yard of concrete placed.

Next to the proper design of the structural features of a concrete building, the economical design of the form work is of paramount importance. The truth of this statement is borne out by the fact that on the average job the cost of the forms amounts to about one-third the cost of the entire structure. On the buildings under consideration, the average cost of the forms for the floors, including beams, girders, and slabs, was 30 cents per square foot, and for the columns, 12 cents per square foot. The lowest cost was in the building of the so-called "mushroom" or flat slab type of construction, where, by the intelligent use of corrugated iron for the slab forms, the cost of the floor forms, including wall beams was 2 cents per square foot, and the highest cost was for a rather plain but not elaborate overhanging cornice on a 12-story building, which was 32 cents per square foot. This last item rather forcibly demonstrates that an attempt at ornate head development is very apt to be a costly proposition.

The cost of the labor of making, erecting, and stripping the forms varied according to the nature of the work, design of the structure, method of forming, character of the supervision, and the skill of the workmen, from 1¾ to 12 cents per square foot. The cost of lumber, nails and oil, divided by the square feet of forms, averaged from 2¼ to 4½ cents per square foot.

The cost of handling and placing the reinforcing steel, including the necessary wire, averaged $10 per ton, the range being from $5.75 to $17.00 per ton.

Granolithic floor finish 1½ inches thick, when laid before the concrete below it had set, so as to form one homogeneous slab cost on an average 4½ cents per square foot. When put on after the rough concrete slab the cost averaged 7 cents per square foot.

Inasmuch as the only economical design of a reinforced concrete structure is one which closely resembles that of the steel skeleton type, the relative cost of the various materials commonly used for curtain walls under the windows may be of interest. The writer has used brick, vitrified tile, concrete blocks, cast concrete slabs, and solid concrete walls for this purpose.

The most common type of curtain wall has been either an 8-inch or a 12-inch brick wall resting on the concrete wall beam. The average cost of these walls has been 45 cents per square foot. There is practically no difference in cost between the 8-inch and the 12-inch brick curtain wall, as the saving of material is offset by the great amount of extra labor in culling and laying the thinner wall.

An excellent and inexpensive spandrel wall is constructed by using 8 by 12 by 18-inch vitrified tile. This is a non-absorbent wall, and, when properly laid in cement mortar, makes a tight, weather-proof curtain wall. The cost of this wall averages about 25 cents per square foot. If the tile is plastered on both sides, the cost is about 38 cents per square foot.

Where 8-inch concrete curtain walls were cast in place after the skeleton frame was completed, the average cost was 30 cents per square foot; and when poured simultaneously with the columns, 18 cents per square foot. Four-inch cast concrete slabs cost about 35 cents per square foot.

While concrete blocks make a very cheap and light curtain wall, the price being about the same as for the 8-inch tile, the writer's experience with them has been rather unfortunate on account of their extreme porosity.

Where the location of the building has demanded special treatment of the exposed surfaces, we have generally specified rubbing with a block of carborundum. The average cost of this work has been 4 cents per square foot. In two instances, portions of the structure have been bush-hammered, with a resulting average cost of 7 cents per square foot.

Concrete piles were used in the foundation of several of the buildings, and the average cost of the piles was $1.15 per linear foot.

The most common methods of waterproofing concrete structures are by the introduction of foreign ingredients into the concrete, by the application of a compound to the concrete surface, by the use of paper or felt waterproofing, and by accurately grading and proportioning the aggregates and the cement.

Where an addition of hydrated lime in the proportions of 10 per cent to the weight of the cement has been used, the added cost to a cubic yard of 1:2:4 concrete has been 50 cents. Patented compounds similar to Hydrolithic cement have cost from 25 to 35 cents per square foot of surface covered. On horizontal or inclined surfaces we have sometimes used a granolithic surface of rich mortar of Portland cement and sand, or Portland cement and screenings in the proportions of 1:1, laid at the same time as the base and troweled as in side-wall construction. The cost of this work has been about 5 cents per square foot.

Taken as a whole, the lowest possible cost on a reinforced concrete building can be obtained only by a careful study of each particular case to determine the cheapest type of construction and most economical spacing of columns. As a general proposition we have found that for light loads with the most economical spacing of columns has been eighteen feet each way, and for flat-slab construction, 20 feet each way. For heavy loads, such as 300 pounds per square foot and over, it has been our experience that the

cheapest column spacing for beam-and girder construction is 15 feet by 15 feet; and for flat-slab construction, 17 feet by 17 feet. In arriving at the most economical layout, it is always well to bear in mind that the consideration which allows the greatest simplicity of form units, together with the maximum number of repetitions of same, is invariably the one that will work out cheapest in the end. The fact that the actual amount of concrete or steel required for a certain floor construction is less than that required in another, by no means implies that it is actually the cheapest floor construction, as the unit labor cost of the latter work may easily have been increased out of all proportion.

State Highway Contracts Let.

San Francisco and Oakland Firms Secure Three Out of Four of the Big Projects.

Contracts have been awarded on four of the big projects in connection with the construction of state highways. The four contracts call for the construction of about 37 miles of roads in all, the total cost of the work being approximately $295,000 or somewhat less than the State Engineer's estimate of the work. The following are the awards made and bids submitted.

F. E. Frye of Sacramento, was the successful bidder for the work of constructing the nine-mile strip from Morrison's crossing, Yuba county, to Marysville, for which his figure was $67,780.

Moreing & Moreing of Stockton, $76,844.25; G. S. Benson & Sons of Los Angeles, $69,789.75; F. E. Frye of Sacramento, $67,780.50. The engineers' estimate was $69,938.25.

The Ransome Crummey Company of Oakland, was awarded the contract for the construction of a ten-mile road from Madera City to Califa, Madera County, their bid for which amounted to $72,091.

Moreing & Moreing, $78,688.60; Rogers Brothers of Los Angeles, $82,-816.75; Ransome-Crummey company, $72,091.70; Imperial Engineering and Construction company of Los Angeles, $83,016.82. The engineer's estimate was $66,297.10.

F. R. Ritchie & Co. of San Francisco, was given the contract for the construction of a five and four-tenths-mile strip of roadway from South San Francisco to Burlingame, their bid being $89,368.

State Construction Company of San Francisco, $128,788.17; Clark & Henery of San Francisco, $96,173.10; G. T. Covault of Stockton, $101,154.55; Roisch Improvement Company of San Francisco, $119,746.48; Tully & Phillips of Denver, Colo., $95,127.13; City Street Improvement company of San Francisco, $104,564.61; Burns, Clark & Da Rosa of Sacramento, $115,234.78; A. Techert & Son of Sacramento, $115,970.10; Ransome-Crummy company of Oakland, $125,796.15; Barber Asphalt company of San Francisco, $122,320.30; T. R. Ritchie & Co. of San Francisco, $89,-368.82; Worswick Street Pavement company of Fresno, $110,984.30; General Contracting Company of San Francisco, $108,562.85.

The General Contracting Corporation of San Francisco received the contract for the 1.1 miles of road from the south city limits of Alameda county to Hopland, for which they will get $75,425.

Millet & Lane of San Francisco, $1-66,-00; Nelson & Hansen of Watsonville, $86,077.45; Lund Oiley company of San Francisco, $96,096.50; Clark & Hageway Construction company of San Francisco, $88,011.67; J. A. Pauley of Berkeley, $84,165.37; O'Brien Brothers & Swift of San Francisco, $[illegible]; Olsen & Lee of Willits, $[illegible]; General Contracting corporation of San Francisco, $67,325.40.

Auditorium Plans Are Requested.

Exposition Company Ask Supervisors to Appoint Architects for Big Structure in Civic Center.

The directors of the Panama-Pacific Exposition Company have passed resolutions asking the Board of Supervisors to name an Advisory Board of Architects whose duties will be to approve plans for the million dollar auditorium which is to be erected in the Civic Center by the Exposition Company. The resolutions, reading the right hon. are as follows:

Whereas, the Panama-Pacific International Exposition company has set aside $1,000,000 for the erection of a monumental auditorium in the [illegible] to be [illegible] by the city and county of San Francisco; and

Whereas, it is desired that plans for this auditorium shall be secured immediately, so that the building may be completed at the earliest possible date; and

Whereas, a harmonious program and plan of action has been agreed upon by the buildings and grounds committee of the Panama-Pacific International Exposition company and the [illegible] committee of the board of Supervisors.

Be it resolved, that the Panama-Pacific International exposition company hereby requests the city of San Francisco to designate the following board of architects as the architects to prepare plans for said auditorium, which plans shall be for a building that will harmonize with all of the other buildings, and that the preparation of these plans be advised by the architects or architect in charge shall be advised and instructed by the Panama-Pacific International Exposition company as to the interior arrangement and space allotment in said auditorium. The drafting expense of said board of architects in the preparation of said plans and specifications to be borne by the Panama-Pacific International Exposition company out of the $1,000,000 set aside by the exposition company for the purpose of erecting the auditorium, it being understood that the expenses of said [illegible] shall not exceed $40,000.

Be it further resolved, that when the plans for the auditorium shall have been approved by the board of supervisors of the city and county of San Francisco and the Panama-Pacific International Exposition company, bids for the construction of said auditorium shall be let by the [illegible]

The Hansbrough Lumber company refused the [illegible] to have the payment of [illegible] delayed by Hansbrough [illegible] of the Hall-Tibbetts Contracting company, which they took over from the bankrupt firm. Judge [illegible] against Hansbrough and all [illegible] of their suit.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again received under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 6 story and base, brick and steel, $10,000. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, R. D. McElroy. The building will be erected on an inside lot and will cover an area of approximately 46x120 feet. There will be in the neighborhood of 60 apartments arranged in suites of two and three rooms each, with baths and wall beds. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

San Francisco.—Apartment house, 9 story and base, brick and steel, $90,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner, J. H. Bohlig. This building will be erected at the southeast corner of Pine and Powell streets and will contain in the neighborhood of 120 apartments of two and three rooms each. There will be private baths, wall beds, steam heat, elevator service vacuum cleaning system and all other modern improvements. The exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

San Francisco.—Apartment house, 3 story and base, frame, $20,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Shaw. The building has been designed to contain 12 apartments which will be arranged in suites of two, three and four rooms. There will be connecting baths, wall beds and steam heat. The interior will be finished in pine and redwood. The exterior of the building will be covered with shiplap and brick veneer. Plans will be complete within the next few days and turned over to the owner who will do the work by Day Labor.

San Jose, Santa Clara Co., Cal.—Apartment house, 2 story and base, frame, $10,000. Architect, F. D. Wolfe Smout Bldg., San Jose. Owner, William A. Coulter. The building will contain four apartments of four rooms and bath each. The interior will be finished in pine with some oak floors. There will be wall beds. The exterior will be covered with shiplap. Plans are complete and figures are being taken.

Long Beach, Los Angeles Co., Cal.—Apartment house, 9 story and base, reinforced concrete. Cost not stated. Architect, Paul C. Pape, Union League Bldg., L. A. Owner, E. Tismerat. The building will contain 68 apartments of two rooms each, with kitchen and private bath. The first floor will contain store room, billiard room, lobby, amusement rooms, sun parlor, dressing rooms and shower baths for bathers, etc. The construction will be entirely of reinforced concrete with cement pebble exterior finish, composition roofing hollow tile interior partitions and tile trim throughout. Tile will be used in the bath rooms. There will be wall beds, steam heat, vacuum cleaning system and two electric passenger elevators. The architect is now preparing the plans.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, Fred C. Harris. The building will contain 27 rooms divided into two and three room apartments with connecting baths. They will be steam heat. The exterior of the building will be faced with pressed brick. The architect is now complete the working drawings.

San Francisco.—Apartment house, 3 story and base, frame, $5,000. Size of lot 25 feet, O. E. Evans 2564 Mission street. S. F. Owner's name withheld. The building will be erected in the Mission District and will cover an area of 50x100 feet. The architect is just working out the preliminary drawings and details of the construction can not be given. Mr. Evans states however that the building will contain a central heating system wall beds and elevators. The exterior will probably be covered with colored plaster on metal lath.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, $75,000. Size of lot, 0. E. Evans, 256 Mission street, S. F. Owner, H. B. Packard. The building will be 90x150 feet and will be arranged for 24 apartments of two and three rooms each. There will be American fixtures, tile wainscot baths, steam heat and elevator service. The interior trim will be of pine and hardwoods. The exterior of the building will be faced with pressed brick.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, C. C. Pitzer, 413½ South Hill St., L. A. Owner, Mr. Street. The building has been arranged for three stores on the ground floor and 24 rooms and baths on the upper floors. The apartments will contain two and three rooms each. Tile trim will be used throughout. There will be wall beds. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Seattle, Wash.—Apartment house, 3 story and base, brick, $75,000. Architect, C. E. Green, Cobb Bldg., Seattle. Owner's name withheld. The building will be 78x80 feet and will contain 44 apartments arranged in suites of 3 rooms and bath each. There will be hot water heating system wall beds and elevator service. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Portland, Ore.—Apartment house, 3 story and base, frame, $20,000. Architect, J. S. Atkins, Portland. Owner, Miss A. R. Riddle. The building has been designed for thirty apartments of two rooms and bath each. The interior finish will be of pine with hard wood floors. There will be steam heat and wall beds. The exterior of the building will be covered with cement plaster. Plans will be completed by July 10th.

—BANKS—

Albany, Ore.—Bank and office, 3 story and base, reinforced concrete, $80,000. Architect, W. F. Tobey, Portland. Owners, First National Bank of Albany. This work has been mentioned here before when the architect was first commissioned to prepare the plans for the building. The working drawings are now complete and figures will be called for at once. The building will cover an area of 48x102 feet. The first floor will be occupied by the bank and the upper floors will be subdivided into 110 modern offices. The exterior will be faced with pressed brick and terra cotta.

BRIDGES, DAMS AND HARBOR WORK.

Richmond, Contra Costa Co., Cal.—Harbor work, $2,000,000. Engineers, Haviland & Tibbetts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. The City Council of Richmond have approved the plans for an inner harbor costing $2,000,000, which were submitted by Col. Thomas H. Rees, of the United States Army. These plans provide for a rectangular harbor, about a mile long and 2,200 feet wide, with a channel 600 feet wide and a mean depth of 24 feet at low tide. The work will include the construction of a large amount of sea wall, dredging and filling. The city of Richmond's share of the expense in bonds will be $600,000. Further plans now under consideration contemplate the boring of a long tunnel and the construction of a municipal wharf. If both these projects are carried out it will add another $150,000 to the bonded indebtedness of Richmond. Consulting Engineer P. A. Haviland, of the firm of Haviland & Tibbetts, has prepared the preliminary plans for the city of Richmond's share of this work and is now completing the estimates.

San Pablo Creek, Contra Costa Co., Cal.—Bridge, wood and concrete. Cost not stated. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans for the construction of a bridge over the San Pablo Creek near the Sheldon School have been completed and figures are now being taken. Plans may be secured from the County Clerk. Bids will be opened on July 15.

The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Store and Billiard Hall—2 story and base, brick and steel, $30,000. San Francisco. Architect, Frank S. Holland, 100 Haigut St., S. F. Owner's name witneld. This building has been mentioned here before. The plans provide for a bakery in the basement, large restaurant on the first floor and a billiard hall on the second floor. The bakery and restaurant will have tile floors. Considerable art glass will be used. The interior will be finished in hardwoods. The exterior will be faced with glazed brick. Plans are complete and figures are being taken.

Let Big Contract For Pier No. 28.

San Francisco Bridge Company Awarded Work By State Board of Harbor Commissioners.

The contract for the construction of Pier No. 28 has been awarded to the San Francisco Bridge Company on their bid of $358,400. Nine other bids were received by the State Board of Harbor Commissioners for the work the highest of which was from the State Construction Company which firm bid $453,099.50.

Pier No. 28 will be of the latest type of construction, 800 feet long 150 feet wide and has been leased to the Matson Navigation Company. The contractors have 200 days in which to complete the work with a forfeit and bonus of $100 per day.

The San Francisco Bridge Company recently completed the extensive work at Fort Mason for the Transport Docks and now have a large force of men engaged in government work at Pearl Harbor near Honlulu.

The following is a complete list of the bids presented for the construction of Pier No. 28:

State Construction Co...	$453,099.50
Grant-Smith & Co.....	439,000
Pacific Construction Co....	372,500

Oakland Church Bids.

Bids for The First Methodist Church of Oakland Show Williams Bros. and Henderson Low.

Bids for the general construction of the First Methodist Church of Oakland, which is to be erected at 24th and Broadway streets in Oakland, have been opened and show Williams Bros. and Henderson, Monadnock Bldg., San Francisco, low at $186,000. Six other bids were received as follows:

Duval & Son, First National Bank Bldg., Oakland, $236,000.

Kidder & McCullough, 2035 Addison street, Berkeley, $210,000.

R. H. Van Sant, First National Bank Bldg., Oakland, $194,000.

Leiter-Arlett Co., San Francisco, $206,000.

Schnebly-Hostrawser-Pedgrift Co., Broadway, Oakland, $191,000.

E. T. Thurston, 57 Post Street, San Francisco, $190,000.

All of the bids received are in excess of the amount available for construction at this time and it is doubtful what action will be taken by the Building Committee. The plans for the church were prepared in the office of Norman F. Marsh, Broadway Central Bldg Los Angeles.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Harbor Work—$2,000,000. Richmond, Contra Costa Co., Cal. Engineers, Haviland & Tibbetts, Alaska Commercial Bldg., S. F. Owners, City of Richmond. The City Council of Richmond have approved the plans for an inner harbor costing $2,000,000, which were submitted by Col. Thomas H. Rees, of the United States Army. These plans provide for a rectangular harbor, about a mile long and 2,200 feet wide, with a channel 600 feet wide and a mean depth of 24 feet at low tide. The work will include the construction of a large amount of sea wall, dredging and filling. The city of Richmond's share of the expense in bonds will be $600,000. Further plans now under consideration contemplate the boring of a long tunnel and the construction of a municipal wharf. If both these projects are carried out, it will add another $150,000 to the bonded indebtedness of Richmond. Consulting Engineer P. A. Haviland, of the firm of Haviland & Tibbetts, has prepared the preliminary plans for the city of Richmond's share of this work and is now completing the estimates.

Bridge—Wood and concrete. Cost not stated. San Pablo Creek, Contra Costa Co., Cal. Engineer, County Surveyor, Martinez. Owners, Contra Costa County. Plans for the construction of a bridge over the San Pablo Creek near the Sheldon School have been completed and figures are now being taken. Plans may be secured from the County Clerk. Bids will be opened on July 15th.

ANNOUNCEMENT

The Board of Public Works of the City of Los Angeles realizing that active construction on the Los Angeles Aqueduct is nearing completion, has authorized the organization of a Sales Department for the purpose of disposing of all excess material and equipment. While large quantities will not be available until the work is over, varying amounts will be released from time to time and either sold at nearest railroad siding or at Receiving Yard, Corner Slauson and Compton avenues.

Material to be sold includes steam and electric power shovels, mules, horses, wagons of all kinds and sizes, electrical equipment, drills, drill steel and sharpeners, compressors, air receivers, pumps, boilers, locomotives, both steam and electric, rail of all sizes, riveted pipe, casing, black pipe, forges, blowers, gas engines, hoists, tunnel and dirt carts, concrete mixers and buggies, lathes, drill presses, steam hammers, machine shop equipment, etc., besides quantities of small tools of every size and description.

Correspondence or personal visits invited regarding any or all items in quantity or otherwise. If articles wanted are not yet available, record will be kept and notification made as soon as same are released.

All communications should be addressed to E. W. BANNISTER, Sales Engineer, 1108 Central Building, Los Angeles, Cal.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—[illegible] story and base, reinforced concrete. Cost [illegible]. Long Beach, Los Angeles Co., Cal. Architect, Paul C. Pape, [illegible] Bldg., L. A. Owner, [illegible] building will contain [illegible] of two rooms each, with kitchen and private bath. The first floor will contain store room, billiard room, [illegible] amusement rooms, sun parlor, dressing rooms and shower baths for bathers, etc. The construction will be entirely of reinforced concrete with cement plaster exterior finish, composition roofing, hollow tile interior partitions and birch trim throughout. Tile will be used in the bath rooms. There will be wall beds, steam heat, vacuum cleaning system and two electric passenger elevators. The architect is now preparing the plans.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, Fred C. Harris. The building will contain 72 rooms divided into two and three room apartments with wall beds and connecting baths. There will be steam heat. The exterior of the building will be faced with tapestry brick. The architect is now completing the working drawings.

Apartment House—3 story and base, brick, $75,000. Los Angeles, Cal. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, H. B. Parker. The building will be 50x100 feet and has been arranged for 50 apartments of two and three rooms each. There will be American disappearing beds, private baths, steam heat and elevator service. The interior trim will be of pine and hardwood. The exterior of the building will be faced with pressed brick.

School—2 story and base, brick, $60,000. Los Angeles, Cal. Architect, Frank G. Krucker, Ferguson Bldg., L. A. Owners City of Los Angeles. The school will cover an area of 198x72 feet. There will be eight standard class rooms and an auditorium. The interior partitions will be of hollow tile, the ceilings of metal and the stairways of reinforced concrete. There will be steam heat. The exterior will be faced with pressed brick. Plans are complete and figures will be called for shortly.

Stores and Offices—13 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Syndicate composed of C. Laux, F. N. Drake, J. A. Duano, F. S. Owen and Henry Blumberg, Jr. The building will be erected in South Broadway, between 7th and 8th streets, and will cover an area of 60x160 feet. The plans are still in the preliminary stage and details of the arrangement cannot be given. There will be a complete steel frame and exterior walls of brick faced with glazed brick and terra cotta. The architects are preparing [illegible] preliminary plans.

Apartment House—4 story and base, frame. Cost not stated. Los Angeles, Cal. Architect C. C. Pitzer, 433½ South Hill St., L. A. Owner, Mr. Stover. The building has been arranged for 4 [illegible] stores on the ground floor and [illegible] apartments on the upper floors. The apartments will contain two and three rooms each. The trim will be of pine throughout. There will be steam heat. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Church—1 story and base, frame, $3,000. Upland, San Bernardino Co., Cal. Architect, Robert H. Orr, State Bank Bldg., Pomona. Owners, First Methodist Church of Upland. The building will be of frame construction with the exterior covered with cement

plaster on metal lath. The interior will be finished in pine. The present building will be moved to the rear of the lot and used as a Sunday school room. The architect is preparing the plans.

Hospital—4 story and base, reinforced concrete, $50,000. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. The building will be 36x85 feet. Each floor will contain 22 patients' rooms with connecting baths and diet kitchens. The mechanical equipment will include steam heat and elevator service. The building is a part of a large group which, when completed, will cost $2,000,000. The architect is preparing the plans.

School—1 story and base, brick, $20,000. Sawtelle, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Sawtelle School District. The building will be 100x71 feet and has been designed for an eight-room school. Only four of the class rooms will be finished at this time. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be opened on July 6th.

High School—Reinforced concrete or brick and steel, $150,000. Los Angeles, Cal. Architect, Edgar H. Cline, Wright and Callender Bldg., L. A. Owners, City of Los Angeles. The selection of the architect for this work has just been announced. Eight sets of plans were considered. The new building will be known as the East Side High School. The design is in the Greek Classic, and provides for a total of eight buildings. Only the $150,000 is now available and only the administration and science buildings will be erected at this time.

School—2 story and base, brick. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Notre Dame Parochial Schools. The building will cover an area of 75x100 feet, and will contain ten class rooms. The work will be done by the Jesuit Fathers. Plans are now being prepared.

Theatre Remodeling—$40,000. San Bernardino, San Bernardino Co., Cal. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owners, San Bernardino Opera House. This work was mentioned here when the architect first started the working drawings. Plans are now complete and figures are being taken on the work, which will include extensive brick work, interior finish, plumbing and electric work.

Lofts—5 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, none. Owners, Whiting Wrecking Co., 415 North Ninth St., L. A. The building will be 92x86 feet and when complete will be occupied entirely by the owners. The exterior of the structure will be covered with cement plaster. Plans are being prepared, and when complete the work will be done by Day Labor.

SEATTLE AND WASHINGTON.

Apartment House—3 story and base, brick, $35,000. Seattle, Wash. Architect, C. E. Green, Central Bldg., Seattle. Owner's name withheld. The building will be 52x90 feet and will contain 11 apartments arranged in suites of five rooms and bath each. There will be a hot water heating system, wall beds and elevator service. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Warehouse—3 story and base, reinforced concrete. Cost not stated. Seattle, Wash. Engineers, Stone & Webster Co., Seattle. Owners, Fisher Flouring Mills Co. The building will be erected adjoining the present buildings on the tide water flats. The plans will be completed within ten days and bids will be taken for a general contract.

Wharf — Pile construction, $50,000. Seattle, Wash. Engineers, Stone & Webster Engineering Co., Seattle. Owners, White-Dulany Co. This company has recently purchased property adjoining the Fisher Mills near Seattle, and will have several buildings planned besides the wharf. The plans for the wharf will be completed shortly and figures will be taken.

Field House—2 story and base, brick, $22,000. Seattle, Wash. Architects Bebb & Mendel, Seattle. Owners, City of Seattle. The building has been out for figures, but all bids presented by the contractors were found to be in excess of the appropriation. The architects have been instructed to revise the plans, making such illiminations as are necessary to bring the cost of the building within $22,000. The lowest bid presented was $29,994

Contracts Awarded.

Concrete Piers for Bridge—$400,000 Seattle, Wash. Engineering Dept. City of Seattle, Seattle. Owners City of Seattle. Contractor, Butler Construction Co., Central Bldg., Seattle. Contract price, $400,000.

School—3 story and base, brick and concrete, $65,000. Montesano, Wash. Architect's name not given. Owners, Montesano School District. Contractors, Syllassen & Sando, Arcade Bldg., Seattle. Contract price, $65,000.

The big dam of the Nevada California Power Company at Bishop Creek, Inyo County, has been declared to be unsafe. The reason given by the Assistant State Engineer is that the concrete was not properly distributed in its construction and the dam has not been built according to specifications.

This is the first report by the State Engineer's office on dams built by private capital. Inasmuch as the surrounding residents are much concerned in the dams that impound great quantities of water the state very properly should see that they are safely constructed. It would naturally seem that private corporations would construct dams with every possible degree of safety, but in many cases the officials of the corporations themselves are grafters who profit by crooked work. As in the case of the Austin dam in Pennsylvania numerous lives were lost and a vast amount of property by the failure of faulty and unsafe construction.

Where such a vast quantity of water is impounded at high elevations it is a constant menace to life and property for miles below. The state should see that all such dams are properly constructed and that they have proper safeguards to protect them.

Kansas has what is called the Sky Blue laws for the inspection of stocks and securities offered for sale within her borders. A state commission passes upon the securities represented by the paper offered for sale within her borders and anyone caught selling stocks or securities there without their permit is guilty of a crime and punished accordingly. It is estimated that this commission saves the state millions of dollars, annually, from the get-rich-quick promoters that fatten off the cupidity and ignorance of the general multitude.

It might be a good thing to have such a committee of censors for the builders. For it seems that there is no class of men so successfully duped as are the contractors and builders generally. It might be a good thing to have such a committee for the Builders' Exchange and General Contractors' Association that would look into and report on the securities offered for sale to its members.

WINS DAMAGE CASE UNDER NEW LAW.

A test case for damages brought bp Mrs. Lavinia Crabbe for the death of her son, William R. Crabbe, a miner killed in the shafts of the Mammoth Channel Gold Mining Company at Magalia by a fall of rock, resulted in a verdict of $20,000 under the law which abolishes the assumption of risk and fellow-servant defenses.

The case was tried in the Superior Court of Butte county, Judge John C. Gray presiding. Mrs. Crabbe sued for $50,000 damages.

It was shown that the gold mining concern had not used due care in propping its shafts. Attorneys are watching the course of the test case with interest. An appeal will be taken.

MR. ARCHITECT:

You are keen for every improvement in the building line.

You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out date.

The Simplex is manufactured in 49 different varieties.

Send for details.

Simplex Window Co., 62 Post St.

Editorial Comment.

Building construction for the first six months of the year amounted to $14,182,521 which makes an average of over two and one-third millions per month. At that the month of June fell a little behind the three preceding months which had shown remarkable gains. June footed up $2,058,224 as against $2,625,740 for the same month of the preceding year. The total for the first six months of the preceding year, however, amounted to $12,723,211 as against the $14,182,521 of the present period.

June has usually shown considerable variation in different years. For the past ten years the record is as follows:

June, 1902	$1,100,024
June, 1904	1,516,593
June, 1905	2,376,928
June, 1906	687,391
June, 1907	3,937,589
June, 1908	3,477,506
June, 1909	1,398,446
June, 1910	1,458,464
June, 1911	2,625,740
June, 1912	2,058,224

Compared with the months of the past year the record is as follows:

1911	
July	$2,126,720
August	1,686,518
September	2,100,633
October	1,928,826
November	2,647,318
December	1,218,022
1912	
January	1,692,810
February	1,696,232
March	2,146,011
April	3,145,344
May	3,153,910
June	2,058,224

Altogether June has been an average month the contracts let varying in a natural degree from those of the preceding period.

The City Hall, Auditorium and Fair buildings should come along to give impetus to the building business from now on and the last half of 1912 should show a considerable gain over the first half of the year, good as that record has been.

The vote by the Supervisors on Monday's session in placing the City Hall on the site represented by what is known as Scheme B, prepared by the Advisory Board of Architects, still settles the question. But little objection was made to the erection of the site and the Supervisors who voted against it did so on the ground that they felt themselves morally bound to do so.

So far as the selection of either site goes there seems to be no legal or moral objection either way. With the first plan contemplated the selection of the old City Hall site against acquiring new territory at Van Ness avenue and Market street. The great majority of opinion has been given in favor of Scheme B and from the standpoint of traffic utility and economy it has very much in its favor.

The United States Government finds itself operating the mail service with no appropriation to meet the actual deficiencies. Instead of the appropriation the appointments are allowed to continue for another month or until congress shall have passed an appropriation bill.

This shows a defect in the procedure of the government to be remedied. The present congress locked upon the regular appropriation bill a lot of new services and other things that had no relation to the regular business. President Taft has vetoed the measure. And then congress refuses to pass another bill.

Such a thing should be prevented by law. It is an excuse to say that all matters of a special conditions ought to be made that no rider should be attached to an appropriation bill and it should be decided on its merits alone.

This state has a provision that a bill shall embrace but one subject and that shall be expressed in its title. Some such amendment should be made to the constitution so that such a tie up of necessary appropriations will not result from the piques of disgruntled politicians.

After a protracted fight at Baltimore the Democratic National Convention nominated Governor Woodrow Wilson, of New Jersey, on the forty-sixth ballot. This nomination was made possible through the withdrawal of Champ Clark and the nomination was made unanimous on motion of W. J. Bryan.

It is presumed that Colonel Harvey, of Harper's Weekly and Messrs. Henry Watterson and other Taft papers will now declare that Governor Wilson is a safe and sane statesman and entirely acceptable to the President of the United States.

[illegible]

Materials and Methods Of Constructing Cement Plaster Or Stucco Houses.

In building a house, it is conservative to estimate that the contents will be worth at least as much as the house itself, and that there is upon the house the double duty of protecting not only itself, but also of sheltering that which it contains. Therefore, in the construction of the house, it is demanded that the materials and the methods shall be the best that human wisdom can devise, taking into account economy, durability, protection, appearance and general desirability. Of course, we contend that in the way of material the best is cement; and it is the object of this association to exchange ideas as to what may be the best in the way of methods of construction, and thus promote the more general use of concrete.

Economical advantages are always to be considered, and in this case it certainly is obvious that in ultimate cost the advantage is with concrete, on account of its durability, owing to freedom from decay, its certain protection to the contents of the building, its saving in the use of paint, its equalization of temperatures between summer and winter, and many other features. The original cost, of course, will vary according to the location of the property or the design of the structure; but it will be found that in many forms concrete may be used nearly as cheaply as perishable wood. Even if a house be constructed merely as an investment, a concrete building will be found to outclass any other, since it may retain its original value for centuries, while other forms of construction rapidly deteriorate, demanding constant expenditure for repairs.

There is lively interest among those studying modern building methods, in the controversy between the advocates of hollow wall construction and those who favor solid walls of reinforced concrete for factories, warehouses and structures of like character. The writer is firmly of the belief that the hollow wall, constructed by tying two walls together with pieces of iron or heavy wire at regular intervales, while originally more expensive, is the best for all climates, as the air space thus formed acts as a barrier to excessive heat or extreme cold. Furthermore, it can be safely plastered on the inside without fear of frost or moisture penetrating—advantages which more than offset the slight additional cost.

The hollow wall is made in the same manner as the solid wall construction, except that the core is built in sections about two feet high, which rest upon the irons or wires used to tie the walls together. These irons should be long enough to extend half way through each wall, and the distance between them will be governed by the strength required of the structure. There should, however, be a course of these irons every time the core form is raised. The top and ends of each wall should be made solid the last three or four inches thereby forming a dead air space which must be continuous and not partial.

Cement Plaster Construction.

If it be desired to leave a finish which can be cheaply built and yet have the external appearance of a solid cement structure I would recommend the following methods:

Using in soft brick for the outside walls, in stead of 2 in. x 4 in. standing 16 in. center to center bridged every four or five feet. First cover the outside with 8 in. strong boards not too close together, well nailed. Next put up two thicknesses of roofing paper with furring strips nailed at the ends. On the paper lay on, staple expanded metal lath. Then lay wall as usual, the cement plaster. By the method no will be able to complete the exterior, and do all the lathing and plastering necessary, and allow the wood to shrink and the house to settle before the outside is completed and thus eliminate the danger of cracking the concrete; and by doing all work with outside wood finish at the floor and windows, and permit the plastering treatment to be given at the final time as on any other permanent construction. The cement plaster will absolute protection for the metal lath being moisture proof.

To the wood sheeting apply the scratch coat about ½ in. thick, and press it partly between the openings in the lath, roughing the surface with a scraper or a piece of metal lath. Allow this to set at least [illegible] according to the weather, before the second coat is put on.

As a rule two coats are used for a plain surface, but if a more artistic effect is desired three coats are necessary. In making up the mixture for this class of work the number of coats should be studied as well as the thickness, because Portland cement will stand only a limited quantity of any one coat as in the case of paint. If it be put on too thick it will crack, slide or crack when setting, according to the condition of the surface.

If Tyrolean rustic or rough cast be desired as a final finish, it is necessary to treat the second coat accordingly with the purpose to bring to and accentuate the margins at corners and openings, window sills, caps, water table, belt courses, panels and whatever trim may be desired. This of course must be done at least one day before the rough cast is applied.

In rough casting start at an upper corner of the building by wetting the wall thoroughly. In the meantime the helper mixes the plaster in the proportion of one and one-half parts of sand to one part of cement. The mixture should be taken to the place where it is to be used, and then with a small box to the consistency of very thick cream as needed being kept well agitated.

This mixture must be put on with a broom made of the twigs of [illegible] about two feet from the wall the broom is dipped in the mortar and struck on a round piece of wood held in the other hand. This allows the mortar to reach the wall in a spraying fashion, like raindrops. Repeat this by going backward and forward until it has come to the desired color. With this method it is possible to make three or four colors from the same mixture, whenever you intend to have them to produce designs on the face of a building, or on any other surface.

Cement plaster can be applied successfully to any walls or surfaces made of any material provided special precautions are taken in preparing the surface properly, so the plaster will adhere and not crack or scale off. This work should be done by an experienced cement worker. Owing to the difference in the nature of stucco and lime plaster it is very important that men employed in working with them should understand the chemical actions of the three different materials as used for exterior work in cold climates. Ignorance in these particulars is part of the reason why so much of such work has gone bad.

Preparation of Surfaces.

If a brick wall has been laid up with lime mortar, it is necessary that the joints be raked out to the depth of half an inch, and so with any masonry laid up with the mortar except concrete. Then clean the surface thoroughly by using plenty of clean water so as to soak the wall.

As a rule two coats are used—the first or scratch coat composed of two parts of clean sand to one part of cement with about ten per cent of hydrated lime. The thickness of this coat would be about ¾ in. to 1½ in., and it should be left rough.

Care must be exercised in applying the second or last coat to see that the mortar in the previous coat has reached the same degree of setting or seasoning over the particular wall area that is to be finished on that day, as this precaution is necessary for any kind of surface to insure the desired uniform shade in the last coat.

The prominence of reinforced concrete for residence and building construction has brought about a demand for decorative material with which to relieve the monotonous appearance of the unbroken gray color conspicuous in all concrete surfaces. While it is true that much work of a very plain character in form as well as in surface, has been executed in concrete, yet all have an objectionable sameness of color.

For the exterior decoration of concrete, common brick, block, stone or wood structures, nothing can excel Portland cement plaster. In its adoption, is found a medium yielding any scheme in color or design. It is impervious to climatic conditions, and as time goes on time itself when it is done by practical workmen trained for the task.

A rapid and inexpensive method of covering an artistic effect consists in covering the entire surface of the building with rough-cast of Portland cement mortar. When it comes to details,

it is desirable to have the trimming at the openings, water tables, belt courses and marginal corners to give expression to ideas or architectural beauty and workmanship. The concrete house conveys primarily the impression of strength, and it calls for the same qualities in all its various attributes, including the roof.

This humble material, so replete with possibilities, but as yet so little understood, is manifestly destined to take an important place in ornamentation of our future buildings, and must therefore strongly influence their design. If our designers will devote themselves with sufficient energy to the demands of this new material, as it so well deserves, they will discover a new architecture that will be full of life and character, strength and dignity, which will go to making up a living style.

It is to be regretted that the average cement user in the Middle West knows so little and cares less concerning its development. The time is not far distant when a cement worker must learn his trade, the same as is required in any other profession, in order to create a forced demand for his line of business in competition with the old orders of construction, and to create a better taste and to increase its appeal for more classical work.

The writer is of the opinion that the invention and use of machinery to turn out stereotyped units for alleged cement "construction," whether in the way of Edison's "poured houses" or in the way of supplying concrete blocks, have a retrogressive instead of a progressive tendency in the real art of using this splendidly plastic material. It seems that so long as the machine supplies the blocks which make them a living, a large proportion of cement users do not care to improve the conditions of their craft and in too many cases the art of it lapses and withers.

In too many localities there are men without previous experience in the business, who procure a few books on the subject and then go into "cement construction." Of course, technical or book knowledge is helpful, but practical experience is the great overwhelming necessity in order that the best results shall be secured.

My recommendation for the benefit of him who is inclined to take up this useful profession of cement construction, which, as yet is only in its infancy in this country, is that he should perfect himself for the business through practical demonstration, assisted by such knowledge as he may acquire from books or from association with those who may have had experience. Already the hour has struck when winners in any occupation or profession must be experts in combine to accomplish the results the world demands.—P. P. Connell in Cement and Engineering News.

G. & C. MERRIAM CO., Springfield, Mass.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 3 story and base, frame, $20,000. Architect, Arthur T. Ehrenpfort, Russ Bldg., S. F. Owner's name withheld. The building has been designed to contain twelve apartments of three rooms and bath each. There will be steam heat and wall beds. The interior of the apartments will be finished in pine. There will be a modern laundry plant installed in the basement. The exterior of the building will be faced with cement plaster and ship'ap. The plans are complete and a contract will be awarded at once.

Oakland, Cal.—Apartment house, 3 story and base frame, $20,000. Architect, Thomas M. Edwards, 15 Kearny St., F. Owner, George W. Peckham. The building has been designed to contain twelve modern apartments with baths and wall beds. The interior of the building will be finished in pine with some oak floors. There will be steam heat. The exterior will be covered with cement plaster and rustic. Plans are complete and figures are being taken.

Stockton, San Joaquin Co., Cal.—Apartment house, 5 story and base, brick and steel, $50,000. Architect, Glenn Allen, 1396 Golden Gate Ave., S. F. Owner, Samuel Henry, Stockton. The building will cover a considerable ground area and when completed will contain about 30 apartments arranged in suites of from two to four rooms each. There will be private baths and wall beds. The mechanical equipment will include steam heat, both passenger and freight elevators and a vacuum cleaning system. The interior trim will be of pine and hardwood. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now preparing the plans.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Whiting Thompson, Douglas Bldg., L. A. Owner, W. H. Allen. The building will contain 70 rooms besides the office, connected rooms and storage space. All chambers will be equipped with wall beds. There will be steam heat and elevator service. The interior trim will be largely of pine. The exterior of the building will be faced with pressed brick. The architect is now preparing the plans.

Oakland, Cal.—Apartment house, 3 story and base, frame, $25,000. Architect, Ivan C. Satterlee, 817 35th St., Oakland. Owner, Julia Marshall. The building will be 91x80 feet and has been designed to contain twelve three-room apartments and nine two-room. All apartments will have connecting baths and wall beds. There will be a central heating system. The interior of the building will be finished in pine and redwood. The exterior will be covered with cement plaster on metal lath and rustic. Plans are complete and bids are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, none. Owners, Patterson Investment Co., Grosse Bldg., L. A. The building has been designed to contain sixty rooms which will be [illegible] two and three room [illegible] will be private [illegible] apartments. [illegible] and [illegible] The exterior of the [illegible] with pressed brick, [illegible] and [illegible] are being taken.

Los Angeles, Cal.—Apartment house, [illegible] Cost not stated. [illegible] Architects, Walter [illegible] and H. Stanley Benedict. The building will be 50x138 feet and will contain [illegible] arranged in suites of two, three, four [illegible] rooms and baths. There will be steam heat, [illegible] exterior will be faced with [illegible] and the complete plans will be filed [illegible]

Contracts Awarded.

[illegible] Co., Cal.—Apartment house, [illegible] Architect, [illegible] Crocker Bldg., S. F. Owner, H. H. Brix. Contractor, Fred J. Amweg, 241 Kearny [illegible]

BANKS.

Whittier, Los Angeles Co., Cal.—[illegible] and base brick. [illegible]

Tillamook, Ore.—[illegible] tect, [illegible] Tillamook [illegible]

Bank. The building will contain besides the banking offices, several stores on the first floor. The upper floors will be arranged for offices and rooms. There will be a central heating system. The exterior of the building will be faced with pressed brick. Safety deposit and coin vaults will be installed. Plans will be complete by July 15th and bids will be taken.

Pasadena, Los Angeles Co., Cal.—Bank, 1 story and base. Class A construction, $50,000. Architect, S. B. Marston, Chamber of Commerce Bldg., Pasadena. Owners, Pasadena National Bank. The building will cover an area of 60x120 feet and will be devoted to the exclusive use of the bank. There will be a full basement and a mezzanine floor. The plans are still in the preliminary stage and details of the construction cannot be given.

BRIDGES AND DAMS.

New Westminster, Wash. — Harbor improvements. Cost not stated. Engineer, A. O. Powell Central Bldg., Seattle. Owners, City of Seattle. The appointment of the engineer who will be in charge of this big work has just been announced. Tentative plans will be submitted to the council before August 1st. The drawings will provide for a number of docks, seawall, bulkheads and breakwater. At this time the city expects to start the work early in September. More complete details will be given as the work progresses.

CHURCHES.

Oakland, Cal.—Church, class A construction $170,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Methodist Church of Oakland. Bids for this work were printed in these columns last week. The lowest figure was some $50,000 in excess of the amount available for construction and all bids have been rejected by the Building Committee. New plans will be prepared and another estimate will be taken.

Seattle, Wash.—Church. Class A construction. Cost not stated. Architect, W. Grant Fay, Central Bldg., Seattle. Owners, University Presbyterian Church. Other than the fact that the architect has just been commissioned to prepare the plans and that the building will be erected at 16th avenue and 14th street no details of the work are obtainable.

Camarillo, Ventura Co., Cal.—Chapel, 1 story and base, steel and stone. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Juan Camarillo. The building will be designed after the famous Madeline Chapel in Paris. The building will be of fireproof construction, the exterior walls of terra cotta and stone. The interior will be finished in marble. The architect is now preparing the plans and bids will be called for shortly.

Contracts Awarded.

Madison, Yolo Co., Cal.—Church, 1 story and base, frame. Cost not stated. Architect, none. Owner, Roman Catholic Church. Contractor, S. Arnold, Benicia. Contract price not stated.

FACTORIES & WAREHOUSES.

San Francisco—Factory, 2 story and [illegible] reinforced concrete. Cost not stated. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. This work as been mentioned here before. The [illegible] announced their selection of an architect to prepare the plans and work will be undertaken at once. The company is erecting a number of factories in the Pacific Coast plants for all of which are being prepared by Architect Graham. A local firm of architects will be selected to superintend the work.

FLATS.

San Francisco—[illegible] base, frame $8,000. Architect, [illegible] Owner, M. H. King, [illegible] S. F. The building [illegible] for three modern flats of five rooms each. There will be [illegible] throughout. There will [illegible] and hooded boilers. The exterior of the building will be [illegible] Plans [illegible] work will be done by Day Labor.

San Francisco—[illegible] base, frame $6,000. Architect, [illegible] Owner, C. Stiltz, [illegible] St., S. F. The building [illegible] to contain three [illegible] will cover an area of [illegible] feet. The interior [illegible] will be [illegible] and tub [illegible] The [illegible] of the building will be [illegible] The plans are [illegible] The work will be done by Day Labor.

GARAGES.

San Francisco—[illegible] base, brick [illegible] Architect, Bros. Clunie Bldg., S. F. Owners, [illegible] Whitehall. The building will cover an area of [illegible] feet. [illegible] be erected from the [illegible] grade and [illegible] garage purposes. [illegible] other in the [illegible] story. The floors will be [illegible] Considerable steel will be [illegible] exterior will be [illegible] brick. Plans [illegible] have been taken.

Oakland, Cal.—[illegible] and [illegible] Architect, [illegible] Bldg., Oakland. Owners, [illegible] land. Bids of the [illegible] will be erected at once. It will [illegible] improvements being made [illegible] line department. The exterior will be covered with cement plaster on metal lath. The interiors will be finished in pine. Plans [illegible] and figures [illegible] being taken.

GOVERNMENT WORK AND SUPPLIES.

The Sunset Construction Co., of San Francisco, Cal., presented the lowest bid at $17,795 for extending the road system at Fort Worden, Wash.

The plans for the polytechnic school are now being completed while plans for the $25,000 grammar school are complete and out for figures.

Seattle, Wash.—College buildings. Class A construction, $1,000,000. Architects, Beezer Bros., Northern Bank Bldg., Seattle. Owners, Seattle College. The Rev. C. F. Carroll, S. J., president of the Seattle College, Broadway and Marion street, announces that tentative plans for the $1,000,000 worth of building improvements, have been completed. He also states that the new buildings to be erected on the block bounded by 18th and 19th avenues and East Roy and Aloha streets, will be ready for occupancy next June. The main college building will be four stories high, divided into a main portion and two wings the total frontage of which will be about 200 feet, on either wing will be a two and three story building, with a frontage of about 500 feet. The larger of the three story buildings will be used as the president's residence. Adjoining the president's quarters will be erected a new St. Joseph's church, 60x120, three stories high. All buildings will be steel and concrete construction and will total a cost of over $1,000,000. The church will be faced with brick and trimmed with stone and terra cotta as will be the school buildings.

Contracts Awarded.

Seattle, Wash.—Schools, 2, 2 story and base, brick and concrete, $125,000. Architect's name not given. Owners, City of Seattle. Contractors, general construction for both the Alki School and the Lawton School, Dittleson & Gehring, Epler Bldg., Seattle. Contract price, Alki School, $51,935; Lawton School, $52,005. Heating and ventilating, Ernst Hardware Co., Alki School, $17,692 for the Lawton School, $16,537.75.

STORES AND OFFICES.

Oakland, Cal.—Store alterations, 2 story and base, frame, $4,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, E. A. Bushell. The work will include the alteration of the present building into retail stores. There will be patent fronts, plate glass windows, plastering and electrical work. The plans are complete and figures are being taken.

Oakland, Cal.—Stores, 2 story and base, brick and steel. Cost not stated. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Moffit Estate. The building will contain ten stores and a theatre on the first floor. The upper two floors have been divided in 68 guest rooms. There will be steam heat and running water in all rooms. The building will have a complete steel frame. The exterior walls will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

Glendale, Los Angeles Co., Cal.—Stores and offices, 2 story and base, reinforced concrete and brick, $15,000. Architects, Fairchild Bros., Glendale. Owner, J. A. Wright. The building will be 75x100 feet and has been arranged for stores on the first floor and offices above. The interior will be finished in pine. The exterior will be faced with pressed brick. When plans are complete bids will be taken by the owner.

Contracts Awarded.

Portland, Ore.—Store and office alterations, brick and steel, $100,000. Architects, MacNaughton & Raymond, Portland. Owners, Marquam Bldg. Contractors, Sound Construction Co., Seattle. Contract price, $100,000.

SEALED PROPOSALS.

PROPOSALS FOR SEWERS.
(Bids close July 18.)

NOTICE is hereby given that the Board of Trustees of the Town of Rio Vista, County of Solano, State of California, will, at a meeting to be held for that purpose on Thursday, the 18th day of July, 1912, at 8 o'clock p. m. of said day, receive bids for the construction of a sewer system for the Town of Rio Vista, in accordance with the plans and specifications of said sewer system adopted by said Board of Trustees and now on file in the office of the Clerk of said Town.

Said bids will be submitted in accordance with the instructions to bidders contained in said specifications.

Sealed bids therefor will be received by the Clerk of said Town, at his office in the said Town of Rio Vista, Solano County, California, at any time prior to Thursday, the 18th day of July, 1912, at 8 o'clock p. m. of said date. All bids must be accompanied with a certified check in the sum of Five Hundred Dollars ($500.00) as a guarantee of good faith on the part of the bidder as provided for in the instructions to bidders attached to said specifications.

The right is hereby reserved to reject any or all bids. Also the Board reserves the right to let the contract for said sewer system in two parts, the disposal works of said system to constitute one of said parts and the balance of the system the other.

F. J. KALBER.
Clerk of said Town of Rio Vista.

PROPOSALS FOR BRIDGE WORK.
(Bids close July 15.

OFFICE of the Clerk of the Board of Supervisors of the County of Ventura, State of California.

Pursuant to an order of the Board of Supervisors of Ventura County, sealed bids will be received by the Clerk of the Board of Supervisors of Ventura County, at his office at Ventura, until the 15th day of July, 1912, at 11:30 o'clock a. m., for the construction of eleven (11) concrete piers to replace the pile piers under the twelve old spans of the Montalvo bridge, one and one-quarter miles from the Southern Pacific Depot at Montalvo in said county.

The specifications provide for the moving of the old spans onto the concrete piers and anchoring the same into place.

The piers will each consist of two four-foot concrete cylinders sunk

through sand and gravel to about twenty-five feet below ground water level, connected at the top by a twelve-inch reinforced concrete web.

Plans and specifications for this work are on file in the office of the Clerk of the Board of Supervisors, and copies of the same may be obtained from the Clerk on deposit of the sum of five dollars ($5.00), which will be refunded on their return in good condition, not later than July 25th. Blanks for proposals will be furnished at said office.

J. B. McCLOSKEY,
County Clerk.

PROPOSALS FOR CONSTDUCTING SCHOOL

(Bids close July 18.)

NOTICE is hereby given that sealed bids will be received and opened at 2 o'clock p. m. by the Board of Trustees of the Bonita School District on the 18th day of July, 1912, at the office of the County Superintendent of Schools for the erection and completion of a brick and concrete school building in accordance with the plans and specifications made for the same by W. H. Weeks, the authorized architect employed by the Board.

Separate bids will be received, first, on the general contract; second, on the heating and ventilating, and third, on alternate propositions.

Plans and specifications may be seen at the Crows Landing post office or at the County Superintendent's office Modesto, or at the office of the architect, W. H. Weeks, 251 Kearny street San Francisco, California. A deposit of $5.00 cash will be required on all plans loaned out, as a guarantee of good faith.

GEORGE A. FINK,
H. A. KRICKE,
MRS. W. W. COX,
Board of Trustees Bonita School District.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, $20,000. San Francisco. Architect, Arthur T. Ehrenpfort, Russ Bldg., S. F. Owner's name witheld. The building has been designed to contain twelve apartments of three rooms and bath each. There will be steam heat and wall beds. The interior of the apartments will be finished in pine. There will be a modern laundry plant installed in the basement. The exterior of the building will be faced with cement plaster and shiplap. The plans are complete and a contract will be awarded at once.

Factory—3 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, John Graham, Lyon Bldg., Seattle. Owners, Ford Motor Car Co. This work has been mentioned here before. The owners have announced their selection of an architect to prepare the plans and work will be undertaken at once. The company is erecting a number of buildings on the Pacific Coast, plans for all of which are being prepared by Architect Graham. A local firm of architects will be selected to superintend the work.

Flats—3 story and base, frame, $5,000. San Francisco. Architect, none. Owner, M. R. King, 844 California St., S. F. The building has been arranged for three modern flats of five and six rooms each. There will be three baths. The interior trim will be of pine throughout. There will be gas grates and 30-gallon boilers. The exterior of the building will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, $5,500. San Francisco. Architect, none. Owner, G. Spirz, 232 West Langton St., S. F. The building has been designed to contain three small flats and will cover an area of 25x59 feet. The interior finish will be of pine and redwood. There will be open fire places and tile mantels. The exterior of the building will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Garage—2 story and base, brick, $20,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will cover an area of 50x165 feet. The contour of the lot is such that the second floor may be entered from the rear at street grade and both floors will be used for garage purposes. There will be an office in the front portion of the first story. The floors will be of cement. Considerable steel will be used. The exterior will be faced with pressed brick. Plans are complete and figures have been taken.

Hotel—5 story and base, brick and steel. Cost not stated. San Francisco Architects, L. B. Dutton & Co., Chronicle Bldg., S. F. Owner, Alice Peace. The building will be erected at the northwest corner of O'Farrell and Jones streets. There will be in the neighborhood of 150 rooms, a large percent of which will have connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. The plans are complete and figures are being taken.

Hotel and Stores—4 story and basement brick and steel, $100,000 San Francisco Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Sommer and Kaufmann. This work has been mentioned here before. The contracts for the excavating, pile and steel work have been awarded. Plans for the balance of the work are complete and figures are being taken.

Bungalows—3, 1½ story and basement frame, $2,000 each. San Francisco. Architect, none. Owners, MacArthur Bros., 1560 Fell St., S. F. Each of the dwellings will contain six rooms and bath. The interior trim will be of pine. There will be oak floors in the principal rooms and open fire places. The mantels will be of brick and tile. The exteriors of the lower will be covered with shiplap. The plans are complete and the work will be done by Day Labor.

Residence—2 story and basement frame, $4,000. San Francisco. Architect, O. Clausen, Pecan Bldg., S. F. Owner, P. De Besto. The work to be done consists of a modern seven room house for the front of the lot and a two bedroom cottage in the back for the rear. There will be two separate contracts let for this work. The interior of both buildings will be finished in pine. There will be some oak floors. The exteriors will be finished in stucco and shiplap. Plans are complete and the work will be done by Day Labor.

Hotel—4 story and basement reinforced concrete. Cost not stated. San Francisco. Architect Ralph Werner Hoit, Humboldt Bank Bldg., S. F. Owners, Bellow Estate. This building, which is to be erected at the corner of Clay and Montgomery streets, has been mentioned here before. The plans are now complete and bids are being taken. The plan permits for stores on the first floor and a large number of guest rooms above. There will be steam heat and [illegible] for [illegible]. The exterior will be faced with cement plaster.

UNITED STATES SUB-TREASURY BUILDING
San Francisco

Milton J. Dyer, Architect,
Cleveland, Ohio.

PROPOSED CITY LIBRARY
San Francisco

Reid Bros., Architects
San Francisco

OAKLAND AND ALAMEDA COUNTY.

Apartment House—3 story and base, frame, $20,000. Oakland, Cal. Architect, Thomas M. Edwards, 45 Kearny St., S. F. Owner, George W. Peckham. The building has been designed to contain twelve modern three-room apartments with baths and wall beds. The interior of the building will be finished in pine with some oak floors. There will be steam heat. The exterior will be covered with cement plaster and rustic. Plans are complete and figures are being taken.

Church—Class A construction, $150,000. Oakland, Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Methodist Church of Oakland. Bids for this work were printed in these columns last week. The lowest figure was some $50,000 in excess of the amount available for construction and all bids have been rejected by the Building Comittee. New plans will be prepared and another estimate will be taken.

Garages—2, 2 story and base, frame $5,000 each. Oakland, Cal. Architect, Fred D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Oakland. Both of these buildings will be erected in conjunction with the improvements being made by the city fire department. The exteriors will be covered with cement plaster on metal lath. The interiors will be finished in pine. Plans are now complete and figures are being taken.

Residence—2 story and base, frame, $3,200. Oakland, Cal. Architects, Hutchinson Bros., 4709 13th St., Oakland. Owner, M. C. Vaughan. The dwelling has been designed for a seven-room house with bath. The interior will be finished in pine with some oak floors. There will be open fire places and mantels of stone. The exteriors of the house will be covered with shingles. Plans are now being prepared and figures will be called for shortly.

Bungalow—1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Waldmann and Waldmann, 1625 Virginia St., Berkeley. The dwelling will contain five rooms and bath. The interior trim will be entirely of pine. There will be open fire places and tile mantels. The exterior of the house will be finished with shingles and shiplap. Plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, $25,000. Oakland, Cal. Architect, Ivan C. Satterlee, 817 35th St., Oakland. Owner, Julia Marshall. The building will be 91x60 feet and has been designed to contain twelve three room apartments and nine two room. All apartments will have connecting baths and wall beds. There will be a central heating system. The interior of the building will be finished in pine and redwood. The exterior will be covered with cement plaster on metal lath and rustic. Plans are complete and figures are being taken.

Lodge Hall—2 story and base, frame, $10,000. Alameda, Alameda Co., Cal. Architect, William Dufour, 2338 Santa Clara Ave., Alameda. Owners, Eagles' Hall Association. The building will be devoted to the exclusive use of the organization. There will be offices for the local officers, large banquet room, smoking and lounging rooms and lodge halls. The interior will be finished in pine. There will be furnace heat. The exterior will be covered with cement plaster on metal lath. Plans are now being prepared.

School—1 story and base, reinforced concrete, $16,000. Centerville, Alameda Co., Cal. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, Centerville School District. The building will contain three standard sized class rooms and an assembly hall. The interior will be finished in pine. The exterior will be faced with cement plaster. There will be a metal tile roof. Plans are now being prepared.

Residence—2 story and base, frame, $5,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Oakland. Owner, Mrs. Charles A. Young. The dwelling has been designed to contain nine rooms, two baths, sleeping porch and laundry. The interior will be finished in pine with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will be used in the baths and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $3,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Oakland. Owner, Dr. Clement. The dwelling will contain eight rooms and bath. The interior trim will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster. Plans are now being prepared.

Residence—2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mrs. E. Wright. The dwelling will contain seven rooms, bath and sleeping porch. The interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Residence—1 story and base, frame, $2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, John Berryman, represented by Peake-Munroe, 2035 Shattuck Ave., Berkeley. The dwelling will contain six rooms and bath. The interior trim will be entirely of pine. There will be some oak floors. There will be open fire places and tile or brick mantels. The exterior of the bungalow will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Bungalow — 1½ story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architects, Peake-Munroe Co., 2035 Shattuck Ave., Berkeley. Owner, George R. Hippard. The dwelling will contain six rooms, sleeping porch and bath. The interior will be finished in pine and redwood. The floors of the principla rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with cement plaster. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,200. Oakland, Cal. Architect, W. G. T. Thornally, 1707 Fruitvale Ave., Oakland. Owner, Theo. Fenn. The dwelling has been designed to contain eight rooms, bath and sleeping porch. The interior will be finished in pine. There will be some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Residence—2 stoiry and base, frame, $3,200. Berkeley, Alameda Co., Cal. Architect, none. Owner, J. A. Hupman, 2220 Prince St., Berkeley. The dwelling will contain seven rooms and bath. The interior will be finished in pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will also be used in the bath and kitchen. The exterior of the dwelling will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, R. L. Randolph. The dwelling has been designed for a six-room house with two baths and two sleeping porches. There will be pine and redwood trim, with oak floors in the principal rooms. The dwelling will be heated by a warm air furnace and open fire places. The mantels will be of brick. Tile will be used in the baths. The exterior will be covered with shakes. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $6,500. Oakland, Cal. Architect, Claude B. Barton, 470 13th St., Oakland. Owner, A. W. Baker. The dwelling has been designed for a ten-room house with baths, laundry and sleeping uporches. The interior trim will be of pine, redwoods and hardwoods. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the house will be covered with cement plaster on metal lath. The plans are complete and figures are being taken.

Residence—2 story and base, frame, $5,000. Berkeley, Alameda Co., Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Mrs. J. B. Galpin. The dwelling will contain about eight rooms and bath. A garage will be erected in the rear. The interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Store Alterations—2 story and base, frame, $4,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, E. A. Bushell. The work will include the alteration of the present building into retail stores. There will be patent fronts, plate glass windows, plastering and electrical work. The plans are complete and figures are being taken.

Stores—3 story and base, brick and steel. Cost not stated. Oakland, Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Mollit Estate. The building will

contain ten stores and a theatre on the first floor. The upper two floors have been subdivided in 68 guest rooms. There will be steam heat and running water in all rooms. The building will have a complete steel frame. The exterior walls will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Whiting Thompson Douglas Bldg., L. A. Owner, W. H. Allen. The building will contain 76 rooms besides the office, amusement rooms and storage space. All chambers will be equipped with wall beds. There will be steam heat and elevator service. The interior trim will be largely of pine. The exterior of the building will be faced with pressed brick. The architect is now preparing the plans.

Bank and Offices—2 story and base, brick. Cost not stated. Whittier, Los Angeles Co., Cal. Architects, T. Beverley Keim, Jr., Co., Title Insurance Bldg., L. A. Owners, Whittier Savings Bank. The building will be 48x75 feet. The entire first floor will be occupied by the banking quarters. The second of the banking rooms will be finished in hardwoods and marble. There will

be a central heating system. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Apartment House—3 story and base, brick. Cost not stated. Los Angeles Cal. Architect, none. Owners, Patterson Investment Co., Grosse Bldg., L. A. The building has been designed to contain sixty rooms which will be arranged in suites of two and three rooms each. There will be private baths and wall beds for all apartments. The plans provide for steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Apartment House—3 story and base brick. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owner, H. Stanley Benedict. The building will be 50x138 feet and will contain 63 rooms arranged in suites of two and three rooms each with wall beds and connecting baths. There will be steam heat and elevator service. The exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for at once.

Bank—1 story and base. Class A construction, $50,000. Pasadena, Los Angeles Co., Cal. Architect, S. B. Marston, Chamber of Commerce Bldg., Pasadena. Owners, Pasadena National Bank. The building will cover an area of 60x120 feet and will be devoted to the exclusive use of the bank. There will be a full basement and mezzanine floor. The plans are still in the preliminary stage and details of the construction cannot be given.

Chapel—1 story and base steel and stone. Cost not stated. Camarillo, Ventura Co., Cal. Architect, A. C. Martin, Higgins Bldg., L. A. Owner, Juan Camarillo. The building will be designed after the famous Madeline Chapel in Paris. The building will be of fire proof construction the exterior walls of terra cotta and stone. The interior will be finished in marble. The architect is now preparing the plans and bids will be called for shortly.

Schools—Group of reinforced concrete buildings, $250,000. Santa Ana, Orange Co., Cal. Architect, A. B. Sturges, Story Bldg., L. A. Owners, Santa Ana School District. The bonds for this work have been sold and money will be available just as soon as the bonds are printed and delivered. The plans for the polytechnic school are now being completed while plans for the $25,000 grammar school are complete and out for figures.

Stores and Offices—2 story and base reinforced concrete and brick $15,000 Glendale, Los Angeles Co., Cal. Architects, Fairchild Bros., Glendale. Owner, J. A. Wright. The building will be 75x100 feet and has been arranged for stores on the first floor and offices above. The interior will be finished in pine. The exterior will be faced with pressed brick. When plans are complete bids will be taken by the owner.

Contracts Awarded.

Hospital—3 story and base reinforced concrete and steel $85,000 Santa Barbara, Santa Barbara Co., Cal. Architect, E. R. Rau, Canfield Bldg., Santa Barbara. Owners, Santa Barbara Cottage Hospital Association Contractor C. J. Kubach Co., Pacific Electric Bldg., L. A. Contract price, $85,000.

Hotel—4 story and base, brick and steel, $50,000. Los Angeles, Cal. Architects, Neher & Skillings, Pacific Electric Bldg., L. A. Owners, Otto H. Neher and Thomas Lee Woolwine. Contractors Betebew & Gould, 1017 East 21st St., L. A. Contract price, $50,000.

PORTLAND AND OREGON.

Bank—3 story and base, brick and steel, $30,000. Tillamook, Ore. Architect, F. H. Benehley, Rotchild Bldg., Seattle. Owners, Tillamook County Bank. The building will contain besides the banking offices, several stores on the first floor. The upper floors will be arranged for offices and rooms. There will be a central heating system. The exterior of the building will be faced with pressed brick. Safety deposit and coin vaults will be installed. Plans will be complete by July 15th and bids will be taken.

Contracts Awarded.

Store and Office Alterations—Brick and steel, $100,000. Portland, Ore. Architects, MacNaughton & Raymond, Portland. Owners, Marquam Bldg. Contractors, Sound Construction Co., Seattle. Contract price, $100,000.

SEATTLE AND WASHINGTON.

Church—Class A construction. Cost not stated. Seattle, Wash. Architect, W. Grant Fay, Central Bldg., Seattle. Owners, University Presbyterian Church. Other than the fact that the architect has just been commissioned to prepare the plans and that the building will be erected at 16th avenue and 17th street, no details of the work are obtainable.

Harbor Improvements — Cost not stated. New Westminster, Wash. Engineer, A. O. Powell, Central Bldg., Seattle. Owners, City of Seattle. The appointment of the engineer who will be in charge of this big work has just been announced. Tentative plans will be submitted to the council before August 1st. The drawings will provide for a number of docks, seawall, bulkheads and breakwater. At this time the city expects to start the work early in September. More complete details will be given as the work progresses.

Hospital—2 and 3 story and base, brick and concrete, $90,000. Aberdeen, Wash. Architect, C. E. Troutman, Aberdeen. Owners, Chehalis County. This work has been mentioned here before. The architect's final plans have received the approval of the County Commissioners and bids are now being taken. The award will be made on August 10th.

Hotel—10 story and base. Class A construction. Cost not stated. Seattle, Wash. Architect, J. O. Taft, Arcade Bldg., Seattle. Owner's name withheld. The building, plans for which have just been started, will cover an area of 60x111 feet. The preliminary sketches show a large lobby on the first floor and twenty rooms and bath to each of the upper floors. The construction will be class A throughout. The owners will probably erect but six stories at this time. More complete details will be given as the plans progress.

College Buildings—Class A construction $1,000,000. Seattle, Wash. Architects, Bebber Bros., Northern Bank Bldg., Seattle. Owners, Seattle College. The Rev. C. F. Carroll, S. J., president of the Seattle College, Broadway and Marion street, announces that tentative plans for the $1,000,000 worth of building improvements, have been completed. He also states that the new buildings to be erected on the block bounded by 18th and 19th avenues and East Roy and Aloha streets, will be ready for occupancy next June. The main college building will be four stories high, divided into a main portion and two wings the total frontage of which will be about 200 feet; on either wing will be a two and three story building, with a frontage of about 200 feet. The larger of the three-story buildings will be used as the president's residence. Adjoining the president's quarters will be erected a new St. Joseph's church, 60x120, three stories high. All buildings will be steel and concrete construction and will total a cost of over $1,000,000. The church will be faced with brick and trimmed with stone and terra cotta as will be the school buildings.

Contracts Awarded.

Schools—2, 2 story and base, brick and concrete, $125,000. Seattle, Wash. Architect's name not given. Owners, City of Seattle. Contractors, general construction for both the Alki School and the Lawton School, Ditlefson & Gehring, Epler Bldg., Seattle. Contract price, Alki School, $51,935, Lawton School, $52,085. Heating and ventilating, Ernst Hardware Co., Alki School, $17,692, for the Lawton School, $16,537.75.

STATE HIGHWAY OREDERS SURVEY OF ROUTE.

The State Highway Commission has issued orders for a survey of the route from Sisson to Coles for the State Highway entrance into Oregon.

The order does not indicate the possible route to Sisson, leaving open the question whether the Commission will select the Sacramento River route or the McCloud River route.

The order from Sisson to Coles provides that the road will be constructed by the most direct and feasible route from Sisson northward.

Other surveys ordered were as follows.

In Monterey County, Division 5, from King City in a southerly direction to the boundary of Monterey County, near San Miguel, following near the westerly bank of the Salinas River, passing through Bradley; also that part of Route 2, in Division 5, in San Luis Obispo County, near San Miguel, beginning at the boundary line of the city of San Luis Obispo and extending through Edna and Arroyo Grande to the southerly boundary of the county at or near San Maria.

The last route selected for survey is that part of route 4, Kern County, Division 6, beginning at the southerly boundary of Kern County, near Lebec, and extending to Bakersfield.

STATE BANKS SHOW INCREASING ASSETS.

W. R. Williams, Superintendent of Banks, has made an abstract of reports of the condition of State banks, commercial, savings and trust companies operating in San Francisco at the close of business June 14, 1912, showing a considerable increase in resources, capital, surplus, individual deposits and other items, as compared with the same items one year ago. Reports from the interior of the State thus far received also indicate a very gratifying increase.

The following are the principal items reported in June, 1911, and 1912:

June 14, 1912

Total resources	$263,315,061.81
Capital	17,718,250.00
Surplus	10,467,835.39
Individual deposits	215,575,444.91

June 7, 1911

Total resources	$247,991,602.69
Capital	17,103,650.00
Surplus	10,114,211.95
Individual deposits	201,736,897.41

TREASURY SHOWS SURPLUS.

WASHINGTON, July 1.—The Federal Government closed the fiscal year today with a surplus of $32,000,000, according to estimates based on incomplete returns from the various sources of revenue the country over. This amount far exceeded the most sanguine expectations of Secretary MacVeagh, who months ago estimated that the surplus would be $10,250,000.

The surplus at the close of the fiscal year 1911 was $45,682,000.

The failure of Congress to pass the general deficiency and other appropriation bills which would have called for large disbursements during the closing days of the fiscal year helped the Government to pile up its surplus.

Another big element in the figures was the corporation tax, which, it is calculated, brought in 27,000,000, against $33,000,000 last year.

Custom receipts yielded about $310,000,000 this fiscal year, against $314,000,000 last year, while internal revenue taxes amounted to $292,000,000, against $289,000,000.

The taxation on beer indicates that American people consumed 63,000,000 barrels during the year.

MOKELUMNE BRIDGE.

MOKELUMNE HILL (Calaveras Co.), July 2.—Work has commenced on the new bridge to span the Mokelumne River at Middle Bar. Material weighing 150 tons is being hauled to the site from the railroad at Valley Springs. The span will be 240 feet.

RUSHING WORK IN LASSEN.

SUSANVILLE (Lassen Co.), July 3.—Practically the whole route of the survey for the Fernley and Lassen Railroad is now under construction. Contractors are busy over the whole distance of about 130 miles, throwing up grades or making cuts or fills. There are, it is estimated, about 5,000 men on the work, and probably 3,000 horses and mules, besides the great amount of machinery that is in use.

Sub-contractor Moxey has 320 head of stock working here and has an excavator digging through a hill at Susanville, back of the F A. Cain residence on South Weatherlow street. The cut will be about thirty feet deep and the material excavated is being used to make a fill east of the cut.

Work is also in progress at the Sifford place, a large camp being established there during the past few days. Work is being rushed here, but it is expected the cut through the hill will take three months to complete, and by that time it is thought most of the grading along the route will have been done.

ENGINEER-ARCHITECT KNIGHTED BY KING OF SPAIN.

John C. Cebrian of 1801 Octavia street, retired capitalist and formerly well known as a civil engineer and architect of this city, has just been knighted by King Alfonso XIII. of Spain for distinguished services and achievements in art, architecture and literature.

Cebrian was named knight commander of the Order of King Alfonso XIII. and last week received the dec-

oration of that order, which is one of the highest given by the Spanish court. The decoration consists of a cross showing an eagle with outstretched wings flying before the rising sun and is surmounted with the arms of Spain and the crown of Alfonso XIII.

Cebrian was a native of Spain, but has spent most of his life in San Francisco. He won early recognition for his work, and during the last few years has gained particular distinction for his valuable gifts of books on art and architecture to the University of California and to the library of the School of Art and Architecture in Madrid.

CONTRACT LET FOR BRICK STORE BUILDING.

LODI (San Joaquin Co.), July 3.—E. F. Nickel let the contract to erect a brick store building on West Elm street to R. Senner. The new building will have a frontage of thirty feet on Elm street and will be constructed of brick and have a pressed brick and plate glass front. The new building, as soon as completed will be occupied by Miss McGachens's millinery establishment.

RECEIPTS FROM STATE TAXES.

SACRAMENTO, July 3.—According to a statement issued by State Controller Nye, the receipts of the State Government for the sixty-third fiscal year, ending June 30th, amounted to $21,445,956.99. This sum includes a good many amounts which were not strictly revenue receipts, including the proceeds of bond sales and also the Panama Pacific Exposition tax money. The total disbursements of the year amount to $18,691,877.28, an increase of $6,174,324.80 over the preceding year.

Disbursements from the general fund, out of which the salaries and nearly all appropriations are paid, amounted to $7,142,376.82, as compared with $6,589,239.34 for the previous year.

Nye points out that, contrary to the predictions made by Senator Cutten and other members of the Legislature during the extra session, there was no deficit in the general fund at the end of the fiscal year just closed.

Nye says that the balance in the general fund on June 30th was $1,881,153.85, a gain of $925,630.46 as compared to the balance of $[illegible] on hand in the general fund a year ago.

PETITIONS IN BANKRUPTCY.

Henry A. Hoyt and Frank L. Hoyt, of the firm of Hoyt Brothers, building contractors of this city, filed a petition in insolvency yesterday. The firm's debts are $96,380, of which $9,038 are preferred and secured, $73,641 unsecured, and $13,700 promissory notes. The assets amount to $77,662, of which $77,324 are unliquidated claims for building the Stockton and Gilroy high schools. Frank L. Hoyt's individual debts are $1,326 and he has no assets. Henry A. Hoyt's individual debts are $1,324, with no assets.

E. H. Marks a local merchant, whose liabilities are $6,282.60, with no available assets, has also filed a petition.

ARE CALLING FOR BIDS.

Exposition Company To Let Contracts For Fencing and Filling Grounds.

The Building and Grounds Committee of the Panama Pacific International Exposition will advertise for bids on Monday for the building of a fence around the Exposition grounds and for the filling in of the lands on the Exposition site located in the Presidio and adjacent thereto. Specifications can be had from Director of Works, Harris D. H. Connick, Exposition Building.

The specifications for constructing the fence provide for the beginning of the work ten days from the day the contract is signed, and it must be built within forty days of the signing of the contract. The fence located outside of the Presidio is to be constructed of wood and wire fencing is to be used within the Presidio. The fence is to be nine feet high.

For the filling in contract, the specifications call for sand of such character as in the judgment of the Director of Works will form a suitable and proper foundation for the erection of buildings. The work must be commenced within twenty days after the signing of the contract. Following is an extract from the specifications:

"Requirements: It is required that the areas within the United States Military reservation, Presidio of San Francisco, lying below an elevation of minus 2½ feet, referred to City base as shown on the attached may be filled to an elevation of minus 2½ feet, referred to City base, and that the real property in the City and County of San Francisco, bounded approximately by Baker street, Beach street, Lombard street and the Westerly line of Lyon street, lying below an elevation of minus four feet referred to City base and as shown on the attached map be filled to an elevation of minus four feet, referred to City base."

CHURCH CONTRACT LET.

WOODLAND (Yolo Co.), July 5.—The contract for the construction of a Catholic Church building at Madison has been let to S. Arnold of Benicia and one of the conditions is that it must be completed in two months. The building will be a wooden one.

Since Father Walrath was appointed pastor of the Woodland parish, with jurisdiction over the entire county, something over a year ago, he has built a new church at Guinda, and commenced new church buildings at Winters, Broderick, Madison and Woodland. The Wooodland building is the most pretentious church structure in the county and will cost, when completed, about $30,000.

COUNTY HOSPITAL BIDS.

PLACERVILLE (El Dorado Co.), July 5.—Phileas Cote has been awarded the contract to build the new County Hospital for El Dorado County. He is to do the work in sixty days for $13,035.

The other bids were Campbell & Turner, 100 days, for $14,874; Fred Fisher, 100 days, $14,300; Ransome Concrete Company, 117 days, $14,284. Work will start at once.

NEW BUSINESS BLOCK.

MARYSVILLE (Yuba Co.), July 5.—I. C. Evans is preparing to erect a new pressed brick business block on D street, between Fourth and Fifth streets. It is to be three stories, 46x160. The lower floor is to be used for stores and a tenant has already been secured. The front of the second floor will be utilized for suites of offices for professional men, and the rest of that floor and the third floor will be equipped for a modern rooming house, a landlord having already arranged to lease it.

USERS OF WYBRO.

The houses being erected in the vicinity of 13th Ave. and B Street of this City by Pockman and company are panelled in WYBRO in Gum, Elm and Birch.

Mr. Pockman recognizes that WYBRO is the Panel that fills the bill as it bears the unqualified guarantee of the distributers, who are the White Erothers of Fifth and Brannan Streets., this City.

FUNDS ALLOWED TO FIGHT SQUIRRELS.

As an emergency measure, there being no available funds in the hands of the State Board of Health for the work, the State Board of Control has adopted a resolution setting aside $10,000 from its emergency fund of $100,000 to be used in the work of exterminating ground squirrels in the coast counties in co-operation with the Federal Government in the fight against the bubonic plague.

This money will be available on Monday, and it is the intention of the State Board of Health to get busy immediately.

Reports have reached the State Board of Health of late that bubonic plague-stricken squirrels are being found along the coast.

ELKS' BUILDING CONTRACT LET.

ELKO (Nev.), July 1.—A contract has been let by Robinson & Ouderkirk for the erection of a brick block upon

a sightly corner, the cost of which will be at least $40,000.

The ground floor will be devoted to store rooms, while the upper floors will be elaborately equipped for offices and apartments. The building will be electrically lighted throughout, with plate glass fronts and equipped with every modern convenience. tI will be the finest business structure in the city.

EL DORADO COUNTY VALUES INCREASE.

PLACERVILLE (El Dorado Co.), July 1.—The County Assessor completed the assessment roll of El Dorado County for 1912 recently.

The assessment of real property foots up $5,544,495, an increase of more than 5 per cent over last year, notwithstanding the loss by operation of the soldiers' exemption law. 8he total including taxes on personal property will exceed $7,000,000, indicating a healthy growth of our county resources.

CHINA REFUSES EUROPEAN LOAN.

LONDON, July2.—The Peking correspondent of the Daily Telegraph says that China absolutely rejects the demands of the six powers group, which were that the loan must be $300,000,000, that three European financial supervisors must be appointed and that the group must have its financial agents in China for five months, during which there should be no issue of bonds and no business of any kind involving the pledging of China's credit without the signature of the supervisors. China's counter proposal is simply for a $50,000,000 loan.

SALINA CRUZ A COMMERCIAL PORT.

The Department of State is in receipt of a note from the Mexican ambassador at Washington stating, in behalf of his government, that the President of Mexico has directed that Salina Cruz shall hereafter be considered a commercial port (Salina Cruz is the western terminus of the Tehuantepec Railway.)

In explanation of the term "commercial port", the ambassador states:

The phrase "commercial port" is used in contradistinction to "military port," as the Government of Mexico has decided not to fortify the port of Salina Cruz for the present, notwithstanding that heretofore and under the administration of President Diaz some work had been done at that port preparatory to its fortification.

SYRIAN APRICOT PASTE.

In view of the abundant apricot-yield on the Pacific coast, it might be of profit to American formers in that region to utilize that portion of the yield which is too ripe, or is otherwise unfit for transportation to the fruit markets or canneries, in the munufacture of apricot paste, known in Syria as kamereddin.

This industry has been in vogue at Damascus and all along the valley of the Barada River. The methods employed are very simple. A basin 2 or 3 feet deep and of a circumference proportionate to the crop to be treated, is dug by the farmer and usually lined with cement. The ripe apricots are stoned and thrown into this basin and beaten into a pulp with tampers. The primitive method of kneading the fruit with bare feet is still often resorted to. The pulp is then spread out on tuin boards and placed under trees in shady places to dry. These boards are of uniform size, and the paste is so spread out as not to be thicker than one-tenth of an inch when dry. The sheets thus manufactured when dry weigh 1 rottle (about 5½ pounds) and look like sole leather

The price varies with the quality, which is determined by the color and thickness: First quanity—clear yellow color and large thin leaf, price 26 to 28 cents per 5½ pounds; second quanity—dull color and thicker leaf, price 25 to 26 cents per 5½ pounds; third quality— dull color and fibrous paste, price 23 cents per 5½ pounds.

Production and Exports—Apricot Jam.

The anual production of this paste reaches about 4,444 tons, and is increasing yearly.

There is a large market for kamereddin throughout Syria, but of late years considerable shipments have been made to Egypt, Turkey, Roumania, and Germany. The exports in 1910 amounted toabout 150,000. The "leaves' are rolled for export and are packed in cases of 30 to 39 rolls.

In Germany, I am informed, kamereddin is imported for the manufacture of jam, which has the full apricot flavor. The leaves should be soaked for 24 hours in a small quantity of water. The water and apricot paste should then be well blended and put to a boil with the required amount of sugar.

The orchardist can produce this paste on the farm with little cost and labor, place on the market an article which is easy to ship and which meets a growing demand. In Syria this product is a substitute for candy and is eaten in its original form. It is also made into a sirup and forms the chief ingrediant of the many iced drinks served in the native houses. A valuable by-product is obtained in the kernals.—Consular Reports.

PRODUCTION OF POTTERY IN 1910.

Record Breaking Figures, Shown by Report of the U. S. Geologicial Survey Decrease in imports.

The year 1911 showed the greatest value for the production of domestic pottery yeet recorded, according to Jefferson Middleton, of the United States Geologicial Survey, in an advance chapter from "Mineral Resources" for 1911.

The value of the pottery marketed in 1911 was $34,518,560, an increase over the value of 1910 of $733,882. This increase, however, came frome the lower grades of ware and china, sanitary ware, and porcelain electrial supplies. The volume of business was possibly even larger than the value would indicate, for the general compiaint, at least among the manufactureres of white ware, has been that the prices were low and the margin of profit small. It is a significense fact that the value of imports, which consists almost exclusevely of ware of the higher grades decreased $495,946 of 4.46 per cent. The continued improvement in quality of the domestic pottery ware and the growing tendency to the use of American makes will, in Mr. Middleton's judgement, insure a steady growth of this industry, as is indicated by almost constant increase in domestic production and the decrease in imports. A noteworthy development in the geographic extension of the industry development in the geographic extension of the industry has been the apparently earnest effort to establish a pottery for the manufacture of white ware in the South, close to the principle sources of the raw material.

Ohio produces the largest quantity of pottery among the States, reporting for 1911 wares valued at $14,775,165, or 42.80 per cent of the total; New Jersey was second, with $8,401,941; and West Virginia third, with $2,889,202.

The exports of domestic pottery products in 1911 were valued at $1,401,366, an increase of 34.53 per cent over the value for 1910.

Ask Architectural Competition.

Members of the Profession in This City Want Competitions Held for all Civic Center Work.

At the last meeting of the Public Buildings Committee of the Board of Supervisors the question of securing plans for the various buildings which are to be erected in the Civic Center was considered at some length. While no definite conclusion was reached, Supervisors McLeran and Gallagher stated that they favored the competitive system of securing plans for all public buildings and would so recommend to the Board of Supervisors.

Architects William Mooser, Kenneth MacDonald and Garden Mitchell appeared before the Public Buildings Committee and spoke in favor of the competitive system. Interest in the matter was brought to a focus a few days ago when the Supervisors were requested to appoint a committee of architects to prepare plans for the auditorium, which is to be erected on the city's property by the Panama-Pacific Exposition Company. At that time it was generally accepted that the present Advisory Board of Architects consisting of John Galen Howard, Frederick H. Meyer and John Reid Jr., would prepare the plans for this work. No definite action can be taken on the matter until the next meeting of the Board of Supervisors, which will be held next Monday.

Cyclones are becoming rampant even so far north as the wild places of Canada. Years ago it was thought that these storms belonged to the southern states or those of the middle west. Perhaps it was because the sparse settlement and lack of communication in the north country made reports of such storms practically impossible.

These tornadoes seem to occur in wide spaces of the plains country where the air has little impediment offered by mountains or altitudes. And with the settlement of the country and the growth of trees and the build-

ing of houses the cyclone becomes a rarer visitor each year.

Perhaps with aerial navigation and the study of air currents more will be learned of the laws of the inconstant winds and the cause and effect of these violent storms.

The Public Utilities Commission is doing effective work for the people. Under the new law bond issues by all kinds of public service corporations must pass with the approval of these officers. In the hearing before the Commission the other day it was found that a corporation had outstanding a 10 million dollar bond issue the proceeds of which no satisfactory accounting could be made. As a consequence the application for the new bond issue was promptly turned down.

This protection furnished by the new law is effective and salutary. And now that after a long fight Governor Johnson and the last legislature succeeded in passing the measure even so staid a paper as the Chronicle agrees that it is the best kind of a measure and even goes so far as to state that it does not go far enough. And in that it is right. Foreign corporations doing business in the state should be required to pass the same test. And securities offered for sale within the borders of the state should have competent investigation by the authorities of the state.

Had the United Railroads of San Francisco been required to give a strict accounting for all the bond issues and the proceeds of the securities sold on its property there would perhaps be a more definite idea of the real value of its property.

Hearst is much hurt over the ingratitude and treachery of Bryan. He has kept the faith of people through all the sixteen years he has been in the public eye. And one further reason that the people have to trust him is that he has never entered into any alliance with William Randolph Hearst

It is reported that Dr. Forbes Ross, a surgeon of London, has discovered a new anesthetic of great value, by means of which operations can be performed without possible injury to the patient. It is in the nature of a local anesthetic, injected into the part of the anatomy to be effected and can be used to deaden the pain following an operation as well as during the act itself.

If it will stand the test it will certainly be a great boon to mankind. One of the chief dangers of modern surgery is the inability to stand the anesthetic. It puts the stomach out of business for a time and paralyzes the glands. So that while aseptic surgery has been so perfected that almost any kind of an operation can be successfully performed it is always a question as to the recovery from anesthesia.

If this substance which he says is composed partly of quinine can stand the test of time it will be another great advance along the line of medical science.

THE ISSUE OF JUSTICE.

If the strong did not see so many loopholes in justice today, so many chances to wear out the weak by lengthy litigation, so many opportunities for appeals, reversals and all the long list of legal barriers built up against the "man who has not," there would be more confidence in justice and the servants of the law and perhaps less anarchy. Prof. Charles McCarthy in "The Wisconsin Idea."

Can any set of men, in whatever convention they may meet, be foolish enough to suppose that they can pass over successfully the popular demand for real justice in our courts by mere platitudes of impertinent defense of the courts?

Material Dealers and Contractors seem to be special prey of all kinds of advertising schemes that have absolutely no merit. Any kind of a crop trap proposition seems to work, and win dollars from the over worked Material Dealer and Contractor, and the game goes merrily on.

Here is an opportunity for our local Builders' Exchange and General Contractors' Association to be of special benefit to the trade by appointing a joint sensor committee to pass upon all advertising or other schemes that may be presented to the trade. If the firms that make up the building business would refuse to subscribe to any advertising proposition, that was not endorsed by the Joint Committee, the fakers would soon disappear.

The duties of such a committe would not be difficult to perform, and would be in the line of advancing and protecting the building industry.

The art of substituting is just as well advanced and perfected, in the building line as in any other line of business, and to "get what you want when you want it" is the perplexing question for the owner and architect. Yet the answer is simple and positive.

Give the job to the man who will do the work right. Pay him a right price for it.

The owner who starts out to get something for nothing, always gets something that he didn't expect.

Recently one of our prominent architects had a particular job of plastering to be done. He wanted the walls toned up with Keenes Cement. The specifications called for it. He didn't get it. He got something else. He felt that he was being fooled, but could not understand it. The foreman on the job was highly indignant when it was hinted that Keenes Cement was not used. So to satisfy himself the architect had the foreman mix up a special batch and applied to the wall, while the architect stood by and watched.

The foreman was wise. He observed the architect quietly go to the sample and place his secret mark on the specimen.

Of course, the architect could not hang around the job all day. He had other business to attend to. No sooner had the architect gone than the "sample" was quietly pushed through the metal lath, other mortar placed back where the sample had been and the architect's secret mark forged. Of course, there was no apparent difference between the marked sample and the rest of the job.

Yet this architect will give his patronage to the lowest man no matter who he is.

You can't get a forty dollar suit of clothes for ten dollars. You have got to pay the price.

Wesco Flat Oil Paint

An improved, sanitary flat paint for interior finishing. Gives very fine finish.

WEST COAST KALSOMINE COMPANY MADE ON WESCO THE COAST NOBEL ALAMEDA CO. CALIFORNIA

Wesco Kalsomine

Spreads easily, does not decay and gives soft, rich surface. Can be washed off when desired.

Cold Water Paint

The most economical paint on the market. When you buy **Wesco Cold Water Paint** you pay only for paint and not for high-priced oils. It can be used on exterior or interior surfaces. It dries very quickly, is non poisonous, a strong disenfectant and does not turn yellow with age. **Wears well** and is an excellent fire retardant.

Concrete Paint

The best paint in the world to use on damp places. It can't be equaled in painting tunnels, arches, cellars or any other place where dampness exists. Makes the finest possible finish for the interior of factories and other buildings where there is loose steam and damp vapors.

Agents wanted for all unoccupied territory.

The building business like any other business has its share of dead beats, but it also has more than its share of honorable and conscientious contractors.

By a vote of 43 to 12 the Navy Bill passed the Senate Friday. The appropriation is the largest ever passed and calls for an expenditure of $133,000,000, or $15,000,000 greater than any previous bill.

Eighteen new vessels are provided for in the appropriation. Two battleships of the first class, six torpedo boats, eight sub-marines and two fuel ships. Besides the vessels above mentioned there is an appropriation of one million dollars for the construction of wireless plants throughout the Pacific.

With the establishment of the elaborate wireless system on this coast comes the assurance of continuous service with the island possessions in times of peace or war. The passage of the bill authorizing the construction of two battleships and fourteen smaller fighting crafts is a long step forward.

On Wednesday of next week the application of the Oakland, Antioch and Eastern Railroad Company for permission to bridge the head of Suisun Bay at Chipps Island will be given a public hearing in the Government Engineer's office, 1337 Merchants' Exchange Building. So far the matter has received less attention from the newspapers than could be expected of a project which envolves, as does this, the welfare of a whole section of the State and the safeguarding of an important branch of San Francisco's commerce, the navigation of the Sacramento and San Joaquin rivers.

The application of the Oakland, Antioch and Eastern Railroad Company is reasonable and should be granted, provided that the plans from which the proposed bridge is to be erected, are first made to insure, for all time, the protection of the important river trade which enters San Francisco from the Sacramento river points. The plan now put forth by the railroad company does not do so and will meet with severe opposition on Wednesday from representatives of the river cities and those interested in river navigation.

At Chipps Island, the site of the proposed bridge, there is a strong current and frequent fogs make navigation practically difficult. The type of bridge which the Oakland, Antioch and Eastern Railroad propose to construct at this point is a low pier bridge with a draw or lift. Such a structure would greatly increase the hazard of river steamers, especially at night and during the frequent fogs. Permission for a structure of this type should not be granted.

At the present time two railroads cross the head of Suisun Bay with ferries. With the coming of a third road it would seem a practical solution of the problem if a union bridge was to be constructed of sufficient height to permit the passing of river crafts of all kinds without the use of a lift or draw. Such a structure was at one time contemplated by the Southern Pacific Company. Doubtlessly both state and county aid could be obtained for such a bridge if provision were made for state and local highways.

MR. ARCHITECT:

You are keen for every improvement in the building line.

You want to save money for your client and give him the best.

You want to protect him from damage suits.

In window construction you can save him money by specifying the Simplex, because it is cheaper than the common double hung.

No damage suits from window cleaners, because the Simplex is reversible.

The common double hung is out date.

The Simplex is manufactured in 49 different varieties.

Send for details.

Build Your House of Redwood

Redwood Is Almost Everlasting

BECAUSE

1—Sun doesn't crack it.

2—Water doesn't rot it.

3—So difficult to burn that it is used for fire doors under license of the fire department of San Francisco.

4—Almost as good as cement for foundations.

5—Holds paint four times as long as other wood.

If you build a redwood house for yourself and do not sell it' it will be a good house when your grandchildren come along for them to live in.

Any information concerning redwood can be obtained from

Editorial Comment.

The building buisness for the past month have looked up, the reports from about 50 cities throughout the country showing a gain of about 9 per cent over the same month last year. The last two months have sonwn a better report of the business all over the country than the four preceding months. Of the Eastern cities, Chicago, Buffalo, Milwaukee, and Detroit show marked gains. Of the coast cities all show gains except Seattle, which practically shows the same total as last year.

Particulars are to be found in the following table:

City.	June, 1912. Cost.	June, 1911. Cost.
Atlanta	$ 589,238	$ 612,334
Baltimore	522,751	933,243
Birmingham	359,285	224,881
Buffalo	2,226,000	968,000
Cedar Rapids	158,000	198,000
Chattanooga	47,920	91,295
Chicago	10,653,900	7,126,100
Cincinnati	814,346	2,271,480
Cleveland	1,669,379	1,979,024
Columbus	579,116	719,055
Dallas	561,914	1,016,958
Des Moines	89,010	115,170
Detroit	2,115,160	1,400,190
Duluth	214,105	254,985
Fort Wayne	300,980	341,650
Grand Rapids	271,420	186,105
Harrisburg	119,730	97,650
Hartford	1,926,140	1,213,640
Indianapolis	1,038,150	857,157
Kansas City	1,342,502	946,243
Los Angeles	3,488,337	2,790,521
Manchester	129,377	126,511
Memphis	709,326	686,320
Milwaukee	3,187,395	1,141,871
Minneapolis	1,328,125	1,818,865
Nashville	92,027	131,827
Newark	1,009,276	1,144,629
New Haven	388,409	165,560
New Orleans	231,637	382,770
Manhattan	13,159,628	12,610,668
Brooklyn	3,065,600	5,167,220
Bronx	3,670,945	2,774,735
New York	19,896,173	20,552,623
Oakland	894,731	670,575
Paterson	210,267	300,083
Philadelphia	3,996,785	1,410,165
Pittsburg	1,109,528	1,179,563
Portland	1,176,605	1,832,855
Rochester	1,251,406	972,756
St. Louis	1,921,076	1,786,175
Salt Lake City	785,150	369,200
San Antonio	181,752	218,644
San Francisco	2,054,542	1,954,501
Scranton	155,299	301,777
Seattle	781,915	788,100
Shreveport	131,244	152,640
Spokane	130,925	367,006
Toledo	378,858	369,190
Wilkes-Barre	751,185	208,489
Worcester	569,927	121,098
Total	$73,170,116	$67,607,079

Altogether the first six months of the year have shown a gain of something better than 10 per cent over the first six months of 1911. Totals from 19 different cities throughout the country made to the American Contractor, Chicago, show an aggregate amount of $358,575,373 for the first half of the present year as against $323,597,568 for the first half of 1911. The following figures represent the record:

	Jan. 1 to July 1, 1912.	Jan. 1 to July 1, 1911.
Atlanta	$ 3,445,613	$ 3,624,640
Baltimore	5,673,372	5,937,020
Birmingham	1,820,748	1,607,458
Buffalo	7,125,000	4,030,000
Cedar Rapids	740,000	911,450
Chattanooga	847,515	411,978
Chicago	10,892,500	37,391,100
Cincinnati	4,001,312	6,585,665
Cleveland	4,206,702	7,687,179
Columbus	2,601,122	2,346,021
Dallas	2,805,620	3,443,422
Des Moines	993,665	907,874
Detroit	14,387,200	10,018,160
Duluth	1,048,048	1,308,726
Fort Wayne	1,360,120	1,071,630
Grand Rapids	1,291,027	1,044,918
Harrisburg	618,695	693,500

Worcester	2,326,668	2,116,145
Total	$358,575,373	$323,597,568

There has recently been launched at the Vulcan Yard at Hamburg, Germany, the largest steamship built, the Imperator. It belongs to the Hamburg-American Company, and now is process of completion. It is 882 feet long, 96 feet beam and

of 62 feet. Her displacement is 65,000 tons, some 5000 tons greater than the illfated Titanic. She is to be equipped with turbine engines of 70,000 horse power and will have a speed of 22½ knots an hour.

Some idea of the stupendous size of such a ship can be gained from the dimensions of the rudder which will weigh 90 tons and the diameter of whose stock will be 2½ feet. From the keel to the boat deck will be 100 feet, and the distance from the keel to the trucks of the mast will be 246 feet.

Naval architects have spoken of the 1000 foot ship as a possibility of the future. The present vessel is a near approach. And the probabilities are that the 1000 foot ship is a thing of the not far distant future.

Unlike the Titanic the Imperator is provided with 24 compartments with both transverse and longitudinal bulkheads that extend two decks above the water line. In case of such an accident as sunk the Titanic the ship would probably float for hours or days without serious danger to the passenger on board.

The opponents of Caesarism throughout the country who profess to find such grave danger in the candidacy of Theodore Roosevelt astound one with their show of self sacrificing patriotism. On this ground the newspapers of New York justify the action of the convention at Chicago and hail as heroes the men who saved the people from themselves.

In another time, under less strained sectional relations the same arguments would have greeted Abraham Lincoln. In fact how many stories are told of the committees from the New York bunch of financiers who came to advise Lincoln how to run the government and protect its credit by turning over its financial management to their allwise control. And how the great commoner invariably saw through their little schemes and turned aside their ponderous arguments by some homely story or quaint illustration that left them without a leg to stand on.

After all what has Roosevelt done that renders him such a dangerous enemy to the country? Did he strive to uproot the government and establish a monarchy during his one term of elective office? Did he give the common people the worst of it? Does the history of his life show him to be a traitor to his country or has his record in all his political and executive offices be had been on the side of good government?

In heading the progressive cause of the Republican party Theodore Roosevelt has taken a long chance if he were merely a politician. With his positive character he has necessarily made a lot of enemies during his term of office and as a leader in his party. Were he content to rest on his record of achievement his fame is secure.

The main reason for the vehement attacks upon him by the special interests is that he was an effective reformer. He put into active operation policies of reform. And he used every means at his command to effect these reforms. So there are hundreds of Brutuses that have arisen to save their country from the danger of tyranny. The danger of Caesar is indeed humorous when one looks at the line of patriots that are alarmed.

Steadily, year by year, advance is being made in fireproof construction and prevention of fires. The wide publication of the enormous waste by fire each year in the United States has served in some degree to emphasize the value and economy of fire proof construction and improve the methods of fire prevention and protection against the ravages of that most destructive element.

During next October, from the second to the twelfth, there will be held an international conference and exhibition, embracing every phase of fire prevention, fire protection, and fire fighting. Fireproof construction, fire alarm systems, automatic sprinklers and fire extinguishers, fire engines, fire escapes and every kind of device for fire prevention and extinguishment will be exhibited and demonstrated. In addition important conferences will be held daily in which general consideration of the fire question will be given by architects, builders, engineers, insurance men and fire chiefs and fire fighters on the same platform.

Awards will be made for new inventions of merit and a campaign of education in fire prevention will be waged to inform the general public as to the best means of preventing the devastation which yearly takes hundreds of millions from the wealth of the country.

Delegates have already been appointed from the principal cities to attend the convention, consisting of the fire chiefs and commissioners and those most familiar with the subject.

In 1913 an exhibition is to be held at Leipsic which will be devoted to the social life of man. The architect, the technician, the engineer and the tradesman will be able to obtain at this exhibition a survey of the entire realm of building. There will be eight sections. Section I will be devoted to the architecture of town and settlements, underground and overground construction, interior decoration, homes and their decoration, architectural painting and sculpture, gardens and parks, cemeteries and their ornamentation, monuments and their care, conservation, etc.; section II will be devoted to the literature of the building trade, trade schools, office furniture; section III will be devoted to building material, their manufacture and use; section IV will include the machinery of building, such as tools and implements; section V will teach the visitor something about real estate transactions and will give him information on insurance, bookkeeping and the like; section VI will be devoted to hygiene in the home, factory and street as well as to the protection and welfare of the workingman; section VII will be devoted to gymnastics, games, etc.; section VIII will show how building material is tested.

Moving pictures will be used to show the processes employed in manufacturing articles for the home, the development of traffic and the state of architecture and the method of building in foreign countries.

Arrangements have been made for the display of the evolution of municipal building in a separate pavilion.

The grounds will be larger even than those of the Dresden Hygiene Exposition of 1911.—Scientific American.

An evidence of the satisfactory working of the New Mechanics' Lien Law is seen is the comparatively few liens that have been filed since its passage. A comparison of the record of the past year with preceding years will show a large percentage in favor of the new law.

As soon as owners and lawyers and the people generally become familiar with the intent and spirit of the new law it will commend itself to them by its simplicity. Instead of the old complicated and arbitrary procedure the new law fixes the liability direct and provides for a simple method of recovery.

The great difficulty with the advocates of the old law and with those unfamiliar with the new is that they seem to fail to see wherein the owner is protected. Ample provision is made whereby the owner or contractor can secure ample protection by requiring a bond which can be in the form of a simple commercial guarantee and also a supplemental remedy in the form of a bond in 50 per cent of the amount of the contract.

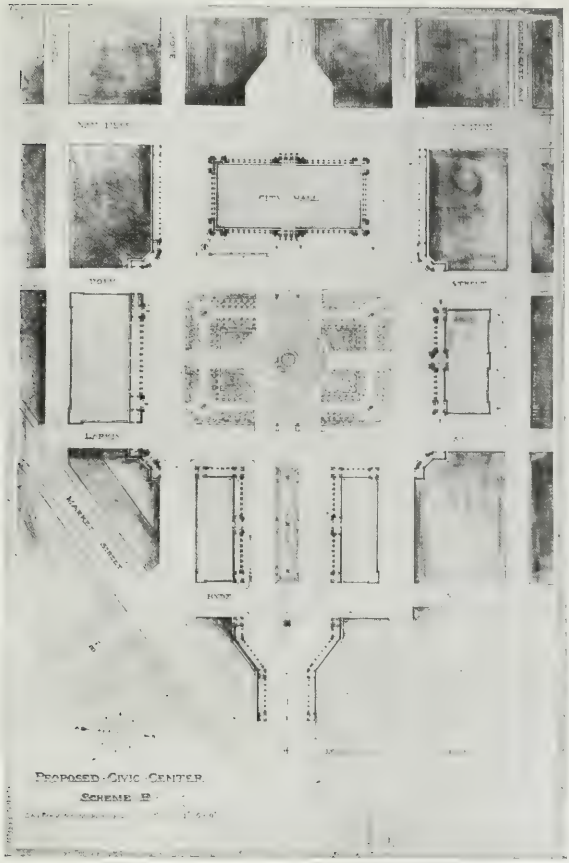
In case of default of anyone the owner pays the liens and recovers from the contractor or his sureties in the same manner as on a promissory note. The procedure is thus simplified and everyone knows the extent of his liabilities . He may file his contract or not as he sees fit and all he need to do is exercise ordinary care and business sense in the procedure.

So far the new law has worked well and by another year the advantages of its provisions should be very well determined.

In another column of today's issue will be found a report of a case by the attorney for the California Building Law Association, wherein the owner was penalized and suffered damage because he failed to comply with the highly technical procedure of the old law. Such a case would not happen under the present statute, for the procedure is direct and relieved of those pitfalls wherein the owner has been so often trapped.

The proposition to bridge Suisun Bay at Chipps Island has met with opposition from the shipping interests of the interior valley. According to those interested the bridge proposed to be erected is so low as to seriously impede river navigation. Over a mile in length the provision made for the passage of traffic is a draw span 200 feet long. This according to the river captains is entirely inadequate as the opening would be at the most dangerous point in the course from the river points to San Francisco. High winds and fogs are prevalent at the place and the conflicting currents make navigation dangerous.

As a counter proposition the people of the interior valleys propose a union high bridge for state and local Highway and railroad purposes. This bridge to be high enough to accommodate all kinds of shipping and furnish no obstruction to the flow of the river waters. The protests have been heard and it is now up to the authorities at Washington.



San Francisco's Civic Center; A Brief Description Of The City Hall Competition And Of The Accepted Design By Architect John Bakewell, Jr.

With the selection of the plans of Architects Bakewell & Brown for the new City Hall at San Francisco, ended the most noteworthy architectural competition ever held on the Pacific Coast. The accepted design received the unanimous approval of the jury, which consisted of the following well known architects: Walter Cook of New York, John Galen Howard, John Reid, Jr., and Frederick H. Meyer of San Francisco, together with Honorable James Rolph, Jr., Mayor, Paul Bancroft of the Public Buildings Committee and Daniel C. Fraser of the Board of Public Works.

The competition was open only to the San Francisco members of the profession. One hundred and odd applications were received, and seventy-three sets of finished plans were opened by the jury on June 15th. The accompanying illustration shows the new San Francisco Civic Center, and the location of the new City Hall. The dimensions of the main portion of the building give it a frontage of 390 feet and a depth of 273 feet.

Both Arthur Brown, Jr., and John Bakewell, Jr., of the firm of Bakewell & Brown, are highly respected members of the architectural profession and both are natives of California. Both were educated at the University of California and both finished their education in Europe at the Ecole des Beaux Arts. The firm has been established in San Francisco for a number of years, during which time they have engaged in a general practice and have designed a number of San Francisco's high class commercial buildings, besides many elaborate country and city residences. During the year the firm has carried out work in this city for the Regents of the University of California. The merit of their past work and their design for the City Hall show that they possess the capabilities to carry such a huge undertaking to a successful conclusion.

In speaking of the accepted design, Mr. Bakewell modestly describes the essential points as follows:

"The distinctive feature of the winning design for the City Hall is a large dome which is expressed in both plan and facade.

"In plan this dome runs up through the various stories as a rotunda forming the center of circulation on each floor.

"On the first floor the stairs up to council room come down under this dome while the entrances into the two great first floor groups, that of finance on the one hand, and that of records on the other, are directly off from this space under the dome.

"These two groups of the first floor have been simplified so as to form two large rooms or offices, lighted both from outside and from skylights.

"On the floors above, the rotunda becomes the center of circulation, the galleries about the dome forming the connecting ties uniting the two halves of the building.

"The general facade consists of a two-story order set up on a rather high base. This builds up into a larger order for the central feature which in turn leads up to the dome. In this way the interest is gradually brought up to the central feature."

Some Observations.

Being An Expression of Opinion As to Architectural Competitions in General and the San Francisco City Hall Competition In Particular. By Clarence R. Ward, A. I. A.

Properly conducted architectural competitions are nearly always satisfactory affairs to those who win. Of course, there can always lurk in the mind of the unsuccessful competitor the fact that a part, if not wholly, the best is just a shade better than the winner and that if the judges had gone over the designs just once more they would have discovered the particular features that they were expected to see and approve.

The above is by way of expressing the idea that about nine out of every ten competitors spend more time in thinking of what the judges are going to think than of what they should think themselves; in other words, the training, taste and prejudices, if you will, of the judges as the competition sees them are made a target of. The designer constructs so and so will favor a tower, one goes a tower without rhyme or reason and the result is an illogical design. This is why so many fail and one reason why competitions are so unsatisfactory to many who enter them. Another objection from the competitor's point of view is that the average architect, however brilliant he may be, has not the office organization at his command to aid him in the assembling and presentation of his ideas, therefore his designs must usually suffer by comparison to those who are better equipped. Many of the more prominent firms of architects of this country maintain a department whose almost sole labor is to study and prepare competitive designs.

A further objection might be found in the fact that it is almost impossible to conduct such a thing as a completely secret competition under purely local judges for the reason that architects who dwell long and build extensively in a community stamp their own hall-mark upon their work. A good architect's work is the child of his brain, and reflects to a great degree his character. Therefore a set of designs presented by such a one might be said to be almost a portrait of himself. It is presumed that the jury is to be governed or influenced by this knowledge, but in the case of two almost equally good designs it is likely that subconsciously they would choose that of the one who was better known in preference to one which might be presented by a designer of less experience. That competitions, however fairly conducted, are not entirely satisfactory to the profession in its entirety is evidenced by the fact that quite a large faction of the American Institute of Architects is opposed to the system. On the other hand there are many points in favor of the competitive system on lines as approved by the A. I. A. The general public is usually the gainer. This is evidenced by the work of the Federal Government during the last decade and the best of which was awarded by competition. A number of our municipalities have also benefitted greatly to the same reason. It can be repeatedly shown that the employment of an individual architect by a municipality for a given piece of work at the established rates is not only far more satisfactory but more economical than if handled by a bureau system. This is also true of the Federal Government bureau.

From the purely professional point of view, so far as the whole body of architects is concerned, the competition system is desirable. If the work is awarded by direct appointment or otherwise by preconceived ideas of prominence and also less able to exert influence would obtain nearly all of the work, thus eliminating the younger and possibly more talented members of the profession and thereby depriving them of an opportunity to show their worth. This would undoubtedly result in retarding the progress of the art.

It is not the writer's purpose to offer a heralded criticism of the programme completed and resulting designs of the recent San Francisco City Hall Competition but merely to give a few observations arrived at through a purely cursory examination of the plans submitted. The program was one of the best that has been put forth in this class, in point of scope and the result appears so far to be satisfactory to the public at large. The writer considers the average of about one-half of the designs to be good and to date was evidently of the one opinion as one of them received had been won at least six designs which could also have appropriately been first prize and that the selection of the winning design was no easy task.

So large an average should be a source of satisfaction to those of the architects who received prize awards and also reported upon designs without any unusual augmentation of their office organization. I have been told that a number of architects of local designs prepared in the East and had some of them who did not have been awarded a second prize. These I feel would be viewed with satisfaction by advocates of "Home Industry" and should point a moral to those who deem it necessary to go far afield for architectural talent. The designers can be entirely grouped in two general styles and rendering one of two looked like designs that might be found on 18th century wall papers or tapestries, while others had the appearance of libraries, convents, depots etc. and were classed as styles with much to be said Spanish, Neo-Grec, Mission, L'Art Nouveau, German esque, etc. The most surprising thing was the fact that there were so many poor floor plans throughout the lot, proper consideration not being given to ease of circulation, or proper lighting. Many were affected with entrances on 150 corners which resulted in fairly arranged plans on the whole, however the writer believes that the competition was a successful one and ventures to express the hope that the municipality will continue to award public buildings by competition.

THE ARTOLITH MANUFACTURING CO.

A Successful Firm.

The Artolith Mfg. Co., of 149-53 Turk St., contractors for composition flooring, although a firm of many years standing in the East, have only been located in this city since February last, since which time they have certainly been getting their share of the business in that line, they have carried out quite a number of contracts and given every satisfaction to the architects under whom they have done work. We understand they have several contracts on their books which will keep them busy for some time to come.

Mr. Jacob Weisser who is the proprietor of this firm has had fifteen years experience in this work in Germany, Canada and the United States, and devotes his attention exclusively to the laying of the floors.

The following is a reference received by Mr. Weisser from work done years ago.

Jacob Weisser, Esq.

Dear Sir:—Your letter received in regards of your floor we can you laid here [illegible] years ago we only can say, would we ever need something substantial everlasting always clean looking floor we surely do the same over again. We are glad to say that this has been a money saver for us and always will be as there are no cracks yet to be seen in spite of immense traffic from People coming here daily to our place which is now double than when you were here.

So in case anybody is looking for Reference in regard of aforesaid flooring and stairway our Address herewith.

BIG INCOME FROM CALIFORNIA FORESTS.

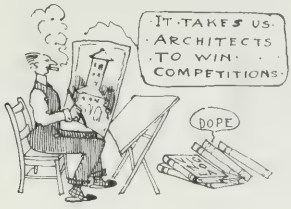
An increase of $18,000 in the receipts from the national forests in California for the fiscal year ending June 31, 1912, over those for the previous 12 months is shown in the annual statement of receipts just issued from the office in San Francisco of district 5 of the United States forest service.

The total receipts for 1911-1912 were $272,183, against $224,581 for 1910-1911. An increase in nearly all the departments from which revenue is obtained is shown in the report, timber sales being a particular feature with an increase of $35,000 in the past year. In this time $119,128 worth of timber was sold, against $81,471 during the previous fiscal year.

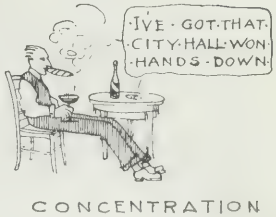
For settlements on timber destroyed in the building of railroads and reservoirs, or otherwise, $6317 was received in 1911-1912, and $1111 in 1910-1911. For timber trespass there is a decrease, $7451 being collected against $12,205 for the previous year, $95,501 was paid for grazing privileges, an increase of $1000 for the last year. For water power approximately $42,000 was received, compared with $31,000 the year before.

The San Francisco City Hall Competition As It Appeared To The Cartoonist. By J. W. B.

CONTEMPLATION



COMPILATION



CONCENTRATION

CONSTERNATION

Plans Wanted

As an outgrowth of the recent successful competition for the San Francisco City Hall, a concerted effort is being made by local architects to have the Board of Supervisors pass measures which will result in the securing of designs for all City and County buildings by open competition. The Public Buildings Committee of the Board has already taken such action and recommended that competitive plans be called for at once for the auditorium building which is to be erected in the Civic Center. If the Board of Supervisors take the same view of the matter as the Buildings Committee, there will be a number of important competitions held within the near future.

Over fifty thousand dollars worth of school bonds have been sold by Sacramento County, the proceeds of which will be devoted to the erection of school buildings. The State Board of Control recently purchased $50,000 worth of these bonds at a substantial premium. The County Superintendent of Schools, Sacramento, will furnish information as to the buildings to be erected.

The commission form of government has been placed in operation in the city of Sacramento, and from present indications the long delayed school work will shortly come up for consideration. As reported in these columns early in the year the bond election which provided for nearly $750,000 worth of school bonds was carried. Competitive plans were asked for at that time for one or two of these buildings, but the School Board later postponed the opening of the plans indefinitely. With the organization of the new School Board this work will be taken up again and a call for competitive plans will probably be issued within a short time.

William Wyles, C. H. Frink, N. S. Kaime, James M. Warren and William G. Griffith have been appointed by the board of directors of the Santa Barbara Young Men's Christian Association to serve as the building committee for the organization and to secure plans for the new building to be erected at Santa Barbara. The site has been donated and the sum of $90,000 raised for building purposes.

The following is a part of the official notice issued by the Board of Supervisors of Santa Barbara County, Cal. calling for plans for the new $200,000 County Hospital Buildings. Further information on this subject may be had from the Clerk of the Board of Supervisors, C. A. Hunt, Santa Barbara, Cal.

Office of the Clerk of the Board of Supervisors, County of Santa Barbara, State of California.

Notice is hereby given that the Board of Supervisors of the County of Santa Barbara will consider the adoption of plans and specifications for the erection of a County Hospital, or buildings to be erected on the County Poor Farm about three miles west of the City of Santa Barbara, the Main Hospital to be of reinforced concrete and brick construction, and to be classic in design, and other buildings to conform in design to the Main Hospital.

It is proposed that the following departments shall be represented, to portion of the building or buildings to be completed now, and that the total cost of the entire building shall not exceed $200,000.00: (1) A Hospital Building to accommodate at least 100 beds, to be of semi-fireproof construction; (2) Nurses' Home to accommodate at least 24 nurses; (3) Building for Steward and family; (5) Engine Room; (6) Electric Light Plant; (7) Laundry; (8) Help Quarters to be connected with the main building. The buildings designated 3 and 4 may be of frame construction, the buildings designated 5, 6, 7 and 8 shall be of semi-fireproof construction.

Plans and specifications may be submitted to the Clerk of the Board of Supervisors, until Monday, August 19th, 1912, at 10 o'clock a. m., and the question of selecting plans and specifications will be considered at that time.

The Board of Trustees of Haywards, Cal. are considering the project of calling a special election at which the question of voting from $20,000 to $40,000 worth of bonds for a Town Hall will be considered. S. H. McCabe, of the Haywards Chamber of Commerce, is particularly interested.

Several school districts in Modoc County, Cal., Have recently voted or are about to vote bonds for the construction of new buildings. These bond issues run from $10,000 to $25,000 each. No exact information has been received as to the methods which are to have new buildings, but this can be obtained from the County Superintendent of Schools, Alturas.

WALTER L. SCOTT, PHOTOGRAPHER

As a recognition of ability in his profession the Building and Industrial News wishes to give full credit to Mr. Walter L. Scott for the assistance which he has given to the publisher of this issue as an artistic and photographer. The photographs from which the halftones contained in this issue were made, taken in the exhibition rooms during the hours of public display and under the least favorable conditions, stand a tribute to his skill.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, brick, $15,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, S. Scow, 1235 Pine St., S. F. The building will be 27x137 feet and has been arranged for 12 modern apartments of two three and four rooms each. There will be private baths and wall beds in all apartments. The building will have steam heat. The interior trim will be of pine and redwood. The exterior will be covered with cement plaster on metal lath and shiplap. Plans are complete and the owner will do the work by day labor.

Manteca, San Joaquin Co., Cal.—Apartment house, 2 story and base, brick, $11,000. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Joseph Cowell. The building has been designed for stores on the first floor and apartments and a school room above. The interior trim will be of pine throughout. There will be some structural steel and the exterior of the building will be lined with pressed brick. The architect is preparing the working drawings.

San Francisco—Apartment house, 4 story and base, brick and steel, $100,000. Architects, Weeks & Day, Western Metropolis Bank Bldg., S. F. Owner, South Bodwell. The building will be erected at the corner of California and Stockton streets, on of the few corner apartment house sites now vacant. The plans provide for forty large apartments all with connecting baths, wall beds and private entrances. There will be steam heat, elevator service and a vacuum cleaning system. The interior will be finished in redwood and will be enamel. The exterior of the building will be lined with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 1 story and base, brick and steel, $45,000. Architect H. A. Cox, 631 Spring St., L. A. Owners, Union Realty Co. The building will cover and area of 50x150 feet. The interior will be arranged for 41 apartments of 2 to 5 rooms and bath each. All suites will be equipped with wall beds. There will be steam heat and elevator service. A vacuum cleaning system will be installed. The interior finish will be of pine and hardwoods. The exterior of the building will be lined with pressed brick. Plans are now nearly complete.

Los Angeles, Cal.—Apartment house, 4 story and base, brick. Cost not stated. Architect, J. William Roberts, 330 West 12th St., L. A. Owner, J. William Roberts. The building will contain 76 rooms divided into two and three room apartments with connecting baths and wall beds. The interior will be finished in pine and hardwood with some oak floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be lined with pressed brick. Plans are complete and figures are being taken.

San Francisco—Apartment house, 3 story and base, frame, $40,000. Architect, Phillip Schwerdt, Phelan Bldg., S. F. Owner, Charles Rebman. This building will cover an area of 64x100 feet and has been arranged to contain twenty-eight apartments all with connecting baths and wall beds. The interior finish will be of pine and redwood. There will be steam heat and elevator service. The exterior of the building will be covered with Cleo stone veneer to the water table and with cement plaster on metal lath above that point. Plans are complete and the architect will award a contract this week.

San Francisco—Apartment house, 3 story and base, veneered frame, $50,000. Architects Ross & Bergren, 310 California St., S. F. Owners, Greenwich Terrace Homeholders' Association. The owners have purchased also an entire city block commanding one of the finest views in the city and will improve the same with several high class apartment house buildings, the above being the first of these structures. The design is in the Spanish Mission style, with cement exterior and red tile roof. The apartments will be arranged in large suites. The interior will be finished in pine and hardwoods. There will be steam heat and wall beds. Plans for the first building are complete and figures are now being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, $21,000. Architect, none. Owner, W. H. Griswold, 116 East Ave. 28, L. A. The building will be 50x120 feet and will contain 18x5 rooms arranged in suites of two and three rooms each. There will be wall beds connecting baths and steam heat. The interior will be finished in pine and redwood. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by day labor.

Portland, Ore.—Apartment house, 7 story and base, reinforced concrete, $175,000. Architects, Whitehouse & Fouilhoux, Portland. Owners, Wauna Land Co. This work has been mentioned here before. The building will cover an area of 68x100 feet and has been designed for apartments ranging from three to nine rooms in size. The construction will be absolutely fire proof. The interior will be finished in hardwoods and marble. There will be open fire places in all apartments. The mechanical equipment will include a cooling plant, steam heat, elevator service, dumb waiters and vacuum cleaning. The exterior of the building will be lined with granite and red pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, none. Owner, W. H. Allen, Douglas Bldg., L. A. Contractors, California Real Estate and Building Co., 631 So. Spring St., L. A. Contract price not stated.

Los Angeles, Cal.—Apartment house, 3 story and base, frame, $30,000. Architect none. Owner, John A. Hayden. Contractor, C. S. Albright, Toberman Bldg., Hollywood. Contract price, $30,000.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Charles W. Von der Kuhlen, 401 So. Fremont Ave., L. A. Owner, P. Branke. Contractors, Pozzo Construction Co., 421 Macy St., L. A.

BANKS.

Bellingham, Wash.—Bank, 6 story and base, steel and concrete. Cost not stated. Architect, John Graham, Lyon Bldg., Seattle. Owners, Bellingham National Bank. The building will cover an area of 110x125 feet. There will be several stores besides the banking rooms on the first floor. The upper five floors have been arranged for offices. There will be steam heat, elevator service, mail chutes and vacuum cleaning system. The exterior of the building will be faced with pressed brick, granite and terra cotta. Plans are complete and figures are being taken.

BRIDGES, DAMS AND HARBOR WORK.

Chico, Butte Co., Cal.—Bridge, reinforced concrete, $12,000. Engineer, County Surveyor, M. C. Polk, Chico. Owners, Butte County. The plans for this bridge, which will span the Rinde Channel at the end of the Esplanade, will be 30 feet in width. There will be six piers. Plans have been approved and bids will be opened for its construction on August 1st.

Niles, Alameda Co., Cal.—Bridge, reinforced concrete, $75,000. Engineer, County Surveyor P. A. Haviland, Oakland. Owners, Alameda County. The bridge will be 500 feet long and 30 feet wide. The structure will be entirely of reinforced concrete. The exterior will be covered with Gunite, applied with the Cement Gun. Plans have been approved and bids are now being called. Bids will be opened on July 22.

Sausalito, Marin Co., Cal.—Dolphins, etc., pile construction. Cost not stated. Engineer, Town Engineer, Sausalito. Bids were opened on July 15th for the construction of a three-pile dolphin with guard rail and court. The result of the bids will be given in the next issue of the Building and Industrial News.

Santa Barbara, Santa Barbara Co., Cal.—Bridge, reinforced concrete. Cost not stated. Engineer, City Engineer Edson A. Garland, Santa Barbara. Owners, City of Santa Barbara. The bridge will be erected on Canyon Perdido street and according to the plans will be a forty-foot arch bridge. The plans have been approved and bids will be opened for the construction on July 25th. Full particulars can be obtained from the City Engineer.

Contracts Awarded.

Ventura, Ventura Co., Cal.—Bridge, reinforced concrete (Thomas-Post system) $49,000. Engineer, County Surveyor, Ventura. Owners, Ventura County. Contractors, Portland Concrete Pile Co., Phelan Bldg., S. F. Contract price, $19,625.25.

CHURCHES.

Pomona, Los Angeles Co., Cal.—Church additions, frame construction, $15,000. Architect, Robert H. Orr, State Bank of Pomona Bldg., Pomona. Owners, First Methodist Church. This

work has been mentioned here before. The present building will be converted into a Sunday school and a new portion added. Plans are complete and bids will be opened on July 20th.

Los Angeles, Cal.—Church, concrete and brick construction. Cost not stated. Architect, John C. Smith, H. W. Hellman Bldg., L. A. Owners, Fourth Church of Christ, Scientist. The building will be erected on So. Hill street near first and will be of concrete and brick construction. There will be a main auditorium seating in the neighborhood of 1,200 people. Besides the auditorium there will be a Sunday school room, parlors and reading rooms. The architect has just received the commission to prepare the plans.

Contracts Awarded.

Oakland, Cal.—Church, Class A construction, $150,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Methodist Church of Oakland. Contractors, Schnebly-Hostrawser-Pedgrift Co., Broadway, Oakland. Note: This contract has been awarded on a percentage basis and only the estimated cost of the building can be given.

Los Angeles, Cal.—Church, brick and frame construction, $35,000. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, West Adams Methodist Episcopal Church. Contractors, Richards-Neustadt Construction Co., Wright and Callender Bldg., L. A., general construction. Contract price, $28,000. Note: This does not include art glass, furniture or the organ.

COURT HOUSES.

Portland, Ore.—Court house and jail, 5 story and base. Class A construction, $200,000. Architects, Emil Schacht & Son, Portland. Owners, City of Portland. The building has been designed for a modern municipal structure and will contain the city courts and other departments, including the jail. The site takes in an entire quarter block. There will be a complete steel frame with exterior walls of concrete and brick. The exterior will be faced with granite and terra cotta. Plans for the excavating, foundation work and steel are complete and figures are being taken.

Contracts Awarded.

Ventura, Ventura Co., Cal.—Court hause, 3 story and base. Class A construction. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Ventura County. Contractors, Pacific Ornamental Iron Works, 1942 So. Main St., L. A., ornamental iron. Contract price, $5,830. Joseph Musto Sons-Keenan Co., S. F., marble and tile work. Contract price, $26,249.

FACTORIES & WAREHOUSES.

San Francisco—Warehouse, 4 story and base, brick or concrete, $50,000. Architects, Ross & Bergren, 310 California St., S. F. Owner's name withheld. The building will be erected adjacent to the Southern Pacific tracks and will cover a large ground area. There will be freight elevators. The construction will be fire proof. Plans have not progressed far enough to give details of the work. The architects have just started the working drawings.

Los Angeles, Cal.—Lofts, 4 story and base, brick and concrete. Cost not stated. Architect, none. Owners, Jones Transfer Co. The work is being handled through the offices of the Market Realty Co., 643 Maple street, L. A. The building will be 50x140 feet, fireproof throughout and of extra heavy construction. Doors and window sash will be of metal. The excavation is now being done by M. A. Howland, Factory Place, and the balance of the work will probably be carried by Mr. Howland.

Los Angeles, Cal.—Factory, 1 story and base, brick. Cost not stated. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owners, Imperial Cotton Works. The structure will cover an area of 130x120 feet. The walls will be designed to carry an additional story. There will be a concrete floor, fire proof doors and a system of ventilation. The exterior will be of stock brick. Plans are complete and figures are being taken.

Long Beach, Los Angeles Co., Cal.—Warehouse, 1story and base, frame and iron. Cost not stated. Architect, none. Owners, Pacific Wharf and Storage Co., Merchants' Trust Bldg., L. A. This firm has had plans prepared for a warehouse 60x200 feet, which is to be erected on one of their wharfs at Long Beach. The building will have a wood frame and corrugated iron siding. Plans are on file at the offices of the company and figures are being taken.

Portland, Ore.—Warehouse, 5 story and base, mill construction, $50,000. Architect, Aaron H. Gould, Portland. Owners, Portland Seed Co. Plans have been filed with the Building Inspector for a permit, and show a structure covering a ground area of 100 feet square. Construction will be of the heavy mill type and there will be fire proof doors, cement floor and an automatic sprinkler system. The exterior will be faced with stock brick.

FIRE HOUSES AND JAILS.

Oakland, Cal.—Fire house, 2 story and base, frame, $6,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Oakland. The building will be erected in the outskirts of the city. There will be a cement floor and steam heat. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

San Francisco—Fire house, 1 story and base, frame, $5,000. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. This building will be erected at 19th avenue and King street, and is a temporary structure. Plans have been completed and bids will be called for this week.

Oakland, Cal.—Fire house, 2 story and base, frame, $6,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Oakland. The building will be identical with the other structure now being erected. There will be steam heat, pine trim and cement floor on the first story. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

San Francisco — Police station, 2 story and base, reinforced concrete, $35,000. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for a station, which is to be erected at Greenwich and Scott streets, are complete and figures for the work will be called for by the end of the week. The official proposal will be published in these columns.

FLATS.

San Francisco — Flats, alterations and additions, $3,000. Architect, none. Owner, William S. Morse, 7 Devisadero St., S. F. The work will consist of the alteration of a three-story frame building into modern flats. The exterior work will be of shiplap and brick veneer. The interior finish will be of pine and redwood. There will be new plumbing, electric work and plastering. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Flats, 2 story and base, frame, $8,000. Architect, none. Owner, E. A. Schmidt Oakland. The building will cover a considerable area and will contain four flats of five and six rooms each. There will be baths with tile floors. The trim will be of pine and redwood. There will be gas grates and tile or brick mantels. The exterior of the building will be covered with shiplap and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 2 story and base, frame, $6,500. Architect, none. Owner, R. W. Moller, 180 Jessie St., S. F. The building has been designed for two large flats of six and seven rooms and bath each. The interiors will be finished in pine with some hardwood floors. There will be gas grates and tile mantels. The exterior will be covered with brick veneer and shiplap. Plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 3 story and base, frame, $6,000. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, G. Cavaglieri 593 Potrero avenue, S. F. The building will contain three flats of five and six rooms each. There will be modern plumbing, including baths. The interior trim will be of pine, redwood and elm. There will be gas grates and tile mantels. The exterior will be covered with glazed brick veneer and cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

San Francisco—Flats, 2 story and base, frame, $3,500. Architect, none. Owners McKillop Bros., 540 Cole St., S. F. The building has been designed to contain two modern flats of five and six rooms each with bath. The interior will be finished in pine and redwood. There will be gas grates and tile mantels. The exterior of the building will be covered with cement plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

GARAGES.

San Francisco—Garage, 3 story and base, brick, $35,000. Architect, Herman Barth, 12 Geary St., S. F. Owners name withheld. The building is to be erected at the corner of Van Ness avenue and Bush street. The building is to be designed for a combination garage and display rooms. The interior will be finished in pine and hardwood. All floors except the first floor, will be of wood. There will be a steel frame, exterior walls of brick lined with pressed brick. There will be an electric elevator. The cement work will all be carried on [illegible]

Plans for the building are now being prepared.

Saratoga, Santa Clara Co., Cal.—Garage, 1 story and base, frame. Cost not stated. Architects, William Curlett & Son, Phelan Bldg. S. F. Owner, James D. Phelan. The building has been designed for a private garage and will complete the recent improvements made to the writer's country home. There will be cement floor. The exterior will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

San Francisco—Garage, 1 story and base, reinforced concrete. Cost not stated. Architects, Whittell Real Estate Co., 166 Geary St., S. F. Owners, Whittell Real Estate Co., 166 Geary St., S. F. This building will be erected on Taylor street near Eddy, and will cover an area of 80x136 feet. The entire building has been designed for a commercial garage. There will be a cement floor. Besides the storage space the building will contain the office and a machine shop. The exterior will be faced with cement plaster. Plans are now being prepared.

Contracts Awarded.

Los Angeles, Cal.—Garage, 1 story and base, brick, $10,000. Architect, none. Owner Mrs. Alice P. Steel worth. Contractor, A. O. Verty, Mason Bldg., L. A. Contract price $9,000.

Hollywood, Los Angeles Co., Cal.—Garage, 1 story and base, brick, $5,000. Architect, none. Owner, Mr. Baker. Contractor, C. S. Alward, Temperance Bldg., Hollywood. Contract price not stated.

GOVERNMENT WORK AND SUPPLIES.

The contract for furnishing telephone supplies for the Reclamation Service under bids opened for the Klamath project as such, awarded to the Western Electric Co. of San Francisco, Cal. The necessary cedar telephone poles will be furnished by the Northern Mercantile Co. of Sandpoint, Idaho.

HALLS AND SOCIETY BUILDINGS.

San Francisco—Armory, 4 story and base, steel and reinforced concrete. $300,000. Engineer State Engineer McClure, Sacramento. Owners, State of California. This work was mentioned here a number of times before. Plans were recently out for the same and a contract was supposed to have been let to Lewis Hicks & Co., of this city. The State Board of Control however were not satisfied with the manner in which bids were submitted and decided to reject all bids and readvertise. Bids are now being taken and will be opened on July 30th.

Sacramento, Sacramento, Co., Cal.—Armory, 3 story and base, reinforced concrete. $100,000. Engineer State Engineer McClure, Sacramento. Owners, State of California. The plans for this building have been revised and new figures are now being taken. Plans are on file at the office. Bid will be opened on July 30.

Oakland, Cal.—Auditorium, 1 and 2 story and base, concrete and steel. $100,000. Architects, Reed & Meyer, Oakland Bank of Savings Bldg., Oakland. Owners, City of Oakland. Plans for this building have been accepted by the Council and construction will be started as soon as bids on the work can be secured. The structure is arranged around a central court. The construction will be of concrete, steel and wood. There will be a central heating system. The architect's preliminary plans have just been approved and full details cannot be obtained at this time.

Napa, Napa Co., Cal.—Lodge hall, 3 story and base, brick and steel, $75,000. Architect, W. H. Corlett, Napa. Owners, Native Sons Hall Association. Preliminary plans for this work have completed and are out for estimates. The plans provide for stores and lodge rooms. There will be considerable structural steel used. The interior finish will be of pine, hardwoods and metal. The exterior walls will be of brick faced with pressed brick and cement plaster. Plans are now being prepared.

Fresno, Fresno Co., Cal.—Lodge hall, 3 story and base, brick and steel, $40,000. Architect, Henry F. Starbuck, Fresno. Owners, Woodmen of the World. This building has been mentioned here a number of times before. The architect has completed certain revisions in the plans and is now taking figures on the work. Bids will be opened on August 1st.

Contracts Awarded.

Ramona Acres, Los Angeles Co., Cal.—Club house, 2 story and base, frame, $8,000. Architect, J. Marian Haenke, Central Bldg., L. A. Owners, Midwick Country Club. Contractor, B. D. Kronick, 2001 S. Hill St., L. A. Contract price, $16,000.

HOSPITALS.

Agnews, Santa Clara Co., Cal.—Convalescent and assembly building, 2 and 3 story and base, concrete and steel. Cost not stated. Engineer, State Engineer McClure, Sacramento. Owners, State of California. Plans for both of these buildings are now practically complete and bids will be called for at once. The work will be figured complete as a whole and segregated. Plans will be on file at this office. Bids will be opened on July 31st.

Aberdeen, Wash.—Hospital group of eight reinforced concrete buildings, $90,000. Architect, C. E. Troutman, Seattle. Owners, Chehalis County. According to information received among the office of the architect plans for the first unit of these buildings will be complete by August 1st and bids will be called other than the above no information has been received. And complete details of the work will be published later.

Contracts Awarded.

San Francisco—Electric time system, $14,000. Architect, City Architectural Dept., Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. The following bids were opened for the installation of an electric time system in the San Francisco Hospital buildings. General Electric Consti. Co. $14,000. John G. Sutton, $11,111. Butte Engineering and Electric Co., $12,650, and McFell Electric Co., $14,000.

HOTELS.

San Francisco—Hotel, 3 story and base, brick, $17,000. Architect, Joseph Caken, 45 Kearny St., S. F. Owners, W. J. Yore and B. E. Bauske. The building will cover an area of 50x77 feet. Plans provide for stores on the first floor and a number of single rooms and baths on the upper floors. The interior trim will be of pine throughout. There will be running water in all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

San Francisco—Hotel, 7 story and base, brick and steel. Cost not stated. Architect, W. H. Weeks, Charleston Bldg., S. F. Owner, Howard G. Anderson. This building will be erected on Fifth street, between Market and Mission streets. The site is 50x75 feet. The first floor will be arranged for stores, the office and lobby of the hotel. The upper floors will be divided into single rooms, a large percentage of which will have connecting baths. There will be steam heat, elevator service and running hot and cold water. The exterior of the building will probably be faced with presed brick. Plans are now being prepared.

San Francisco—Hotel addition, 3 story, brick and steel. Cost not stated. Architect, W. H. Weeks, Charleston Bldg., S. F. Owner, Amos Lester. This work will be started within a short time. The three floors will contain in the neighborhood of 65 rooms and a number of baths. There will be elevator service, steam heat and running water. The additional floors will be carried on a steel frame. The exterior will be faced with pressed brick. Working drawings are now being prepared.

Los Angeles, Cal.—Hotel, 3 story and base, brick and steel. Cost not stated. Architect, F. X. Lourdou, Merchants' Trust Bldg., L. A. Owner, Marius Taix. The building will contain two stores on the first floor and 34 single rooms and five bath rooms on the upper two floors. There will be steam heat. The interior trim will be of pine throughout. The exterior will be faced with pressed brick. The architect is preparing the working drawings. Bids will be called for shortly.

San Francisco—Hotel, 4 story and base, brick and steel, $40,000. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners Louis Haas and C. Cohen, 235 Russ Bldg., S. F. This work has been mentioned here before when the architects were preparing the plans. The working drawings are now complete and out for figures. Bids are being taken by the owners. The plans provide for a building containing in the neighborhood of 75 rooms nearly all of which will have connecting baths. There will be steam heat and elevator service. The interior will be finished in pine and redwood. The exterior will be faced with pressed brick.

San Francisco—Hotel, 6 story and base, brick and steel, $125,000. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owner, Annie M. Faxton. The building will be erected at the corner of Fourth and Mission streets and will cover a large area. There will be stores on both street frontages besides the hotel lobby and offices. The upper floors will contain over 200 single rooms and baths. The mechanical equipment will include steam heat, ele-

vators, a hot water system and vacuum cleaning. The interior will be finished in pine and redwood. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

San Francisco—Hotel. 5 story and base, brick and steel. Cost not stated. Architect, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owners, Behlow Estate. This building was mentioned here last week, at which time it was stated that the structure was to be of the reinforced concrete type. As stated above the construction will be of brick and steel. Plans are still being figured.

Los Angeles, Cal.—Hotel, 14 story and base. Class A construction. Cost not stated. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, John Parkinson. Architect Parkinson has just purchased the property at the southwest corner of 6th and Figueroa streets, covering an area of 90x120 feet. It is stated that he intends to erect a large hotel on the site. No details of the building are obtainable as yet.

Portland, Ore.—Hotel, 3 story and base, stone and frame. Cost not stated. Architect, William J. Kratz, Portland. Owners, Syndicate of Portland capitalists. A fine country hotel is to be erected at one of the resorts near Portland and around the hotel will be developed a summer colony. The plans for the hotel show a building of irregular shape having a total frontage of 482 feet. The main body of the structure will be 100x200 feet. There will be in the neighborhood of 75 rooms and baths on each of the upper floors. The exterior will be of stone and shakes. Plans are being prepared.

Contracts Awarded.

Los Angeles, Cal.—Hotel, 3 story and base, brick, $20,000. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owner, Mrs. Jennie Gans. Contractors, Ganz Bros, 211 North Main St., L. A. Contract price, $20,000.

Los Angeles, Cal.—Hotel, 10 story and base, reinforced concrete. Cost not stated. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner's name not given. General construction, Alta Planing Mill Co., 830 McGarry St., L. A., $124,034; electric wireing, Newberry-Bendheim Co., Stimson Bldg., L. A., $4,888; plumbing and heating, Howe Bros., L. A., $29,821; and elevators, Otis Elevator Co., L. A., $8,100.

—LIBRARIES—

McMinnville, Ore.—Library, 1 story and base, brick and concrete, $10,000. Architect, Ernest Kroner, Portland. Owners, McMinnville Library Trustees. The building will be 72x30 feet. The basement will contain the mechanical equipment, work room and an auditorium. The first floor will be occupied by the reading room, rack room and office. The exterior will be faced with pressed brick. There will be hardwood trim and a central heating system. The plans will be complete and go out for figures on July 18th.

POST OFFICES.

San Pedro, Los Angeles Co., Cal.—Post office, 2 story and base, brick, $40,000. Architect, Oscar Wendroth, Washington, D. C. Owners, United States Government. The House Committee on Public Buildings has agreed to include an appropriation of $40,000 for the construction of this building. A site will be selected at once and plans prepared.

RAILROAD CONSTRUCTION—STATIONS AND EQUIPMENT.

Contracts Awarded.

Fort Stewart to Laytonville, Cal.—Constructing railroad, $2,000,000. Engineering Dept. Northwestern Pacific R. R. Co., Phelan Bldg., S. F. Owners, Northwestern Pacific Co. Contractors, Utah Construction Co., Phelan Bldg., S. F. Contract price, $2,000,000.

Albany, Ore.—Depot, 2 story and base, brick. Cost not stated. Architects name not given. Owners, Oregon Electric R. R. Co. Contractor, H. C. Meyer, Portland. Contract price not stated.

SCHOOLS.

San Francisco—School, 3 story and base, reinforced concrete, $100,000. Architect, William C. Hays, Foxcroft Bldg., S. F. Owners, Trustees of the Wilmerding School of Industrial Arts. This is the first of several extensive buildings which are to be erected by this institution on their property at 17th and Potrero streets. The first building will contain several departments for manual training and a large department of domestic economy. The construction will be fire proof throughout. There will be a central steam heating plant and a modern system of ventilation. The exterior of the building will be faced with cement plaster. Plans have been out for figures and a contract will be awarded this week.

Oakland, Cal.—Schools, 1 2 story, class A construction, $100,000 and 1, 1 story concrete, $42,500. Architect, City Architect Donovan, Oakland. Owners, City of Oakland. Preliminary plans have been approved by the Oakland Board of Education for the College Avenue School and for the Peralto Heights School. Plans for the College Avenue School were prepared by Architect Walter D. Reed, Oakland Bank of Savings, and call for a two-story and base, class A building costing $100,000. There will be thirteen class rooms. The plans for the Peralto Heights School show a building one story in height containing six class rooms and a branch of the City Library. The cost will be $42,500. Plans for both of these buildings are in the hands of City Architect Donovan and complete drawings will be worked up under his directions.

Berkeley, Alameda Co., Cal.—School, 4 story and base, reinforced concrete and brick, $100,000. Architect, State Dept. of Engineering, Sacramento. Owners, State of California. Revised plans for this building have been completed and are now being figured. Bids for the construction will be opened on July 19th. The building will form a part of the improvements which are contemplated for the State Institution for the Deaf, Dumb and Blind at Berkeley. Plans for this work are on file at this office and the official proposal appears in this issue

Bonita School District, Stanislaus Co., Cal.—School, 2 story and base, brick or reinforced concrete. Cost not stated. Architect, W. H. Weeks, Charleston Bldg. S. F. Owners, Bonita School District. The building will contain eight class rooms, assembly hall and principal's office. There will be steam heat and a modern system of ventilation. Bids will be taken for both the brick and reinforced methods of construction. Separate figures are asked for on the general construction, heating and ventilating and on the alternate plan. Bids will be opened on July 18th.

Los Angeles, Cal.—School, 2 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, St. Agnes Parish. The building will be 129x80 feet, and has been designed for a parochial school. The working drawings are complete and work will be started on the excavation and foundation walls at once. The balance of the work will be figured later.

Los Angeles, Cal.—School, 1 story and base, frame and concrete. Cost not stated. Architect, A. H. Daum, supervisor of construction Los Angeles School Department. Owners, City of Los Angeles. The building will be in the patio style and will cover an area of 120x120. Provision has been made for eight class rooms and an auditorium. The exterior will be covered with cement plaster on metal lath. Plans are complete and bids will be opened on July 25th.

Sutter Creek, Amador Co., Cal.—School, 1 story and base, reinforced concrete, $25,000. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owners, Sutter Creek School District. Bonds for the construction of this building have been sold and working drawings will be prepared at once. The building will be used as a high school and will contain science departments besides the usual class rooms. There will be a central heating system. The exterior will be faced with cement plaster.

Wahtoke School District, Fresno Co., Cal.—School, 1 story and base, frame. Cost not stated. Architect, J. Carl Thayer, Fresno. Owners, Wahtoke School District. The building has been designed for a district school. There will be one class room. The exterior will be covered with cement plaster on metal lath. Plans are being prepared.

Friday Harbor, Wash.—School, 2 story and base, reinforced concre e. Cost not stated. Architects, C. Lewis Wilson & Co., Northern Bank Bldg., Seattle. Owners, Friday Harbor School District. The building will contain 6 class rooms and assembly hall. There will be a central heating system. The exterior will be faced with cement plaster. Plans are now being completed and bids will be called for shortly.

Alki Point and Fort Lawton, Wash.—Schools, 2, 2 story and base, brick and concrete, $65,000. Architect's name not given. Owners, Alki Point and Fort Lawton School District. A contract for the construction of both of these buildings was awarded to Ditleson & Gehring of Seattle last week, but failure on their part to produce a surety bond within the time limit resulted in the rejection of all bids. New figures will be called for at once.

Santa Barbara, Santa Barbara Co., Cal.—School, 2 story and mezzanine, reinforced concrete and brick. Cost not stated. Architect, State Dept. of Engineering, Sacramento. Owners, State of California. The plans, which are now out for figures, show a building designed for a department of Manual Arts and Domestic Economics in connection with the State Normal School at Santa Barbara. The structure will be practically fire proof. There will be several large departments designed for the special use of the two sciences. The exterior will be faced with cement plaster. Plans are on file at this office and bids will be opened on July 30th. Bids are being taken on the work as a whole and on segregated contracts.

Los Angeles, Cal.—School, group of nine buildings, brick and steel or reinforced concrete. Cost not determined. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, City of Los Angeles. The present scheme contemplates the erection of nine buildings. The main building science, library, fine arts, domestic science and training school buildings will be two stories, and the manual arts, gymnasium and power plant buildings one story in height. The style of the construction has not been determined, but will probably be either reinforced concrete or brick faced with tapestry brick It is not definitely settled whether the construction will be strictly fire proof or semi-fire proof. The cost of the buildings has not been estimated, but it is thought that if 650,000, or more, is realized from the sale of the present site all the buildings can be erected at once without any appropriation from the State Legislature.

Contracts Awarded.

Sawtelle, Los Angeles Co., Cal.—School, 1 story and base, brick. Cost not stated. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Sawtelle School District. Contractor, J. E. McCutcheon, 2006 6th St., Santa Monica, general construction, $13,257; Thomas J. Low, Sawtelle, plumbing, $771, and Machinery and Electric Co., 351 North Main St., L. A., heating and ventilating, $939.

Eagle Rock Valley, Los Angeles Co., Cal.—College buildings, 3, 3 story and base, reinforced concrete, $180,000. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Occidental College. Contractors, Richards-Neustadt Co., Wright and Callender Bldg., L. A., general construction, $180,000. Note: This contract does not include the plumbing, heating and blackboards.

Los Angeles, Cal.—School, 2 story and base, brick. Cost not stated. Architect, Frank G. Krucker, Ferguson Bldg., L. A. Owners, City of Los Angeles. Contractor, Alex. Grant, 1201 West 37th St., L. A., general construction, $57,793. Note: This contract does not include the heating and ventilating or plumbing.

SEWERS, STREET WORK AND WATER SYSTEMS.

Tulare, Tulare Co., Cal.—Water system, $100,000. Engineers, Sloan & Robson, Nevada Bank Bldg., S. F. Owners, Town of Tulare. Tulare is to construct a municipal water system and has commissioned the above mentioned engineers to prepare plans. Bonds for the work have been voted and plans will be considered at an early meeting of the Town Trustees.

Sedro Woolley, Wash. — Drainage system. Cost not stated. Engineers, Hanford & Blackwell, Hoge Bldg., Seattle. Owners, State of Washington. The engineers have completed the plans for a drainage ditch, filter beds, sedimentation tank and pipe sewers, which are to be installed at the Northern Hospital for the Insane. Bids on this work will be opened on July 27.

Rio Vista, Solano Co., Cal.—Sewer system. Cost not stated. Engineer E. N. Enget, Fairfield. Owners, City of Rio Vista. Plans for a complete town sewer system have been completed and approved by the Board of Trustees. Bids for this work are now being taken and will be opened by the Board of Trustees on July 31st. Plans and specifications are on hand at the office of the Engineer and may also be Town Clerk, Rio Vista.

STORES & OFFICE BUILDINGS.

Los Angeles, Cal.—Market, 1 story and base, brick. Cost not stated. Architect, William Sherman, 430 First Nat'l. St., L. A. Owners, Frank Simmonds and F. T. King, California Bldg., L. A. Plans for this building, which will cover an area of 58X248 feet have been completed and placed at the hands of the owners who are taking figures for the construction. The building will contain 55 market stalls and will have a cement floor, tile and marble wainscot, large skylights and collapsible iron doors. The exterior will be faced with glazed brick.

Santa Monica, Los Angeles Co., Cal.—Stores and offices, 3 story and base, brick. Cost not stated. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, George Nickelson. The building will be 50X100 feet. There will be three stores on the first floor and a number of office suites on the upper floors. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Seattle, Wash.—Stores, 2 story and base, reinforced concrete, $110,000. Architect, James H. Schack, Downs Bldg., Seattle. Owner, T. S. Lippy. This building will cover a ground area of 120X120 feet. There will be a number of stores on the first floor, besides a theatre. The upper floor will be arranged for singles rooms and offices. Plans are complete and figures are being taken.

San Francisco—Stores, 1 story and base, frame, $3,000. Architects, Salfield & Kohlberg, Clunie Bldg., S. F. Owner, Paul Barbieri. The building will be erected in the Richmond District and has been designed for two stores. There will be plate glass windows and pine trim. The exterior of the building will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

San Francisco—Stores and hall, 2 story and base, brick and steel, $25,000. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, Emma S. Owens. This work has been mentioned here before. The building will cover an area of 75x 160 feet. There will be a restaurant on the first floor, bakery in the basement and a billiard hall on the second floor. The interior of the restaurant and billiard hall are to be finished in tile and hardwoods. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

San Francisco — Store alterations, brick construction, $2,000. Architect, A. D. Nicholson, 20 Montgomery St., S. F. Owner, Abe Schoenfeld. This work will consist of the alteration of an underground floor and will include new interior trim and decoration, electric work, plumbing and plastering. Plans are complete and the work will be done by Day Labor.

San Francisco—Stores, 1 story and base, brick and steel, $10,000. Architects, Havens & Toepke, 16 Kearny St., S. F. Owner, J. E. Scully, Phelan Bldg., S. F. This building has been designed with foundation walls of sufficient strength for four more stories. The building which is to be erected now will contain two stores. The interior trim will be of pine. There will be patent store fronts and plate glass windows. The exterior will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Stores and offices, 7 story and base, brick and steel, $125,-000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, John M. Locke. This building will be erected at the northeast corner of 14th and Jefferson streets. The first floor will be arranged for several stores and an attractive entrance to the upper floors. The six upper stories will be subdivided into modern offices. There will be elevator service, steam heat, mail chutes and a vacuum cleaning system. The trim will be largely of metal. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

Oakland, Cal.—Stores and offices, 4 story and base. Class A construction. Cost not stated. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, R. W. Kinney. The architect has only started the preliminary plans for this work and the details of the construction cannot be given at this time. The same architect is preparing plans for another large office building and wants figures for Blue Trap rock veneer.

Oakland, Cal.—Stores and lofts, 3 story and base, brick and steel, $40,-000. Architects, Reed & Meyer, Oakland Bank of Savings, Oakland. Owner, M. J. Lavmance. The present plans are so arranged that four more stories may be added in the future. There will be stores on the first floor and large light lofts on the upper floors. The plans provide for steam heat and elevator service. The exterior of the building will be faced with stone to the second floor line and with cement plaster decorated with ornamental metal above that point. Plans are complete and figures are being taken.

Fresno, Fresno Co., Cal.—Stores and offices, 8 story and base. Class A construction. $250,000. Architect, George William Kelham, Crocker Bldg., S. F. Owners, S. W. Griffith and the McKenzie Estate. The big building will be erected at the corner of J and Mariposa streets, and will have a frontage of 150 feet on J street and nearly as much on Mariposa. There will be a number of large retail stores fronting both streets. The upper floors will be subdivided into offices. There will be four elevators, steam heat, vacuum cleaning system and mail chutes. The construction will be entirely fire proof, the trim throughout being of metal. There will be a complete steel frame and exterior walls of reinforced concrete faced with pressed brick and terra cotta. The preliminary plans have been approved and working drawings are now being made.

Contracts Awarded.

Wenatchee, Wash.—Stores and offices, 2 story and base, brick, $30,000. Architect, Creutzer, Haight Bldg., Seattle. Owners, Griggs Land Co. Contractor, T. E. Young, Haight Bldg., Seattle. Contract price, $30,000. The same architect will prepare plans at once for a number of other commercial buildings which are to be erected at Wenatchee and which will replace those recently destroyed by fire. Mr. Young will do much of the construction work.

Los Angeles, Cal.—Store, 1 story and base, brick. Cost not stated. Architect, none. Owners, Los Angeles Trust and Savings Bank. Contractors, C. B. Weaver Construction Co., Wright and Callender Bldg., L. A. Note: This structure will be 100X100 feet and the contract has been taken on the percentage basis.

THEATRES.

Aberdeen, Wash.—Theatre alterations, brick and steel construction, $40,000. Architect, B Marcus Pretica, Empire Bldg., Seattle. Owner, Alex. Pantages. Mr. Pantages has just secured a lease on a large two-story brick building and is having plans prepared for extensive alterations. The work will include the building of a stage, balcony and lobby. There will be structural steel, brick work, plumbing, carpentry, plastering and electric work. Plans will be completed as rapidly as possible.

Pasco, Wash.—Theatre, 2 story and base, brick and steel, $40,000. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, John Cort. This building has been described in these columns before. The plans are complete and the architect has announced that the work will be done by Day Labor. All bids for material are being taken through the architect's office.

Alameda, Alameda Co., Cal—Theatre, 1 story and base, brick and steel, $15,-000. Architect, C. F. King, Hotel Shattuck, Berkeley. Owner's name not given. The building has been designed for a moving picture house. The seating capacity will be about 350 people. There will be a system of heating and ventilation. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.
(Bids close July 16.)

OFFICE of the Park Commissioners, Park Lodge.—Sealed proposals are invited for the furnishing and setting of marble and tiling for the Public Convenience Station in course of construction near the junction of the Sloat Boulevard and Great Highway.

Complete specifications for the same may be had at the office of Reid Bros., Architects, California Pacific Building, 105 Montgomery Street.

All proposals must be accompanied by a certified check equal to ten per cent (10%) of amount of bid, payable to the Secretary of the Park Commissioners.

All bids must be filed at the office of the Park Commissioners, Park Lodge, Golden Gate Park, before noon of Tuesday, July 16, 1912.

The Board reserves the right to reject any or all bids.

JAMES DE SUCCA, Secretary.

PROPOSALS FOR CANAL SUPPLIES.
(Bids close Aug. 5.)

CANAL CIRCULAR 718—Proposals for the purchase of Scrap Copper, Screens, Manila Rope, Rubber and Hose, offered by sale by the Isthmian Canal Commission, which are no longer needed—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10.30 a. m. August 5, 1912, at which time they will be opened in public, for purchasing the above-mentioned articles. Blanks and general information relating to this circular (No. 718) may be obtained from this office or the offices of the assistant purchasing agent, 1086 North Point St., San Fran-

cisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

NOTICE TO CONTRACTORS.

(Bids close July 18.)

NOTICE is hereby given that sealed bids will be received and opened at 2 o'clock p. m. by the Board of Trustees of the Bonita School District on the 18th day of July, 1912, at the office of the County Superintendent of Schools for the erection and completion of a brick and concrete school building in accordance with the plans and specifications made for the same by W. H. Weeks, the authorized architect employed by the Board.

Separate bids will be received, first, on the general contract; second, on the heating and ventilating; and third, on alternate propositions.

Plans and specifications may be seen at the Crows Landing post office or at the County Superintendent's office, Modesto, or at the office of the architect, W. H. Weeks, 251 Kearny St., San Francisco. A deposit of $20.00 cash will be required on all plans loaned out, as a guarantee of good faith. All bids are to be made out on blank forms furnished by the Board and must be accompanied by a check for not less than 5 per cent of the amount of the bid, made payable to Mrs. W. W. Cox, clerk of the Board of Trustee, and certified to by some responsible banking house. This check to be forfeited in the event that the successul bidder, after having been awarded the contract, fails within ten days to sign the contract and furnish a good and sufficient bond, as required by law.

The Board reserves the right to reject any and all bids.

GEORGE A. FINK,
H. A. KRICKE,
MRS. W. W. COX,
Board of Trustees, Bonita School District.

NOTICE TO CONTRACTORS.

(Bids close July 31.)

SEALED bids will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock, noon, Wednesday, July 31, 1912, said bids then and there to be publicly opened and read, for the Building for Convalescents at Agnews State Hospital at Agnew, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Bids will be received as a whole or in sub-divisions, as follows: First, for the Entire Building; second, for the Mason Work; third, for the Carpenter and Mill Work, fourth, for the Metal Lathing and Plastering; fifth, for the Sheet Metal and Roofing; sixth, for the Painting, Staining and Glazing; seventh, for the Plumbing, Sewers and Gasfitting; eighth, for the Steam Heating and Ventilating; ninth, for the Electric Wiring.

A certified check in the sum of ten per centum (10%) of the amount of bid must accompany each bid.

A deposit of Twenty-five Dollars ($25.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, Cal., and plainly marked on the envelope. "Proposals for Agnews Convalescent Building."

(Signed) W. F. McCLURE.
State Engineer.

All bids must be addressed to W. F. McClure State Engineer, Sacramento, Cal., and plainly marked on the envelope: "Proposals for Santa Barbara State Normal School.

(Signed) W. F. McCLURE.
State Engineer.

HIGHEST PIPE LINE IN THE WORLD

It will be of interest to our readers to hear that again "California knows how," the latest achievement for the Golden State is the construction of a Pipe Line running from the Midway Oil Fields in Kern County through the city of Los Angeles to the harbor at San Pedro, a distance of 154 miles. This line while in no sense the longest Pipe Line in California, reaches a higher altitude than any other Pipe Line in the World, crossing the mountains at an elevation of 4220 feet. The pipe is buried in a trench eighteen inches by thirty-six inches, being first painted with hot asphaltum and covered with half ply mule hide covering supplied by the Thunder Distributing Company of San Francisco. The amount of covering required is 2,560,000 square feet, this is one of the largest single orders for ready roofing ever placed on the Pacific Coast. Considerable study was given to the question of a suitable covering, and it was finally decided that Mule Hide was the most efficient covering on the market for the protection of a steel pipe running through a country heavily impregnated with various kinds of salts. The Pipe Line Company is controlled and directed by Captain John Barenson, E. J. de Sabla, Frank W. Griffin, Louis Sloss and other well known business men. The Engineer for the Pipe Line Company is Roy E. Marstens, well known among the engineers of the Pacific Coast.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Armory—1 story and base, steel and reinforced concrete, $300,000. San Francisco. Engineer, State Engineer McClure, Sacramento. Owners, State of California. This work has been mentioned here a number of times before. Plans were recently out for figures and a contract was supposed to have been let to Lewis Hicks & Co., of this city. The State Board of Control, however, were not satisfied with the manner in which bids were submitted and decided to reject all figures and readvertise. Bids are now being taken and will be opened on July 29th.

Residence—2 story, attic and base, frame, $12,500. San Francisco. Architects, Havens & Tiepke, 46 Kearny St., S. F. Owner's name withheld. This dwelling will contain in the neighborhood of ten rooms and three baths. There will be sleeping porches and a laundry. The interior finish will be of hardwoods throughout. The floors will be of oak. There will be furnace heat and open fire places. The mantels will be of both brick and tile. Tile in will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. The architects are now completing the working drawings.

Hotel—5 story and base, brick and steel. Cost not stated. San Francisco. Architect, Ralph Warner Hart, Humboldt Bank Bldg. S. F. Owners, Bellow Estate. This building was mentioned here last week at which time it was stated that the structure was to be of the reinforced concrete type. As stated above the construction will be of brick and steel. Plans are still being figured.

Garage—3 story and base, brick, $35,000. San Francisco. Architect, Herman Barth, 12 Geary St., S. F. Owner's name withheld. The building is to be erected at the corner of Van Ness avenue and Bush street. The building has been designed for a commercial garage and display rooms. The interior will be finished in pine and hardwoods. All floors, except the first floor will be of wood. There will be a steel frame, exterior walls of brick faced with pressed brick. There will be an electric elevator. The electric work will all be carried in conduit. Plans for the building are now being prepared.

Apartment House—3 story and base, frame, $7,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, S. Show, 1235 Pine St., S. F. The building will be 27x125 feet and has been arranged for twelve modern apartments of two three and four rooms each. There will be private baths and wall beds in all apartments. The building will have steam heat. The interior trim will be of pine and redwood. The exterior will be covered with cement plaster on metal lath and sciplap. Plans are complete and the owner will do the work by Day Labor.

Flats—1 story and base, frame, $6,000. San Francisco. Architect, owner, R. W. Moller, 180 Jessie St. S. F. The building has been designed for two large flats of six and seven rooms and bath each. The interiors will be finished in pine with some hardwood floors. There will be gas grates and tile mantels. The exterior will be covered with brick veneer and shiplap. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $2,000. San Francisco. Architect, none. Owner,. Ted Berggwist, 3931 21st St., S. F. The dwelling will contain six rooms and bath. The interior will be finished in pine with some oak floors. There will be an open fire place in the living room with a tile mantel. The exterior will be covered with shingles. Plans are in the hands of the owner and the work will be done by Day Labor.

Apartment House—7 story and base, brick and steel, $100,000. San Francisco. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, Soule Dolliver. The building will be erected at the corner of California and Stockton streets, one of the few choice apartment house sites now vacant. The plan provide for thirty large apartments all with connecting baths, wall beds and private entrances. There will be steam heat, elevator service and a vacuu mcleaning system. The interior will be finished in redwood and white enamel. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Flats—3 story and base, frame, $6,000. San Francisco. Architect, O. E. Evans, 2367 Mission St., S. F. Owner, G. Cavagheri, 593 Potrero Ave., S. F. The building will contain three flats of five and six room each. There will be modern plumbing, including baths. The interior trim will be of pine, redwood and elm. There will be gas grates and tile mantels. The exterior will be covered with glazed brick veneer and cement plaster on metal lath. The plans are in the hands of the owner and the work will be done by Day Labor.

Hotel—3 story and base, brick, $17,000. San Francisco. Architect, Joseph Cahen, 45 Kearny St., S. F. Owners, W. J. Yore and B. E. Bauske. The building will cover an area of 50x77 feet. Plans provide for stores on the first floor and a number of single rooms and baths on the upper floors. The interior trim will be of pine throughout. There will be running water in all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Hotel—4 story and base, brick and steel, $40,000. San Francisco. Architects, Falch & Knoll, Hearst Bldg., S. F. Owners, Louis Haas and C. Cohen, 235 Russ Bldg., S. F. This work has been mentioned here before when the architects were preparing the plans. The working drawings are now complete and out for figures. Bids are being taken by the owners. The plans provide for a building containing in the neighborhood of 75 rooms nearly all of which will have connecting

Residences—3, 2 story and base, frame, $3,000 to $4,000 each. San Francisco. Architect, Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. Phelan Bldg., S. F. These dwellings will range from six to seven rooms and bath each. The interiors will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile and brick. Tile will be used in the baths and kitchens. The exteriors will be covered with cement plaster on metal lath and brick veneer. Plans are complete and the owners are now purchasing all materials. The work will be done by Day Labor.

Hotel—7 story and base, brick and steel. Cost not stated. San Francisco. Architect, W. H. Weeks, Charleston Bldg., S. F. Owner, Howard G. Anderson. This building will be erected on Fifth street between Market and Mission streets. The site is 50x75 feet. The first floor will be arranged for stores, the office and lobby of the hotel. The upper floors will be divided into single rooms, a large percentage of which will have connecting baths. There will be steam heat, elevator service and running hot and cold water. The exterior of the building will probably be faced with pressed brick. Plans are now being prepared. baths. There will be steam heat and elevator service. The interior will be finished in pine and redwood. The exterior will be faced with pressed brick.

Bungalow—1 story and base, frame, $2,000. San Francisco. Architect, none. Owner, R. Miller, 113 Wool St., S. F. The dwelling has been designed for a six-room bungalow with bath. The interior will be finished in pine and redwood throughout. There will be open fire places with brick mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done byDay Labor.

Warehouse—1 story and base, brick or concrete, $50,000. San Francisco. Architects, Ross & Bergren, 310 California St., S. F. Owner's name withheld. The building will be erected adjacent to the Southern Pacific tracks and will cover a large ground area. There will be freight elevators. The construction will be fire proof. Plans have not progressed far enough to give details of the work. The architects have just started the working drawings.

Hotel Addition—3 story, brick and steel. Cost not stated. San Francisco. Architect, W. H. Weeks, Charleston Bldg., S. F. Owner, Amos Lester. This work will be started within a short time. The three floors will contain in the neighborhood of 65 rooms and a number of baths. There will be elevator service, steam heat and running water. The additional floors will be carried on a steel frame. The exterior will be faced with pressed brick. Working drawings are now being prepared.

Residence—2 story, attic and base, frame, $15,000. San Francisco. Architects, Havens & Toepke, 46 Kearny St., S. F. Owner F. L. Hilmer. The dwelling will be erected in the Jordan Tract and will contain about ten rooms, baths, sleeping porches, laundry and garage. The interior will be finished in pine, redwoods and hardwoods. The floors throughout will be of oak. There will be furnace heat, open fire places and brick or tile mantels. Tile will be used in the baths and kitchen. A vacuum cleaning sys-

tem will be installed. The exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

Flats, Alterations and Additions—$3,000. San Francisco. Architect, none. Owner, William S. Morse, 7 Devisadero St., S. F. The work will consist of the alteration of a three-story frame building into modern flats. The exterior work will be of shiplap and brick veneer. The interior finish will be of pine and redwood. There will be new plumbing, electric work and plastering. Plans are complete and the work will be done by Day Labor.

Hotel—6 story and base, brick and steel, $125,000. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owner, Annie M. Faxton. The building will be erected at the corner of Fourth and Mission streets and will cover a large area. There will be stores on both street frontages besides the hotel lobby and office. The upper floors will contain over 200 single rooms and baths. The mechanical equipment will include steam heat, elevators, a hot water system and vacuum cleaning. The interior will be finished in pine and redwood. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Store Alteration—Brick construction, $2,000. San Francisco. Architect, A. D. Nicholson, 20 Montgomery St., S. F. Owner, Abe Schoenfeld. This work will consist of the alteration of an undertaking parlor, and will include new interior trim and decoration, electric work, plumbing and plastering. Plans are complete and the work will be done by Day Labor.

Apartment House—3 story and base, frame, $10,000. San Francisco. Architect, Phillip Schwerdt, Phelan Bldg., S. F. Owner, Charles Rebman. This building will cover an area of 64x100 feet and has been arranged to contain twenty-four apartments all with connecting baths and wall beds. The interior finish will be of pine and redwood. There will be steam heat and elevator service. The exterior of the building will b covered with Caen stone veneer to the water table and with cement plaster on metal lath above that point. Plans are complete and the architect will award a contract this week.

Stores and Hall—2 story and base, brick and steel, $25,000. San Francisco. Architect, Frank S. Holland, 100 Haight St., S. F. Owner, Emma S. Owens. This work has been mentioned here before. The building will cover an area of 75x160 feet. There will be a restaurant on the first floor, bakery in the basement and a billiard hall on the second floor. The interior of the restaurant and billiard hall will be finished in tile and hardwoods. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Garage—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Whittell Real Estate Co., 166 Geary St., S. F. Owners, Whittell Real Estate Co., S. F. This building will be erected on Taylor street near Eddy and will cover an area of 80x136 feet. The entire building has been designed for a commercial garage. There will be a cement floor. Besides the storage space the building will contain the office and a machine shop. The exterior will be faced with cement plaster. Plans are now being prepared.

School—3 story and base, reinforced concrete, $100,000. San Francisco. Architect, William C. Hayes, Foxcroft Bldg., S. F. Owners, Trustees of the Wilmerding School of Industrial Arts. This is the first of several extensive buildings which are to be erected by this institution on their property at 17th and Potrero streets. The first building will contain several departments for manual training and a large department of domestic economy. The construction will be fire proof throughout. There will be a central steam heating plant and a modern system of ventilation. The exterior of the building will be faced with cement plaster. Plans have been out for figures and a contract will be awarded this week.

Apartment House—3 story and base, terraced frame, $50,000. San Francisco. Architects, Ross & Bergren, 310 California St., S. F. Owners, Greenwich Terrace Householders' Association. The owners have purchased also an entire city block commanding one of the finest views in the city and will improve the same with several high class apartment house buildings, the above being the first of these structures. The design is in the Spanish Mission style, with cement exterior and red clay tile roof. The apartments will be arranged in large suites. The interior will be finished in pine and hardwoods. There will be steam heat and wall beds. Plans for the first building are complete and figures are now being taken.

Fire House—1 story and base, frame, $5,000. San Francisco. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. This building will be erected at 19th Ave. and King street and is a temporary structure. Plans have been completed and bids will be called for this week.

Flats—2 story and base, frame, $3,500. San Francisco. Architect, none. Owners, McKillop Bros., 540 Cole St., S. F. The building has been designed to contain two modern flats of five and six rooms each with bath. The interior will be finished in pine and redwood. There will be gas grates and tile mantels. The exterior of the building will be covered with cement plaster. Plans are in the hands of the owners and the work will be done by Day Labor.

Stores—1 story and base, frame, $3,000. San Francisco. Architects, Salfield & Kohlberg, Clunie Bldg., S. F. Owner, Paul Barbieri. The building will be erected in the Richmond District and has been designed for two stores. There will be plate glass windows and pine trim. The exterior of the building will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base frame, $2,000. San Francisco. Architect none. owner, Daniel Wolf, 654 Alvarado St., S. F. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood throughout. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with rustic. The plans are complete and the work will be done by Day Labor.

Stores—1 story and base, brick and steel, $10,000. San Francisco. Architects, Havens & Toepke, 46 Kearny St., S. F. Owner J. E. Scully, Phelan Bldg., S. F. This building has been designed with foundation walls of sufficient strength for four more stories. The interior trim will be of pine. There will be patent store fronts and plate glass windows. The exterior will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Police Station—2 story and base, reinforced concrete, $35,000. San Francisco. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for a station, which is to be erected at Greenwich and Scott streets are complete, and figures for the work will be called for by the end of this week. The official proposal will be published in these columns.

City Bids Opened.

The following bids were received at Wednesday's meeting of the Baard of Public Works for the electric work in connection with an electric time system to be installed at the San Francisco Hospital:

General Elec Constr Co.....	$14,600
John G. Sutton Co.....	14,111
Butte Eng. & Elec. Co.....	12,650
McFell Elec. Co.....	14,000

The Value of "Atelier Work" for Architectural Draftsmen.

It is noteworthy that the architects who entered the competition for the San Francisco City Hall preferred the services of draftsmen active in "Atelier" work.

Attention was drawn to this fact when a number of advertisements calling for draftsmen were posted on the bulletin board of the San Francisco Architectural Club. In nearly every instance the ad read, "Atelier men preferred."

Owing to the fact that seventy-three architects competed and only fifty or sixty local draftsmen were experienced in this line of work, the demand for "Atelier" men could not be supplied.

This was and unfortunate state of affairs and more than one-half of the competing architects were unable to secure competent men to do the drawing and rendering for them.

Some of the architects who realized the importance of having men familiar with monumental design and could not secure them here were obliged to bring men out from New York and other eastern cities.

It is of interest to know that the majority of the architects, who won prizes, secured the services of members of the San Francisco Architectural Club "Atélier" to do the drawing and rendering.

The draftsmen in the office of Architects Bakewell & Brown, who won the first prize, are all members of the local club "Atelier," and received their training in monumental design under the direction of the club's patrons, Messrs. Arthur Brown, Jr., and Geo. W. Kelham.

SAN FRANCISCO BUILDING PERMITS ISSUED WEEK ENDING JULY 12, 1912.

Class "A"	1	$125,000
Class "B"	1	200,000

OAKLAND AND ALAMEDA COUNTY.

Theatre—1 story and base, brick and steel, $15,000 Alameda, Alameda Co., Cal. Architect, C. F. King, Hotel Shattuck, Berkeley. Owner's name withheld. The building has been designed for a moving picture house. The seating capacity will be about 350 people. There will be a system of heating and ventilation. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Bungalow—1 story and base, frame, $2,300. Oakland, Cal. Architect, none. Owner, Edward Larmer, 631 Poirier St., Oakland. The house has been designed to contain five rooms and bath. The interior will be finished in pine throughout. Floors in the dining room and den will be of oak. There will be open fire places and tile mantels. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,250. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph Ave., Oakland. Owner, Ellis C. Wilson. This house has been designed to contain eight rooms, bath and sleeping porch. There will be furnace heat and open fire places. The interior will be finished in pine with some oak floors. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now nearing completion.

Schools—1, 2 story. Class A construction. $100,000 and 1, 1 story, concrete, $42,500. Oakland, Cal. Architect, City Architect Donovan, Oakland. Owners, City of Oakland. Preliminary plans have been approved by the Oakland Board of Education for the College Avenue School and for the Peralta Heights School. Plans for the College Avenue School were prepared by Architect Walter D. Reed, Oakland Bank of Savings Bldg., and call for a two-story and [illegible] building, costing $100,000. There will be thirteen class rooms. The plans

for the Peralta Heights School show a building one story in height containing six class rooms and a branch of the City Library. The cost will be $12,500. Plans for both of these buildings are in the hands of City Architect Donovan, and complete drawings will be worked out under his direction.

Residences—2 story and base, frame, $5,000 each. Oakland, Cal. Architect, none. Owner, Lester Reiff, Grand Ave., Oakland. Each of these dwellings has been designed for a seven room house with sleeping porch and laundry. The interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. Tile will be used in the baths and kitchens. The exteriors will be covered with cement plaster on metal lath. Plans are now in the hands of the owner who is taking figures on all parts of the work.

Gardner's Cottage and Pump House—Frame, $3,000. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 601 Mission St., S. F. Owner, Duncan McDuffie. The buildings will be erected on the owners estate in Berkeley. The interior of the cottage will be finished in pine. The exterior will be covered with rustic and shingles. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,500. Oakland, Cal. Owner, W. F. Vane, Mills Bldg., S. F. The dwelling will contain eight rooms and bath. The interior will be finished in pine with some white enamel. There will be oak floors in the dining and living rooms. The house will have furnace heat and open fire places. The mantels will be of tile or brick. The exterior will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Stores and Offices—7 story and base, brick and steel, $125,000. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, John M. Locke. This building will be erected at the northwest corner of 14th and Jefferson streets. The first floor will be arranged for several stores and an attractive entrance to the upper floors. The six upper stories will be subdivided into modern offices. There will be elevator service, steam heat, mail chutes and a vacuum cleaning system. The trim will be largely of oak. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

Residence—2 story and base, frame, $6,000. Berkeley, Alameda Co., Cal. Architect none. Owner, Louis Engler, 2711 Parker Ave., Berkeley. The dwelling has been designed for a nine-room house with sleeping porches, bath and laundry. The interior trim will be of pine throughout. There will be furnace heat and open fire places. The mantels will be of tile and brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,500. Oakland, Cal. Architect, W. G. Thornally, 3027 E. 16th St., Oakland. Owner, James Hennessey. The house will contain six rooms and bath. The interior will be finished in pine with some oak floors. There will be open fire places and tile or brick mantels. The exterior will be covered with shingles. Plans are complete and the architect is taking figures on the work.

Flats—2 story and base, frame, $8,000. Oakland, Cal. Architect, none. Owner, E. A. Schmidt, Oakland. The building will cover a considerable area and will contain four flats of five and six rooms each. There will be gas grates and tile or brick mantels. The exterior of the building will be covered with sidlap and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $5,500. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Mrs. K. E. Morris. The dwelling will contain ten rooms, sleeping porches and a laundry. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be furnace heat and a Rood boiler. In the living room and dining room will be large open fire places with brick mantels. The exterior will be covered with cement plaster on metal lath. Plans are now out for bids.

Stores and Offices—4 story and base, Class A construction. Cost not started. Oakland, Cal. Architect, A. W. Smith, Into Broadway, Oakland. Owner, R. W. Kinney. The architect has only started the preliminary plans for this work and the details of the construction cannot be given at this time. The same architect is preparing plans for another large office building and wants names for Blue Trap rock veneer.

Residence—2 story and base, frame, $4,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Charles Mayer. The dwelling has been designed for an eight-room house with bath, laundry and sleeping porches. The interior will be handsomely finished in redwood with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior will be covered with cement plaster on metal lath. Architect Thomas is completing the working drawings.

Bungalow—1 story and base, frame, $2,300. Oakland, Cal. Architect, none. Owner, A. C. Wiehen, 1831 34th Ave., Oakland. The bungalow will contain 5 rooms and bath. The interior will be finished entirely in pine. There will be open fire places. Fifty dollars has been allowed for mantels. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,500. Berkeley, Alameda Co., Cal. Architect, John Sullivan, 6452 Harmon Court, Oakland. Owner, Mrs. Edward C. Dunn. The dwelling will contain eight rooms, bath and sleeping porch. There will be furnace heat and open fire places. The mantels will be of tile. The interior of the dwelling will be finished in pine with oak floors in the principal rooms. Tile will be used in the bath and kitchen. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

School—1 story and base, reinforced concrete and brick, $100,000. Berkeley, Alameda Co., Cal. Architect, State Dept. of Engineering, Sacramento. Owners, State of California. Revised plans for this building have been completed and are now being figured. Bids for the construction will be opened on July 19th. The building will form a part of the improvements which are contemplated for the State Institution for the Deaf, Dumb and Blind at Berkeley. Plans for this work are on file at this office and the official proposal appears in this issue.

Residence—2 story and base, frame, $3,500. Alameda, Alameda Co., Cal. Architect, Frederick Soderberg, Union Savings Bank Bldg., Oakland. Owner, Capt. C. H. Williams. The house has been designed for a six-room dwelling with bath, sleeping porch and laundry. The interior will be finished in pine, redwood and Australian red gum. There will be some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Architect Soderberg is now taking figures.

Bridge—Reinforced concrete, $75,000. Niles, Alameda Co., Cal. Engineer, County Surveyor P. A. Haviland, Oakland. Owners, Alameda County. The bridge will be 400 feet long and 30 feet wide. The structure will be entirely of reinforced concrete. The exterior will be covered with Gunite, applied with the Cement Gun. Plans have been approved and bids are now being called. Bids will be opened on July 22.

Auditorium—1 and 2 story and base, concrete and steel, $100,000. Oakland, Cal. Architects, Reed & Meyer, Oakland Bank of Savings Bldg., Oakland. Owners, City of Oakland. Plans for this building have been accepted by the Council and construction will be started as soon as bids on the work can be secured. The structure is arranged around a central court. The construction will be of concrete, steel and wood. There will be a central heating system. The architects' preliminary plans have just been approved and full details cannot be obtained at this time.

Stores and Lofts—3 story and base, brick and steel, $40,000. Oakland, Cal. Architects, Reed & Meyer, Oakland Bank of Savings, Oakland. Owner, M. J. Lavinance. The present plans are so arranged that four more stories may be added in the future. There will be stores on the first floor and large light lofts on the upper floors. The plans provide for steam heat and elevator service. The exterior of the building will be faced with stone to the second floor line and with cement plaster decorated with ornamental metal above that point. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $3,500. Oakland, Cal. Architect, Leonard Thomas, 612 Broadway, Oakland. Owners, Taylor Bros., 1462 Broadway, Oakland. The dwelling has been designed for an eight-room house with bath and sleeping porch. The interior will be finished in pine with hardwood floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base frame, $4,000, Berkeley, Alameda Co., Cal. Architect, Sidney B. Newsom, Nevada Bank Bldg. S. F. Owner, C. H. Rundie. This work has been mentioned here before. Plans are complete and figures are now being taken. The dwelling will contain six rooms, bath, sleeping porch and laundry. The interior will be finished in redwood with some oak floors. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with rustic and shakes.

Fire House—2 story and base, frame, $6,000. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Oakland. The building will be erected in the outskirts of the city. There will be a cement floor and steam heat. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $4,500. Oakland, Cal. Architect none. Owner, C. E. Quigley, b64 Van Buren Ave., Oakland. The dwelling will contain seven rooms and bath. The interior finish will be of pine and redwood with oak floors in the dining and living rooms. There will be furnace heat and open fire places. The mantels will be of tile. Tile will be used in the bath. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Fire House—2 story and base, frame, $6,000. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owners, City of Oakland. The building will be identical with the other structure now being figured. There will be steam heat, pine trim and cement floor on the first story. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

Church—Class A construction, $150,000. Oakland, Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Methodist Church of Oakland. Contractors, Schneibly-Hostrawser-Pedgrift Co., Broadway, Oakland. Note: This contract has been awarded on a percentage basis and only the estimated cost of the building can be given.

SAN JOSE AND SANTA CLARA VALLEY.

Convalescent and Assembly Buildings—2 and 3 story and base, concrete and steel. Cost not stated. Agnews, Santa Clara Co., Cal. Engineer, State Engineer McClure, Sacramento. Owners, State of California. Plans for both of these buildings are now practically complete and bids will be called for at once. The work will be figured both as a whole and segregated. Plans will be on file at this office. Bids will be opened on July 31st.

Garage—1 story and base, frame. Cost not stated. Saratoga, Santa Clara Co., Cal. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, James D. Phelan. The building has been designed for a private garage and will complete the recent improvements made to the owner's country home. There will be a cement floor. The exterior will be covered with cement plaster. Plans are complete and the work will be done by Day Labor.

Bids Opened For San Jose Elks.

Bids Opened for the San Jose Elks' Hall Show Morrison Bros. Low on General Construction.

The following bids have been received by the Building Committee of the San Jose Elks' Hall Association. Plans for this building were prepared by five San Jose architects, all members of the order. The working drawings were prepared in the office of Architect William Binder, Rea Bldg., San Jose. The building will be a four-story and basement Class "C" structure and is to be erected at the corner of First and St. Johns streets. The general contract has been awarded to Morrison Bros., Santa Clara, at $74,781, and the electric work to Faser Bros., of San Jose at $1489. The following is a complete list of the figures submitted:

General Construction.

Schnebly, Hostawser, Pedgrift Co., Broadway, Oakland, $75,499.
R. O. Summers, San Jose, $74,800.
Morrison Bros., Santa Clara, $74,781.
D. J. Byron, San Francisco, $81,987.
Z. O. Field, San Jose, $78,340.
Burt Owsley, San Francisco, $79,775.

Electric Work.

Globe Elec. Co., Monterey, $1991.
Garden City Elec. Co., San Jose, $2033.
Faser Bros., San Jose, $1489.
Century Elec. Co., San Jose, $1533.

Building Contracts Awarded.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Hotel—3 story and base, brick and tile. Cost not stated. Los Angeles, Cor. N. Lourdon, Merchants Trust Bldg., L. A. Owner, Morris Tois. The building will contain two stores on the first floor and 34 single rooms and two baths rooms on the upper two floors. There will be steam heat. The interior trim will be of oak throughout. The exterior will be faced with pressed brick. The architect is preparing the working drawings. Bids will be called for shortly.

Lofts—1 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architect, Home. Owners, Ivy Tractor Co. The work is being handled through the offices of the Mesker Realty Co., 617 Maple St., L. A. The building will be 50x110 feet. Concrete is to be cut and of extra fine construction. Doors and windows will be of metal. The excavation is now being done by M. A.

Howland. Factory Place, and the balance of the work will probably be carried on by Mr. Howland.

Residence—2 story and base, frame. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, C. E. Wolf, Pomona. Owner, H. H. Benham. The dwelling will contain a number of living rooms, bed rooms and bath. The interior will be finished in pine with some oak floors. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster. Plans are complete.

Post Office—2 story and base, brick, $40,000. San Pedro, Los Angeles Co., Cal. Architect, Oscar Wendroth, Washington, D. C. Owners, United States Government. The House Committee on Public Buildings has agreed to include an appropriation of $40,000 for the construction of this building. A site will be selected at once and plans prepared.

Apartment House—4 story and base, brick and steel, $45,000. Los Angeles, Cal. Architect, H. A. Cole, 631 Spring St., L. A. Owners, Union Realty Co. The building will cover an area of 55x150 feet. The interior has been arranged for 74 apartments of three rooms and bath each. All suites will be equipped with wall beds. There will be steam heat and elevator service. A vacuum cleaning system will be installed. The interior finish will be of pine and hardwoods. The exterior of the building will be faced with pressed brick. Plans are now nearly complete.

School—2 story and mezzanine, reinforced concrete and brick. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architect, State Department of Engineering, Sacramento. Owners, State of California. The plans, which are now out for figures, show a building designed for a department of Manual Arts and Domestic Economics in connection with the State Normal School at Santa Barbara. The structure will be practically fire proof. There will be several large departments designed for the special use of the two sciences. The exterior will be faced with cement plaster. Plans are on file at this office and bids will be opened on July 30th. Bids are being taken on the work as a whole and on segregated contracts.

School—Group of nine buildings, brick and steel or reinforced concrete. Cost not determined. Los Angeles, Cal. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, City of Los Angeles. The present scheme contemplates the erection of nine buildings. The main building, science, library, fine arts, domestic science and training school buildings will be two stories, and the manual arts, gymnasium and power plant buildings one story in height. The style of the construction has not been determined, but will probably be either reinforced concrete or brick faced with tapestry brick. It is not definitely settled whether the construction will be strictly fire proof or semi-fire proof. The cost of the buildings has not been estimated, but it is thought that if $650,000, or more, is realized from the sale of the present site all the buildings can be erected at once without any appropriation from the State Legislature.

Stores and Offices—3 story and base, brick. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architects, R. B. Young & Son, Lankershim Bldg., L. A. Owner, George Nicholson. The building will be 50x100 feet. There will be three stores on the first floor and a number of office suites on the upper floors. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Apartment House—3 story and base, frame, $31,000. Los Angeles, Cal. Architect, none. Owner, W. H. Griswold, 416 East Ave. 28, L. A. The building will be 50x120 feet and will contain 60 rooms arranged in suites of two and three rooms each. There will be wall beds, connecting baths and steam heat. The interior will be finished in pine and redwood. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Church—Concrete and brick construction. Cost not stated. Los Angeles, Cal. Architect, John C. Smith, H. W. Hellman Bldg., L. A. Owners, Fourth Church of Christ Scientist. The building will be erected on So. Hill street near First and will be of concrete and brick construction. There will be a main auditorium seating in the neighborhood of 1,200 people. Besides the auditorium there will be a Sunday school room, parlors and reading rooms. The architect has just received the commission to prepare the plans.

Hotel—14 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Parkinson & Bergstrom, Security Bldg., L. A. Owner, John Parkinson. Architect, Parkinson has just purchased the property at the southwest corner of 6th and Figueroa streets, covering an area of 90x120 feet. It is stated that he intends to erect a large hotel on the site. No details of the building are obtainable as yet.

Apartment House—4 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, J. William Roberts, 2340 West 13th St., L. A. Owner, J. William Roberts. The building will contain 76 rooms, divided into two and three room apartments with connecting baths and wall. The interior will be finished in pine and hardwood with some oak floors. There will be steam heat, elevator service and a vacuum cleaning system. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Church Additions—Frame construction, $15,000. Pomona, Los Angeles Co., Cal. Architect Robert H. Orr, State Bank of Pomona Bldg., Pomona. Owners, First Methodist Church. This work has been mentioned here before. The present building will be converted into a Sunday school and a new portion added. Plans are complete and bids will be opened on July 20th.

Factory—1 story and base. Cost not stated. Los Angeles, Cal. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owners Imperial Cotton Works. The structure will cover an area of 130x120 feet. The walls will be designed to carry an additional story. There will be a concrete floor, fire proof doors and a system of ventilation. The exterior will be of stock brick. Plans are complete and figures are being taken.

Warehouse—1 story and base, frame and iron. Cost not stated. Long Beach, Los Angeles Co., Cal. Archi-

Wesco Flat Oil Paint

An improved, sanitary flat paint for interior finishing. Gives very fine finish.

MADE ON THE COAST — WESCO — WEST COAST KALSOMINE COMPANY — NOBEL, ALAMEDA CO., CALIFORNIA

Wesco Kalsomine

Spreads easily, does not decay and gives soft, rich surface. Can be washed off when desired.

Cold Water Paint

The most economical paint on the market. When you buy **Wesco Cold Water Paint** you pay only for paint and not for high-priced oils. It can be used on exterior or interior surfaces. It dries very quickly, is non poisonous, a strong disenfectant and does not turn yellow with age. **Wears well** and is an excellent fire retardant.

Concrete Paint

The best paint in the world to use on damp places. It can't be equaled in painting tunnels, arches, cellars or any other place where dampness exists. Makes the finest possible finish for the interior of factories and other buildings where there is loose steam and damp vapors.

SEND FOR COLOR CARDS

WEST COAST KALSOMINE CO.

Hotel—3 story and base, brick, $20,000. Los Angeles, Cal. Architect, S. Tilden Norton, Title Insurance Bldg., L. A. Owner, Mrs. Jennie Gans. Contractors, Gans Bros., 211 North Main St., L. A. Contract price, $20,000.

Hotel—10 story and base, reinforced concrete. Cost not stated Los Angeles, Cal. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner's name not given. General construction, Alta Planing Mill Co., 830 McGarry St., L. A., $124,034; electric wiring, Newberry-Bendheim Co., Stimson Bldg., L. A., $4,888; plumbing and heating, Howe Bros., L. A., $29,821, and elevators, Otis Elevator Co., L. A., $8,100.

School—1 story and base, brick. Cost not stated. Sawtelle, Los Angeles Co., Cal. Architects, Tuttle & Hopkins, Delta Bldg., L. A. Owners, Sawtelle School District. Contractor, J. E. McCutcheon, 2006 6th St., Santa Monica, general construction, $13,257; Thomas J. Low, Sawtelle, plumbing, $771, and Machinery and Electric Co., 351 North Main St., L. A., heating and ventilating, $939.

College buildings, 3, 3 storyI k

College Buildings—3, 3 story and base, reinforced concrete $180,000. Eagle Rock Valley, Los Angeles Co., Cal. Architect, Myron Hunt, Herman Bank Bldg., L. A. Owners, Occidental College. Contractors, Richards-Neustadt Co., Wright and Callender Bldg., L. A., general construction, $180,000. Note: This contract does not include the plumbing, heating and blackboards.

School—2 story and base, brick. Cost not stated Los Angeles, Cal. Architect, Frank G. Krucker, Ferguson Bldg., L. A. Owners, City of Los Angeles. Contractor, Alex. Grant, 1261 West 37th St., L. A., general construction, $57,793. Note: This contract does not include the heating and ventilating or plumbing.

Depot and Maintenance Building—Hollow tile construction, $20,000. Torrence, Cal. Architect, Irving J. Gill, Title Insurance Bldg., L. A. Owners, Dominguez Land Co. Contractors, California Real Estate and Building Co., 631 Co. Spring St., L. A. Contract price, $20,000.

SEATTLE AND WASHINGTON.

Stores—2 story and base, reinforced concrete, $110,000. Seattle, Wash. Architect, James H. Schack, Downs Bldg., Seattle. Owner, T. S. Lippy. This building will cover a ground area of 120x120 feet. There will be a number of stores on the first floor, besides a theatre. The upper floor will be arranged for single rooms and offices. The exterior will be faced with glazed terra cotta. Plans are complete and figures are being taken.

Drainage System—Cost not stated. Sedro Woolley, Wash. Engineers, Hanford & Blackwell, Hoge Bldg., Seattle. Owners, State of Washington. The engineers have completed the plans for a drainage ditch, filter beds, sedimentation tank and pipe sewers, which are to be installed at the Northern Hospital for the Insane. Bids on this work will be opened on July 22.

Hospital—Group of eight reinforced concrete buildings, $90,000. Aberdeen, Wash. Architect, C. E. Troutman, Seattle. Owners, Chehalis County. According to information received through the office of the architect plans for the first unit of these buildings will be completed by August 1st and bids will be called. Other than the above no information has been received, but complete details of the

work will be published later.

Bank—6 story and base, steel and concrete. Cost not stated. Bellingham, Wash. Architect, John Graham Lyon, Bldg., Seattle. Owners, Bellingham National Bank. The building will cover an area of 110x125 feet. There will be several stores besides the banking rooms on the first floor. The upper five floors have been arranged for offices. There will be steam heat, elevator service, mail chutes and vacuum cleaning system. The exterior of the building will be faced with pressed brick, granite and terra cotta. Plans are complete and figures are being taken.

School—2 story and base, reinforced concrete. Cost not stated. Friday Harbor, Wash. Architect, C. Lewis Wilson Co., Northern Bank Bldg., Seattle. Owners, Friday Harbor School District. The building will contain six class rooms and assembly hall. There will be a central heating system. The exterior will be faced with cement plaster. Plans are now being completed and bids will be called for shortly.

Schools—2, 2 story and base, brick and concrete, $65,000. Alki Point and Fort Lawton, Wash. Architect's name not given. Owners, Alki Point and Fort Lawton School Districts. A contract for the construction of both of these buildings was awarded to Ditleson & Gehring of Seattle last week, but failure on their part to produce a surety bond within the time limit has resulted in the rejection of all bids. New figures will be called for at once.

Theatre Alterations—Brick and steel construction, $40,000. Aberdeen, Wash. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owner, Alex. Pantages. Mr. Pantages has just secured a lease on a large two-story brick building and is having plans prepared for extensive alterations. The work will include the building of a stage, balcony and lobby. There will be structural steel, brick work, plumbing, carpentry, plastering and electric work. Plans will be completed as rapidly as possible.

Theatre—2 story and base, brick and steel, $40,000. Pasco, Wash. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, John Cort. This building has been described in these columns before. The plans are complete and the architect has announced that the work will be done by Day Labor. All bids for materials are being taken through the architect's office.

INTENSE BODY WHITE

Guaranteed to be Whiter, Finer, and Smoother, and to cover 50 per cent more surface than any strictly Pure White Lead. 57 lbs of **Intense Body White** and 3 1-2 gallons of oil will cover as much surface as 100 lbs of white lead and 5 gallons of oil. Ask for price.

DULOPAKE

(Satin Washable Wall Finish)

Absolutely Sanitary, Non Fading, Non Absorbant, and as washable as porcelain, defies the evils of Steam, Smoke, Water and Gas. Especially adaptad for Plastered Walls, but produces the same rich Velvety effect on burlap, canvas, or woodwork. Now being used extensively for undercoates in Enamel work. Ask for price.

MULE-HIDE ROOFING

(Not a kick in a million feet.)

Tough, Time tried, and True. Half, One, Two and Three ply. There are many roofings on the market but none better than MULE HIDE. Our first order in California amounted to 2,560,000 square feet or 22 car loads. We got the business on QUALITY & PRICE. Ask for price.

PORTLAND AND OREGON.

Courts and Jail—5 story and base. Class A construction, $200,000. Architects, Emil Schacht & Son, Portland. Owners, City of Portland. The building has been designed for a modern municipal structure and will contain the city courts, and other departments including the jail. The site takes in an entire quarter block. There will be a complete steel frame with exterior walls of concrete and brick. The exterior will be faced with granite and terra cotta. Plans for the excavating, foundation work and steel are complete and figures are being taken.

Hotel—3 story and base, stone and frame. Cost not stated. Portland, Ore. Architect, William J. Kratz, Portland. Owners, Syndicate of Portland capitalists. A fine country hotel is to be erected at one of the resorts near Portland and around the hotel will be developed a summer colony. The plans for the hotel show a building of irregular shape having a total frontage of 432 feet. The main body of the structure will be 100x200 feet. There will be in the neighborhood of 75 rooms and baths on each of the upper floors. The exterior will be of stone and shakes. Plans are being prepared.

Apartment House—7 story and base, reinforced concrete, $125,000. Portland, Ore. Architects, Whitehouse & Foulihoux, Portland. Owners, Wauna Land Co. This work has been mentioned here before. The building will cover an area of 68x100 feet and has been designed for apartments ranging from three to nine rooms in size. The construction will be absolutely fire proof. The interior will be finished in hardwoods and marble. There will be open fire places in all apartments. The mechanical equipment will include a cooling plant, steam heat, elevator service, dumb waiters and vacuum cleaning. The exterior of the building will be faced with granite and red pressed brick. Plans are complete and figures are being taken.

Library—1 story and base, brick and concrete, $10,000. McMinnville, Ore. Architect, Ernest Kroner, Portland. Owners, McMinnville Library Trustees. The building will be 72x30 feet. The basement will contain the mechanical equipment, work room and an auditorium. The first floor will be occupied by the reading room, rack room and office. The exterior will be faced with pressed brick. There will be hardwood trim and a central heating system. The plans will be complete and go out for figures on July 18th.

THE ABSURDITY OF THE OPEN ELEVATOR WELL

AN elevator, dumbwaiter or other kind of shaft creates, in case of fire, the most powerful and destructive draft imaginable. Fires naturally follow the direction of air currents. The more powerful the draft, the more surely and more quickly are the flames swept along by these air currents—growing in their ferocity and velocity.

Every one is familiar with the great rush of air up elevator wells—increasing proportionately to the height or depth of the shaft. Literally, these shafts are chimneys with an opening on each floor.

Flames are irresistibly drawn to the elevator well. They sweep to this, igniting all in their path, bursting forth at every opening. The rapid spreading of the fire is inevitable.

The absurdity of open elevator wells has been clearly demonstrated thousands of times. Even now, in many of our supposedly perfect buildings, this simple but no less positive rule has been ignored.

Every elevator shaft should be securely closed. It should not be possible for a fire to spread by the elevator shaft route. There is no excuse for any opening in the elevator shaft doors. If there is an opening, it should be closed with heavy wire glass. To willfully violate "what experience has taught" is openly inviting danger.

If nothing else in the building, present or future, is fireproof, the elevator well should be totally "boxed in" with The Dahlstrom Products. Better still, The Dahlstrom Products should replace all obsolete inflammable trim of a building which permits a fire to eat its way from room to room or floor to floor.

Complete literature may be had upon request from our nearest branch office or direct.

Discriminating Conduit Users Specify

CENTRAL RED

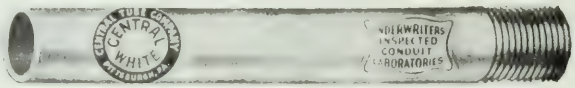
It Stands Out as the Best of Rigid Conduits

In the manufacture of this especially prepared conduit, we have taken advantage of every refinement known to the profession and have utilized the experience of producers of this class of material for the past twelve years, in evolving a coating for pipe that is an ABSOLUTE PREVENTATIVE of deterioration in the pipe under the most trying conditions.

The utmost care has been taken to thoroughly clean and to remove all scale and silicates before giving the pipe a coating of zinc by our own special process. This exterior coating is absolutely continuous, free from pin holes and other objectionable features. The coating of zinc prevents rust and insures against any deterioration in the pipe. Over the zinc exterior, two layers of our own especially prepared red enamel are coated, great care being observed to allow only a very thin layer to adhere to the threads, thus avoiding the necessity of re-cleaning them and to maintain perfect electrical contact. The red enameled interior provides a smooth, slippery raceway, facilitating fishing.

The salt air of sea coast cities, so injurious to all other classes of conduit, has no appreciable effect upon "CENTRAL RED," and we heartily recommend its use in these localities and wherever conditions are the most severe. It is especially adapted for use in CINDER CONCRETE.

"Try It Where Others Have Failed"



"CENTRAL WHITE"

is as good, if not better than competing brands of electro-galvanized conduit. Adequate protection from deterioration is insured by a heavy zinc coating. Couplings are removed during the electro-galvanizing, so that there may be no unprotected spots on the pipe.

"CENTRAL BLACK"

is especially recommended for its softness and easy working qualities. Our patented cleaning process gives us a product free from roughness.

APPROVED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS

Editorial Comment.

The registration for voters for the primaries to be held on September 3d closes August 3d. As yet but a comparatively few have registered. Voters should remember that the old registration died in May and unless you have registered since January 2, 1912, you are not entitled to vote at the primaries. Registration booths are provided for in different parts of the city and everyone should see that his name is on the list.

The presence of plague in Havana, Porto Rico and other places in the West Indies gives rise to the danger that it may enter this country from those islands. But that danger is relatively small to what it would have been years ago. Still as the disease is carried by the flea that lives on rats and vermin it may yet result in clearing many of these eastern cities of these loathsome pests. The Federal authorities are at present working hard to prevent the landing of any rats from the West Indies at any of the eastern or southern ports.

The Pacific Coast has had its campaign to extinguish the rat pest and all the seaports has had its crusade against the vermin. It has cost hundreds of thousands of dollars. Cement has been substituted for wood in sidewalks and basements and city ordinances provide for the ratproofing of basements and such construction as will prevent the harboring and breeding of rats in the cities. The fight must be constantly kept up for only by this method are the prevention of disease made possible.

Since the source of the disease has been determined the method of prevention has taken definite shape and has stamped out the peril. Garbage is disposed of in a sanitary manner. No place is left for the rats to live and nothing is left for them to eat so that their extermination is comparatively easy.

The Chronicle goes so far as to denounce Senator Root of New York in his attitude in siding with Great Britain in her protest against allowing ships in the coast wise trade free use of the Panama canal and points out that this course is in direct accordance with the predatory railroads.

It is hard to see what England has to do with the case and so far as published reports go there is no subsisting treaty by which we are bound to respect the rights of Great Britain in the premises, even if she has any color of right, which is not at all shown.

In the light of his record it is altogether probable that Senator Root would be the active ally and the adroit director of any scheme that might be fathered by the predatory interests. And this protest coming at this time from a foreign source and playing into the hands of the railroads looks very suspicious.

THE PROSPECTIVE ASSEMBLYMAN

Major W. S. Scott, Candidate For State Representative in the 28th Assembly District.

Major W. S. Scott, the well known Secretary of the California Building Law Association and The Contractors' and Dealers' Association of San Francisco, has filed his petition as candidate for the Assembly in the 28th District of San Francisco. At a meeting held at the Richmond Improvement Club rooms, at Fourth avenue and Clement street Thursday night, at which a large number of prominent citizens of the District were present, his candidacy was unanimously endorsed.

Major Scott has been a resident of the Richmond District for many years and has been prominently identified with the Improvement Clubs and the Progressive movement of the state. He is a native son and is well and favorably known throughout the state. Builders are well aware of the strenuous fight he made for the New Lien Law and his aggressive ability in championing any cause which he espouses.

With his wide acquaintance and knowledge of legislative procedure he will make a particularly strong assemblyman from the district he represents. His many friends among the builders will appreciate the fact that he is line to be one of the representatives of the state at Sacramento and will welcome the opportunity to work for the man who has so often and so ably represented them as a private citizen.

United States Government Specifications For Concrete And Mortar Material.

Specifications for concrete and concrete made with sand and mortar and mortar made with cement as the Navy Department March 5, 1912.

The following specifications govern in the case of all contracts of whatever form a part except in so far as they may be modified by the special specifications for the work.

I. Materials for Concrete and Mortar.

(a) Sand for concrete shall be clean and siliceous, and shall be of well-graded mixture of coarse and fine grains, with the coarse grains predominating. It shall be free from clay, loam, mud, organic matter, or other impurities. It shall be screened to remove all particles not passing a 1-inch mesh screen, unless in the opinion of the officer in charge the proportion of such particles is so small that the sand will perform as well without screening. Sand for concrete may contain not more than one per cent of salt when measured by volume. Salt in a test tube shall not cause it to subside. Other tests may be made by passing a 1-inch mesh screen and combining with that retained on a sieve not more than one-half of the sand by weight. The material which will pass the screen may be used in the concrete only in the same proportion as is used in the best suitable grades of natural sand. Sands of the kind may be ordered by the officer in charge for approval before using if desired.

(b) Sand for mortar shall be clean, and siliceous and shall conform to the grades of variation in size. It shall be free from clay, loam, mud, and vegetable or other impurities and also to the limit of 3% by weight of salt. It shall be screened if necessary, to remove all particles passing a 1-inch mesh screen. It shall be of such grade that it will pass a sieve having 4 meshes per linear inch. Fine sand may be used to make the mesh screen, may be screened out and measured as sand by volume as specified under "Sand for concrete."

(c) Crushed stone or gravel.—Broken stone or gravel shall be hard, durable particles free from dust, soft or flat pieces, vegetable matter, and other objectionable matter.

(d) Size of broken stone or gravel.—Material to be approved to size and shall be screened to remove dust. The limit given for the coarse material may be taken to mean that the voids shall be a minimum. For foundations of mass concrete the stone shall pass a 2-inch screen, and be retained on a ½-inch screen. In reinforced concrete the stone shall pass a 1-inch screen and be retained on a ¼ inch screen, but where the distance between the reinforcing strands is less than 2 inches the upper limits shall not be over ¾ in.

(f) Water.—Only fresh and clean water shall be used in mixing concrete and mortar.

(g) Cement shall be in accordance with the United States Government specifications for Portland cement as used by the Navy Department. Cement brought to the work in bags shall be stored by the contractor, immediately upon delivery, in a suitable weather tight and properly ventilated office having a floor raised above the ground. The cement shall be stored in such a manner as to permit easy access for proper inspection and identification of each shipment.

(h) The cement shall be tested in the usual way with regard to fineness, time of setting, tensile strength, and constancy of volume. All cement shall be subject to the usual 7 days' test after delivery to the work and shall be of the brand.

II. Measurement of Materials.

(a) Cement shall be measured by weight and not by volume and for the purpose of proportioning a barrel of cement (376 pounds) shall be taken as the equivalent of 4 cubic feet. A sufficient number of bags of cement shall be weighed at the mill to insure the required amount in each batch.

(b) Sand, broken stone, or gravel shall be measured in boxes for proportioning or other equivalent devices approved by the officer in charge.

III. Proportioning Materials in Concrete.

(Method A. Fixed volumes of sand and stone.)

(a) Mass concrete (1-3-6).—Foundations for buildings, in footing walls for buildings, in dams, piers, curtain walls, retaining walls, abutments, wall footings, concrete foundations, and mass concrete similar to these shall be composed of one part cement calling for 376 pounds to the cubic foot, three parts by volume of sand, and six parts by volume of broken stone or gravel.

(b) Reinforced concrete (1-2-4) in columns, beams, floor walls, etc., shall be composed of one part cement calling for 376 pounds to the cubic foot, two parts by volume of sand, and four parts by volume of broken stone or gravel.

(Method B. Fixed volume of stone and variable volume of sand.)

(c) Proportions of concrete under Method B will be used only when specifically required by the specifications for the work and shall be as follows.

Class A. One part cement (allowing 100 pounds to the cubic foot) to six and one-half parts by volume of broken stone combined with a variable proportion of sand.

Class B. One part cement (allowing 100 pounds to the cubic foot) to four and one-fourth parts by volume of broken stone combined with a variable proportion of sand.

(d) Determining amount of sand. It is the intention with the given amounts of cement and broken stone to secure concrete as dense as possible. The amount of sand to be added will therefore depend on the actual character on the sand and broken stone, and the number of cubic feet of sand to be added will be determined by frequent experiments and tests of the material as actually delivered and accepted during the progress of the work. The proportion will be established from time to time for each class of aggregate used and will not be changed during any period of 24 hours, unless the contractor desires to use material of different characteristics, and the proportion determined at any one time shall continue to be used until the next determination is made and the contractor has been ordered to change the previous proportions.

(e) Tests for amount of sand shall be conducted as follows. To a fixed volume (not less than 5 cubic feet) of dry stone, which shall be a representative sample add a fixed volume of dry sand. Mix these very thoroughly, so as to fill all the voids as uniformly as possible, and then measure and weigh the resulting mixture. Repeat the experiment with varying amounts of sand. Treat proportion of sand which gives the heaviest mixture per unit of volume as will be used in preparing the concrete. The labor and materials for the experiment shall be furnished by the contractor, but the experiment shall be conducted under the immediate supervision of the officer in charge.

(f) Run of crusher stone.—The specifications herein require the screening out of particles of broken stone and gravel below one-fourth inch in size. Under method "B" of proportioning materials, this will not be necessary if it can be shown by tests that the amount of fine material remaining in the stone or gravel is such that with addition of sand the resulting total of fine material below one-fourth inch size will be at least equal to the most suitable grades of natural sand. Tests must be made to determine that there is not an excess of fine material beyond that required to give the densest possible aggregate. Permission to use run of crusher stone as described in this paragraph must be previously obtained from the officer in charge of the work.

IV. Mixing Materials.

(a) Method of mixing.—Concrete shall be mixed by hand or by a mechanical mixer of a type to be approved by the officer in charge.

(b) Presence of inspector.—Concrete may be mixed and placed only in the

presence of an inspector, and the contractor or his agent shall give due and ample notice to the officer in charge when mixing is to be commenced. The officer in charge may reject any concrete mixed or placed without the presence of an inspector when such notice has not been given.

(c) Hand-mixing.—For mixing by hand use only strong, water-tight, built platforms, large enough to provide space for the partial simultaneous mixing of two batches, which shall not consist of more than 1 cubic yard each, shall be used. The sand and cement in specified proportions shall be spread in layers on the mixing platform, the sand at the bottom, and shall then be thoroughly and evenly mixed dry until of uniform color without streaks. Water shall then be added and thoroughly and uniformly incorporated. The sand and cement mixture shall then be placed on the broken stone, which shall have been previously wet down and placed in a layer on the board adjoining the cement and sand. The mixture shall then be worked up and turned over at least three times, not including shoveling from the platform to place of deposit or into the vehicle of transportation. The material on the shovel shall be completely turned over and not merely dropped from the shovel. The number of turnings shall be more than three if necessary to produce a thoroughly mixed concrete of uniform consistency throughout. The use of a take is permitted in mixing the sand and cement, but is forbidden after the stone has been added. The amount of water shall be such as to give the consistency specified elsewhere, and special care must be taken not to exceed the proper amount. Should an excess of water be added inadvertently, the batch shall be remixed with sufficient additional cement to take up the water. The details of the methods of hand mixing may be varied from the above by permission of the officer in charge, but the results must be substantially the same as produced by the method described.

(d) Machine mixing, if efficiently done, is ordinarily to be preferred to hand mixing. The mixer shall be tested at the beginning of the work to determine the most efficient size of batch and method of use. The material for each batch shall be carefully and accurately measured and introduced into the mixer. Water shall be introduced into the mixer during the process of mixing, and the amount shall be accurately measured to give the required consistency as determined by experience with previous batches. Should too much water be added inadvertently, the batch shall be remixed with sufficient additional cement to take up the water. The machine shall be of the batch type and shall produce a concrete thoroughly mixed and of uniform mixture and consistency superior to or at least equal to that produced by the hand mixing above described. The type of machine selected is subject to approval by the officer in charge. A machine of the continuous or of the gravity type shall not be used unless specifically permitted by the specifications for the work.

(e) Consistency. A medium or quaking mixture of tenacious jelly-like consistency which quakes under light ramming shall be used for all concrete except reinforced concrete. For reinforced concrete a very wet or mushy mixture shall be used, such as it will flow into the forms and around the reinforcement, but not so wet as to allow the materials to separate in handling or depositing. For hand-placed concrete, the maximum shall be slightly dryer.

V. Handling and Placing Concrete.

(a) Handling. Concrete shall be conveyed in deposited in such a manner that it will not have any separation of the different ingredients. Any concrete which has commenced to set before placing shall be rejected and immediately removed from the work and wasted in such manner as may be directed by the officer in charge.

(b) Placing. The specified consistency of the concrete will require only light tamping or spading. Along the face of the forms the concrete shall be spaded in such a manner as to force back the larger particles and bring the mortar to the surface of the form in order to avoid pits and irregular concrete after removal of the forms. Except in continuous laying, the concrete shall not be deposited upon that which has been laid less than twelve hours. The surface of this layer which is not thoroughly cleaned and wet, and then broomed with one-to-one cement wash before depositing the succeeding layer.

(c) Joints in reinforced concrete. All slabs shall be poured in the centers of beams and girders. Beams and girders shall be built in sections continuously from the center line of one girder or column to the next, no deeper girder being permitted to rest upon a shallower one unless both are built simultaneously. Where beams and girders intersect the same column, the joints shall be directly across the column so as to secure proper bearing for each.

(d) Protection of concrete from depositing. Concrete shall be protected from injurious action by the sun, rain, running water, frost or mechanical injury. In cold weather it shall be wet down frequently.

(e) Freezing weather. Concrete shall not be deposited in freezing weather nor at such times as it may be in the opinion of the officer in charge to be subjected to freezing weather while it is in the forms before deposited, except with the written authority of the officer in charge and then only under such conditions as he may impose. Concrete which has been frozen must in such manner as he may direct.

(f) Depositing under water. Concrete shall not be deposited in water unless distinctly permitted by the specifications for the work. Concrete shall at all times be protected from running water.

(g) Forms.—All forms shall be water-proof to prevent leaks, of sufficient and of a construction to hold the concrete true to the lines. The design and erection of forms shall be subject to approval by the Engineer in charge, and if not approved by him shall be remodeled and improved. If the forms are held together by bolts or wires, they shall be so used that no iron will be left exposed on the faces of the finished work. All forms for exposed work shall be removed one side and bottom to be deferred during the hardening of the concrete. Forms shall remain in place long enough to allow the concrete to [illegible]

VI. Mortars.

[illegible] composed of [illegible] cement and [illegible] Mortar shall be mixed on a [illegible] platform, the [illegible] spreading in and [illegible] mixed dry until of uniform color, without streaks. Water shall then be added and thoroughly and uniformly incorporated with the mixture until it is of the proper consistency for the work for which it is intended.

Lime paste shall be prepared in [illegible] adding to [illegible] sufficient water to [illegible] slack the lime, commonly called "drowning" the lime, while still warm [illegible] to form a stiff paste. Sufficient water shall be used in order to [illegible] of unslacked or [illegible] lime. After cooling [illegible] properly protected [illegible] mortar shall stand [illegible] before use.

Lime mortar shall be composed of [illegible] following two [illegible] one part of [illegible] parts of sand by volume. The lime paste and sand shall be [illegible] mixed not less than [illegible] using and [illegible] shall be taken [illegible] Mortar shall be used only in small [illegible] mortar in which [illegible] to set within [illegible] Mortar [illegible] or plaster [illegible] the initial setting [illegible]

[illegible] attention is called [illegible] to the [illegible] to the [illegible] Navy Department, Washington, D. C.

Durango's New Lumber Mill.

Canitas Branch.

Nayas Valley & Pacific Railroad.

(From Consul Clement S. Edwards, Acapulco.)

New Pacific Coast Railway.

A beginning has been made for the opening of this resurrected west coast railway. Through the enterprise of an American corporation known as the Mexican Pacific Railway Co., whose principal offices are at Seattle, Wash., a railroad along the coast from Acapulco to Zihuatanejo is now under construction. The greatest difficulty encountered in this construction was in the first 10 miles out from Acapulco, owing to necessity at one point to cross the mountain with a tunnel 300 feet in length. The tunnel lies at a point 7 miles from Acapulco and the ascent to this point is at a 2 per cent grade. The tunnel has now been completed and the grading for the greater part of about 10 miles likewise completed and ready for the ties and rails. The street of road between the city and the tunnel was completed and formally "opened" on February 14 by a train, consisting of a locomotive and a gaily decked flat car crowded with seats carried the business men and the elite of Acapulco for the first ride over the site of the future tracks to the tunnel, where the three opening addresses were delivered.

The work of construction beyond a point about 10 or 12 miles distant from Acapulco is considered light. The line will pass all along the coast for nearly 150 miles and traverse a region wonderfully rich in agricultural and mineral possibilities, and will for the most part parallel the mountain ranges abounding in merchantable timber.

Due to the disturbed condition of the country during the past year, the work of railway construction was completely suspended during certain months and at no time was the enterprise free of the vigilance which more settled conditions would have permitted.

The Line to Balsas.

During the past year a concession was granted by the Government to this same company or to men interested in it for building a railroad from Zihuatanejo to the Balsas river, down upon the coast of the same name, the Government granting a subvention of $6,000 gold per kilometer (0.62 mile). It is now learned although the completed contracts have not yet been made that for the Mexican Pacific Co. has secured all its entire railroad interests in the State, including this last concession, to an English company and that the interests of the former company will retire completely. This line will connect Iguala and Acapulco with Mexico City, and as the course is planned beyond Zihuatanejo it will follow the banks of the Balsas River to the town of that name, penetrating a region rich in mines and mining possibilities.

Some additional details of this enterprise from the Mexican Herald follow.

Capital Arranged For.

Arrangements have just been completed for raising $10,000,000 gold for constructing the Mexican Pacific Railway between Iguala, Zihuatanejo and Acapulco, in the State of Guerrero.

For present purposes the construction of two large cement docks to cost $1,250,000 at Zihuatanejo and Acapulco

which will be capable of accommodating the largest vessels in use on the Pacific Coast trade.

The line as projected, will run from Balsas, with direct communication with the City of Mexico, to Hacienda de Balsas, 185 miles, thence to the Pacific coast, where it will follow to Zihuatanejo, and thence to Acapulco, a total distance of 456 miles. An 80-mile branch will also be constructed to Uruapam, and a spur will probably be run from this branch to connect with the large copper mine at Inguaran.

To Employ Thousands.

The preliminary surveys and exploration work have already been completed and about five miles of grading have been finished at Acapulco. Work has been partially suspended during the recent disturbances, but the engineers in charge of the work have kept a force of at least 500 men busy all the time, and they anticipate no shortage of labor when conditions become more settled. It is planned to have 6,000 men working within the next few months.

The capital already available is $30,000,000, which has been provided by the largest financial interests in England and France, and American financiers also are concerned in the undertaking. The president of the company is an American, Melbourne Mc. Thomson, of Seattle, Wash.)

Feat of Engineering.

The importance of the line is great, as it opens up practically a virgin country rich in minerals, timber, and agricultural lands. Many difficulties will have to be met in crossing the mountains and from an engineering point of view to complete the line will be a colossal undertaking.

The concession calls for the line to be in operation in seven years from the signing of the contract, but it is confidently estimated that the work will be finished in four or five years.

The docks which it is proposed to construct at Acapulco and Zihuatanejo will form perfect harbors, as the natural advantages of these points are exceptional. Acapulco, in particular, it is claimed, possesses in an average second only to Sydney, Australia, the finest harbor in the world. The bottom of the harbor at Acapulco shelves upward from 600 to 100 feet depth, and Zihuatanejo is almost similar. Preparatory work has already commenced on the docks at Acapulco.

(From Mexican Daily Herald.)

Canadian Company for Power Plant.

The Mexican Midland Light and Power Co. has recently been incorporated in Canada under the laws of the Province of Ontario to work the concessions granted to the Compania Hydro-Electrica Mexicana, S. A. These concessions authorize the development of the waterfalls of the Rio Nataneo and the Rio Blanco for the purpose of generating electric power. The acquisition of these concessions, it is stated, secures for the company a practical monopoly for the supply of hydroelectric power over a great part of central and the whole north-eastern Mexico, and the concessions give the right to transmit power anywhere during out the republic.

The horsepower available from the Rio Nataneo with the construction of only one small reservoir will, it is said be 65,000 during the whole year and that from the Rio Blanco is stated to be 35,000, which it is intended to develop after the completion of Rio Nataneo. It is reported that has contained 100,000 horsepower can easily be increased up to twice the amount at a relatively small cost.

Already an important contract for the sale of power has been entered into. One contract has been signed by the parent company for the supply of 4,000 horsepower at $75 gold per horsepower per annum. The company is said to be in negotiation with the principal power consumers of various towns, including Tampico, San Luis Potosi and Monterey, and it is believed that there is already a market for all power to be generated by the company.

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, brick and steel construction stated. Architect, C. A. Meussdorffer Hamilton Bank Bldg., S. F. Owner, T. J. Roche. Only the preliminary plans for this building have as yet been prepared and offers for the location can little detail can be given at this time. The building will be erected at the corner of Pine and Jones streets. The construction will be of brick and steel. There will be steam heat elevator service and wall beds. The exterior will be finished with pressed brick trimmed with brown terra cotta. Plans will be completed as rapidly as possible.

San Francisco—Apartment house, 3 story and base, brick and steel, $35,000. Architects, O'Brien & Werner, Crocker Bldg., S. F. Owner, Mrs. Tampcke. The building has been mentioned here before. Additional data now obtained is that above the estimate and plans have been revised. New offers for erecting above the estimate are desired in the hope of getting one of two plans arranged in suites of two and three rooms. All apartments will have competing baths, steam heat and wall beds. A general contract will be let within a few days.

San Francisco—Apartment house, 3 story and base, frame, $15,000. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owner, Mrs. Tampcke. The building will be 100x80 feet and will contain two stores on the first floor and eight apartments above. The interiors will be finished in pine and redwood with some oak trim. Each will be steam heat and wall beds. The exterior of the building will be covered with brick veneer and shingles. Plans are complete and the work will be done by day labor.

Oakland, Cal.—Apartment house, 3 story and base, frame, $20,000. Architect, Musgrave & Dow, 141 Telegraph Ave., Oakland. Owner, C. A. Johnson. The building will contain two stores on the first floor and 45 apartments arranged in suites of two rooms each and bath. There will be a system of wall beds and other modern conveniences. The interior will be finished in pine with some oak floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, brick construction. Architect, Wm. Lee Woollett. Owner, Mrs. Hugo H. Kelly. The building will contain 30 rooms with baths and will cost $40,000. It will be erected on Alvarado street between Fifth and Sixth streets. Mr. Woollett has also prepared plans for a 3-story brick apartment house to be erected on Fifth street between Alvarado and Lucas avenue. The building will contain 30 rooms and will cost $30,000

brick. Plans [illegible] work will be ready [illegible].

Los Angeles, Cal.—[illegible] 5 story and [illegible] 000. Architects, Noonan & Kysor, Wright and Callender [illegible] Owner, Jacob Morgan. [illegible] will contain [illegible] lobby, mail [illegible] in public [illegible] depot [illegible] wood [illegible] room [illegible] And [illegible] of [illegible] are now preparing the working drawings.

Los Angeles, Cal.—[illegible] Lots, [illegible] school [illegible] Avenue [illegible] Hill [illegible] All of [illegible] are to be [illegible] to be [illegible] be supplied [illegible] Tenders will be [illegible] and [illegible] will be of pile [illegible] Each [illegible] will be of brick. Plans [illegible] called for [illegible].

Los Angeles, Cal.—[illegible] 3 [illegible] Hotel [illegible] Broadway [illegible] Avenue [illegible] to contain [illegible] basement [illegible] Lobby [illegible] both street fronts. [illegible] glass windows, steel beams, fire escapes, composition roof, [illegible] galvanized iron [illegible] trim will be of pine. [illegible] will [illegible] be [illegible] large [illegible].

Los Angeles, Cal.—[illegible] 3 story and [illegible] Court [illegible] stated. Architects [illegible] & Lee, Hollenbeck Bldg., Los Angeles. [illegible] of Architect [illegible] be made to [illegible] Separate [illegible] will be [illegible] two and [illegible] be [illegible] floor. The [illegible] of pine. The [illegible] will be [illegible] be [illegible].

Los Angeles, Cal.—Apartment [illegible] Court [illegible] Avenue [illegible] Sixth [illegible] Architect [illegible] Building, Los Angeles. [illegible] structure will [illegible] be [illegible] Work [illegible] be [illegible] Plans [illegible] be [illegible] Building [illegible] be [illegible] Plans [illegible] being [illegible].

BRIDGES, DAMS AND HARBOR WORK.

Felta Creek, Sonoma Co., Cal.—Bridge, work [illegible] plans [illegible] and [illegible] County Engineer Sam [illegible] ers, Sonoma County. [illegible] for the work have been approved by the Supervisors and bids for the construction will be opened by the Board on August [illegible]. For complete particulars [illegible] the County Engineer.

Lindo Channel, Butte Co., Cal.—[illegible] reinforced concrete. Cost not stated. Engineer, M. C. Polk, County Engineer, Chico. Owners, Butte County. [illegible] to call for a [illegible] bridge [illegible] concrete abutments [illegible] reinforced concrete roadway. Plans [illegible] approved and [illegible] being taken. Proposals [illegible] to be opened by the Board of Supervisors on August [illegible]. Plans and specifications can be secured from the County Engineer.

San Pablo Creek, Contra Costa Co., Cal.—[illegible] steel and reinforced concrete. Cost not stated. Engineer, [illegible] County Engineer, Martinez, Contra Costa County. All bids for the construction of the [illegible] steel and concrete bridge [illegible] San Pablo Creek, near that town [illegible] by the Board of Supervisors [illegible] meeting. The bids [illegible] to the County Engineer [illegible] specifications can be secured from [illegible] The work [illegible] be started [illegible].

FACTORIES & WAREHOUSES.

San Francisco.—[illegible] 4 story [illegible] reinforced concrete, $45,000. Architect A. W. Patton, 526 Academy of Sciences Building, S. F. Owner will sell. The [illegible] work on the building and [illegible] for the building and [illegible] in two weeks for figures on the construction. At the present [illegible] now west to make public [illegible] name of the exact location [illegible] building. When [illegible] plans [illegible] and ready for figures an [illegible] description of the building will [illegible] in these columns.

San Francisco.—Factory and warehouse, [illegible] and [illegible] brick and reinforced concrete construction. Architect [illegible], Kohler Hotel Bldg., S. F. Owner, Ford Motor Car Co. Architect [illegible] Ford Motor Car Company's [illegible] the [illegible] work and [illegible] Architect William Knowles, [illegible] Hotel Bldg., [illegible] are [illegible] Ford Motor Car Company's [illegible] plant on this city. Mr. [illegible] the supervising architect [illegible] the Ford Company's work on the coast. The building for which Architect Knowles is to prepare plans [illegible] on the property recently purchased by the Ford Co. and [illegible] on the west line of Harrison street [illegible] from 251st to [illegible] street. The details of the building [illegible] although it is [illegible] as to the [illegible] steel. The understood intention of the owners is to put [illegible] story structure covering [illegible] the entire block. It has not been [illegible] the building will be [illegible] of brick and [illegible] Knowles stated to [illegible] representative of the Building and [illegible] News that he had just finished the drawings [illegible] are complete [illegible] and go to Seattle [illegible] approved. The building will probably [illegible] in the neighborhood of $300,000.

San Francisco.—Stable, 3 story, mill construction, $10,000. Architect, J. C. Flugrath, Crocker Bldg., S. F. Owner, James Eagan. The building will cover a considerable area and is to be erected on Harrison street, south of 5th. There will be no interior finish. The exterior will be faced with stock brick. Plans are complete and figures will be taken on Mr. Flugger's return to this city, which will be in the course of the next week.

Oakland, Cal.—Factory, 1 story, frame and galvanized iron. Cost not stated. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. This building has been designed for a machine shop and will cover a large area. There will be a cement floor. The exterior will be covered with corrugated iron. Plans are complete and figures are being taken.

Los Angeles, Cal.—Warehouse, 3 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, S. M. Bernard Co. The building will be 60x100 feet. The construction will be of the heavy mill type with exterior walls faced with stock brick or cement plaster. Plans are complete and figures are being taken.

San Diego, Cal.—Warehouse, 3 story and base, reinforced concrete. Cost not stated. Architect, W. J. Saunders, Wright and Callender Bldg., L. A. Owners, Independent Sash and Door Co. The building will be erected at State and F streets and will cover an area of 75x100 feet. There will be concrete floor slabs and elevators. The building will have no interior finish. The exterior will be faced with cement plaster. Plans are now being prepared.

Portland, Ore.—Warehouse, 6 story and base, mill construction, $150,000. Architects, Bennes & Hendricks, Portland. Owners, Mitchell, Lewis and Staver. The building will be erected in the East Side Warehouse District and is to cover a site 220x94 feet. The office and shipping departments will be on the first floor and will be heated by steam. There will be two large elevators. Plans are now being prepared and full details of the work will be given later

Contract Awarded.

Portland, Ore.—Warehouse, 5 story and base, brick, $45,000. Architect, Aaron Gould, Portland. Owners, Portland Seed Co. Contractors, Bingham & McClellan, Portland. Contract price, $45,000.

FLATS.

San Francisco—Flats, 3 story and base, frame, $10,000. Architect, William A. Newman, David Hewes Bldg., S. F. Owner's name withheld. The building has been designed to contain six modern flats each of which will have five rooms and bath. The interiors will be finished in pine and redwood. There will probably be gas grates. The exterior of the building will be covered with shiplap. Plans are complete and the architect is taking figures on the work.

San Francisco—Flats, 3 story and base, frame, $12,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners name withheld. This building has been designed for the Mission District, and will contain 12 small flats of three and four rooms each. The interior finish will be of redwood throughout. There will be thirty-gallon boilers and other modern plumbing in each of the

flats. The exterior of the building will be covered with shingle. Plans are complete and figures are being taken.

Oakland, Cal.—Flats, 2 story and base, frame. Cost not stated. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The architects have completed the working drawings for a building containing one store on the first floor and a five-room flat above. The interior of both will be finished in pine. Plans are complete and figures are being taken.

Stockton, San Joaquin Co., Cal.—Flats, 2 story and basement, frame, $8,500. Architect, Walter King, Elks' Bldg., Stockton. Owner, Mr. Turnbull. The exterior of the building has been designed to contain four flats of four and five rooms each. The interior will be of pine and the floors will be covered with linoleum. Plans are now being prepared for this work.

GARAGES.

San Francisco—Garage, 1 story and base, brick, $10,000. Architect, none. Owner, E. Pordon, 1737 Mason St., S. F. The building site is 80 feet square and the structure will cover the entire area. The floor will be of concrete. The exterior of the building will be faced with stock brick. The owner is preparing the plans and will put the same out for figures within a week or ten days.

Contracts Awarded.

Seattle, Wash.—Garage, 2 story and base, brick, $30,000. Architect, none. Owner, W. H Barnes Contractor, T. W. Bennett, Bailey Bldg., Seattle. Contract price, $30,000.

GOVERNMENT WORK AND SUPPLIES.

Awards have been made as follows for furnishing various building supplies for Schofield Barracks, Honolulu. Additional awards will be announced in these columns from time to time as action is taken. California Door Co., mill work for ten double officers' quarters, $5,570, for 32 double officers' quarters, $25,120; for three squadron barracks, $10,650; O. Danzenbaker, Washington, D. C., asbestos shingles for ten single officers quarters, $1,488.-90; for 32 double officers quarters, $6,-248.32.

The bid of Dundons Iron Works of San Francisco, Cal., $900 in amount, has been accepted for installing new boiler in the ice plant at Whipple Barracks, Ariz.

The contract for the construction of an addition to the hospital at Honolulu, Hawaii, has been awarded to the Hawaiian Planing Mill, Ltd., of Honolulu, Hawaii, at prices as follows: For the construction, $49,797; plumbing, using Clow fixtures, $7,878; wiring, $849; light fixtures, $741.

The chief of the bureau of yards and docks, Navy Department, Washington, D. C., has accepted the bid of the Ericsson Construction Co., Seattle, Wash., $8,700 in amount, for furnishing water closets at the navy yard, Puget Sound, Wash.

Grant Lee has the contract at $6,730, for sinking one 8-inch tubular deep well at Fort Logan, Colo.

The bid of the Troy Laundry Machinery Co., New York city, $21,953 in amount, has been accepted for laundry plant equipment for Schofield Barracks, Honolulu.

Awards have been made as follows for oil burners and fuel oil distributing system for the Presidio, San Francisco, and Fort Winfield Scott, Cal. Chambers & Heafey, San Francisco, Cal., for oil burning appliances in barracks, disconnecting and moving tank, $1,650, and for concrete bases for two tanks, $764.88, and to the central California Construction Co., of San Francisco, Cal., for connecting tank and laying main divided into two contracts at $9,500 and $5,650 and for the laying of balance of main, $3,360.

HALLS & SOCIETY BLDGS.

San Francisco—Armory, 3 story and base, Class A construction. Cost not stated. Architect, Department of Engineering, Sacramento. Owners, State of California. Revised plans for the construction of this building have been received at this office and figures are now being taken for the general construction with the exception of the excavating and concrete foundation work. Bids will be opened by the State Board of Control on July 29th. For complete particulars of the work address the State Engineering Department, Sacramento.

Oakland, Cal.—Lodge hall, 1 story and base, brick and steel, $100,000 Architect, J. Henry Boehrer, Delger Bldg., Oakland, associated with Engineer, L. F. Hyde. Owners, Odd Fellows' Hall Association. The building will be erected at the northwest corner of 11th and Frank'in streets. The first floor will be arranged for stores and the upper three floors will be devoted to the uses of the organization. There will be a complete steel frame with exterior walls of brick, faced with pressed brick and terra cotta. The interior finish will be of pine and oak. There will be steam heat and elevator service. Plans are now being prepared for the work.

Red Bluff, Tehama Co., Cal.—Lodge hall, 3 story and base, brick, $35,000 Architects, Parker & Kenyon, 244 Kearny St., S. F. Owners, Red Bluff Elks' Hall Association. The building will cover a considerable area and has been arranged for stores on the first floor and halls above.. The interior trim will be largely of oak. There will be maple floors. A steam heating system will be installed. The exterior of the building will be faced with pressed brick. The architects have just been commissioned to prepare the plans and working drawings will be completed as rapidly as possible.

San Jose, Santa Clara Co., Cal.—Country Club, 2 story and base, brick and frame, $15,000. Architect, Fred D. Wolfe, First National Bank Bldg., San Jose. Owners, San Jose Golf and Country Club. The building will be erected about three miles east of San Jose. There will be a large club room, dining room, kitchen and several private rooms. The exterior of the building will be faced with cement plaster. The interior trim will be of redwood. There will be furnace heat and open fire places. Plans are now being prepared and bids will be called for soon.

Sacramento, Sacramento Co., Cal.—Armory, 2 story and base, steel and reinforced concrete. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners State of California. Bids for this work were opened in Sacramento on July 19th. The Ransome Concrete Construction Co., of Sacramento, were low on the general construction at $90,750, but no contract has been awarded. For a complete list of the bids presented see under Sacramento and Northern California.

HOSPITALS.

Agnews Santa Clara Co., Cal.—Hospital, 2 2-story and base, reinforced concrete buildings. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. This work was mentioned here last week, at which time it was stated that bids would be opened on the 31st of this month. Plans for both the Convalescent and Assembly buildings have been received at this office and may be seen on application.

San Francisco—Hospital heating and ventilating. Cost not stated. Architect City Dept. of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Bids for the installation of a heating and ventilating system in the Receiving Building and in the Sanitary Towers of the Ward building at the San Francisco Hospital will be received by the Board of Public Works on July 31st. Plans for this work have been approved and may be seen on application to the City Architectural Dept.

Patton, Los Angeles Co., Cal.—Hospital power plant equipment. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Bids have been opened for the power plant equipment at the State Hospital at Patton. Robert Dalziel, Jr., of San Francisco, is low on the equipment and Charles C. Moore on the auxiliary work. For a complete list of the bids seen under Los Angeles and Southern California.

Stockton, San Joaquin Co., Cal.—Hospital heating system. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Bids for the installation of a complete heating system at the Stockton Hospital were opened on July 16 by the State Board of Control and show F. P. Walsh, of San Francisco, low man at $11,887. HOTELS.

San Francisco—Hotel, 7 story and base, brick and steel, $80,000 Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, W. B. Pringle. This building will be erected at the corner of Geary and Mason streets and will cover an area of 90x100 feet. There will be a large central lobby on the first floor and 81 guest rooms on the upper floors. All rooms will have connecting baths. There will be steam heat, elevator service, wall beds and a vacuum cleaning system. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with pressed brick and terra cotta. The architect is now completing the working drawings.

Los Angeles, Cal.—Hotel, 12 story and base, Class A construction, $800,000 Architects A. L. Haley & Carleton, Bldg., L. A. Owner, Haswell Estate. This building will be erected at the southwest corner of Main and

Fifth streets, and will contain the hotel lobby and seven store rooms in the First story and 250 rooms and 125 baths in the upper stories. The construction will be steel frame and brick with glazed terra cotta facing. The interior will be finished in steel, with marble and tile in the lobby, tile floors and marble base in the corridors. There will be three passenger elevators and a freight elevator steam heat, power plant, etc. Only the preliminary sketches have been worked out and complete details will not be available for some time.

Los Angeles, Cal.—Hotel, 11 story and steel. Class A construction. Cost not stated. Architect, Anton Reif, Higgins Bldg., L. A. Owner, Mrs. Hattie M. Mayo. While the building has been designed for an eleven-story structure it is proposed that only seven stories will be built at the present time. It will contain 168 guest rooms and 84 bath rooms. There will be a large lobby and parlors in the first story, and dining room, billiard room, etc., in the basement. The construction will be entirely of reinforced concrete with hollow tile and concrete floors, hollow tile partitions, glazed pressed brick facing, terra cotta trim, galvanized iron cornice, composition roofing, fire escapes, plate glass windows, metal frames and sash and wired glass. The interior trim will be of hard finish throughout, with tile floors and marble wainscoting in the lobby. There will be electric elevators, steam heat, vacuum cleaning system. Plans will be ready for bidders in about ten days.

Los Angeles, Cal.—Hotel and stores, 1 story and base, brick and steel. Cost not stated. Architects, Garrett & Eisler, Current Bldg., L. A. Owners, L. L. Bowen and W. C. Norman. The building will be 75x100 feet and will contain five stores in the first floor and 67 guest rooms and 18 baths in the upper stories. It will have a concrete foundation and basement, tapestry brick facing, plate glass store windows, prism glass plate transoms, steel columns and beams, composition roof, galvanized iron and wire glass skylights, fire escapes, metal frames and sash. The interior trim will be of pine. There will be a lavatory in each room, hot water heater and steam heat. The plans are now being prepared and when complete the work will be done by Day Labor.

San Francisco—Hotel, 7 story and base, reinforced concrete, $85,000. Architects, Reggetti & Headman, Phelan Bldg. S. F. Owner, J. Alice. This work has been mentioned here before when plans were first started. The building has been arranged for five stores besides the lobby and office on the first floor and in the neighborhood of 100 guest rooms on the upper floors. A large percentage of these rooms will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system, hot and cold running water. The exterior will be faced with cement plaster. Plans are complete and a contract will be awarded at once.

San Francisco—Hotel, 4 story and base, brick and steel. Cost not stated. Architects Ross & Bargren, 310 California St., S. F. Owners, Doyle Estate. The building will contain one store on the street floor and the upper floors will be subdivided into 75 rooms. There will be steam heat and elevator service. Hot and cold running water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

Contracts Awarded.

Fresno, Fresno Co., Cal.—Hotel annex, 5 story and base, brick and reinforced concrete, $150,000. Architect, Benj.. G. McDougall, Sheldon Bldg., S. F. Owner, Robert Kennedy. Contractors, Charles Lindgren & Co., Monadnock Bldg., S. F. Contract price, $150,000.

—LIBRARIES—

Contracts Awarded.

Portland, Ore.—Library, 3 story and base, reinforced concrete, $350,000. Architect's name not given. Owners, City of Portland. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price, $336,175.

RESIDENCES.

San Francisco—Residence, 2 story and base, $9,000. Architect, A. W. Putman, 897 Ashbury St., S. F. Owner's name withheld. Plans are being prepared for an eight-room house with sleeping porch, bath and laundry. The interior finish will be of pine, redwood and hardwoods. The floors throughout will be of oak. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will probably be covered with shingles or cement plaster. Detail drawings will not be made for some time.

San Francisco—Residence, 2 story and base, frame, $5,000. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owners, Urban Realty Co. The dwelling has been designed for an eight-room house with all modern conveniences. There will be furnace heat and open fire places. The interior will be finished in redwood with some white enamel and oak floors. The mantels will be of tile and brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with klinker brick veneer and shingles. Plans are complete and the work will be done by Day Labor. (Bids close Aug. 8.)

NOTICE is hereby given by the Board of Supervisors of Sonoma County, California, that sealed bids will be received by the Clerk of said Board up to 12 o'clock noon, Thursday, August 8th, 1912, for the construction of a bridge over Felta Creek, in Monticino Road District, according to the plans and specifications adopted July 15th, 1912, by the Board of Supervisors and now on file in the office of the Clerk of said Board. All bids must be accompanied by a certified check for not less than 10 per cent of the amount of the bid, payable to W. W. Felt, Jr., County Clerk, and to be forfeited to the County of Sonoma, should the successful bidder fail within one week after the acceptance of said bid, to enter into a contract therefor, and signing good and sufficient bond for the faithful performance of said contract.

Checks of unsuccessful bidders to be returned.

The Board reserves the right to reject any and all bids.

W. W. FELT, JR., County Clerk.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—2 stories, [illegible] frame, $30,000. Oakland, Cal. Architects, Morgenroth & Doane, 1611 Telegraph Ave., Oakland. Owner, C. A. Johnson. The building will contain two stores on the first floor and apartments, arranged in suites of two rooms each on the upper floor. There will be a central heating system and hoods and other modern conveniences. The interior will be finished in pine with some oak floors. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Factory—1 story frame and galvanized iron. Cost not stated. Oakland, Cal. Architects, Odbert & Odbert, Tribune Bldg., S. F. Owners name not stated. This building has been designed to meet the needs and will cover a large area. There will be a concrete floor. The exterior will be covered with galvanized iron. Plans are complete and figures are being taken.

Flats—1 story and basement, frame; cost not stated. Oakland, Cal. Architect, O'Brien Bros. Chas. Bliss & S. F. Bowers name withheld. The architects have completed the working plans for a building containing six flats on the first floor and a basement and attic above. The interior of flats will be finished in pine. Plans are complete and figures are being taken.

Lodge Hall—1 story and basement, brick and steel, $100,000. Oakland, Cal. Architect, J. Henry Rowell, Syndicate Bldg., Oakland. Owner, Fraternal Order of Eagles. Oakland Aerie No. 1. The following will be erected at the corner of 11th and Franklin streets. The first floor will be occupied for stores and the upper floor lodge rooms will be devoted to the uses of the organization. There will be a complete basement with exterior walls of brick. Floors will be pressed brick and tile. The interior finish will be of pine and oak. There will be steam heat and electric service. Plans are now being prepared for the work.

Residence—2 story and attic, frame, $6,000. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, N. E. Pinchock. The dwelling has been designed for an eight-room house with bath and sleeping porch. The interior finish will be of pine and redwood with some cardwood floors. There will be furnace heat and open fire places. The mantels will be of brick and tile. The will be used in the bath and kitchen. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and attic, frame, $1,500. Oakland, Cal. Architect, Hutchinson Bros., 470 13th St., Oakland. Owner's name withheld. The dwelling will contain eight rooms, bath, sleeping porch and laundry. The exterior will be finished in pine and oak. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile or brick. The exterior of the house will be covered with cement plaster on metal lath. The architects are now preparing the plans.

Residences—2, 2 story and basement, frame, $4,000 each. Piedmont, Alameda Co., Cal. Architect, Warren J. Wells, Central Bank Bldg., Oakland. Owner, Smith-Hoag Co., Inc. Each of these [illegible] and contain eight rooms and [illegible] sleeping porch and laundry. All floors will be of oak throughout. There will be furnace heat and open fire places. The mantels will be of brick. The exteriors will be covered with cement plaster on metal lath. Plans are complete and the architect is taking figures on the work.

Residence—[illegible] story and basement, frame, $5,000. Oakland, Cal. Architect, C. W. Parker, Central Bank Bldg., Oakland. Owner, [illegible] Kaye. The dwelling will contain [illegible] rooms, bath, sleeping porch and laundry. There will be furnace heat and open fire places. The mantels will be of tile and brick. The floors of the principal rooms will be of oak. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—[illegible] story and basement, frame, $5,000. Oakland, Cal. Architect, A. [illegible] Parker, Central Bank Bldg., Oakland. Owner, [illegible] Kaye. The dwelling will contain [illegible] rooms, bath, sleeping porches, laundry and garage. The interior will be finished in pine and redwood with some white enamel

with cement plaster on metal lath. Plans are complete and figures are being taken.

Bungalow—1 story and base, frame, $6,500. Oakland, Cal. Architect, none. Owners, Realty Syndicate Building Co., 1218 Broadway, Oakland. The building will contain a large number of rooms all of which will be finished in pine and hardwoods. The floors throughout will be of oak. There will be furnace heat and open fire places. Mantels will cost from $40 to $60 each. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $4,750. Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Dr. F. R. Jordan. The dwelling has been designed for an eight-room house with sleeping porches and baths. The interior trim will be largely of pine and hardwood. The floors in all principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,000. Oakland, Cal. Architect, none. Owner, Louis Johnson, 1732 Ward St., Berkeley. The bungalow will contain 6 rooms and bath. The interior will be finished in pine and redwood throughout. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $3,000. Oakland, Cal. Architect, none. Owner, C. F. Legris, 600 56th St., Oakland. This bungalow has been designed to contain six rooms and bath with sleeping porches. The interior will be finished in pine throughout. There will be open fire places and brick mantels. The exterior will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and base, frame, $3,000. Oakland, Cal. Architect, none. Owner, W. E. McChesney, 2005 Etna St., Berkeley. The dwelling has been designed for a seven room house with bath. The interior will be finished in pine and redwood with some oak floors. There will be open fire places with tile or brick mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $3,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, A. Y. Skee, 1432 Carlton St., Berkeley. The dwelling has been designed for a seven-room house with bath. The interior trim will be of pine throughout. There will be some oak floors. The dwelling will be heated by open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,000. Albany, Alameda Co., Cal. Architect, J. A. Pinkerton, 1931 Berryman St., Berkeley. Owners, Peake-Munroe Co. The bungalow has been designed to contain five rooms and bath. The interior will be finished in pine throughout. There will be an open fire place in the living room with a tile or brick mantel. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Bungalows—2 story and base, frame, $2,500 each. Oakland, Cal. Architect, none. Owner, C. F. Legris, 600 56th St., Oakland. Each of these houses will contain five rooms, bath and sleeping porch. The interior trim will be of pine and redwood with some oak floors used. There will be open fire places and brick mantels. The exteriors will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $6,000. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, Alfred S. Kea. The dwelling will contain ten rooms, sleeping porch and laundry. The interior will be finished in pine and redwood with some white enamel. Floors in all the principal rooms will be of oak. There will be furnace heat and open fire places. The mantels will be of tile or brick. Tile will be used in the bath. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Market—1 story and base brick. Cost not stated. Oakland, Cal. Architect, Charles E. J. Rogers, 24 California St., S. F. Owners, Julius and Hess Hayman. The building will have a frontage of 50 feet and a depth of 150 feet. There will be considerable light and ventilation used. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Stores—1 story and base, brick, $10,000. Alameda, Alameda Co., Cal. Architect, William A. Newman, David Hewes Bldg., S. F. Owner, Charles E. Barton. The building is being designed so that two additional stores may be added later. The first floor will contain five stores. The interiors will be finished in oak and the large plate glass windows. The exterior of the building will be covered with cement plaster. Plans are complete and figures are being taken.

Moving Picture Theatre—1 story, brick, $15,000. Oakland, Cal. Architect, not selected. Owner, H. H. Brown Estate, Ave. and 41st St., Oakland. The plans for the building are being prepared by the owner and will shortly be ready for bids.

Grand Stand and Stadium—Steel frame and concrete, $75,000. Oakland, Cal. Architect, City Architect J. J. Donovan. Secure. E. E. Oakland, Cal. Engineer, City of Oakland. Plans for this structure are on file in the office of the Superintendent of Streets. Specifications are being written. The building will be similar to the Greek Theatre at Berkeley with the exception that it will be entirely of steel frame. The space under the seats will be utilized for baths and a gymnasium.

Nickelodian—1 story brick $10,000 Melrose, Alameda Co., Cal. Architect, J. B. Sprague, Melrose. Plans are complete and bids are being taken. The building will be one story, in height and will seat about 300 people. There will be a moving picture machine installed. The interior will be finished in pine. The exterior of the building will be faced with pressed brick.

School—2 story and base, frame and concrete. Cost not stated. Oakland, Cal. Architects, Wilde and Schaffer, Security Bank Bldg., Oakland. Owners, City of Oakland. Preliminary plans for this building have been approved and detail drawings are now being worked out by the architects. Bids will be called for in a short time.

Stores and Offices—6 story and base, brick and steel, $65,000. Oakland, Cal. Architect, William A. Newman, David Hewes Bldg., S. F. Owner's name withheld. The architect has prepared sketches for this building, which will be erected at a prominent corner in the business district, but will not complete the working drawings before September 1st. None of the details of the structure have been decided upon as yet, but these will be given as the plans progress.

Residence—2 story and base, frame, $8,000. Oakland, Cal. Architect, Ralph P. Morrell, Yosemite Theatre Bldg., Stockton. Owner, Mrs. Kern. Plans provide for eight rooms, bath, sleeping porch and laundry. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and furnace heat. The mantels will be of brick or tile. Tile will be used in the bath and kitchen. The exterior of the house will be finished in cement plaster on metal lath. Plans are complete and figures are being taken.

Bungalow—1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, None. Owner, Charles A. Werner, 2416 10th St., Berkeley. The dwelling will contain five rooms and bath. The interior finish will be of pine and redwood with oak floors in the dining and living rooms. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Carl Erieson, 1346 Nielson St., Berkeley. The dwelling will contain five rooms and bath. The interior will be finished in pine and redwood throughout. There will be some oak floors. A large open fire place with tile or brick mantel will be a feature of the living room. The exterior of the dwelling will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $3,000. Oakland, Cal. Architect, E. R. Comstock, 667 Aileen St., Oakland. Owner, D. Read. The dwelling has been designed for a five room house with bath. The interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN JOSE AND THE SANTA CLARA VALLEY.

Country Club—2 story and base, brick and frame, $15,000. San Jose, Santa Clara Co., Cal. Architect, Fred D. Wolfe. First National Bank Bldg., San Jose. Owners, San Jose Golf and Country Club. The building will be erected about three miles east of San Jose. There will be a large club room, dining room, kitchen and several private rooms. The exterior of the building will be faced with cement plaster. The interior trim will be of redwood. There will be furnace heat and open fire places. Plans are now being prepared and bids will be called for shortly.

Hospital—2, 2 story and base, reinforced concrete buildings. Cost not stated. Agnews, Santa Clara Co., Cal. Architect, State Department of Engineering, Sacramento. Owners, State of California. This work was mentioned here last week, at which time it was stated that bids would be opened on the 31st of this month. Plans for both the Convalescent and Assembly buildings have been received at this office and may be seen on application.

Bungalow—1 story and base, frame, $10,000. Los Gatos, Santa Clara Co., Cal. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Clarence E. Musto. The dwelling will contain ten rooms, baths, sleeping porches and a garage. The interior will be finished in pine, white enamel and hardwoods with hardwood floors throughout. There will be furnace heat and open fire places. The mantels will be of Caen stone and brick. Several unique built-in features will be used. Tile will be used in all baths and in the kitchen. The exterior of the dwelling will be covered with shingles. Plans are complete and a contract will be awarded at once.

Wesco Flat Oil Paint

An improved, sanitary flat paint for interior finishing. Gives very fine finish.

WEST COAST KALSOMINE COMPANY MADE ON WESCO THE COAST MODEL ALAMEDA CAL. CALIFORNIA

Wesco Kalsomine

Spreads easily, does not decay and gives soft, rich surface. Can be washed off when desired.

Cold Water Paint

The most economical paint on the market. When you buy **Wesco Cold Water Paint** you pay only for paint and not for high-priced oils. It can be used on exterior or interior surfaces. It dries very quickly, is non poisonous, a strong disenfectant and does not turn yellow with age. **Wears well** and is an excellent fire retardant.

Concrete Paint

The best paint in the world to use on damp places. It can't be equaled in painting tunnels, arches, cellars or any other place where dampness exists. Makes the finest possible finish for the interior of factories and other buildings where there is loose steam and damp vapors.

STATE OPENS BIDS FOR BERKELEY JOB.

Eight Contractors Put in Figures For Buildings at the Institute For the Blind at Berkeley.

(By Special Wire.)

Eight sets of figuees were received on July 17th by State Engineer, McClure at Sacramento for the general construction of the building for the Institution of Deaf, Dumb and Blind at Berkeley and one figure for the carpentry work. The following is a complete list of the bids submitted together with the names of the bidders:

McLeran & Peterson, 180 Jessie St., San Francisco, $29,999.
Lindgren & Company, $31,500.
Frank Gallagher, $33,640.
Lewis A. Hicks Co., $34,450.
Robert Greig, $36,621.
L. C. Brimkmeyer & Co., $36,900.
Fluth & Morton, $37,997.
Thurston & Co., $43,970.

Carpentry Work.

McSheehy Bros., $5742.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—[illegible] brick. Cost not stated. Los Angeles, Cal. Architect, Wallace Neff. Owner, Douglas Bldg., L. A. Owner, W. H. Allen. The building will contain 10 rooms will have tiled baths. The suites will be arranged in apartments of two rooms each. All of these units will be of white enamel. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are practically completed. The work will be let by day labor.

Apartment House—[illegible] brick and steel $80,000. Los Angeles, Cal. Architects, Noonan & Kysor. Wright and Callender Bldg. L. A. Owner, Jacob Morris. The building will contain about 120 guest rooms, lobby, ambassador rooms, dining room, grill, etc. It will have a concrete foundation, pressed brick facing and stone trimmings. There will be plate glass windows. The interior trim will be of Carolina pine with oak floors and tile floors in bath rooms. There will be an electric passenger elevator, wall beds, steam heat, hot water heater and vacuum cleaning system. The architects are now preparing the working drawings.

Apartment House—[illegible] brick and steel $70,000. Los Angeles, Cal. Architect, H. H. Martin. Union Oil Bldg. L. A. Owner, E. W. Bergin. All of the most modern improvements are to be included in the building, which is to contain eight rooms, arranged in suites of two and three rooms each. There will be wall beds, steam heat and electric light. The interior trim will be of pine with oak floors. The exterior of the building will be faced with pressed brick. Plans are now nearly completed and figures will be called for shortly.

Apartment House—[illegible] brick. Cost not stated. Los Angeles, Cal. Architects, Train & Williams. Exchange Bldg., L. A. Owner, A. Anderson. The building will contain four store rooms in the first story and 16 rooms arranged in 16 apartments in the upper stories. There will be a concrete foundation and exterior will be pressed brick facing on ornamental fronts. There will be plate glass windows, steel beams for the composition roofing, skylights, steel and wood iron cornice. The interior trim will be of pine. There will be wall beds, individual gas heaters, hot water heater, etc. There will be 16 bath rooms. The architects are completing the working drawings.

Apartment House—[illegible] frame. Cost not stated. Los Angeles, Cal. Architects, E. W. Stillwell & Co., Heine Bldg., L. A. Owners, L. Gioseli. A three-story frame addition will be made to a large dwelling. The resultant building containing seventy rooms which will be arranged in suites of two and three rooms each. There will be private baths, steam heat and wall beds. The trim throughout will be of pine. The exterior of the building will be covered with rustic. Plans are now being prepared.

Warehouse—[illegible] brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, S. M. Bernard Co. The building will be 100x200 feet. The construction will consist of [illegible] brick walls, tile roof, exterior walls [illegible] brick and cement plaster. Plans are nearly completed. Bids will be taken.

Warehouse—[illegible] brick and steel construction. Cost not stated. San Diego, Cal. Architect, W. J. Sharp. Wright Bldg., San Diego. Owners, Estate L. A. Cressey, Hotel Cornado, San Diego. The building will be erected at State and [illegible] streets. It will have a frontage of [illegible] feet and a depth of [illegible] feet. The building will have no interior walls. [illegible] will be constructed [illegible] Plans are now being prepared.

Hotel—[illegible] Los Angeles. Architects, [illegible] L. A. Owners, [illegible] L. A. The building will be a [illegible] and will contain the [illegible] etc., in the basement. [illegible] Plans are now being prepared.

Hotel—[illegible] Los Angeles. Architects, [illegible] L. A. Owners, Mrs. H. L. [illegible] The building will be [illegible] and will contain [illegible] etc., in the basement. The [illegible] Plans are now being prepared.

Hotel and Stores—[illegible] steel construction. Cost not stated. Los Angeles, Cal. Architects, [illegible] Bldg., L. A. Owners, L. L. Bowen and W. C. [illegible] The building will be [illegible] feet and contain [illegible] rooms [illegible] Plans are now being prepared. Bids will be taken in a few days.

Apartment House—[illegible] frame. Cost not stated. Los Angeles, Cal. Architect, Frank T. Kegley, Consolidated Realty Bldg., L. A. Owner, S. B. Nolo. The building will be 107x100 feet. Only a part of the structure will be erected at this time. There will be 20 rooms, which will be arranged in suites of two rooms and bath each. Wall beds will be installed. There will be steam heat. The exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

School Buildings—Brick, reinforced concrete and frame, $100,000. Oneonta Park, Los Angeles Co., Cal. Architect, J. Marvin Hoarke, Central Bldg., L. A. Owners, Huntington Hall School for Girls. There will be a two-story brick and plaster building known as the Senior Girls' building, an open-air Greek Theatre, gymnasium and a [illegible] building. The present building also will be entirely remodeled. Plans and [illegible] work are just being started.

Contracts Awarded.

Stores and Offices—12 story and [illegible] construction, $500,000, Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owners, W. I. Hollingsworth. Contractor, Paul Hunt, Union Oil Bldg., L. A. Contract price not stated.

BIDS OPENED FOR POWER PLANT.

Equipment at Southern California State Hospital, Patton.

Bids were opened July 18th for the [illegible] work as follow

R. H. Beazel Jr., S. F.	$23,127
Chas. C. Moore & Co., S. F.	24,200
Conlon, Cal. Constr. Co.	24,250
Pac. Fire Extinguisher Co.	25,617

Wrecking Old Boilers.

Chas. C. Moore & Co.	$12,826

Furnishing Auxiliaries.

Chas. C. Moore & Co.	$ 9,846

PORTLAND AND OREGON.

Warehouse—6 story and base, mill construction, $150,000. Portland, Ore. Architects, Doyle & Hendricks, Portland, Owners, Mitchell, Lewis and Staver. The building will be erected in the U. S. Sub warehouse district and will cover a site 220x90 feet. The office and shipping departments will be on the first floor and will be located by steam. There will be two large elevators. Plans are now being prepared and full details of the work will be given later.

Contracts Awarded.

Warehouse—6 story and base, brick, $15,000. Portland, Ore. Architect, Aaron Gould, Portland. Owners, Portland Seed Co. Contractors, Bingham & McClellan, Portland. Contract price, $15,000.

Library—3 story and base, reinforced concrete, $350,000, Portland, Ore. Architects name not given. Owners, City of Portland. Contractors, Pearson Construction Co., New York Bldg., Seattle. Contract price, $336,175.

SEATTLE AND WASHINGTON.

Contracts Awarded.

Garage—2 story and base, brick, $30,000. Seattle, Wash. Architect, none. Owner, W. H. Barnes. Contractor, T. W. Bennett, Bailey Bldg., Seattle. Contract price, $20,000.

The testimonial papers, edited generally by lackeys of some owner are forever harping on the "architect" fact has been built up in this state. Paul Francis in the Call is forever throwing mud at Governor Johnson on any pretext whatever. When it is proposed to go before the people on an issue and fight out a question on an even basis he insists on calling it a regular. Another instance of deliberate and willful misrepresentation of facts was contained in his article in yesterday's Call. After a just and severe criticism of the city officials for their unwarranted delay in the construction of the garbage incinerators he continued on to roast the Johnson administration of the water front, saying it is just the same as the old Southern Pacific board, only that the number of employes has doubled because Johnson needed votes. Nothing could be farther from the truth, and undoubtedly Mr. Francis knows it.

The number of employes has doubled to be sure and for good reason. The present Harbor Board has been one of the most progressive that the state ... ever known in any department. To begin with when it took hold of affairs it made a thorough investigation of affairs along the water front, disclosing the rotten construction and the imminent danger that existed in nearly all of the ferry slips. As a result something like three hundred thousand dollars had to be spent in repairs to protect the lives of people and the ferry transportation of the bay. Further than that, in the short period of its existence the present board has provided for the extension of the belt line, increased its equipment, let paving contracts, increased the facilities for handling cargoes, and prepared plans for 4 slips for which the contracts have already been let for three and which involve the expenditure of two or three million dollars.

Nothing of this great amount of work is noticed by Mr. Francis. He perverts his facts to suit his argument and only tells one side of the case as has always been the habit of the reactionaries. These tricks of a newspaper may cause some people to be misinformed yet the fact is that the public has been led to so often, that it takes everything it reads with a good many grains of salt.

Bids Opened For Reinforced Concrete Bridge.

Locke Construction Company Low on Reinforced Concrete Bridge at Niles. Contract Will Be Awarded.

Seven firms submitted figures for the construction of the large reinforced concrete bridge which is to be erected at Niles, Alameda County. The Locke Construction Company was low at $71,460. A contract will probably be awarded on this work Wednesday. Plans for the bridge were prepared by County Engineer Haviland. The unit system of construction will be used. The following is a complete list of figures received by the Board of Supervisors on Monday:

Locke Construction Co.	$71,460.00
[illegible]	73,162.00
[illegible]	75,000.00
[illegible]	78,179.75
[illegible]	80,076.75
[illegible]	85,850.00
Oliver & McDonald	90,911.00

"FALLS" HEAD ON 37 AND SHAKING TRIP.

J. C. Kostick, President and General Manager of the Falls Manufacturing Co., Inc., of 34 to 38 First street, San Francisco, manufacturers of the Patented "Falls" Board of Post Caps, Lasts, Joist Hangers and Universal Post Iron Hardware and Special Forgings, is on an extended business trip, having gone as far north as Vancouver, British Columbia.

Mr. Kostick makes a point of making it a visit to the meeting of the Architects and Trade of the districts contiguous to Seattle, Portland, Tacoma and other cities, meeting the many customers and friends of the company.

This organization shows a very substantial business gain as it is [illegible] on account of the fact that with each succeeding Executive Order [illegible] deliveries are [illegible] of Falls specialties. However, the Architectural profession have endorsed and recognized the Board of Building Hardware to be of the best and up to the most exacting standards [illegible] specifications. Many of the new City [illegible] as well as other buildings, have been equipped with their product. In a letter from Mr. Kostick he reports business prospects very encouraging and will return with business to keep his factory busy for quite a few months.

FORESTRY BUREAU SHOWS USES OF WOOD.

The California State Board of Forestry, Edward Stone, secretary, to Mr. Pinchot, has issued a bulletin containing facts and figures regarding the wood-using industries of California. The bulletin [illegible] kinds of wood used, the [illegible] manufactured from each kind of wood, the amount of lumber [illegible] and the percentage [illegible] and hard wood.

In California [illegible] there are 15 species of [illegible] 90 per cent of the total [illegible] Twelve species [illegible] and in the state five partly within and thirty-six outside the State, twenty-four having been grown in foreign countries.

[illegible] wood or [illegible] agricultural implements, [illegible] boxes and [illegible] bobbins, [illegible] houses and [illegible] coffins, caskets and [illegible] carriages, [illegible] and [illegible] supplies, [illegible] frames and moldings, furniture, [illegible] and planing, handles, musical instruments, [illegible] and scientific instruments, [illegible] and [illegible] toys, [illegible] and [illegible] products, [illegible] and [illegible] vessels, pipes, refrigerators and kitchen utensils, rollers for shades and miscellaneous saddles and harness, sash, doors, blinds and general millwork; shop and boat building, signs, sporting and athletic goods, tanks, trunks and valises, vehicles and vehicle parts, wood carvings, woodenware and novelties.

NEW PORCELAIN PLANT FOR RICHMOND.

RICHMOND, July 22.—Announcement has just been made of establishing a new porcelain manufacturing company here at Richmond which makes the third plant of its kind for this place. These are the only porcelain factories west of the Mississippi and the industry is fast growing into an important business.

The Western States Porcelain Ware Works is the name of the new factory. Prominent in the company, which is capitalized for $100,000, are three San Franciscans—R. J. Tyson of the Seaboard Bank; C. P. Overton, manager of the Union Fish Company, and James Tyson, president of the Charles Nelson Company. W. Platz, a porcelain expert, is general manager.

The new concern will go further than its predecessors and besides making solid porcelain bathtubs and sanitary ware will turn out porcelain articles used in electrical fittings and hotel china. There will be a separate building and separate kilns for each of these industries. Material is arriving for construction. The plant will be located on the Santa Fe at the northern edge of the city.

The Pacific Sanitary Manufacturing Company, of which E. S. Waugenheim, Newman and Oakland capitalist, is president, has begun erection of its first structure, 175 by 600 feet. The Pacific Porcelain Ware Company's plant, the pioneer, has been in operation two or three years.

The carbon products factory in the northern part of the city, the buildings for which are just being completed, will also compete with the East. It will be the only plant of the sort outside of Niagara Falls and Duluth. The carbides are used in manufacturing acetylene gas and in locomotive and automobile lights and for other purposes. They are made of oil residuum and lime fused by electrical process. The Richmond factory will use and has signed a contract for 2000 electrical horsepower a month.

GOVERNMENT RESERVES MORE TIMBER LAND.

Notice was given at the local land office recently that further reservations have been made in regard to the national Redwood park, which lies in Santa Cruz and adjoining counties.

The lands to be withdrawn are included in the following description:

UNITED STATES LAND OFFICE.

San Francisco, Cal., July 19, 1912.

Notice is hereby given under the provisions of the act of June 15, 1912, (public No. 195) to every person having a valid existing right to any lands in township 9 south, range 3 west, and township 9 south, range 4 west, M. D. meridian, California, initiated by settlement under the public land laws prior to February 10, 1902, and main-

formed in accordance with the law under which initiated up to the date of the passage of said act, must file in the office of the undersigned within 90 days from June 15, 1912, the proper application to enter said land claimed, failing in which said right will be forfeited.

T. G. DANIELS, Register
JOHN J. DEANE, Receiver.

SOUTHERN PACIFIC TO ELECTRIFY PORTLAND LINES.

Three hundred and fifty miles of electric railway are to be built for the Southern Pacific Company around and south of Portland at a cost of from 8 to 10 million dollars. Robert Strahorn has been selected to build the new lines and he will be manager of the new electric system when completed. D. W. Campbell retaining a similar position with the company's steam lines in that part of the country.

When this work is completed the Southern Pacific will have the following electric road systems as adjuncts.

Portland. Three hundred and fifty miles of road in addition to forty miles of city lines in Salem, Albany, Eugene and Corvallis.

ELECTRICAL CONTRACTORS TO MEET.

State Association To Hold Convention At San Jose.

Four Days of Business and Merriment In the Garden City.

The California State Association of Electrical Contractors will hold their meeting this year at San Jose on July 24, 25, 26 and 27th.

Special rates of one and one-third fares for round trip tickets from all points in California can be procured from the Southern Pacific Company.

The following program of proceedings has been proposed for each day of the convention.

July 24—Contractors meet 10 A. M. and 2 P. M. Sight seeing trip for ladies and visitors in P. M. Reception and dance in evening.

July 25—Contractors meet same as on 24th. Evening entertainment by Sons of Jove under direction of Statesman Sanderson. Theatre party for ladies.

July 26—Open meetings for every one. Evening, annual dinner.

July 27—Electric Trades Day. Picnic, games, etc. Free lunch for all.

The officers of the Association are: J. C. Rendler, President, Los Angeles; C. Holbrook, First Vice-President, San Diego; J. S. Reynolds, Second Vice-President, Santa Barbara; W. S. Hanbridge, Secretary and Treasurer, San Francisco; R. L. Boom, Sergeant-at-Arms, Los Angeles.

The various committees are as follows:

Music and Printing Committee.

C. Fraser, L. R. Boynton, W. S. Hanbridge.

Transportation Committee.

W. S. Hanbridge, W. Kirsten, G. Sitman.

Entertainment Sons of Jove Committee

R. Waldron, F. Somers, L. Levy.

Convention Papers Committee.

C. F. Butte, P. C. Butte, W. Gallavan

The above committee has arranged for the following papers which will be read at the meetings in the forenoon and afternoon of July 26th.

Co-operation of the Electrical Trades, What a Contractors Should Know About the Central Station, by a Central Station Manager.

Conditions as they should exist between Manufacturer and the Contractor, by a Manufacturer.

Contractors as we have found them, by a Jobber.

How to improve the Electrical Contracting Business, by a Contractor.

The Development of the Electrical Business, by an Advertising Man.

Co-operation of Contractors and the Inspection Department, by a member of the Underwriters' Inspection Department.

No bills will be contracted for by the Committee of Arrangements, unless the money for same is in the hands of the Treasurer.

CONVENTION COMMITTEES.

Committee of Arrangements.

L. R. Boynton, N. Hope, L. G. Aims, L. Levy and W. S. Hanbridge.

Finance Committee.

F. Somers, H. Tittle, F. Watts and W. S. Hanbridge, Treasurer.

Reception Committee.

C. Faser, F. Somers, R. A. Warren, J. Gilbert.

Ladies' Reception Committee.

Mrs. Chas. Faser, Mrs. Frank Somers, Mrs. R. A. Warren, Mrs. J. Gilbert, Mrs. L. R. Boynton, Mrs. N. Hope, Mrs. L. G. Aims, Mrs. P. Levy, Mrs. W. S. Hanbridge.

Entertainment of Ladies and Visitors.

P. Levy, J. Foster, R. A. Warren, C. Anthony.

Banquet Committee.

P. Decker, N. Hope, F. Somers.

Picnic Committee.

Seth Cohn, L. G. Aims, C. Fraser.

Prize Committee.

L. Levy, L. R. Boynton, H. Reed, C. Eppstein, G. Davis, W. Kohlwey, G. Peters, M. Fortin.

URUGUAY.

(From Consul Frederic W. Goding, Montevideo.)

The First Drawbridge in Uruguay.

On May 1, 1912, a new and important public work was officially inaugurated—the drawbridge over Las Vacas Creek, at Carmelo, the first of the kind in the country, which will be of the greatest possible future benefit to this rich and fertile district.

The drawbridge has two arms of equal length, similar in structure and size, as regards the rotary part, to the Parnitz at Stettin, and the Niederboum at Hamburg. The most interesting part of the bridge is its foundations, built by means of dikes, with watertight divisions open at the top, which by their dimensions, on account of the great density of the water, may be counted among the most notable examples of this system, as it is rarely that the weight of water flow, which it must resist, overcomes it. The drawbridge has two navigable passages. The length of the rotary section is 118 feet, and of the arms 6.6 feet by 59 feet. The weight of the movable part is 300 tons, total width 26 feet, length 246 feet.

The work has been under the direction of a local engineer. The building to the bridge was done by the Government, after having called for the requisite three tenders, which were canceled because they exceeded the estimate given.

KOREA.

(From Consul General George H. Scidmore, Seoul, Chosen.)

Electric Enterprises in Korea.

It is announced by the Seoul press that the Japanese firm of Okura & Co. of Tokyo have made arrangement, under Government permission granted on May 6, for installing on the Chongchon River an electric plant to supply the demand of the mining district of north Pyongan Province.

The scheme contemplates the supply of motive power, tram service, and lighting, and contracts have been already entered into with the Oriental Consolidated Mining Co., the Chosen Mining Co. (both American), and others for the supply of over 2,000 horsepower. I am informed by representatives of these companies that this arrangement is considered of great advantage, in view of increased cost and growing scarcity of wood for fuel.

The coal to be used in the work will be supplied from Manchuria, where Okura & Co. control the output of the Penshu Colliery. The machinery required will be obtained from Germany. Okura & Co. are the sole agents for Japan of the Allgemeine Elektricitats Gesellschaft, of Berlin.

PACIFIC GAS AND ELECTRIC AT WORK ON RESERVOIR.

EMIGRAN GAP (Placer Co.), July 5—Eight engineers are now at work in the five camps situated along the line of activities of the Pacific Gas and Electric Company in the Bear River and Lake Spaulding section. About a thousand men will be needed to carry on the work, and five hundred head of stock. The dam at Lake Spaulding will be one of the highest in the world and will require at least two years of actual work to build. The rights of way are all from secured, and the Federal Commission gave the permit for the prosecution of the work ten days ago, so there is no obstacle in the way of continuance of the great project. The work will require the expenditure of $5,000,000. The purchase of $20,000,000 worth of the company's bonds by J. Pierpont Morgan supplied the funds for this purpose.

Three electric plants are to be constructed along Bear River. One will be at a point five or six miles east of Towle, on the line of the Southern Pacific over the Sierras. There an installation of 35,000 horsepower will be made. When these plants are completed the company will give increased its hydro electric power service to upwards of 100,000 horsepower.

In addition to these plants there is to be constructed at Lake Spaulding, a little over ten miles to the west of the first power station, a large concrete dam, 300 feet in height, which is to impound the waters of the river for storage purposes to the amount of 71,000 acre feet, or 1,000,000,000 cubic feet, equivalent to 30,000,000,000 gallons of water.

GLENN COUNTY VALUES INCREASE

WILLOWS (Glenn Co.), July 17.—According to the figures submitted to the County Supervisors by Assessor W. H. Markham Monday Glenn County's total taxable values have gone up to more than a million dollars in the last year. The total assessments of the present year for the whole county is $15,687,355.

This includes everything except the railroads and such corporation property as the State alone taxes.

The total valuation in Willows for the present year is $1,508,105, an increase of about a quarter of a million over last year.

The real estate of the county is assessed at $12,450,224. The improvements are assessed at $1,170,775. Personal property is assessed at $2,020,698. Cash is assessed at $41,655. Solvent credits are assessed at $4,000.

The cattle of the country are assessed at $257,129 and the automobiles at $33,880. While the books are complete and have passed into the Supervisors' hands, there are yet to add many columns of figures showing the valuation of various separate classes of property, etc.

TO EXTERMINATE FRUIT PEST.

WASHINGTON, July 17—The Senate Agricultural Committee Tuesday favorably reported Representative Raker's bill providing an appropriation of $40,000 for extermination of the Mediterranean fly. The bill had previously been reported favorably by the House Agricultural Committee.

STOCKTON PLANS ADMISSION DAY FETE.

STOCKTON, July 17—The local committee in charge of arrangements for the Ninth of September celebration here, is making every effort to provide lodgings for the 50,000 visitors expected. Every available building will be transformed into a lodging house, and a committee has begun a canvass of the town to locate extra rooms in private residences.

Reports that come in daily indicate that the parade will be the longest ever seen in California, and arrangements have been made to rope off cross streets and the curbs along the line of march to keep the crowd from interfering with the marchers.

The committee will insist that there be no extortion during the celebration, and merchants in all lines, together with eating establishments and hotels will get together and agree upon reasonable rates for all.

FOURTH CONSTRUCTION CAMP IS ESTABLISHED.

AUBURN (Placer Co.), July 16.—The Pacific Gas & Electric Company opened up its fourth construction camp at Bear Valley yesterday. In all 800 men are now employed. The company will spend $40,000 in erecting bunkhouses and providing baths for its employes.

VALUE OF CALIFORNIA FARM LANDS.

WASHINGTON, July 17. A census bureau report for the thirteenth census, issued yesterday gives the following statistics for California:

Number of farms, 88,197; approximate land area of the State, 99,617,280 acres; land in farms, 34,261,111 acres; improved land in farms, 11,389,894 acres; number of acres irrigated, 3,039,355; acreage reclaimed by irrigation, [illegible]; acreage included in projects [illegible]; dependent on irrigation, [illegible]; cost of irrigation enterprises, [illegible]; average cost per acre, $[illegible]; estimated final cost of existing enterprises, $81,142,-[illegible]; all operating and maintenance [illegible]; cost reported, $[illegible]; average cost per acre, $15.

OAKLAND AND ANTIOCH RAILWAY ASKS FOR POWER CABLE PERMIT.

The Oakland-Antioch & Eastern Railroad Company has applied to the War Department for permission to lay power cables across Suisun Bay and Montezuma Slough, near the site of its proposed bridges across those bodies of water.

The applications, which are on file in the office of Major S. A. Cheney, Acting Chief of Government Engineers in this city, are identical to provide a means of carrying the power from the Oakland-Antioch lines on the Contra Costa side across Suisun Bay for the projected line to West Pittsburg in Solano county.

The contract for building the two big suction dredgers, Sacramento and San Joaquin, which will be used by the War Department in carrying out the Rio Vista project, is now 10½ per cent completed, and the work completing the project for the canal of 30 feet depth, according to the Ellicott Machine Company of Baltimore, Md., the contractors, by Major Cheney.

COMPLETING ROADS TO ALUM ROCK.

SAN JOSE, July 19. Access to Alum Rock Park was cut off yesterday by order of the Board of Supervisors. The county road into the park in the foothills was closed until the Peninsula Railroad Company has finished building its new line into the park. Nearly all curves are being eliminated [illegible] by the order of the Board of Supervisors. The new line will enable the company to handle the crowds that [illegible] at the park entrance. [illegible] on the Alum Rock road. The county Board [illegible] the [illegible] have time to [illegible] work it [illegible]

ANOTHER ADDITION TO THE WYBRO RANKS.

[illegible] Mr. S. A. Lewis, who built so many high class residences out in the exclusive district near the [illegible] in West Clay Park, called at White Brothers' yard at [illegible] and selected a quantity of WYBRO in three-ply [illegible] Sunset Red Gum for [illegible] a $5,000 residence which [illegible] building in that fashionable section.

Mr. Lewis [illegible] that the WYBRO panels [illegible] panel to the [illegible] Mr. Lewis [illegible] to a man who would be [illegible] extra [illegible] panels.

PORTLAND CEMENT PRODUCTION INCREASED.

Figures of United States Geologicial Survey for 1911 Show an Output of Nearly Two Million Barrels More than in 1910.

During the last 13 years the production of cement in the United StSates has shown an annual increase and the growth of the Portland cement industry has been enormous. This is indicated by the fact that the two-million barrel increase in production in 1911 was the smallest that has been recorded these 13 years. The total production of Portland cement in the United States in 1911, according to Ernest F. Burchard, of the United States Geologicial Survey. in the advance chapter for cement from "Mineral Resources for 1911," was 78,528,637 barrels, valued at $66,248,817. Although the increase over the production of 1910 was 1,978,686 barrels, or 2.58 per cent, the total value decreased $1,956-98[illegible] or 2.87 per cent. The average price per barrel in 1911 was a little over 84 cents, compared with 89 cents in 1910. The average price of Portland cement in the Lehigh district was 71½ cents a barrel, and that on the Pacific coast $1.40½. Many mills in the East and Middle West, according to Mr. Burchard, sold cement as low as 65 cents a barrel. The Portland cement plants reported in operation unmbered 115, an increase of 9 over the unmber in the preceeding year.

The total productionof natural cement in 1911 was 926,091 barrels, valued at $378,533, and of puzzolan cement 93,230 barrels, valued at$77,$86, making a grand total for all cements of 79,547,958 barrels, valued at $66,705,136.

A copy of Mr. Burchard's report, which is a complete review of the industry, may be obtained on application to the Director, Unites States Geologicial Survey, Washington, D. C.

PRODUCTION OF COAL IN THE ROCKY MOUNTAIN STATES.

The complete returns of the coal production in the States of the Rocky Mountain region in 1911 have been received by E. W. Parker, of the United States Geologicial Survey. The eight States included, namely, Colorado, Idaho, Montana, Nevada, New Mexico, North Dakota, Utah, and Wyoming, produced in 1911 a total of 26,044,387 short tons,valued at $40,098,747. Although no coal was produced in Nevada in 1910, the output of the seven other States was 28,813,026 short tons, or 9.7 per cent in quantity, and of $3,677,968, or 8.4 per cent in value. This decrease was due to the resumption of mining in the Mississippi Valley States, the idleness in which, caused by the strike in 1910, resulted in extraordinary demand on the mines of most of the Rocky Mountain States.

In Montana and North Dakota the production in 1911 exceeded that of 1910, in the former by 55,388 short tons and in the latter(which produced lignite exclusively) by 103,587 short tons. Both of these States attained their maximum record of production in 1911.

In importance of production Colorado ranked first in 1911 with an output of 10,157,383short tons. Wyoming second, with 6,744,864 short tons; and

New Mexico third, with 3,148,158 short tons.

Coke is made in Colorado, New Mexico, and Utah. Colorado's coal made into coke in 1911amounted to 1,424,251 short tons, or 14 per cent of the total output of the State. New Mexico consumed 767,108 short tons, or 25 per cent of the total production of the State, in the manufacture of coke, and Utah 381,696 short tons, or 15 per cent of the total output. The total quantity of the coal consumed in the manufacture of coke at the mines of the Rocky Mountain States was 2,573,-055 short tons, a little less than 10 per cent of the total production.

The total number of men employed in the coal mines of the Rocky Mountain States was 33,783, who worked an average of 219 days, against 34,652 men for an average of 245 days in 1910.

GOVERNMENT BUILDING CRITICIZED.

House Committee Recommends That Work Be Standardized.

WASHINGTON, July 20. — Severe criticism of the Government methods of erecting public buildings is contained in the report of the House Committee on Expenditures in Public Buildings which Chairman Cline of Indiana submitted. The committee points out extravagance and waste and the possibilities of fraud in public expenditures. The committee recommends that Government buildings be standardized, and endeavors to point out what it considers the folly of maintaining a big force of draftsmen and architects to make plans for every building constructed by the Government. The report finds that since 1902 721 buildings have been erected, and that there are now pending bills for 750 buildings, to cost an aggregate of $70,000,000.

"If this keeps up," the committee says, "there will be 1520 public buildings inside of fifteen years." The cost of maintenance alone will be $11,000,-000 annually.

The office of the Supervising Architect of the Treasury is criticised. This office is maintained at a cost of $3,000,-000 annually. It has had no definite policy, the committee finds, and blame is attached to former Supervising Architect James Knox Taylor for some of the mistakes discovered.

The committee says the present system of awards is bad, and should be changed. It points to instances where contractors have been beneficiaries of "extras" and "betterments" when Taylor dominated the board.

The committee urges that members of Congress be less zealous in their efforts to get public buildings for their districts, and recommends legislation making it illegal to erect a public building in any city of less than 5000 inhabitants or whose Postoffice takes in less than $10,000 annually.

In its comment on the administration of Supervising Architect Taylor, the committee says: "Mr. Taylor cannot escape blame."

In the Senate, public buildings of the country today were variously characterized as of the "store box variety," the "brick block" type and a "cross between a stable and a chicken coop."

Most of the criticism upon the Nation's public architecture was made by Senator Heyburn, who suggested that many buildings should be removed "overnight."

The comments were made during consideration of the sundry civil appropriation bill. The House had put in a provision that would prohibit the purchase of building plans from architects outside the office of the Federal Supervising Architect. Senator Newlands said public architecture had been improved by allowing President Roosevelt to secure plans from outside architects.

The Senate reversed the action of the House, and the question will be fought out in conference.

LUMBER MERGER ABANDONED.

SPOKANE July 20.—The plan to merge all the tide water saw mills and lumber interests of Washington and Oregon in a $75,000,000 corporation has been abandoned, at least temporarily, according to Henry J. Pierce of Spokane, who has been prominent in promoting the merger. Pierce announced Friday that while the general plan for the merger had met with the approval of the majority of the interests concerned, certain points had met with opposition, and the matter would be dropped for a time.

The merger involved the issue of $42,000,000 in bonds, the floating of which it is understood already had been arranged with New York and Chicago financiers. The merger plans not only contemplated placing the logging and saw mill operations of the territory involved under one management, but also proposed the transportation of all products in bottoms owned by the company, the products to be under conditions such as to eliminate the middleman as much as possible.

START WORK ON KLAMATH COURT HOUSE.

KLAMAH FALLS (Ore.), July 20. — After a contest over the site which has lasted several years work was commenced yesterday on the erection of the County Court House. The structure is to cost $200,000 and will be located on Block 10, the site donated by the Klamath Development Company. The erection of the building will be continued regardless of the appeal to the Supreme Court taken by the objectors.

Local laborers are to be employed on the work and preference will be given to men with families, and $60,-000 is to be spent this year on the building.

The decision to proceed with the work comes at the end of a bitter fight between factions over the location of the building and will change the business center of the city from the west side to the east side.

On July the first the last piece of steel work was riveted in place on the top of the highest building in the world, the Woolworth building in New York. Like the great ships of the Atlantic the buildings of the great metropolis have been growing higher and higher. And this office building marks the highest point yet reached in skyscrapers which began their existence with the career of the late D. H. Burnham.

Steel has now become the great frame structural material of the world. The great ocean liners, the battleships, the railroad coaches, the great buildings the engine of construction are all constructed of steel or steel frame work and riveted steel.

The Woolworth building will rise 750 feet from the street level, which is 50 feet higher than the Metropolitan tower and 138 feet higher than the Singer building. In all it contains fifty-five stories. It is of standard steel column and floor beam construction. In order to take care of the enormous dead load and wind stress to which it will be subjected the framework is of unprecedented size. Withal the building is designed along lines that are extremely graceful proportions and while the tallest and the largest building in the world it is also the most beautiful building.

The report of the engineer John R. Freeman on the sources and proposed sources of the water supply for the metropolitan area of San Francisco reads like the report of a man who knew his business and said needs a thorough and unbiased investigation of the subject. According to him the Hetch Hetchy valley source is the best and practical the only available one that can furnish the city an adequate supply.

Two boards and years and years of frittering away time and money, hearing objections from every conceivable source, discussing the supply and that supply and all aside from the main point at issue.

Mr. Freeman's report takes that a new permit could be obtained from the Secretary of the Interior and that the city should first use the supply from the Hetch-Hetchy valley itself and not attempt to do anything with the lake Tenaya supply for many years. Instead of taking the water down into the San Joaquin Valley and then pumping it over the Livermore hills to plant a forest line by enclosed aqueduct and tunnel that will bring the water in by gravity alone.

To avoid the opposition of the Spring Valley and People's Water Company interests at most one bond their estimate.

The objections of these lovers, who have protested against the use of the valley, he seems to be without foundation. On the whole the report reads like one that was made after competent investigation and a complete knowledge of conditions. If the plans were carried out the city would certainly acquire and come into possession of the most essential element of its existence.

Meanwhile here are parts of San Francisco where it is utterly impossible to get water to let you at present time. The city has had an opportunity to acquire the properties of the Spring Valley Company.

P. H. McCarthy, when mayor of San Francisco, was going to have the Hetch-Hetchy supply into the city within three years. By the Gods!

Now this report comes along and seems to indicate that all the work of the years past has been useless fiddling around and that the time for some determined effective action be taken by the citizens that awaits the metropolitan area around the bay.

Discriminating Conduit Users Specify

CENTRAL RED

It Stands Out as the Best of Rigid Conduits

In the manufacture of this especially prepared conduit, we have taken advantage of every refinement known to the profession and have utilized the experience of producers of this class of material for the past twelve years, in evolving a coating for pipe that is an ABSOLUTE PREVENTATIVE of deterioration in the pipe under the most trying conditions.

The utmost care has been taken to thoroughly clean and to remove all scale and silicates before giving the pipe a coating of zinc by our own special process. This exterior coating is absolutely continuous, free from pin holes and other objectionable features. The coating of zinc prevents rust and insures against any deterioration in the pipe. Over the zinc exterior, two layers of our own especially prepared red enamel are coated, great care being observed to allow only a very thin layer to adhere to the threads, thus avoiding the necessity of recleaning them and to maintain perfect electrical contact. The red enameled interior provides a smooth, slippery raceway, facilitating fishing.

The salt air of sea coast cities, so injurious to all other classes of conduit, has no appreciable effect upon "CENTRAL RED," and we heartily recommend its use in these localities and wherever conditions are the most severe. It is especially adapted for use in CINDER CONCRETE.

"Try It Where Others Have Failed"

"CENTRAL WHITE"

is as good, if not better than competing brands of electro-galvanized conduit. Adequate protection from deterioration is insured by a heavy zinc coating. Couplings are removed during the electro-galvanizing, so that there may be no unprotected spots on the pipe.

"CENTRAL BLACK"

is especially recommended for its softness and easy working qualities. Our patented cleaning process gives us a product free from roughness.

APPROVED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS

Honest samples of our product furnished on request.

Editorial Comment.

Work on the Panama Canel continues unabated. It is a remarkable thing that the greatest undertaking of modern times, or for that matter of any time, should have been conducted without any scandal and done so effectively that the whole world marvels at it.

In striking contrast is it to the work of its predecessor, the De Lasseps undertaking where millions were spent on graft contracts and the money of the subscribers to the stock of the company was squandered and stolen. Tons of steel pens, enough to supply the world for a long period of time were received in the purchase from the French syndicate and numberless other useless outfits were among the things for which the people in charge spent the money that they handled.

The present construction is the best monnument of the right kind of organized work that the world has ever witnessed. And it depends upon the man in charge, the constructive engineer who not only has the technical knowledge and the executive ability to handle so great an enterprise but apparently has the moral virtues to instill into all lines of the work the proper motive and compel the honesty that effective public service demands.

It has long been a proverb that an Englishman is "set in his ways" and that changes in some departments of English society are about as progressive as they were in China during the Manchu dynasty. Newspaper reports state that London is to have a new building ordinance and a new building inspector, whose duty will be to see the law carried out. It is said that the City will appoint a "practical builder" rather than an architect and will pay one thousand dollars a year for the service, as one hundred dollars a month is deemed an extravagant expenditure for the service.

It is presumed that in the largest City in all the world some important buildings will be constructed. And yet this "practical builder" is supposed to see that the provisions of the ordinance are carried out and interpret all its regulations and fine points. Surely a great deal of honor must go with the job else the "practical builder" could earn more money shingling roofs or carrying a hod than he will as chief inspector of buldings in the world metropolis. Surely the builders of London must not be well organized or the dersity of the ignorance of municipal departments of the great city must be something appalling.

In such a city it ought to be evident to anyone that the position of inspector of buildngs should be occupied by a man of high order of experience and knowledge of all kinds of architectural work. To ask such a man to take so important an office or one thousand dollars a year is to treat the situation as if it were a mere clerkship that entailed no other duty than the signing of the officer's name to a building permit.

Announcement is made in the scientific journals that India rubber has been produced by synthetic construction of organic chemistry, that is the rubber tissue is built up by the union of its constituent parts obtained from different sources. The announcement comes from Prefessor W. H. Perkin, the English chemist, and son of the illustrious Sir William Perkin, the founder of the coal tar industry.

The new rubber is manufactured from a distillate of starchy materials such as Indian corn or potatoes and water and it is said that the resulting rubber is manufactured much cheaper than that obtained from the rubber tree.

The preliminary estimates are encouraging at least and it is expected that the synthetic rubber can be sold at 60 cents a pound. Para rubber sells at about $1.35 per pound so that if the manufactured article is the equal of the natural product there is certainly an optimistic outlook for the chemists who have succeeded in creating this much used substance from a different and cheaper source.

It appears that the chemists of Germany, England and France have been working along the same line to discover the means of creating rubber by artificial means with the result that the Englishman has won with the Germans a close second.

In the competition of everyday life women are preparing to enter the occupation of builders. Mrs. Sydney Williams has given $10,000 for the establishment of scholarships in the school for Women Builders in process of erection at Winfield, Long Island. There will be accommodations in the school for about a hundred students. Professors of architecture, engineering, civil and electrical, masonry, plumbing and carpentry are now on the faculty roll. The course covers two school years of forty weeks each, and there is a third year's post graduate course.

It is said that over fifty young women have already applied for admission and that the course bids fair to be popular.

The building trades have been generally thought to be outside woman's realm of labor. Most of the work is rough, a good part of it is difficult and dangerous and requires a good deal of physical strength and endurance. However, the new order of things may breed a race of amazons who will be equal to the occasion and will enter and compete in all kinds of work without regard to the class of labor.

Premium And Profit Showing Systems And Their Application To Modern Industrial Conditions.

The tendency of the age is to increase production and many schemes to accomplish this are being devised. Some of these schemes are good and some are bad; some succeed and some fail to accomplish the purpose for which they were designed. Some fail because of an inherent weakness, and deserve no better fate, while others fail because of incompetence on the part of those administering the system. Any system of premiums, bonuses or profit-sharing that is designed for the purpose of blindfolding men while they are being robbed of the product of their toil, is sure to fail, because it ought to fail. Any system of premiums, bonuses or profit-sharing that is correctly designed and honestly and efficiently managed is just as certain of success, because it will give every man as his share in the reward of his labor.

For the sake of clearness and to aid in a better understanding of some of the things that may be said hereafter, the writer wishes to state his position. He believes in the competitive system of working as the only proper way to attain proficiency and efficiency. He believes in piecework as the only proper and economically correct way to administer the competitive system. He believes that every man is entitled to the product of his toil and that a system of profit-sharing which recognizes its obligation to both capital and labor is the only way in which the rights of both can be equitably adjusted. He believes that capital represents labor in some form, because it is, or represents the product of some man's toil, and as he should receive his share of the profits.

I might also not be amiss to briefly state my reasons for believing as outlined above. In regard to the competitive system, it will, I think, be readily admitted that all men, or at least the great majority of men are living for the higher ideal looking forward to something better than the present. Conditions and things are valued on their own merits only, are judged in comparison with other conditions and things. The condition of the common people today is better than it was a few years ago, but it is no better when compared with the advance that has been made in the conditions of the world's progress. Within the memory of the average man the post man walked and the fire-tender rode a bicycle. Today the post man must be content with a bicycle, and the rich man has motor car or carriage. All this has been brought about by competition in the struggle for something better. Destroy competition and you destroy the incentive of the progressive in the world's progress.

Piecework is the only way in which a man can earn his own merit, compelling each fellow man to receive the reward of his own toil only. Of course, this system must be administered fairly and honestly and every man get his fair share of the product of his toil, and not as is the fact of the case, workmen fail to get their share of the reward of all or it will utterly fail to accomplish that for which it was intended. It is not fair, it is not sound business, it is not in the interest of human progress, to have a standard rate of wages, because under it there is no encouragement for the good workman to excel, else and no incentive for the bad workman to become good.

It would require no argument to prove that every man is entitled to the product of his toil but it is because of failure to recognize this fundamental principle that so many so-called profit-sharing combinations have failed. Failure to recognize the principle is also largely responsible for efforts on certain quarters to recognize the rights of capital. A lack of knowledge of what capital is and how it came to be, its rights, capital represents labor or the product of labor, and many men who are desirous saving for themselves and their families, invest in stocks and bonds. Workingmen place their savings in the bank and receive interest on it. These small savings in the aggregate amount to large sums and are loaned to manufacturers and merchants to conduct their business. Part of the gross earnings of these different enterprises go to pay interest to the banks, and part of the interest is returned to the workingmen in the form of the savings deposit.

Any person who has worked for a wage well knows that a day's work would get you a dollar and that for that dollar you were entitled to a good day's work. He finds a dollar in his pocket when he quits work and the next day he puts in his time and does a day's work for a dollar. Now, the man who furnishes the capital to buy the tools and the material for the man, let us call him, would want to work for a dollar a day and find the same pay for the goods, so he puts at once from the manufacture a certain sum of money to pay for the tools to the product of the man. Now, the machine itself is created at cost of toil of one man and the money that was given in exchange for it was created because it was saved from the wages that had been paid to the workingmen, who, in their turn, were entitled to it in exchange for their toil. Now when that machine begins to work it is entitled to its share of the gross products, and the capitalist who owns it is entitled to his reward for the use of it, and just the same as the laborer was entitled to a reward but the latter's reward is usually in the form of wages, while the reward may go to the owner, who divides it with the banker who loaned him the money with which to buy it and the banker divides his share with the workingmen from whom he first got the money. A clear understanding of the relationship that exists between capital and labor will make it comparatively easy to understand why profit-sharing is the only way in which the rights of both capital and labor can be equitably adjusted.

In the first place, profit-sharing recognizes the equality of capital and labor. This recognition is essential to harmony, and harmony is absolutely necessary to success. Under it capital and labor are partners, and not labor the slave of capital, nor capital the victim of labor. Capital approaches labor in the spirit of mutual obligations and not in the spirit of "you take my pay, you take my say." The helplessness of capital without labor TWO July 23 Hoyt sea nff and of labor without capital is recognized; their mutual obligations are admitted.

"But," some one asks, "are these two great forces, capital and labor, helpless if separated from each other? Are the obligations mutual?" Most certainly they are. The capitalist, with a million dollars of borrowed money ready to invest in plant and equipment cannot raise a tool of wall or install a machine without labor, and the money stands idle, unable to earn even the interest which he agreed to pay for its use. When financial institutions become uneasy and the workingmen become alarmed and distrustful, and in huge numbers withdraw their money from the banks, the whole industrial fabric becomes disturbed and labor stands idle, unable to earn even the bread to keep soul and body together. The dependence of each is apparent, the obligations are seen to be mutual.

Capital, with the aid of labor, builds a factory and equips it with the latest machinery then comes other labor and commences to operate these machines, and the men who built the factory and made the machines are now reaping the reward of their toil, and, also the men who operate the machines are reaping theirs.

Now comes the question of how to divide the product of the various operations. How much shall go to capital and how much to labor? the writer is of the opinion that capital should receive a dividend of 10 per cent on the investment. I do not mean 10 per cent of the net profits, but 10 per cent on the money invested in plant and equipment and for the purpose of running the business. After all wages, salaries and other expenses connected with business have been paid, and a sufficient amount allowed for depreciation of plant and equipment, the balance of the gross earnings would be termed "net profits," and this 10 per cent due to capital should be a first charge against the net profits. Whatever is left of the net profits after paying this 10 per cent to capital should be divided between capital and labor in proportion to their respective earn-

ings. To illustrate: Suppose capital had $1,000,000 invested in the business, labor had earned $150,000 in wages, and the net profits amounted to $300,000. The first charge against this $300,000 of net profits would be 10 per cent on $1,000,000 of capital invested, which would amount to $100,000, leaving a balance of $200,000 to be divided between capital and labor in proportion to their earnings. That is, capital earned $100,000, labor earned $150,000, making $160,000 in all; and the $200,000 is 12½ per cent on $160,000. From these figures it will be seen that capital would receive $1,250, which is 12½ percent on $10,000, and labor would receive $18,750, which is 12½ per cent on $150,000. This $18,750 would be divided amoung the workmen in proportion to their respective earnings. If a man had earned $1,000 per annum, he would receive $125; if he had earned only $800, he would receive only $100.

But some will ask, "Why should this 10 per cent on capital invested be a first charge against the net profits?" Simply because it is entitled to its reward the same as labor. Labor became a first charge against the gross earnings of the business, and every workman received his share of the gross earnings each week in the shape of wages, and after each workman and salaried employe has received his share according to the basis of calculation agreed upon capital receives its share, if the balance is sufficient to pay it.

But some will object that a 10 per cent dividend is too large to be a first charge against the net profits. In using these figures I have done so more for the sake of convenience than with any intention of establishing anything like an arbitrary rule. The rate paid to capital should be settled by mutual agreement in the same way that the rate of payment for any particular class of work is settled. At the same time, I feel free to say that while a 10 per cent dividend is generous and many manufacturers are compelled to accept much less, I do not think it is too large. There is an element of risk associated with investments in industrial enterprises, such as loss from fire, etc., which cannot always be covered by insurance. Again, capital that is thus employed cannot always be withdrawn at will. It is different with the workman, as he is free to separate himself from the concern at any time, unless under contract, and seek employment elsewhere.

One objection that has been raised to the profit-sharing, or premium system is that it works only so long as those affected continue to make improvements in their results, and that if the extra effort fails to bring extra returns, the men become dissatisfied and the last state is worse than the first.

But in what respect is this different from anything else? Where is the man who would not become dissatisfied in any walk of life, were extra effort failed in the end to produce extra results, was openly discussed. The fault was not with the system, nor with those who worked under it, but the fault lay with those who were behind the system and who failed to [illegible] even a quarter of a century's wide and varied experience of factory life I have never known of one where extra effort on the part of a man in the end did not produce extra results, unless he had been tempted by those higher in authority. It is certainly discouraging for a man to have his plans all made for getting out a certain amount of work by a certain time, to find that not withstanding the fact that plenty of notice had been given, the buying end of the concern had neglected to get certain supplies. It is also most discouraging for a foreman to have a higher override him and engage temporarily men to operate machines, with the result that he now and then break valuable machines, necessitating expensive repairs, and the cost of operation is gotten up instead of down. No amount of extra effort will in the least of a human being in overcome such handicaps as these.

In the course of a century in which the writer has been closely identified with the internal economy of factory life [illegible] is known many accidents and losses to men, and on not a few of them were personable or else some one believing them old and ill been part of his business, would have taken the necessary steps to prevent them. It is a system designed to promote thrift, loyalty and the welfare of the employed as far as the truest possibilities are to be obtained. There must be cooperation, a recognition of equity and mutual obligation and responsibility.

CANAL EQUIPMENT FOR ALASKA.

Reconstruction Work during the construction of the Panama Canal, by Major General George W. Goethals, U. S. A. Chief Engineer and Governor of the Panama Canal.

In the case of those who hope that the equipment and material so far as it will be available, which is now in use in the construction of the Panama Canal will not be sold but will be retained by the Government for use in some great enterprise which I believe the Government will undertake.

I endeavored last summer to dispose of a portion of this equipment and found that the estimated worth of 10 per cent of the equipment was represented by the actual worth. It is now proposed that Alaska is to be developed and I am compelled to [illegible] transportation from the Atlantic coast to Alaska, in the judgment of the Department of the United States Railroad and operate the railroad and sold use the canal equipment [illegible] for that purpose. As it would [illegible] several months before [illegible] to some proper [illegible] and it seemed to me to be worth while to [illegible] certain correspondence with the quartermaster general of the Isthmian Canal Commission relative to the disposition of its material."

[illegible] Col. [illegible] U. S. Army, and quartermaster Isthmian Canal Commission, [illegible] as follows:

Referring to your several inquiries of late as to proposed [illegible] equipment, and tools now on the Panama Canal, construction work for the [illegible] Alaska, [illegible] to follow. I transmit [illegible] of all such equipment [illegible] boats, cranes, rails, etc., to Secretary Fisher on his visit to the Canal Zone some months since. This is an itemized list, showing in detail all the articles now carried, giving the date purchased, original cost, condition at present, and probable date of release from work on the canal. In addition there is being prepared a list of shop tools, which will be turned over to the Secretary of the Interior at an early date.

"Although the gauge of the Panama Railroad is 5 feet, all cars, steam shovels, etc., can be reduced to a standard gauge, or 4 feet 8½ inches, at a very moderate cost. About 24 locomotives can also be remodeled, but the greater number are so constructed that there is not sufficient room to set the tires and driving wheels into the standard gauge.

"We have on the Isthmus two large repair shops—one to repair steam shovels and one on repair of locomotives and car equipment—and all equipment is kept in first-class condition, none of it being allowed to deteriorate. Should a transfer of the surplus equipment be directed, it could all be put through the shops before leaving and be in good, serviceable condition on arrival in Alaska.

"We have employed on the Isthmus at the present time about 5,000 American citizens, the greater number of whom have been identified with the construction work on the canal for a number of years. They have learned of the proposed legislation in regard to the railway in Alaska, and they are already talking the matter over and many of them are eager to go. They are accustomed to the Government service, accustomed to our methods, and entirely familiar with all the various articles of equipment that are to be shipped from the Isthmus, in other words, a portion of the canal organization, including accountants, mechanics, engineers, and all classes of men, with the appliances, with which they are entirely familiar, could be transplanted to Alaska and go to work at once under the system entirely familiar to them. There would be no loss of time incident to the formative stages of the organization, the men would know each other and would know their immediate superiors, and it would seem that the best results should obtain.

"It is presumed that a wage scale for this force would be authorized similar to the wage scale on the canal, as good men would not be induced to live in either Panama or Alaska for the same amount of wages that are paid in the United States.

"Arrangements could be made to ship the equipment just as fast as it is released and this probably would fit in with the construction work in Alaska. The transport Buford, now on the Pacific Coast, possibly might be used to effect this transfer and therefore minimize the cost.

"An attempt has been made recently to sell some of the surplus equipment, with very discouraging results; steam shovels, for instance, only bringing 10 per cent of the original cost, and unless some special project can be found it is not believed any better prices will be obtained in the future. It would, therefore, effect a very decided saving to the Government to put this plant, the total value of which amounts to about $[illegible],000,000, into service elsewhere."

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco—Apartment house, 3 story and base, frame, $12,000. Architects C. M. and A. F. Ropessan, Monadnock Bldg. S. F. Owner's name withheld. The building will be erected on an inside lot and will contain about 12 modern apartments which will be arranged in suites of two and three rooms each. There will be connecting baths and wall beds. The interior finish will be of pine and redwood. There will be steam heat. The exterior of the building will be covered with metal and shiplap. Plans are now being prepared.

San Francisco—Apartment house, 6 story and base, brick and steel, $75,000. Architect, Milton Lichtenstein, 111 Ellis St. S. F. Owners, Gump Realty Co. The building will be erected at the corner of Geary and Jones streets and will cover an area of 62x77 feet. There will be in the neighborhood of 150 rooms arranged in suites of two and three rooms each. There will be connecting baths and wall beds. Provision has been made for steam heat, elevator service and a vacuum cleaning system. The interior will be handsomely finished. The exterior of the building will be faced with pressed brick. Plans for the work are now being prepared.

San Francisco—Apartment house, 9 story and base. Class A construction, $200,000. Architect, Hoag ton Sawyer, Sharon Bldg. S. F. Owners, Embarcadero Court Investment Co. Reports of the project have been in circulation for several months but this is the first information given out as to the location and details. The building will occupy a corner site at the northwest intersection of Sacramento and Mason streets, commanding not only a view of the entire bay but of the city as well. The construction will be of the class A type throughout with a complete steel frame, exterior walls faced with ornate pressed brick and terra cotta floors of concrete and interior partitions of hollow tile. The floors will be subdivided into large apartments and will be fitted up for the use of wealthy tenants. Mr. Sawyer has spent considerable time in the past studying the developments in modern apartment house construction and the equipment of the new building will embrace all of the latest improvements. The mechanical equipment will include steam heat, elevators, hand water, vacuum cleaning, laundry machinery and probably an electric light plant. Working drawings are being made and further notice will be given in these columns as the plans progress.

Oakland, Cal.—Apartment house, 3 story and base, brick and frame, $15,000. Architect, Edward T. Foulkes, Syndicate Bldg., S. F. Owners, Clift Estate. The plans for this building are in the preliminary stage and none of the details of the work can be obtained at this time. As the plans progress further notice will be given in these columns.

Santa Rosa, Sonoma Co., Cal.—Apartment house, 2 stories, concrete construction. Cost not stated. Architect, Hermann Barth. Grant Ave. S. F. Owners name withheld. At present the building work is to be altered contains baths. There will be new interior partitions, hard wood finish, plaster work, plumbing and electric work. Plans are complete and figures are being taken by the architect.

San Francisco—Apartment house, 3 story and base, frame, $75,000. Architects Weeks & Day, Western Metropolis Bank Bldg. S. F. Owner, Sewell Hoffler. The building will be erected at the corner of Fillmore and Sacramento streets and is to cover a large area. There will be in the neighborhood of 75 suites in the building, arranged in two and three rooms each. There will be connecting baths, wall beds, steam heat and a vacuum cleaning system. The exterior will be finished in pine with redwoods. The exterior wall probably be covered with cement plaster. Plans are complete and bids are being taken.

San Francisco—Apartment house, 7 story and base, brick and steel, $100,000. Architects Weeks & Day, Western Metropolis Bank Bldg. S. F. Owner, Sewell Hoffler. The building has been mentioned in these columns. The plans propose the erection of a fireproof apartment house, containing considerably over two hundred rooms, which will be arranged in suites of two, three and four rooms each. All apartments will be equipped with wall beds and private baths. There will be steam heating apparatus, electric service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick and terra cotta. Plans are now complete and bids and figures are now being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and steel, $70,000. Architects Millar & Coker, Building Co., Wright and Callender Bldg., L. A. Owner, M. Silverman. The work is now practically under way. Plans are now complete and the contract states that the building will be finished by June 1. The building will contain 150 rooms which will be arranged in two, three and four room suites with baths, wall beds, steam heat, electric service, hot water supply and passenger elevator service. There will be a vacuum cleaning plant. The exterior will be faced with pressed brick.

Los Angeles, Cal.—Apartment house, 3 story and base, brick and steel, $90,000. Architects Millar & Coker, Building Co., Wright and Callender Bldg., L. A. Owner, Jacob Talbert. The building will contain about 150 rooms which will be arranged in apartments of two and three rooms each with connecting baths. There will be wall beds, steam heat, hot water and passenger elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be started at once.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, C. E. Hodgkinson, Wilcox Bldg. Owner, E. B. Harrison. The building will cover a considerable area and is to contain about 100 rooms which will be arranged in two and three room apartments with connecting baths and wall beds. The plans provide for steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be finished in pine, hardwoods and white enamel. There will be steam heat, freight and passenger elevators, wall beds, and a vacuum cleaning system. The exterior of the building will be faced with pressed brick trimmed with artificial stone. Plans are now nearly complete.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, M. D. Scott, Douglass Bldg. L. A. Owner, C. H. Lewis. The first floor of the building will be subdivided for stores. The upper floors will be arranged for two and three room apartments with baths and wall beds. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and bids are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architects, Taylor & King, Consolidated Realty Bldg., L. A. Owner, Tacoma Thompson. The building will contain 30 apartments of two and three rooms each with wall beds and private baths. The interior will be finished in pine and redwood with some hardwood floors. There will be steam heat. The exterior will probably be covered with cement plaster on metal lath. Plans are now nearly complete and figures will be called for shortly.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, H. W. Squires. The building will cover an area of 100x146 feet. The interior has been arranged to contain 120 rooms which will be arranged in apartments of two and three rooms each. There will be wall beds, steam heat, private baths, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Los Angeles, Cal.—Apartment house 3 story and base, brick. Cost not stated. Architect, H. C. Beckbar, Ferguson Bldg., L. A. Owners, Mrs. Eugene D. Porter and J. J. Seeman. The building will contain 17 guest rooms, 24 of which will have private baths. All apartments will be equipped with wall beds. Apartments will range from two to four rooms each. There will be steam heat. The exterior of the building will be faced with pressed brick and artificial stone. Plans are complete and segregated bids are now being taken on the work.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, F. M. Tyler, L. A. Owner, H. L. Wineman, 307 Hellman Bldg., L. A. This building will be erected at the corner of 10th and Maple streets. As yet only sketches have been prepared and none of the details of the building can be given. As soon as working drawings are started complete information will be published in these columns.

Los Angeles, Cal.—Apartment house, 2 story and base, frame. Cost not stated. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owner, A. Mitchell. The building will cover a considerable area and is to contain 60 rooms, which will be arranged in two and three room apartments with connecting baths and wall beds. The plans provide for steam heat, elevator service and a vacuum cleaning system. The exterior of the

building will be covered with cement plaster on metal lath. Plans are being prepared.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, F. X. Lourdou, Merchants' Trust Bldg., L. A. Owner, L. Figueira. The building will be 88x143 feet. There will be 18 two and three room suites besides the lobby, parlor and billiard hall besides the store rooms. There will be steam heat and wall beds. The exterior will be faced with pressed brick. Plans are complete and subcontracts for all parts of the work will be let.

Contracts Awarded.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel, $65,000. Architects, Neher & Skilling, Pacific Electric Bldg., L. A. Owner, Washington Sullivan. Contractors, Kelch & Sharp, Builders' Exchange. Contract price, $62,619.

Portland, Ore.—Apartment house, 4 story and base, brick, $50,000. Architect, R. F. Wassell, Portland. Owner, J. D. Wharton. Contractor, R. F. Wassell, Portland. Contract price, $50,000.

—BANKS—

Tillamook, Ore.—Bank and offices, 2 story and base, reinforced concrete, $30,000. Architect, Frank K. Benchley, Portland. Owners, Tillamook County Bank. The building will be 55x71 feet. The entire first floor will be fitted up for the bank. The upper floors will be subdivided into 15 modern offices. The interior of the banking room will be finished in hard wood, marble and bronze. There will be fire proof vaults. The building will be heated by a hot water system. The exterior will be faced with cement plaster. Plans are complete and bids will be called for at once.

BRIDGES AND DAMS.

Burlingame, San Mateo Co., Cal.—Bridge, reinforced concrete. Cost not stated. Engineer, Eric Wold, Burlingame. Owners, Town of Burlingame. Plans for this work have been completed and figures are now being taken. Bids will be opened by the City Trustees on August 7th. For full particulars of the work address either the Town Clerk, J. R. Murphy, or Engineer Wold.

San Jose, Santa Clara Co., Cal.—Bridges, reinforced concrete and steel. Cost not stated. Engineer McMillan, County Engineer, San Jose. Owners, Santa Clara County. County Engineer McMillan of Santa Clara has completed plans for three bridges which are to be erected in the county at once. There will be a reinforced concrete bridge over Beardsley Ravine on the Los Gatos and Santa Cruz road, a reinforced concrete cantilever bridge over Rundell Creek on the Dougherty road and a third bridge over Llagas Creek. Bids for this work will be opened on August 6th. Plans and specifications and full information of the work may be had on application to the County Engineer, San Jose, Cal.

Merced, Merced Co., Cal.—Bridge, reinforced concrete or steel. Cost not stated. Engineer, Cowell, County Surveyor, Merced. Owners, Merced County. This structure will be erected at Merced Falls. The type of construction is still undecided. Plans are now being prepared and will shortly come before the Board of Supervisors for approval. More complete details of this work will be given at a later date.

Devore, San Bernardino Co., Cal.—Bridge, steel. Cost not stated. Engineering Department Santa Fe R. R. Co., Los Angeles. Owners, Santa Fe R. R. Co. The bridge will be 1,000 feet long and is designed to carry two tracks. Plans are complete and bids are being taken.

San Bernardino, San Bernardino Co., Cal.—Bridge, truss steel. Cost not stated. Engineer, County Surveyor, San Bernardino. Owners, San Bernardino County. Plans have been approved by the Board of Supervisors for an 18-foot bridge carried on four 60-foot spans. Bids are now being taken and will be opened on August 6th. Plans and specifications may be had from Charles Post, County Clerk.

Pendleton, Ore.—Bridge, steel construction. Cost not stated. Engineer not selected. Owners, City of Pendleton. The city authorities are now taking steps for the construction of a large steel bridge across the Umatilla River in the west end of the city. As soon as an engineer is elected complete details will be given in these columns.

Seattle, Wash.—Bridge, steel construction. Cost not stated. Engineer, County Engineer, King County. Owner, King County. Plans for the L. M. Nye Bridge No. 2 have been completed and bids are now being called for. The bridge will consist of one 70-foot span, one 204-foot span, and an approach of 16 feet. Bids will be opened on August 13th.

Contracts Awarded.

Niles, Alameda Co., Cal.—Bridge, reinforced concrete and steel, $75,000. Engineer, County Engineer Haviland, Oakland. Owners, Alameda County. The following bids for the construction of this bridge have been received: Locke Construction Co., $71,160.91; F. Roland, $76,160.00; Raymond Concrete Construction Co., $73,993.60; Foster-Voght, $74,649.75; Thurston & Co., $80,-876.00; Walsen & Porter Construction Co., $82,285.00; Oxsee & McDonald, $86,944.00.

Perry, Ore.—Bridge, steel and concrete. Cost not stated. Engineer, County Surveyor, Dayton. Owners, Yamhill County. Contractors, Missouri Valley Construction Co., Chicago. Contract price not stated.

—CHURCHES—

Van Nuys, Los Angeles Co., Cal.—Church, 1 story and base, brick and frame, $10,000. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owners, Van Nuys Presbyterian Church. Besides the main auditorium, which will seat 745 people, there will be Sunday school rooms, several class rooms, study and parlors. The exterior of the building will be covered with white glazed brick. The interior will be finished in pine. There will be some art glass windows. Plans are complete and figures are being taken.

San Jacinto, Riverside Co., Cal.—Church, 1 story and base, frame, $15,000. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owners, San Jacinto Methodist Church. The main auditorium will have a seating capacity of 500 people. There will also be several Sunday school rooms, pastor's study and parlors. The design is in the Mission style with exterior walls of cement plaster on metal lath. Plans are complete and figures are being taken.

Seattle, Wash.—Church, 2 story and base, brick and stone. Cost not stated. Architect, U. Grant Fay, Central Bldg. Seattle. Owners, University Congregational Church. This building has been mentioned here before. The structure will be 60x81 feet. Plans are complete for the foundation work and grading. Bids on this part of the work are now being taken and plans are being finished as rapidly as possible for the balance of the work.

Contracts Awarded.

Los Angeles, Cal.—Church, 1 story and base, brick, $25,000. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Holy Cross Catholic Church. Contractor, J. A. Cook, Chamber of Commerce Bldg., L. A. Contract price, $21,457.

COURT HOUSES.

Seattle, Wash.—Court house, 8 story and base. Class A construction, $1,-000,000. Architect, A. Warren Gould, Empire Bldg., Seattle. Owners, King County. The architect has just been commissioned to prepare these plans and no sketches have even been made. In regard to the matter the Seattle Record has the following to say: A. Warren Gould, Empire Bldg., was selected at a meeting of the Board of County Commissioners, Wednesday, to prepare plans for an eight-story building to cover the block between James and Jefferson streets and 3rd and 4th avenues, at an approximate cost of $1,000,-000, for the county of King to be used by county and city officials exclusively. The architect's commission will be 6 per cent on the first $500,000 of cost and 3½ per cent for any additional cost over $500,000. In the event that the necessary bonds are not voted in November, the architect will receive $3,500 as his compensation for preparing the plans. A strong protest has been made by a number of architects on account of the awarding of this contract before the bonds have been voted, and it is possible that the matter may be taken into the courts.

FACTORIES & WAREHOUSES.

Pomona, Los Angeles Co., Cal.—Factory 1 story, steel and concrete. Cost not stated. Architect, Robert H. Orr, State Bank Bldg., Pomona. Owners, Pomona Manufacturing Co. The building will cover an area of 65x140 feet and is to be 32 feet high. The exterior covering of the steel frame will be of cement plaster on metal lath. The roof will be of corrugated iron. Three large traveling cranes will be installed, besides an electric power plant. The floor will be of concrete. Plans are nearly complete and bids will be called for shortly.

Creston, Cal.—Factory barracks, 2, 1 story, reinforced concrete. Cost not stated. Architect, Irving J. Gill, Title Insurance Bldg., L. A. Owners, Riverside Portland Cement Co. These buildings will each be 100x150 feet. They have been designed in the form of a hollow square. Each structure will contain a living room, kitchen, school hall and 30 sleeping apartments. The exteriors will be faced with cement

plaster. Plans are complete and work will be started at once.

Contracts Awarded.

San Francisco—Warehouse, 4 story and base, brick and steel, $44,000. Architect, Nathaniel Blaisdell, [illegible] California St., S. F. Owner, Spreckels & Co. Contractors, Matson Bros., Crocker Bldg., S. F. Contract price, $[illegible]. Note: The contractors are now taking figures on several important sub-contracts.

Sumner, Wash.—Factory building, 2nd unit, reinforced concrete, $10,000. Architect [illegible], Grosscup Dean Bldg., Seattle. Owners, Pacific Mill Co. Contractors, Aldine & Hall, Central Bldg., Seattle. Contract price, $10,000.

FIRE HOUSES AND JAILS.

Contracts Awarded.

Santa Monica, Los Angeles Co., Cal.—Jail, 1 story and base, brick, $15,000. Architect H. C. Hollwedel, Majestic Theatre Bldg., Santa Monica. Owners, City of Santa Monica. Contractors, J. D. Kincaid Construction Co., 1802 Berendo St., L. A. Contract price, $16,-540.

FLATS.

San Francisco—Flats, 3 story and base, frame, $5,000. Architects, Fabre & Bearwald, Western Metropolis Bank Bldg., S. F. Owner's name withheld. The building has been designed for one store on the first floor and two flats of five and six rooms each on the two upper floors. The interior trim will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with sculp-lap. Plans are complete and figures are being taken.

San Francisco—Flats, 2 story and base, frame, $4,000. Architect L. Traverso, 861 Union St., S. F. Owner L. Banchero. The building will contain four flats of four and five rooms each with baths. The interior trim will be of pine and redwood. The exterior of the building will be covered with sculp-lap. Plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 3 story and base, frame, $8,500. Architect, William A. Newman, David Hewes Bldg., S. F. Owner's name will be withheld. The building has been mentioned here before. Plans are complete and the architect is taking figures on the work. There will be six flats of four and five rooms each with baths. The interiors will be finished in pine and redwood with some oak floors. There will be gas or coal grates with tile mantels. The exterior of the building will be covered with rock veneer and sculp-lap.

Oakland, Cal.—Flats, 2 story and base, frame, $6,000. Architect, none. Owner, Edward Fitzgerald, 660 32nd Grove St., Oakland. The building will contain two large flats. The interior will be finished in pine and redwood with some oak floors. There will be gas grates. The sum of $[illegible] is allowed for each mantel. There will be wall beds in the sleeping apartments. The exterior of the building will be covered with rustic. Plans are complete and bids are being taken by the owner.

GARAGES.

San Francisco—Garage, 1 story and base, brick and steel. Cost not stated. Architect Herman Barth, 12 Geary St., S. F. Owner name withheld. A large garage to be on Van Ness Avenue and Lewis street is to be improved at once. The building will be a [illegible] concrete and brick with exterior walls faced with pressed brick or terra cotta. The office and showroom will be located on corner side with tile floors. The location will be nearly fireproof. Plans are now being prepared and working drawings will be out for bidders in about six weeks.

GOVERNMENT WORK AND SUPPLIES.

Yellowstone Irrigation Project.

The Reclamation Service is taking bids for all work and structures in the extension of the main canal and lateral system, Lower Yellowstone irrigation project, Montana. The work involves approximately [illegible] cubic yards of excavation, [illegible] cubic yards of concrete and [illegible] pounds of steel reinforcement. The bids will be opened at the office of the Reclamation Service at Savage, Montana, on August 9, 1911.

Steel Head Gates.

The Reclamation Service is asking for proposals for furnishing steel head gates and accessories for small and lateral of the Northern Division, Belle Fourche Project, Montana. The specifications may be had upon application to the Secretary, Interior, U. S. R. S., at Havre, Mont. The bids will be opened at Helena, on August 5, 1911.

Cement for Canal.

Under the head of Naval Progress in the 1911 report of the Isthmian Canal Commission covering the work for the fiscal year ending June 30, 1911, it is stated that [illegible] barrels of Portland cement for delivery on the Isthmus at Panama. The bids will be opened at Washington September 9, 1911. The deliveries are to commence not earlier than November 1, 1911, and not later than August 1, 1912. It is expected the deliveries will extend over a period of two years.

Fresno, Cal., Oil-Burning Plant.

L. Schwering, Architect, Treasury Department, Washington, D. C., received by February 15 for furnishing and erecting complete an oil-burning boiler in the U. S. post office at Fresno, Cal. S. T. Johnson Co., 564 Folsom St., San Francisco, Cal., [illegible] $[illegible].

Pacific Steel Co., San Francisco, Cal., [illegible] $[illegible].

T. C. Lewis, San Francisco, Cal., [illegible] $[illegible].

Cement for Lahontan Dam.

The Secretary of the Interior has instructed the Reclamation Service to enter into contract with the Pacific Portland Cement Co., of San Francisco, for furnishing [illegible] barrels of Portland cement, the contract to be awarded to the lowest responsible bidder complying with the requirements of the specifications on file in the office of the Reclamation Service in connection with constructing the Lahontan dam, Truckee-Carson irrigation project, Nevada. The contract price for the cement is $[illegible] per barrel f. o. b. cars Tolenas, Cal.

Salem Indian School Building.

The following bids were received by the Commissioner of Indian Affairs, Washington, D. C., for the construction of an addition to the boarding school at Salem, Ore., Indian school:

W. D. Pugh, Salem, Ore., $13,688, time 90 days.

W. D. Lovell, Minneapolis, Minn., $12,800, time, 180 days.

Arthur W. Hutsche, Portland, Ore., $9,541, time 90 days.

L. L. Wells, Salem, Ore., $13,940.

Welch Bros., Salem, Ore., $13,959.

Herman & Hubbard, Salem, Ore., $14,170.50.

Jacob Merten, Everett, Wash., $19,-500.

F. B. Southwick, & A. L. Henry, Salem, Ore., $13,167.

Gasoline Storage Tanks, Pearl Harbor.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for steel fuel oil and gasoline storage tanks at the naval station, Pearl Harbor, H. T.:

Bid 1. Reeves Bros. Co., Alliance, O., [illegible].

2. Des Moines Bridge and Iron Co., 500 Citizens Building, Pittsburgh, Pa.

3. Chicago Bridge and Iron Co., 105th and Throop streets, Chicago, Ill.

4. Midland Bridge Co., 510 Midland Building, Kansas City, Mo.

5. W. N. Concannon Co., 133 Monadnock Building, San Francisco, Cal.

6. Petroleum Iron Works Co., Sharon, Pa.

Item 1. Work complete, based on design A for support of fuel oil tank: Bid 1, $15,294 and $14,127. 3, $18,390 and $14,000. 4, $15,593. 5, $13,591. 6, $[illegible].

Item 2. Do based on design B, for steel support of fuel oil tank: Bid 1, $[illegible]. 3, $18,000. 4, $15,393. 5, $12,294. 6, $13,483.

HALLS & SOCIETY BLDGS

Sacramento—Association Building, 5 story and base, brick and steel, $160,-000. Architect, E. C. Hemmings, Sacramento. Owners, Young Men's Christian Association. This work was mentioned here when Mr. Hemmings was first selected to prepare the plans for the building. At this time the architect reports that working drawings are well advanced and that plans will be ready for figures by August 1st. Bids will probably be called at once and opened sometime early in September.

—HOSPITALS—

Seattle, Wash.—Hospital buildings, brick and concrete, $250,000. Architect not selected, preliminary plans under the supervision of Superintendent of Buildings Ober, Seattle. Owner, King County. The City of Seattle has made an appropriation of $100,000 to start the work of constructing the King County Anti-Tuberculosis Hospital. The general plan, as now outlined, embraces the construction of a four-story brick and concrete administration building, a brick dormitory, nurses' home, frame cottages and separate building for the heating plant and power house. Superintendent Ober will probably take up the matter of securing plans with local architects.

Los Angeles, Cal.—Hospital, 1 story and base, reinforced concrete, $50,000. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. The building will contain [illegible] private wards with connecting baths, kitchens and other conveniences.

The construction will be fire proof. The exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

Contracts Awarded.

Hanford, Kings Co., Cal.—Hospital, 3 story and base, brick, $25,000. Architect's name not given. Owners, Hanford Sanitarium Co. Contractors, Trewhitt-Shields Co., Hanford. Contract price, $22,925.

—HOTELS—

San Francisco—Hotel, 7 story and base, brick and steel, $70,000. Architects, Hladik & Thayer, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected at the southwest corner of O'Farrell and Jones streets and has been arranged for stores on the first floor and about 150 rooms on the upper floors. A large percentage of the rooms will have connecting baths. There will be steam heat, elevator service and a vacuum cleaning system. The interior trim will be of pine, with the exception of the lobby, which will be finished in oak and marble. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

San Francisco—Hotel and stores, 7 story and base, brick and steel, $140,000. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owner, Rudolph Spreckels. This building will be erected at the corner of Geary and Fillmore streets and will cover a large area. There will be a number of stores on both street fronts in the first floor and in the neighborhood of 200 rooms, a large percentage of which will have connecting baths, on the upper floors. Plans provide for a spacious lobby, steam heat, elevator service and other conveniences. The exterior of the building will probably be faced with pressed brick. The architects have just started the working drawings.

San Francisco—Hotel, 5 story and base, reinforced concrete. Cost not stated. Architect, Ralph Warner Hart, Humboldt Bank Bldg., S. F. Owners, Behlow Estate. This work has been mentioned here a number of time before. Figures taken from the last revised plans are under advisement and a contract will be awarded shortly.

San Francisco—Hotel, 5 story and base, brick and steel, $30,000. Architect, none. Owners, W. W. Anderson and J. B. Cruz, 117 Grant Ave., S. F. The building has been designed for stores on the first floor and a number of single rooms on the upper floors. There will be steam heat and elevator service. Running water has been provided for all rooms. The interior will be finished in pine throughout. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Los Angeles, Cal.—Hotel, 3 story and base, brick, $18,000. Architect, F. A. Martin, 491 Hartford Ave., L. A. Owner, J. H. Heidt. The building will be 38x110 feet and will contain 14 rooms and 6 baths. There will be steam heat and hot and cold running water provided for all rooms. The interior will be finished in pine throughout. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Los Angeles, Cal.—Hotel, 11 story and base. Class A construction. $250,000. Architect, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Shirley C. Ward and associates. Shirley C. Ward and associates Union Oil Bldg., holding a leasehold interest in a lot 47½x120 feet, on the northeast corner of Sixth street and Grand avenue, have had preliminary plans prepared for a fourteen story hotel building to occupy the site. Negotiations with prospective tenants for the proposed building are now in progress. The sketches provide for a Class A steel frame building to contain a store room and lobby on the ground floor and 208 guest rooms and the bath rooms in the upper floors, with steam heat, elevator service, hardwood finish, pressed brick exterior and the most modern conveniences of a first-class hotel.

Los Angeles, Cal.—Hotel, 4 story and base, brick. Cost not stated. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. Bernheim. The building has been designed to contain 66 guest rooms and 30 baths. There will be steam heat, elevator service and hot and cold running water. The first floor will be arranged for a store besides the hotel lobby and entrance. The exterior of the building will be faced with pressed brick. Plans are complete and bids will be called for within a few days.

Los Angeles, Cal.—Hotel and stores, 3 story and base brick. Cost not stated. Architect, F. N. Loucks, Merchants' Trust Bldg., L. A. Owner, Myrtus Tate. Plans provide for two stores on the first floor and 34 rooms on the upper floors. About one-half of the rooms will have connecting baths. Running water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans have been revised and new figures will be taken at once.

Seattle, Wash.—Hotel addition, 2 story brick and steel, $100,000. Architect, Jean Graham, Lyon Bldg., Seattle, owner, John B. Agnew. This work will consist of the erection of two additional stories to the present two-story and basement brick and steel building. The addition will double the present capacity of the building. The exterior walls will be faced with pressed brick. Architect Graham has not started the working drawings as yet.

—POST OFFICES—

Santa Barbara, Santa Barbara Co., Cal.—Post office, 2 story and base. Class A construction. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids for this work, which were opened some two months ago, have been rejected and the plans are now being revised. A new call for bids will be issued in about three weeks or a month.

Modesto, Stanislaus Co., Cal.—Post office, 2 story and base, brick and stone. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. No particulars of this building have been worked out as yet. An appropriation has been authorized and as soon as a suitable site can be secured the matter of preparing plans will be taken up. Full particulars will be given as the plans progress.

RAILROAD CONST., STATIONS AND EQUIPMENT.

San Francisco—Passenger station alterations. Cost not stated. Architect, Assistant Chief Engineer Barlow, Flood Bldg., S. F. Owners, Southern Pacific Co. Plans are being prepared for extensive alterations to the exterior of the Third and Townsend street depot. The exterior will probably be covered with cement plaster on metal lath. Plans will be completed within a short time and figures called.

Summit, San Bernardino Co., Cal.—Railroad tunnels. Cost not stated. Engineers, Engineering Dept. Santa Fe., R. R., L. A. Owners, Santa Fe R. R. Co. Plans have been completed by the engineering department for two tunnels which will be constructed between Cajon and Summit, to do away with the Cajon Pass. The cost is estimated at $1,000,000. Bids will be called for at once.

Modesto to Ceres, Cal.—Electric line, $60,000. Engineers, Engineering Dept. Modesto-Empire Electric Co., Modesto. Owners, Modesto-Empire Electric Co. A right of way has been secured and residents of the district to be traversed have pledged nearly $30,000 towards the construction. The owners state that construction will probably be undertaken before the first of next year.

Contracts Awarded.

Truckee to Reno—Railroad construction. Cost not stated. Engineers, Engineering Dept. S. P. Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Contractors, Utah Construction Co., Phelan Bldg., S. F. Contract price not stated.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, $2,000. Architect, none. Owners, City Homes Building Co., Merchants' Exchange Bldg., S. F. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood throughout. The floors in the living room and dining room will be of oak. There will be open fire places and tile mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, $12,000. San Francisco. Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners name withheld. The building will be erected on an inside lot and will contain about 12 modern apartments, which will be arranged in suites of two and three rooms each. There will be connecting bath and wall beds. The interior finish will be of pine and redwood. Taste will be steam heat. The exterior of the building will be covered with rustic and shiplap. Plans are now being prepared.

Apartment House—6 story and base, brick and steel, $75,000. San Francisco. Architect, Milton Lichenstein, 111 Ellis St., S. F. Owners, Gump Realty Co. The building will be erected at the corner of Geary and Jones streets and will cover an area of 62x77 feet. There will be in the neighborhood of 150 rooms arranged in suites of two and three rooms each. There will be connecting baths and wall beds. Provision has been made for steam heat, vestibule, elevator service and a vacuum cleaning system. The interior will be handsomely finished. The exterior of the building will be faced with pressed brick. Plans for the work are now being prepared.

Apartment House—4 story and basement, Class A construction, $500,000. San Francisco. Architect, Houghton Sawyer, Screve Bldg., S. F. Owners, Fairmeadow Court Investment Co. Reports of this project have been in circulation for several months, but this is the first information given out as to the location and details. The building will occupy a corner site at the intersection of Sacramento and Mason streets, commanding not only a view of the entire bay but of the city as well. The construction will be of the class A type throughout with a complete steel frame, exterior walls faced with granite, pressed brick and terra cotta floors of concrete and interior partitions of terra cotta. The floors have been subdivided into large apartments and will be fitted up for the use of wealthy tenants. Mr. Sawyer has spent considerable time in the east studying the developments in modern apartment construction and the completed of the new building will embrace all of the most improved. The mechanical equipment will include steam heat, elevators, dumb waiters, vacuum cleaning, laundry machinery and probably an electric lighting plant. Working drawings, specifications and further notice regarding bids will be given in these columns as the work progresses.

Flats—3 story and basement frame, $8,000. San Francisco. Architects, Fabre & Barnwell, Western Metropolis Bank Bldg., S. F. Owners name withheld. The building has been designed for one store on the first floor and two flats of five and six rooms each on the two upper floors. The interior trim will be of pine and redwood. There will be gas grates. The exterior of the building will be covered with shiplap. Plans are complete and figures are being taken.

Flats—2 story and base, frame, $4,000. San Francisco. Architect, L. Traverso, 854 Union St., S. F. Owner, L. Banchero. The building will contain four flats of four and five rooms each with baths. The interior finish will be of pine and redwood. The exterior of the building will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

Flats—3 story and base, frame, $8,000, San Francisco. Architect, William A. Newman, David Hewes Bldg., S. F. Owner's name withheld. his building has been mentioned here before. Plans are complete and the architect is taking figures on the work. There will be six flats of four and five rooms each with baths. The interiors will be finished in pine and redwood with some oak floors. There will be gas or coal grates with tile mantels. The exterior of the building will be covered with brick veneer and shiplap.

Garage—1 story and base, brick and steel. Cost not stated. San Francisco. Architect, Herman Barth, 12 Geary St., S. F. Owner's name withheld. A large corner site at Van Ness avenue and Lush street is to be improved at once with this building. There will be a complete steel frame with exterior walls faced with pressed brick or terra cotta. The office and sales rooms will be finished in hardwoods with tile floors. Construction will be nearly fire proof. Plans are now being prepared and working drawings will be out for figures in about six weeks.

Residence—2 story and base, frame, $2,000. San Francisco. Architect, none. Owners, City Homes Building Co., Merchants' Exchange Bldg., S. F. The dwelling will contain six rooms and bath. The interior finish will be of pine and redwood throughout. The floors in the living room and dining room will be of oak. There will be open fire places and tile mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,000. San Francisco. Architect, O. W. Dengen, Constr Q. M. Office, Fort Mason. Owner, Herman Knowles, 255 Lower Terrace, S. F. The dwelling has been designed for a seven-room house with bath and laundry. Its interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and tile mantels. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are com-

plete and the work will be done by Day Labor.

Residence—2 story and base, frame. Cost not stated. San Francisco. Architect, Herman Barth, 12 Geary St., S. F. Owners name will not be given. The dwelling will be erected at Parkside and has been designed to contain seven rooms and bath. The interior will be finished in pine and elm with oak floors in the dining and living rooms. There will be furnace heat and open fireplaces. Two mantels will be of brick. The wall is used in the bath and kitchen. The exterior will probably be covered with cement plaster on metal lath. The architect is preparing the working drawings.

Hotel and Stores—7 story and base, brick and steel, $140,000. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. Owner, Rudolph Sroeckels. This building will be erected at the corner of Geary and Fillmore streets and will cover a large area. There will be a number of stores on the street fronts in the first floor and in the neighborhood of 200 rooms a large percentage of which will have connecting baths on the upper floors. Plans provide for a spacious lobby, local cage elevator service and other conveniences. The exterior of the building will probably be faced with pressed brick. The architects have just started the working drawings.

Hotel—5 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Ralph Warner Hart, Humboldt Bank Bldg. S. F. Owners, Ingelow Estate. This work has been mentioned here a number of times before. Figures taken from the last revised plans are under advisement and a contract will be awarded shortly.

Hotel—6 story and base, brick and steel, $70,000. San Francisco. Architects, Hladik & Treiber, Monadnock Bldg., S. F. Owners name withheld. The building will be erected at the southwest corner of O'Farrell and Jones streets and has been arranged for stores on the first floor and about 150 rooms on the upper floors. Average exposure of the rooms will give connecting baths. There will be steam and elevator service and a vacuum cleaning system. The interior trim will be of pine, with the exception of the lobby, which will be finished in oak and marble. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Theatre—2 story and base, Class A, $90,000. San Francisco. Architects, Oliver & Werner, Foxcroft Bldg., S. F. Owners, Tivoli Theatre Co. Architects Oliver & Werner state that contracts and arrangements for the construction of this theatre, Class A building on the Tivoli Theatre Co. property on Geary and Taylor streets, have been completed and that construction will be started very shortly. All steel for this work have been received, and a list of sub-contracts will be awarded contracts for the building will be given out soon. The building will be 100 ft. on the north line of Eddy street, 137 ft. 6 in. east of Mason street and is estimated to cost $250,000.

Apartment House—3 story and base, frame, $45,000. San Francisco. Architects, Welsh & Carey, Western Metropolis Bank Bldg., S. F. Owner, Sewell Cook. The building will be erected on the corner of Fillmore and Sacramento streets and is to cover a lot 137 ft. 6 in. by 100 ft. There will be in the building 18 suites of rooms arranged in two and three rooms each. There will be connecting baths, wall beds, steam heat and a vacuum cleaning system. The interior will be finished in pine, white enamel and hardwoods. The exterior will probably be covered with cement plaster. Plans are complete and figures are being taken.

Apartment House—7 story and base, brick and steel, $100,000. San Francisco. Architects, Weeks & Day, Western Metropolis Bank Bldg., S. F. Owner, Sewell Dolliver. This building has been mentioned here before. The plans provide for a structure containing one hundred rooms or more, which will be arranged in suites of two, three and four rooms each. All apartments will be equipped with wall beds and private baths. There will be a steam heating system, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick, and terra cotta. Plans are now complete and sealed proposals will be taken by the owner.

Hotel—6 story and base, brick and steel, $70,000. San Francisco. Architect, none. Owners, W. W. Anderson and J. B. Craig, 347 Bush St., S. F. The building has been arranged to contain stores on the first floor and a number of single rooms on the upper floors. There will be steam heating and elevator service. Baths and toilets are provided for the rooms. The exterior will be faced with pressed brick. The exterior of the building will be faced with pressed brick. Plans are complete and the work will be let by contract by the owners.

Passenger Station Alterations—[illegible] Architect, [illegible] Assistant Chief Engineer, Flood Bldg., S. F. Owner, Southern Pacific Co. SAN JOSE AND THE SANTA CLARA VALLEY.

Bridge—Reinforced concrete. Cost not stated. Burlingame, San Mateo Co., Cal. Engineer, Eric Wold, Burlingame. Owners, Town of Burlingame. Plans for this work have been completed and bids are now being taken. Bids will be opened by the City Trustees on August 7th. For full particulars address either the Town Clerk, J. R. Murphy, or Engineer Wold.

Bridges—Reinforced concrete and steel. Cost not stated. San Jose, Santa Clara Co., Cal. Engineer McMillan. County Engineer, San Jose. Owners, Santa Clara County. County Engineer McMillan of Santa Clara has completed plans for three bridges, which are to be erected in the county at once. There will be a reinforced concrete bridge over Beardsley Ravine on the Los Gatos and Santa Cruz road, a reinforced concrete cantilever bridge over Randell Creek on the Dougherty road, and a steel bridge over Llagas Creek. Bids for this work will be opened on August 6th. Plans and specifications and full information of the work may be had on application to the County Engineer, San Jose, Cal.

Sewer Work—Brick construction. Cost not stated. Burlingame, San Mateo Co., Cal. Engineer, Eric Wold, Town Engineer, Burlingame. Owners, Town of Burlingame. Plans have been completed for considerable sewer work at Burlingame and bids are now being called. Complete particulars can be had either from the Town Engineer or from J. R. Murphy, City Clerk. Bids will be opened on August 6th.

School—1 story and base, reinforced concrete, $60,000. Santa Clara, Santa Clara Co., Cal. Architect, William Binder, Rea Bldg., San Jose. Owners, Santa Clara School District. Competitive plans for this work have just been completed and Mr. Binder is now at work on the detail drawings. The building is being designed for a grammar school, and will contain 18 standard size class rooms, besides principal's office and teachers' rooms. The basement will be used for the mechanical plant. A modern system of heating and ventilation will be installed. The exterior of the building will be faced with cement plaster. Plans will be complete in the course of five weeks.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

School—2 story and base, brick. Cost not stated. Crows Landing, Stanislaus Co., Cal. Architect, W. H. Weeks, 75 Kearny St., S. F. Owners, Bonita School District. This work was mentioned here last week, at which time it was stated that figures would be opened on July 18th. These bids ran too high and plans have been called in for revision. The building is to contain eight class rooms. Bids will be asked for on the revised plans within a short time.

Bridge—Reinforced concrete or steel. Cost not stated. Merced, Merced Co., Cal. Engineer, Cowell, County Surveyor, Merced. Owners, Merced County. This structure will be erected at Merced Falls. The type of construction is still undecided. Plans are now being prepared and will shortly come before the Board of Supervisors for approval. More complete details of this work will be given here later.

Post Office—2 story and base, brick and steel. Cost not stated. Modesto, Stanislaus Co., Cal. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. No particulars of this building have been worked out as yet. An appropriation has been authorized, and as soon as a suitable site can be secured the business of preparing plans will be taken up. Full particulars will be given as the plans progress.

Electric Line—$60,000. Modesto to Ceres, Cal. Engineers, Engineering Dept. Modesto-Empire Electric Co., Modesto. Owners, Modesto-Empire Electric Co. A right of way has been secured and residents of the district to be traversed have pledged nearly $20,000 towards the construction. The owners state that construction will probably be undertaken before the first of next year.

School—1 story, frame, $3,500. Sanger, Fresno Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owners, Alameda School District. The building is designed for a district school and will contain two class rooms. The exterior of the building will be covered with veneer pressed brick. Plans are being prepared.

School—1 story, frame and brick, $10,000. Ness School District, Fresno Co., Cal. Architects, A. C. Swartz & Son, Fresno. Owners, Ness School District. Plans for this building, which is to contain three standard sized class rooms, are complete and bids will be opened shortly for the construction. The exterior of the building will be covered with a veneer pressed brick.

Contract Awarded.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Apartment House Alterations—Concrete building. Cost not stated. Santa Rosa, Sonoma Co., Cal. Architect, Herman Barth, 12 Geary St., S. F. Owner's name withheld. At present the building which is to be altered contains lofts. There will be new interior partitions, interior finish, plaster work, plumbing and electric work. Plans are complete and figures are being taken by the architect.

Bungalow—1 story and base, frame, $2,000. Richmond, Contra Costa Co., Cal. Architect, E. Bemus, 2331 21st St., Bakersfield. Owner's name withheld. This house will contain six rooms and bath. The interior will be finished in pine throughout. There will be open fire places and tile mantels. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

Stores and Rooms—2 story and base, brick and steel, $35,000. Richmond, Contra Costa Co., Cal. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Ralph Tcherassy. This work has been mentioned here before when the architect first started to take figures on the work. Bids were found to be too high and plans have been revised. New figures will be taken at once from among four of the lowest bidders.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—1 story and base. Brick and tile. $7,000. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, M. Steele. This work has been mentioned in a letter. Plans are now complete and it is expected that actual construction will be started at once. The building will contain 12x rooms with baths and be arranged in two and three room suites with hall and wall beds. There will be electric valet service, hot water heat and pressed steam heat for the winter. Warming plant. The exterior will be faced with pressed brick.

Apartment House—1 story and base. Brick and stone. $9,000. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, Jessie Tillott. The building as now designed to contain two rooms, with will be arranged in apartments of two and three rooms each, with connecting bath. There will be wall beds, steam heat, hot and cold water and electric light. Passenger elevator and a vacuum cleaning system. The exterior of the structure will be faced with pressed brick. Plans are complete and the work will be started at once.

Apartment House—1 story and base. Brick. Cost not stated. Los Angeles, Cal. Architect C. C. Robinson, Wilcox Bldg., L. A. Owner, E. B. Harbour. The building will cover a site 50x172 feet. The interior is to be arranged for six bedrooms, sporting den and 18 three-room apartments, all of which will have connecting baths and wall beds. Besides the apartments there will be three bowling alleys and billiard rooms. The interior will be finished in oak, cabinet and white enamel. There will be steam heat, hot and cold water and electric lights. Passenger elevator will be installed and a vacuum cleaning system. The exterior of the building will be faced with pressed brick trimmed with artificial stone. Plans are now nearly complete.

Apartment House—3 story and base. Brick. Cost not stated. Los Angeles, Cal. Architect M. D. L. Scott, Trust and Savings Bldg., L. A. owner, C. H. Lewis. The first floor of the building will be subdivided for stores. The upper floors will be arranged for two and three room apartments with baths and wall beds. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and bids are being taken.

Apartment House—3 story and base. Frame. Cost not stated. Los Angeles, Cal. Architects Train & Kysor, Consolidated Realty Bldg., L. A. owner, Toomey [illegible] three rooms [illegible] wall beds [illegible] private baths. The interior will be finished in pine and redwood with some selected hard. There will be steam heat. The exterior will probably be covered with cement plaster on metal lath. Plans are now nearly complete and figures will be called for shortly.

Apartment House—3 story and base. Brick. Cost not stated. Los Angeles, Cal. Architects, M. S. Yeager & Co., Trust and Savings Bldg., L. A. Owner, H. W. Squires. The building will cover an area of 100x116 feet. The interior has been arranged to contain 150 rooms, which will be arranged in apartments of two and three rooms each. There will be wall beds, steam heat, private baths, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Apartment House—3 story and base. Brick. Cost not stated. Los Angeles, Cal. Architect, H. C. Deckbar, Ferguson Bldg., L. A. owners, Mrs. Eugene D. Porter and J. J. Seeman. The building will contain 47 guest rooms, 24 of which will have private baths. All apartments will be equipped with wall beds. Apartments will range from two to four rooms each. There will be steam heat. The exterior of the building will be faced with pressed brick and artificial stone. Plans are complete and separate bids are now being taken on the work.

Apartment House—3 story and base. Brick. Cost not stated. Los Angeles, Cal. Architect F. M. Tyler, L. A. owner, H. L. Winchell, 30, Helman Bldg., L. A. This building will be erected at the corner of Diamond and Maple streets. As yet only sketches have been prepared and none of the details of the building can be given. As soon as working drawings are started complete information will be published in these columns.

Apartment House—3 story and base. Brick. Cost not stated. Los Angeles, Cal. Architects, California Real Estate and Building Co., 631 So. Spring St., L. A. Owners, A. Mitchell. The building will cover a considerable area and is to contain 90 rooms, which will be arranged in two and three room suites with connecting baths and wall beds. The plans provide for steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

Apartment House—3 story and base. Brick. Cost not stated. Los Angeles, Cal. Architect, F. X. Lourdou, Mercantile Trust Bldg., L. A. Owner, L. Pizzuto. The building will be 88x143 feet. There will be 18 two and three room suites besides the lobby, parlor and billiard hall, besides the store rooms. There will be steam heat and wall beds. The exterior will be faced with pressed brick. Plans arecomplete and sub-contracts for all parts of the work will be let.

Bridge—Steel. Cost not stated. Devore, San Bernardino Co., Cal. Engineering Dept. Santa Fe R. R. Co., Los Angeles. Owners, Santa Fe R. R. Co. The bridge will be 100 feet long and is designed to carry two tracks. Plans are complete and bids are being taken.

Bridge—Truss steel. Cost not stated. San Bernardino, San Bernardino Co., Cal. Engineer, County Surveyor, San Bernardino. Owners, San Bernar-

Wesco Flat Oil Paint

An improved, sanitary flat paint for interior finishing. Gives very fine finish.

WEST COAST KALSOMINE COMPANY — MADE ON THE COAST — WESCO — HOBEL, ALAMEDA CO. CALIFORNIA

Wesco Kalsomine

Spreads easily, does not decay and gives soft, rich surface. Can be washed off when desired.

Cold Water Paint

The most economical paint on the market. When you buy **Wesco Cold Water Paint** you pay only for paint and not for high-priced oils. It can be used on exterior or interior surfaces. It dries very quickly, is non poisonous, a strong disenfectant and does not turn yellow with age. **Wears well** and is an excellent fire retardant.

Concrete Paint

The best paint in the world to use on damp places. It can't be equaled in painting tunnels, arches, cellars or any other place where dampness exists. Makes the finest possible finish for the interior of factories and other buildings where there is loose steam and damp vapors.

WEST COAST KALSOMINE CO.

Sales Office
110 Hansford Bldg., San Francisco

dino County. Plans have been approved by the Board of Supervisors for a 18-foot roadway bridge carried on four 60-foot spans. Bids are now being taken and will be opened on August 6th. Plans and specifications may be had from Charles Post, County Clerk.

Church—1 story and base, brick and frame, $10,000. Van Nuys, Los Angeles Co., Cal. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owners, Van Nuys Presbyterian Church. Besides the main auditorium, which will seat 275 people, there will be Sunday school rooms, several class rooms, study and parlors. The exterior of the building will be covered with glazed brick. The interior will be finished in pine. There will be some art glass windows. Plans are complete and figures are being taken.

Church—1 story and base, frame, $15,000. San Jacinto, Riverside Co., Cal. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owners, San Jacinto Methodist Church. The main auditorium will have a seating capacity of 500 people. There will also be several Sunday school rooms, pastor's study and parlors. The design is in the Mission style with exterior walls of cement plaster on metal lath. Plans are complete and figures are being taken.

Factory—1 story, steel and concrete. Cost not stated. Pomona, Los Angeles Co., Cal. Architect, Robert H. Orr, State Bank Bldg., Pomona. Owners, Pomona Manufacturing Co. The building will cover an area of 65X140 feet and is to be 32 feet high. The exterior covering of the steel frame will be of cement plaster on metal lath. The roof will be of corrugated iron. Three large traveling cranes will be installed, besides an electric power plant. The floor will be of concrete. Plans are nearly complete and bids will be called for shortly.

Factory Barracks—2, 1 story, reinforced concrete. Cost not stated. Creston, Cal. Architect, Irving J. Gill, Title Insurance Bldg., L. A. Owners, Riverside Portland Cement Co. These buildings will each be 100x150 feet and have been designed in the form of a hollow square. Each structure will contain a living room, dining room, kitchen, billiard hall and 30 sleeping apartments. The exteriors will be faced with cement plaster. Plans are complete and work will be started at once.

Hospital—1 story and base, reinforced concrete, $50,000. Los Angeles, Cal. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. The building will contain 22 private wards with connecting baths, kitchens and other conveniences. The construction will be fire proof. The exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

Hotel—5 story and base, brick, $75,000. Los Angeles, Cal. Architect, F. A. Martin, 491 Hartford Ave., L. A. Owner, J. H. Heidt. The building will be 38X110 feet and will contain 41 rooms and 6 baths. There will be steam heat and hot and cold water provided for all rooms. The interior will be finished in pine throughout. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Hotel—14 story and base. Class A construction, $1,400,000. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Shirley C. Ward and associates. Shirley C. Ward and associates, Union Oil Building, holding a lease-hold interest in a lot 174x120 feet on the northeast corner of Sixth street and Grand avenue, have had preliminary plans prepared for a fourteen story hotel building to occupy the site. Negotiations with prospective tenants for the proposed building are now in progress. The sketches provide for a Class A steel frame building to contain a store room and lobby on the ground floor and 208 guest rooms and 110 bath rooms in the upper floors, with steam heat, elevator service, hardwood finish, pressed brick exterior and the most modern conveniences of a first class hotel.

Hotel—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Story Bldg., L. A. Owner, A. Bernuetti. The building has been designed to contain 63 guest rooms and 30 baths. There will be steam heat, elevator service and hot and cold running water. The first floor will be arranged for a store besides the hotel lobby and entrance. The exterior of the building will be faced with pressed brick. Plans are complete and bids will be called for within a few days.

Hotel and Stores—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, F. X. Lourdou, Merchants' Trust Bldg., L. A. Owner, Marius Taix. Plans provide for two stores on the first floor and 31 rooms on the upper floors. About one-half of the rooms will have connecting baths. Running water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans have been revised and new figures will be taken at once.

Post Office—2 story and base. Class A construction. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids for this work, which were opened some two months ago, have been rejected and the plans are now being revised. A new call for bids will be issued in about three weeks or a month.

Railroad Tunnels—Cost not stated. Summit, San Bernardino Co., Cal. Engineers, Engineering Dept. Santa Fe R. R. L. A. Owners, Santa Fe R. R. Co. Plans have been completed by the engineering department for two tunnels which will be constructed between Cajon and Summit, to do away with the Cajon Pass. The cost is estimated at $1,000,000. Bids will be called for at once.

School—1 story, frame. Cost not stated. Oxnard, Ventura Co., Cal. Architect A. C. Martin, Higgins Bldg., L. A. Owners, Oxnard High School District. This building will be designed for a manual training department, and is to cover a site 200x200 feet. The exterior will be faced with pressed brick. Plans are being prepared.

Water System — $300,000. Oxnard, Ventura Co., Cal. Engineers, Olmsted & Gilbert, Wentz and Ellendale Bldg., L. A. Owners, City of Oxnard. The system will consist of two wells, a 500,000 gallon reinforced concrete reservoir and about 16,000 feet of cast iron pipe, ranging from 4 to 12 inches. Plans are complete and bids will be opened by the City Council on August 27th. For further information address the engineers or G. R. Bella, City Clerk, Oxnard.

Pumping Station—Hollow tile construction. Cost not stated. Oxnard, Ventura Co., Cal. Architects, Needham & Cline, Wright and Callender Bldg., L. A. Owners, City of Oxnard. The building will be constructed as a part of the municipal water system to be erected in this city. Plans show a building 21X56 feet of concrete and hollow tile construction, with both interior and exterior plastered with cement plaster. Plans are complete and bids will be opened on August 27th.

Stores and Offices—10 story and base. Class A construction, $200,000. San Diego, Cal. Architects, Bristow & Lyman, Timken Bldg., San Diego. Structural Engineer, George W. Harding, Citizens' National Bank Bldg., L. A. Owner, Nathan Watts. The building will be located at the northeast corner of 5th and E streets. The ground floor will be occupied by the San Diego Savings Bank. About 200 modern offices will be arranged for the upper floors. The site is 50x100 feet. The mechanical equipment will consist of two elevators, steam heat and a vacuum cleaning plant. The interior will be finished in birch, marble and tile. The exterior walls of the building will be faced with pressed brick and terra cotta. Plans are nearly complete and construction will be started about August 15th.

Contracts Awarded.

Apartment House—4 story and base, brick and steel, $65,000. Los Angeles, Cal. Architects, Neher & Skilling, Pacific Electric Bldg., L. A. Owner, Washington Sullivan. Contractors, Kelch & Sharp, Builders' Exchange. Contract price, $62,619.

Church—1 story and base, brick, $25,000. Los Angeles, Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owners, Holy Cross Catholic Church. Contractor, J. A. Crook, Chamber of Commerce Bldg., L. A. ontract price, $21,457.

Jail—1 story and base, brick, $17,000. Santa Monica, Los Angeles Co., Cal. Architect, H. C. Hollwedel, Majestic Theatre Bldg., Santa Monica. Owners, City of Santa Monica. Contractors, J. D. Kneen Construction Co., 1800 Berendo St., L. A. Contract price, $16,540.

School—1 story and base, brick, $30,000. Santa Ana, Orange Co., Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Santa Ana School District. Contractor, A. C. Black, 709 West 7th St., Santa Ana, general construction $21,199. S. Hill & Sons, 213 East 3rd St., Santa Ana, plumbing, $1,800.

Market Building—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, William Sherman, 430 East 6th St., L. A. Owners, Frank Simmonds and F. T. King. Contractors, Davilson Construction Co., Union Oil Bldg., L. A. Contract price not stated.

PORTLAND AND OREGON.

Bank and Offices—3 story and base, reinforced concrete, $30,000. Tillamook, Ore. Architect, Frank K. Benchley, Portland. Owners, Tillamook County Bank. The building will be 75X 71 feet. The entire first floor will be fitted up for the bank. The upper floors will be subdivided in 17 modern

offices. The interior of the banking room will be finished in architectural marble and bronze. There will be a fireproof vault. The building will be located by a [illegible] The exterior will be faced with cement plaster. Plans [illegible] and will be called for [illegible].

Bridge—Steel [illegible] Cost not stated. Pending the [illegible] not selected [illegible] of Pendleton. The [illegible] ing steps [illegible] Engineer [illegible] to [illegible] Umatilla River in the [illegible] of the city. A [illegible] is being [illegible] these columns.

School—[illegible] brick $6,000. Heppner [illegible] Architect E. E. McClaren, Portland. Owner, Heppner School District. The building will cover an area of [illegible] feet, to contain [illegible] purposes. There will be a central [illegible] and [illegible] system of ventilation. The construction will be of the [illegible] type. The exterior of the building will be faced with pressed brick trimmed with white glazed brick. Plans will be complete about August 15th, and bids will then be called.

Store and Offices—[illegible] brick. Cost not stated. The Lumbermen. Architect, E. E. McClaren, Portland. Owner, Mrs. Minnie [illegible]. The building will [illegible] of two stories [illegible] feet [illegible] The contract [illegible] The building will be [illegible] with [illegible] which will [illegible] so as to [illegible] office [illegible] on [illegible]. Contracts Awarded.

Apartment House—[illegible] brick, $30,000. [illegible] Architect, R. F. Wassell, Portland. Owner, J. D. Wharton. Contractor, R. F. Wassell, Portland. Contract price, $[illegible].

Bridge—Steel [illegible] Cost not stated. Perry [illegible] Engineer. County Surveyor, Dayton, Oregon. Yamhill County. Contractor, Minnette Veatch Construction Co., Chicago. Contract price not stated.

Stores—[illegible] story and [illegible] brick and steel. Cost not stated. Brokaw, Wash. Architect, Harlan Thomas, Elders Bldg., Seattle. Owner, Brokaw Estate. Contractor, John Gabriel, Mutual Life Bldg., Seattle. Contract price not stated.

Stores and Lofts—[illegible] story [illegible] reinforced concrete, $[illegible]. Seattle, Wash. Architect, James H. Schack, Downs Bldg., Seattle. Owner, T. S. Lippy. Contractor, Puget Sound Bridge and Dredging Co., Central Bldg., Seattle. Contract price, $[illegible].

SEATTLE AND WASHINGTON.

Bridge—Steel [illegible] Cost not stated. Seattle, Wash. Engineer, County Engineer Kriger, County Seattle. Owners, Kings County. Plans for [illegible] M. Nye to [illegible] have been considered and [illegible] contemplated. The [illegible] will consist of [illegible] 20 feet open [illegible] and an [illegible] 6 feet [illegible] will be open [illegible] August 1st.

Church—[illegible] and basement, brick and stone. Cost not stated. Seattle, Wash. Architect, C. Grant [illegible], Bldg., Seattle. Owners, University Congregational Church. This building has been mentioned here before. The structure will be 60x81 feet. Plans are complete for the foundation work and reading. Bids on this part of the work are now being taken and plans are being pushed as rapidly as possible for completion of the work.

Court House—[illegible] story and basement. A construction, $1,000,000. Seattle, Wash. Architect, A. Warren Gould, Empire Bldg., Seattle. Owners, King County. The architect has just been commissioned to prepare these plans and no sketches have even been made in regard to the matter here. Seattle Record has the following to say: A Warren Gould, Empire Bldg., was selected at a meeting of the Board of County Commissioners, Wednesday, to prepare plans for an eight story building, to cover the block between Third and Jefferson streets and 3rd and 4th avenues, at an approximate cost of $1,000,000, for the county of King to be used by county and city officers exclusively. The architect's compensation will be 6 per cent on the first $500,000 of cost and 3½ per cent for any additional cost over $500,000 in the event that the necessary bonds are not voted in November, the architect will receive $5,000 as his compensation for preparing the plans. A strong protest has been made by a number of architects on account of the awarding of this contract before the bonds have been voted and it is possible that the matter may be taken into the courts.

Hospital Buildings—brick and concrete, $[illegible],000. Seattle, Wash. Architect [illegible] selected preliminary plans under the supervision of Superintendent of Banking C. O. Seattle. Owners, King County. The city of Seattle has made an appropriation of $100,000 to start the work of constructing the King County Anti-Tuberculosis hospital. The general plans as now outlined embrace the construction of a four-story brick and concrete administration building, a brick dormitory, nurses home, frame cottages and [illegible] buildings for the heating [illegible] and power house. Superintendent Oser will probably take up the matter of securing plans with local architects.

Hotel Addition—[illegible] story, brick and steel, $[illegible],000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, John B. Agen. This work will consist of the erection of two additional stories to the present two-story and basement brick and steel building. The addition will double the present capacity of the building. The exterior walls will be faced with pressed brick. Architect Graham has not started the working drawings as yet.

Stores—[illegible] story and [illegible] brick and reinforced concrete, $60,000. Wallace, Wash. Architect, J. A. Crenzel, Haight Bldg., Seattle. Owners, Grigg's Land Co. These buildings have been mentioned here before. Both are to be located in the district destroyed by the [illegible] fire. The exteriors of the buildings will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

Factory Buildings—[illegible] unit reinforced concrete, $[illegible],000. Summer, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owners, Fleischmann Co. Contractors, Aldrich & Hunt, Central Bldg., Seattle. Contract price, $40,000.

SCHOOLS OF ARCHITECTURE.

The introduction of architecture as a course in our universities is a step in the right direction, and yet one doubts whether the vocation is not sufficiently comprehensive for separate colleges confined to this one profession. It is true that a draftsman after a few years at the drafting board often sets himself up as an architect, but he is more often one in name alone than in fact.

To draw well the patterns set for him is an accomplishment, but it does not make an architect of a draftsman. Wide and varied knowledge, skill and experience are essential for the true mastery of the profession. To be a good designer is necessary, but it is equally important to be a good constructor. He must do more than produce the roughly hewn stone—he must bring forth the perfect figure. His is a profession which requires peculiar versatility, so much so that it seems to dwarf every other branch of artistic scientific accomplishment. An architect, besides being a designer and draftsman of mechanical ability, must be an artist as well, as he is producing pictures more permanent than those on canvass, he is helping to mold an era which will be in advance of all that has preceded it in beauty of conception and permanency in construction. To meet all the requirements of his exacting profession he should be civil, mechanical, electrical and landscape engineer. He must, further, be an expert and specialist on heating, plumbing, ventiliation, lighting, sanitation, fire protection, acoustics, refrigeration, vacuum cleaning, furnishing, [illegible] decoration, etc. He is held responsible for results and failure in any particular to secure good workmanship and the use of the best materials will reflect upon him and lower his standing. Consequently, he should have a general fund of practical information and knowledge of every branch of building, including masonry, brick laying, carpentry, painting, roofing, plastering, concrete construction metal working, wood turning, etc.

Besides, being technically perfect, he must have a fair business training, keeping posted on building laws and on contracts, surety bonds, liability insurance, etc. Also he must estimate correctly and prove himself a good accountant and bookkeeper, so that his clients will find that his forecasts of expenses are verified by actual cost.

After the plans are approved and building decided upon, every step of the work makes new demands upon his knowledge and experience. The building may be any one of a dozen different varieties—warehouse, church, school, theatre, club house, hotel, apartment house, public building, hospital, store and office building, residence, garage, etc. Each one offers different complexities. In the larger buildings the foundation problems must be first considered, such as borings, pilings, tunnelings, etc. On top of this, weighty matters such as concreting, reinforcing, facing, fireproofing, etc, must be carefully weighed and decided upon. To meet these requirements he must have a knowledge of materials (steel, wood, brick,

stone, granite, sandstone, concrete, terra cotta and marble), also the fabrication, bending, turning, molding, carving, etc., of these materials, as well as of copper, brass, wire, bronze and clay.

Then to have the basic materials right is no more essential than to have them set together and set up in a way which will last, and he must be posted on and able to discriminate between the various brands and qualities of sand, gravel, rock, lime, cement, plaster, oils, varnishes, enamels, wall finishes, damp-proofing compounds, water-proofing cements, anti-corrosion solutions, brick and cement coatings, shingle stains, putty, floor dressings, etc. He must watch out for the sheathing, deadening, damp-proofing, water-proofing, glazing and roofing, and to have the building defective in any of these points would condemn it as a whole.

The frame being up, the matters of equipment, fixtures, interior finish, etc., are to be considered. The one subject of the equipment may demand an enormous amount of time and knowledge, for it can embrace power plant installation, heating and ventilating systems, lighting and wiring, automatic sprinklers, vacuum cleaning plant, elevators and dumb waiters, refrigeration and cold storage, fire extinguishers, fire escapes, fireproof doors, windows, etc.; garbage ejectors, heat regulators, vaults and safes, etc.

The subject of fixtures is almost as perplexing, for in these days of modern plumbing and lighting these alone offer fields for careful study and inspection of the newest types. Also the cabinet work, the ornamental grills, cornices, moldings, etc.; the latest style of hardware; the use of door openers, door closers, door hangers and joists; adjustable windows, Venetian blinds, awnings, lockers, disappearing beds, tower clocks and window screens, not to speak of laundry and kitchen fittings—all these must be separately passed upon.

Finally comes the interior finish,—the wall paper, painting, ceiling decoration, shades, hardwood, tile or composition floors, art glass, etc. In many cases the hangings and furniture are included in the general plan, and some very creditable results have been secured by leaving this also to the architect.

Indeed, for a man to build from plans of others than an experienced architect is to invite disappointment and disaster. Let the contractor stick to his vocation, the carpenter to his and leave to the architect the planning of the work. Let the capitalist choose carefully his architect, and then hold him to strict accountability for results. To be your own architect is worse than to attempt to be your own lawyer. "Let him not venture where angels fear to tread." Architect and Engineer

STATE HIGHWAY ROUTES DETERMINED.

First Connecting Highway In The Sacramento Valley.

The State Highway Commission has adopted the survey for the proposed link in the State highway system crossing the Yolo Basin connecting Sacramento City, the Capital, and Davis, Yolo County.

The acceptance of the survey means that the Commission contemplates the construction of a State highway across the Yolo Basin, affording the first connecting highway for the Sacramento Valley from the Yolo side.

The next step will be in preparing plans and specifications for the work, figuring out what it will cost to construct this link and then calling for bids.

The survey for the Sacramento-Yolo link in the State Highway system was made across the basin by utilizing all the high ground available over the natural crossing, upon which a road now exists for part of the distance. This stretch of highway, it is conceded, will be one of the most difficult engineering problems the Commission and its engineers will have to solve.

The road will have to be constructed on a levee, or embankment for a considerable distance and this embankment must be made strong enough to withstand the pressure of overflow waters of the basin.

This stretch will connect Sacramento direct with the cities of the Bay region, the road from Davis continuing on to Oakland, it is understood.

The Commission has issued an order directing that a survey be made of a proposed route for the State Highway, starting at a point a short distance north of Redding, Shasta County, where the roads passing through the City of Redding and the one going over the river at Free Bridge meet on the east side and up to the McCloud River, crossing the Sacramento at Antler and thence traversing the bank of the Sacramento to Dunsmuir and on to Sisson and the Oregon line.

It has been definitely decided by the Commission that if the City of Redding and the County of Shasta construct the proposed bridge across the Sacramento at Reed's Ferry, that the State Highway to be constructed under the $18,000,000 bond issue will go through the Shasta County seat.

Before the Commission orders the survey accepted or calls for bids on this work, however, the City of Redding must show that it will construct this bridge.

The State Highway Commission has presented six tentative highway surveys proposals to the State Advisory Board to the Department of Engineering, asking the Board to approve the action of the Commission in calling for bids for the construction of six different units in the State system to be constructed under the $18,000,000 bond issue. If the plans for the roads are accepted and approved by the Board, the Commission will take immediate steps to advertise for bids throughout the State.

The routes ordered submitted for approval are as follows:

In Merced County, between the northern boundary of the county and Arena, a distance of 9.6 miles.

In Fresno County, between the northern boundary of the county and the City of Fresno, a distance of 9.6 miles.

In Madera County, between the southern boundary of the county and the City of Madera, ten miles, and between Chowchilla and the northern boundary of Madera County, 6.5 miles.

In Stanislaus County, between the southern boundary of the county and a point one and a half miles north of Ceres, eleven miles.

In San Diego County, between the northern boundary of the City of San Diego and Encinitas, 8.6 miles.

The plans call for 67.6 miles, making a total of 101.6 miles of road which will be under construction, if the proposals are accepted by the Board. Ten strips of road in all will have been completed and ready for construction work.

Santa Clara Highway.

In addition to having these six strips ready for construction, the Board has only a small amount of work necessary before preliminaries are swept aside so that the Commission can receive the proposal for another road in Santa Clara County. The highway in question is twelve miles long, between Palo Alto and a point near Santa Clara.

The Commission has not definitely decided the class of construction it will order for these roads. But it is supposed that they will be of a high grade.

President Burton A. Towne and N. D. Darlington, Commissioners, and A. B. Fletcher, State Highway Engineer, have announced that by the first of the year aproximately $1,000,000 worth of the State Highway work will be under construction.

COMPARATIVE COST OF BRICK AND WOOD.

The comparative cost of wood and brick residences is a subject that is receiving greater consideration this season than ever before. The Build-Brick Association of America has carried on a practical experiment to provide dependable information regarding the difference between the frame and the brick construction of the same house.

A modern eight-room house of good design and excellent arrangement was selected for the test, and bids were asked from a number of contractors upon the work. Nine different types of construction were figured upon, including clapboards, shingle, ten-inch hollow brick wall, 12-inch solid brick wall, tile and stucco, terra cotta with brick veneer tied to studding.

The estimates of different contractors vary slightly, as always is the case, but the percentage of difference was about the same in all cases. Taking the lowest figure submitted for the clapboard house as a basis, the difference between the frame house and the 10-inch brick wall was 12 per cent. One contractor's bid showed a difference of only 10 per cent between the clapboard house and the 12-inch solid brick wall. The greatest difference in any case between the cheapest and the most was 1 per cent.

These figures are important because it was a fair test, and the bids were genuine, since the house was ready to be built. The lowest price submitted for the frame house with concrete piles was $6610, and the same party offered to build the house with hollow brick walls, for $7406 a difference of only $8 between a house with fireproof walls that would last [illegible] with a small cost for [illegible] and one that would [illegible] [illegible] and [illegible] [illegible] The difference [illegible] [illegible] and the brick in every case was only a few cents [illegible] the tile and

stucco cost about [illegible] and [illegible] tenement brick wall, with [illegible] difference in cost. Capacity of Record.

THE STORY OF THE AWAKENING AS APPLIED TO WINDOWS.

"A Window [illegible] to the Ark." This [illegible] Noah is the first [illegible] function of Windows.

Webster defines a Window [illegible] an opening in a wall for admitting of light and air.

Mica and semi-transparent shell were used in one of the earliest Windows. The discovery of glass making is credited by the Greeks to the Phoenicians, as shown by the story of Phoenician merchants resting their cooking pots on blocks of Natron, (subcarbonate of soda) and finding glass produced by the united action of the alkali and heat of the stove. (Pliney's Natural History.)

Glass was used by the Greeks for Architectural Decoration, but it remained for the Romans in their most brilliant period of civilization to develop its use for Windows and other practical purposes.

Windows were once considered a luxury, and in England a tax was levied on all Windows above the number of eight in houses [illegible] cities and towns. In our time Windows are known to be a prime necessity [illegible] and perfect ventilation [illegible] to health, comfort, health and convenience in all modern buildings.

In earlier times ventilation was obtained by means of [illegible]

Authorities agree that in order to preserve a high standard [illegible] air in sanitariums, ventilation must go on at the rate per person of [illegible] cubic feet per hour. For Auditoriums, theatres, meeting halls, [illegible] and dwellings a rate of [illegible] cubic feet is required.

An awakening of the [illegible] ventilated inventors to overcome all difficulties in according to the people a mode of ventilation [illegible] Window construction which makes [illegible] sion of heat and possible [illegible] drafts or other inconvenience to occupants of the room.

In presenting the Simplex Weight-less Reversible Window for consideration we offer a device [illegible] every feature for perfect lighting, perfect ventilation and [illegible] convenience in manipulation [illegible] cleaning and grace of construction.

The Simplex Weight-less Reversible Window is made in any style, size or shape for any kind of a building. It is used in office buildings, [illegible] schools, hospitals, hotels, [illegible] houses, flats, jails, gymnasiums, portables, [illegible] and residences of all classes. In short, my place where a Window is used, a Simplex has no peer.

Sash Boards who have to consider the health and convenience of the growing child are universally adopting the Simplex for school buildings.

Since the enactment of the Employers' Liability Law in the State of California an owner of a building is held responsible for any accident that may befall an employee while in the performance of his duty in the control of the building.

Therefore a Window opened from the inside as is the Simplex [illegible] an important danger to both employer and employee.

The cost of the Simplex [illegible] be erected in Brick, Stone or Concrete buildings and not slightly more in Frame buildings than that of the old fashioned inconvenient cord and pulley Window.

Simplex Windows do not interfere with the use of screens.

[illegible] including Petroleum, Natural Gas, Bituminous Rock, exclusive of Asphaltic and [illegible] products, to the value of $4,161,-[illegible] were produced in California during 1911:

Petroleum [illegible] contributed to [illegible] as follows:

1. Kern	$30,173,314
2. Fresno	9,314,084
3. Orange	4,097,980
4. Los Angeles	3,329,180
5. Santa Barbara	3,295,162
6. Ventura	952,753
7. San Joaquin	114,133
8. Sacramento	82,800
9. Santa Cruz	80,371
10. Solano	10,244
11. San Luis Obispo	3,376
12. Santa Clara	1,005
13. Kings	800
14. Humboldt	150

The [illegible] is [illegible] as follows:

Petroleum Sold in 1911 at [illegible]	$37,610,520
Petroleum Used on Fuel [illegible]	2,031,268
Natural Gas	191,820
Bituminous Rock	147,570
Total	$41,561,226

W. H. STORMS,
State Mineralogist.

GROWTH OF CORPORATIONS IN AMERICA.

[illegible] the [illegible] the [illegible] corporations in America [illegible] 1902 there were [illegible] corporations, of which [illegible] were in Massachusetts. By the year 1850 Chancellor Kent counted but [illegible] corporations in the United States, and [illegible] to the census, 1854. He says: "The increase of corporations in number and of private industry and enterprise, was kept pace in close [illegible] country [illegible] the increase of wealth and improvement. The Massachusetts Legislature [illegible] in the session of 1853, incorporated upwards of seventy manufacturing companies." In 1857 Chief Justice Shaw remarked that "It is [illegible] that legislative corporations were [illegible] by the Legislature of Illinois at its last session than existed in the whole civilized world at the commencement of the present century." In the fiscal year 1909, according to the [illegible] Commissioner of Internal Revenue, there were in the United States 267,149 corporations of all kinds, with a net [illegible] $43,000,000,000 of which [illegible] stock and bonds and $3,135,000,000 of it [illegible] paying a Federal tax of about $25,000,000. For the fiscal year 1910-11 the figures had risen to [illegible] corporations with a net [illegible] $50,000,000,000 of stocks and bonds and $3,360,000,000 of income paying a Federal tax of $30,000,000. As the total wealth of the United States has been estimated at $125,000,000,000, it would appear that [illegible] two-fifths of it is held by corporations. More than one-fifth of the tax payments were made by $32,925, corporations of New York.—Francis Lane Stetson in Atlantic Magazine.

CONSTRUCTION WORK IN CHILE.

Extensive Irrigation Works.

The Inspeccion General de Hidraulica de la Direccion de Obras Publicas, Santiago, Chile, has in hand plans for four irrigation works to cost $924,000 and irrigate about 172,970 acres of fertile lands in the central valley of Chile. Other systems are under consideration farther north that will cover about 50,000 acres more. All of these works are being constructed under the supervision of the Chilean Government, and regulated by laws well calculated to develop the arid lands of the country.

There are many splendid irrigation systems now in operation in the central valley of Chile, fed by mountain streams from the cordilleras, that have done much to develop that part of the country. The irrigated lands are very productive, yielding 4 and 5 crops of alfalfa each year, and will grow 2 crops of different grains or vegetables.

City Hall—Road Building.

Bids have been asked for the erection of a three-story and basement city hall, at Concepcion, Chile, to cover a ground space 70 by 120 feet. It is proposed work should begin on this building before the close of 1912.

The Chilean Government has appropriated $501,160 for wagon-road construction during 1912, and $415,140 for building bridges, of which 11,450 linear feet are now under construction.

Reconstruction of Hospital.

Work is to begin soon on the reconstruction of the San Juan de Dios Hospital in Valparaiso, that was wrecked during the great earthquake of 1906. It is planned to expend about $750,000 in putting it in shape, and it will require about 18 months to complete the work.

STATE HIGHWAY SURVEY.

DUNSMUIR (Siskiyou Co.), July 24. A party of surveyors are camped on the Red River near Castle Crag and will survey for the state highway from Castle Crag south, through Shasta County. It is reported that the Pacific Improvement Company has offered them a right of way through their property at Castle Crag. The Dunsmuir Boosters are working hard for the highway to come through Dunsmuir, which is the natural way for it, thereby taking in all the picturesque resorts along the route of the Shasta wonderland.

LANDS OPEN TO SETTLEMENT.

LAKEVIEW (Ore.), July 24.—Advices have been received here that the Secretary of the Interior has responded to a petition presented to him by Congressman Hawley, asking that about 73,000 acres of land near Arrow and Fort Rock, Lake County, be thrown open to settlement, and were made subject to entry July 22d, under the provisions of the enlarged homestead law. The land is of a semi-arid character.

LARGER QUARTERS.

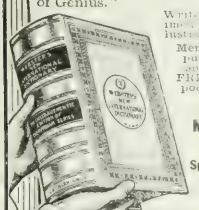
Owing to the increased business and popularity of the Simplex Window.

"Just the Information We Need"

WEBSTER'S NEW INTERNATIONAL
—THE MERRIAM WEBSTER

Every day in your talk and reading, on the street car, in the office, shop, and school some new question is sure to come up. You seek quick, accurate, encyclopedic, up-to-date information.

This NEW CREATION will answer *all* your questions with *final* authority. *400,000 Words Defined. 2700 Pages. 6000 Illustrations. Cost $400,000.* The *only* dictionary with the new divided page. A "Stroke of Genius."



Write for specimen pages, illustrations, etc.
Mention this publication and we will send FREE a set of pocket maps.

G. & C. MERRIAM CO.,
Springfield, Mass. U. S. A.

the Company has been obliged to secure larger and more commodious quarters in the Crocker Building.

NEW INVENTIONS.

Reported especially for this paper by H. B. Willson & Co., Patent Attorneys, 715 Eight Street Northwest, Washington, D. C.

A Complete Copy of these patents will be forwarded to any person by Messrs. Willson & Co. on receipt of ten cents. Persons ordering Copies must give Number of Patent.

1,032,405. Drainage System. J. R. Harrison, Peoria, Ill.

1,032,825. Drop Window. Max [illegible] asz, Budapest, Austria-Hundary.

1,032,952. Method of Constructing Subways. E. R. Shnoble, Chicago, Ill.

1,033,011. Cellular Wall for Sewage Disposal Apparatus. De A. H. [illegible] Birmingham, Ala., assignor to [illegible] Terry, Southampton, N. Y.

SUNDRY CIVIL BILL PASSES.

WASHINGTON, July 25. The sundry civil appropriation bill, [illegible] approximately $111,000,000 [illegible] port of various bureaus [illegible] of the government, passed the Senate yesterday. It contains [illegible] of about $6,000,000 over the appropriation authorized by the House. The differences between the two bodies will be adjusted in conference.

MR. ARCHITECT, Give Your Owner the BEST

Discriminating Conduit Users Specify

CENTRAL RED

It Stands Out as the Best of Rigid Conduits

In the manufacture of this especially prepared conduit, we have taken advantage of every refinement known to the profession and have utilized the experience of producers of this class of material for the past twelve years, in evolving a coating for pipe that is an ABSOLUTE PREVENTATIVE of deterioration in the pipe under the most trying conditions.

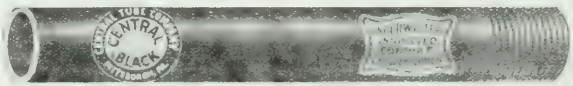
The utmost care has been taken to thoroughly clean and to remove all scale and silicates before giving the pipe a coating of zinc by our own special process. This exterior coating is absolutely continuous, free from pin holes and other objectionable features. The coating of zinc prevents rust and insures against any deterioration in the pipe. Over the zinc exterior, two layers of our own especially prepared red enamel are coated, great care being observed to allow only a very thin layer to adhere to the threads, thus avoiding the necessity of recleaning them and to maintain perfect electrical contact. The red enameled interior provides a smooth, slippery raceway, facilitating fishing.

The salt air of sea coast cities, so injurious to all other classes of conduit, has no appreciable effect upon "CENTRAL RED," and we heartily recommend its use in these localities and wherever conditions are the most severe. It is especially adapted for use in CINDER CONCRETE.

"Try It Where Others Have Failed"

"CENTRAL WHITE"

is as good, if not better than competing brands of electro-galvanized conduit. Adequate protection from deterioration is insured by a heavy zinc coating. Couplings are removed during the electro-galvanizing, so that there may be no unprotected spots on the pipe.



"CENTRAL BLACK"

is especially recommended for its softness and easy working qualities. Our patented cleaning process gives us a product free from roughness.

APPROVED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS

Editorial Comment.

FOREWORD TO THE CONTRACTORS' AND DEALERS' ASSOCIATION OF THE STATE OF CALIFORNIA.

The Building and Industrial News is pleased to announce that at a meeting of the Executive Board of the Contractors and Dealers' Association of the State of California, held at the assembly room of the Builders' Exchange on last Saturday, it was endorsed and designated the official paper of that organization.

The Building and Industrial News congratulates the gentlemen of the organization upon so splendid a showing as the association now presents. Starting only so short a time ago as last March, it already numbers a membership of over one thousand. Among these are the names of the most substantial business men and builders of the State. It is organized on right lines. It looks to the raising of the standard in the building business, better work and honest conditions. When the objects and aims and the practical results to be attained are properly put up to the subcontractors of the State and of the Pacific Coast there can be no question of the ultimate success of the organization.

The Building and Industrial News assures every member of the organization that its columns are and will be an open forum wherein he will find space to express his opinions in print and publish communications for the good of the craft. This publication has always stood for the things that the Contractors and Dealers' Association stands for. As the official organ of the Association it welcomes the added strength that the organization will give in effecting the aims and objects of better building and better conditions for the men engaged in the business.

Further than that, the Building and Industrial News is at the present time furnishing the exact kind of news that every individual and every craft in the organization is looking for. The advance information from all parts of the Coast, from plans wanted to recorded contracts, places in the contractors' and dealers' hands each week the first news of building enterprises of all classes and descriptions. The index each week covers a wide range of live and profitable information. It extends to every craft and business, and, as the business increases as it is sure to, this paper plans to meet the conditions with fuller particulars and a wider range of topics.

So with this issue the Building and Industrial News congratulates the organization upon the work already done, it assures the Association of its enthusiastic support in all its work to come. And it again invites the correspondence and expression of opinion of all members throughout the State for the betterment of building conditions and the advancement of the cause of honest work.

The statement of Mayor Rolph that he will run the Geary Street cars to the Ferry sounds right. It is high time that action like the mayor outlines should be taken. The United Railroads have held property over which they have only a color of right, if they have even that, long enough.

Injunctions and delays in the courts and litigation in keeping the city from what belongs to it has been the order of things. If the mayor can take possession of the streets run the cars down Market street and then let the United Railroads fight it out in the courts it will place the responsibility for litigation where it belongs. It is said that possession is nine points in law, so if the city has the right let it take possession even it it has to do it by force of arms.

Now if some such action would be taken in the case of the telephone company the people would be the ultimate gainer. The Home plant is one of the best equipped in the world. The service it rendered to its subscribers is so far superior to what the Pacific States gives that there is no comparison between them. In violation of their contract with the people, in direct contravention with the terms of their franchise they have attempted to transfer heir property to the Pacific States Telephone Company and have delivered possession. In spite of the vote of the people against the proposal to merge the companies they are proceeding in absolute disregard of the expressed wish and demand of the people. Meanwhile the service is getting worse if anything. Some definite action should be taken by the authorities to prevent this action and steps taken to acquire the plant by the people as was proposed.

Progress is at last reported by the Board of Directors of the Panama-Pacific Exposition.

This is something and gives the people some idea of what is being done. The plans of the architectural department seem to be rather indefinite as yet even as to the Service building, but it is probable that they will soon assume definite shape. Let the good work go on and give the people a monthly report of progress.

In Kansas the Taft politicians are planning to seek refuge in the courts, to keep the Roosevelt electors off the ticket. On the theory, perhaps, that the judicial temperaments ought to stand together.

A Scheme To Reduce The Fire Hazard.---Let the Form Of Construction Determine The Tax Rate.

[illegible] well [illegible]

[illegible] be [illegible] per cent of the [illegible] fire proof buildings throughout the city. Does this offer any reason to [illegible] [illegible] [illegible]

of public buildings a [illegible] because of [illegible] care to inquire into." [illegible] report says. "We are also aware [illegible] some of the suggestions we [illegible] make may not meet with a favorable reception."

After charging the Senate with extravagance in locating public buildings and changing that into villages of 3,000 and 5,000 population, and in given public buildings [illegible] extravagant in cost and expensive to maintain, the report lays [illegible] supervising architect's office.

The committee believes that the office has been working for [illegible] not yet overlooked [illegible] feature of administration, [illegible] says.

"If there is one reform more than another that ought to be inaugurated in the office of the supervising architect it is that of standardizing public buildings. The supervising architect has had under his large for 15 years a corps of draftsmen designers, and computers busily engaged in designing and writing specifications for $70,000 public buildings under the absolutely frivolous plea that location, topography, and latitude gave rise to such difficulties in construction that the plans and specifications must be rewritten in each and every case.

"This office for years and years has gone along, doing the same kind of work over and over again. It has had at a trained mechanical and skilful architect to know that very much of the work done along its lines is needlessly unnecessary and useless, and unjustified by expense of the Government, left in the hands of [illegible] and trust the office as now [illegible] ing. It is making no move [illegible] this reform. It is now employing [illegible] rolls 92 draftsmen and architects to supply this particular line of work in constructing the public buildings provided for in the last act. It [illegible] claimed successful [illegible] $70,000 building properly designed [illegible] tions correctly drawn for [illegible] one locality is not to [illegible] a town similarly [illegible] locality.

"Even if a standard [illegible] possible of the [illegible] that condition [illegible] materials used [illegible] the use of a working model [illegible] stone, sandstone or granite. The [illegible] having been in existence [illegible] to be provided with [illegible] structed with different [illegible] correct and perfect [illegible] beatness for the $70,000 [illegible] locality. There is no [illegible] books ought not to be [illegible] to the construction [illegible] public buildings. The standard [illegible] ought to be applied to [illegible] costing at least $100,000 [illegible] and that would cover [illegible] cent of all the public buildings to be constructed. Provision [illegible] for the more expensive [illegible] be necessary.

"In large cities [illegible] room must be [illegible] eral branches of the [illegible] business, for instance, [illegible] court, internal revenue, [illegible] vice commissioners, [illegible] etc., ought to be [illegible] buildings. Specifications [illegible] be prepared, [illegible] adopted, as a [illegible] signs, drawings, and computations [illegible] given would be effected and the work [illegible] greatly advanced.

The committee believes that [illegible] record of service and skill in a certified number and specifies as an example the post office building at Tuscaloosa. The report has several pages of testimony and statements to prove the assertion that Mr. Taylor acted a [illegible] award by himself in the [illegible] matter after members of the board were refused to sign the award as rendered.

The report [illegible] that Mr. Taylor signed the Toledo award after [illegible] and Secretary Winthrop approved it, and it being wholly disregarded the departmental regulations [illegible] and the board of award."

The committee [illegible] approval [illegible] on the bottom, saying: "We believe it [illegible] to put with [illegible] the power to employ [illegible] state of [illegible] without [illegible] point."

The committee recommended that the office of supervising architect [illegible] the office of H. H. Kemper, a member of the board of review, to have the necessary Mr. Kemper testified as to the system of bids.

In connection the report says on this point:

The testimony of Mr. Kemper is cited to show the possibilities under [illegible] working of this system. [illegible] no doubt of its [illegible] merit, in connection [illegible] it puts the door to the [illegible] ns and most flagrant [illegible] tition. Open and [illegible] bidding lies [illegible] [illegible] competition at [illegible] ruinous cutting [illegible] Take [illegible] [illegible] of quantity [illegible] [illegible] of an unlimited [illegible] [illegible] [illegible] The individual [illegible] [illegible] [illegible] the Government [illegible] [illegible] [illegible]

Items on this page are classified under special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, corresponding on this page. These same items are again reported under "Recent Work" in the last part of our news department.

fire limits and will contain two stores

on the first floor. The upper floors will

be divided into single rooms, all of

which will have running hot and cold

water. The interior trim will be of

oak. The exterior of the building will

be covered with siding. Plans are

complete and the work will be done

by Day Labor.

San Francisco—Hotel, 3 stories and basement, concrete; $1,500. Architect, Albert Pissis, Crocker Bldg. Owner, Clinton Lake, S. F. owner, J. H. Lee. The first floor of the building will be occupied as a saloon. The upper floor will contain 36 rooms consisting of 3 suites and six suites. The interior will be finished in pine belonging. Running water, and steam provided in all rooms. The exterior of the building will be faced with cement plaster. Plans are complete and a contract will be awarded at once.

Los Angeles, Cal.—Hotel, 4 story and basement, brick and steel. Cost not stated. Architect, E. C. Thorne Realty Board Bldg., L. A. Owner, L. F. De Hail. Plans provide for two stores and the second floor and 132 sleeping rooms on the upper floors. The building will be of dimensions of 100x150 feet. There will be 132 rooms. Running water will be piped to all rooms. There will be five stairways and steel work. The exterior of the building will be faced with cement plaster. Plans are complete and the work will probably be let soon.

—POST OFFICES—

Santa Barbara, Santa Barbara Co., Cal.—Post office, 2 story and basement, brick, stone and steel. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. The building is soon to be opened for use and bids are to be opened on these plans August 27th. The building will cover approximately 6500 feet of ground area. Plans can be secured from either the Custodian of the site at Santa Barbara or from the Supervising Architect, Washington, D. C.

RAILROAD CONST., STATIONS AND EQUIPMENT.

Seattle, Wash.—Shipbuilding plant, one story, concrete and steel. Cost not stated. Plans, Stone & Webster, Wilcox Bldg., Seattle. Owner, Lake Washington Shipping Co. Plans for buildings will not be ready for bids for some time. Plans to cost and contracts for all part of the work will be let by the owners.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, $5,000. Architect, H. E. Young, 251 Kearny St. S. F. owner, Thomas Scobie. The dwelling will contain about eight rooms and bath with laundry. The interior will be finished in pine, redwood and oak. Oak floors will be used in the principal rooms. All halls will be finished in tile. There will be steam heat and open fireplaces. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner. The work will be done by day labor.

San Francisco—Residence, 2 story and base, frame, $4,000. Architect, none. Owner, C. A. Hall, 1318 3rd Ave. These houses will contain seven rooms and bath. The interior will be of pine finished in enamel with some oak floors. There will be open grates and tile or brick mantels. The exteriors of the houses will be covered with shingles and stucco. Plans are complete and the work will probably be let soon.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $6,000. Architect, Julia Morgan, Hearst Bldg., San Francisco. Owner, Mrs. Phoebe A. Hearst, Pleasanton. The building will contain 10 rooms and bath. The interior will be finished in pine and redwood with some oak floors. There will be open grates and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and bids are being taken on the work.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $6,000. Architect, Julia Morgan, Hearst Bldg., San Francisco. Owner, Mrs. Phoebe A. Hearst, Pleasanton. The building will contain 10 rooms and bath. The interior will be finished in pine and redwood with some oak floors. There will be open grates and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and bids are being taken on the work.

PROPOSALS FOR GENERAL FINISHING CONSTRUCTION.
(Bids close Aug. 21.)

OFFICE of the Board of Public Works of the City and County of San Francisco. Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday the 21st day of August, 1912, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The general finishing construction of the eight wooden structures comprising the main group, power house and laundry building and connecting pergolas of the San Francisco Hospital grounds on Potrero avenue, San Francisco, street.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.
(Bids close Aug. 13.)

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at the office of the Director of Works of the Exposition Building, Baker and Lombard Streets, San Francisco, California, at 10 a. m. on August 13th, 1912, for the following work:

For Contract No. 5.

For constructing Tea or Green House and a Potting House in the Park in accordance with the specifications on file in the office of the Director of Works.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company for the sum of ten per cent of the bid, or the same will not be considered. When the award is made all checks will be returned to the unsuccessful bidders except that of the successful bidder, which will be retained until the contract is signed and a bond for the faithful performance of the contract, in the sum of fifty per cent of the contract price will be required for the last full performance of the contract. The sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made.

The right is reserved to reject any and all bids and to waive technicalities in the bids received whenever it is for the best interests of the Exposition Company to do so.

By order of the Buildings and Ground Committee.

WILLIAM H. CRocker,
Chairman.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Flats—3 story and cellar, frame, $5,000. San Francisco. Architect, Henry Seymour, Mills Bldg., S. F. Owner, C. L. Hansen. To be on, which this building is to be erected has a frontage of 50 ft. by 100. Architect Seymour reports bids are invited in arranging the plan of the flats of five and six rooms each with baths and all other modern conveniences. The interior will be finished in pine and redwood with some hardwood floors. The exterior will be covered with shiplap. Permits are now out for figures.

Garage—1 story and base, reinforced concrete. Cost not stated. San Francisco. Engineer, P. Zuro, 166 Geary St., S. F. Owners, Whittell Estate. The structure will cover an area of 82x136 feet. The front portion of the building will be arranged for sales rooms and office. A large machine shop and storage space will occupy the rear portion of the building. The concrete floor will be fireproof throughout. The offices and sales rooms will be finished in hardwood trim, and walls and ceilings plastered. The exterior of the building will be faced with cement brick. Plans are complete and bids are being taken.

Garage—2 story and base, reinforced concrete, $75,000. San Francisco. Architect, William Hellwig, 1420 Market St., S. F. Owners, Dow and Green. The building will cover an area of 70x105 feet, access to be afforded by the foot of Hyde, Bellevue and Webb Tax Jones streets. The rear portion of the building will face a small street and will have a paved ramp for Taylor street frontage, providing a direct driveway entrance to the second floor of the building. Construction will be of reinforced concrete throughout. The exterior walls will be faced with pressed brick. Plans are complete and bids are being taken.

Hospital Work—General finishing and repairs on 8 buildings. Cost not stated. San Francisco. Architect, City Architectural Dept., Temporary Hall Bldg., S. F. Owners, City and County of San Francisco. Plans for the completion of all work penalties are supplied at the San Francisco Hospital grounds, completed and placed on file with the Board of Public Works for figures. Bids for this work will be opened on August 21st. Permits are not issued as yet, but will be about the 1st of August.

Hotel—5 story and basement, fireproof construction, $400,000. San Francisco. Architects, Weeks & Day, Mills Bldg., S. F. Owners, Dow Estate. Preliminary plans for the improvement of the site at the corner of Market and Hayes streets are now prepared and accepted by the owners. Details are now being worked out between the owners and a prospective tenant, after which working drawings will be prepared and bids will be called. The site covers a large area and the building planned will contain about 200 rooms. The first floor will be arranged for a large lobby, private dining room, and a number of stores. The construction will be of reinforced concrete and will be provided with steam heat, a vacuum cleaning plant and other modern conveniences. The foundations will be carried on piles and will be of reinforced concrete throughout. The exterior walls will be faced with pressed brick or terra cotta. Complete details will be given on the plans.

Hotel and Stores—4 story and basement, $50,000. San Francisco. Architect, D. H. McLaren. Owner, Montgomery St. S. F. Owner C. A. Dean. The building will be constructed of fire limits and will contain two stores on the ground floor, the upper floors will be subdivided into rooms, all of which will have the use of bath and toilet rooms. The exterior walls will be of brick. The estimated cost of the building will be $50,000. Plans are now being prepared and bids will be called for about the 1st of August.

Hotel—3 story and basement, concrete, $60,000. San Francisco. Architect, [illegible], Chronicle Bldg., S. F. Owner, [illegible]. The first floor will be arranged for stores, the upper floors will be subdivided into rooms, all of which will have the use of bath and toilet rooms. The exterior walls will be of brick. The estimated cost of the building will be $60,000. Plans are now being prepared and bids will be called for about the 1st of August.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—2 story and basement, reinforced concrete, $70,000. Oakland, Cal. Architect, J. Henry Behn, Delger Bldg. Oakland. Owner, J. Lagorio. This building has been arranged for two stores on the first floor and five large apartments on the upper floor. The suites will contain from three to five rooms and bath each. There will be wall beds and steam heat. The interior will be finished in pine with oak floors. The exterior of the building will be lined with cement plaster. Plans are complete and figures are being taken.

Apartment House—2 story and basement, frame, $7,000. Berkeley, Alameda Co., Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Mr. Merritt. The building has been designed to contain four apartments of seven rooms and bath each. There will be a central heating plant and wall beds. The interior finish will be of pine with oak floors in the principal rooms. The floors in all bath rooms will be laid in tile. The exterior of the building will be covered with cement plaster or metal lath. Plans are now out for figures and a contract will be awarded at once.

Church—Brick and steel construction, $150,000. Oakland, Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Methodist Church of Oakland. This work has been mentioned here a number of times before. A general contract has been awarded to Somedly, Hostrawser & Podgett, 1111 Broadway, Oakland and they are now taking sub-figures on all parts of the work.

Lodge Hall—1 story and base, brick and steel, $100,000. Oakland, Cal. Architect, Fred D. Voorhees, Central Bank Bldg., Oakland. Owners Woodmen of the World. Several contracts let. The building have been awarded and the architect is now taking figures for the reinforced concrete work and reinforcing metal. Contracts have been awarded as follows: Brick and terra cotta work to N. Clark & Son; structural steel to Judson Iron Works. Other contracts will be let at once.

Lodge Hall—3 story and base, brick, $30,000. Oakland, Cal. Architect Clay N. Burrell, Central Bank Bldg., Oakland. Owners, Portuguese Hall Society. This work has been mentioned here before when plans were first noted. The drawings are now complete and figures are being taken. The first floor of the building will be arranged for two stores. The exterior will be lined with pressed brick. Plans are complete and figures

Flats—2 story and basement, $8,000. Oakland, Cal. Architect none. Owner, W. C. Vogt. 7th and Linden Sts., Oakland. The building has been designed to contain two modern flats of six rooms and bath each. The interiors will be finished in pine and redwood with some oak floors. There will be open fire places and tile mantels. The exterior of the building will be covered with cement plaster on metal lath. A warm air furnace will be installed. Plans are complete and the owner is now taking figures.

Hospital—4 story and base. Class A construction, $200,000. Oakland, Cal. Architects Sloan & Leiberg, Bank of Italy Bldg. S. F. Owners, Providence Hospital. The building will be fire proof throughout and will contain accommodations for a large number of patients. There will be the most modern equipment throughout, particular attention being paid to the surgical wards. The exterior of the building will be lined with pressed brick or terra cotta. Working drawings are now being prepared and will be ready for figures within a month.

Residence—2 story and base, frame, $6,000. Berkeley, Alameda Co., Cal. Architect Norman F. Coulter, Bekeart Bldg., S. F. Owner, Mr. Robert Law. The house is to be designed for seven rooms and bath. The interior will be finished in pine and redwoods. Oak floors will be used throughout. There will be open fire places and furnace heat. The mantels will be of brick and tile. Tile will be used in the baths and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN JOSE & SANTA CLARA VALLEY

Mausoleum—Concrete and marble, 3 tombs. Holy Cross Cemetery, San Mateo Co., Cal. Architect, Henry Sherrard, Mills Bldg., S. F. Owners, Mesic Estate. Plans for this work are complete and work on the foundations will be started at once. The entire structure with the exception of the foundations, will be of Italian marble. Considerable ornamental bronze will be used. There will be space for six receptacles.

Residence—2 story and base, frame. Cost not stated. Menlo Park, San Mateo Co., Cal. Architect, Arthur G. Scott, Parrott Bldg., S. F. Owner's name not given. The house will contain seven rooms and bath. The exterior will be covered with rustic and shiplap. There will be open fire places and tile or brick mantels. Plans are complete and figures are being taken.

Bungalows—1 and 1 story and base, frame, $2,000 each. Burlingame, San Mateo Co., Cal. Architect none. Owner, J. W. Mahon, 906 41st St., Oakland. Each of these houses will contain six rooms, bath and sleeping porch. The interiors will be finished in pine and redwood with oak floors. There will be open fire places with tile and brick mantels. The exteriors will be covered with cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

Bungalow—1½ story and base, frame $3,500. Salinas Monterey Co., Cal. Architects Hunt & Davis, 1420 Broadway, Oakland. Owner, C. W. Towne. The house will contain eight rooms, bath and sleeping porch. The interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be fireplaces, heat and open fire places. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

Stores—1 story and base, reinforced concrete, $16,000. Burlingame, San Mateo Co., Cal. Architect, Jos. J. Foley, Monadnock Bldg., S. F. Owner's name withheld. This building will be similar in design to the post office now under construction from plans by the same architect. The location has been arranged for a candy store. The exterior walls will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

Hospital Buildings—2, 2 story and base reinforced concrete. One to be called Agnews State Care Co., Cal. Architect State Dept. of Engineering, Secretary Agnews State Commission. Bids to include labor and materials complete, ready for occupancy. Lump sum contract. Bids opened and known as Contract No. 1. Assembly Hall, two story, opened and known as Contract No. 2. The conalescent building at $2,000, and McLeran & Peterson on the assembly hall at $2,000. A contract has been awarded to H. Hess Co., of San Jose and the Santa Clara Valley.

Complete Bids For All Work At Agnews.

Plans are complete and figures are being taken.

Bank and Offices—2 story and base, brick and steel. Cost not stated. Whittier, Los Angeles Co., Cal. Architects, T. Beverley Kiem & Co., Title

Wesco Flat Oil Paint

An improved, sanitary flat paint for interior finishing. Gives very fine finish.

Wesco Kalsomine

Spreads easily, does not decay and gives soft, rich surface. can be washed off when desired.

Cold Water Paint

The most economical paint on the market. When you buy **Wesco Cold Water Paint** you pay only for paint and not for high-priced oils. It can be used on exterior or interior surfaces. It dries very quickly, is non poisonous, a strong disenfectant and does not turn yellow with age. **Wears well** and is an excellent fire retardant.

Concrete Paint

The best paint in the world to use on damp places. It can't be equaled in painting tunnels, arches, cellars or any other place where dampness exists. Makes the finest possible finish for the interior of factories and other buildings where there is loose steam and damp vapors.

MASTER ROOFERS MEET.

Banquet Saturday Evening Largely Attended. Discuss Building Conditions and Uplift of the Business.

The Master Roofers and Manufacturers Association entered a very pleasant and successful session at Jules Cafe last Saturday night. A subscribed banquet was discussed after which under the direction of President Hogan the members considered the question of improvement to be effected by the roofing business.

For some time past a few roofers, who do not belong to the Association, have been figuring ridiculously low and are succeeding in getting their work by cut rates. The action of these men has been so misleading to owners that not only are those engaged in the business unable to acquire any profit from their work but the public is being injured on account of getting inferior roofs, which require constant patching to keep from leaking.

Section 275 of the Building Laws provides that roofs shall be covered and such provisions are followed there will be little or no complaint on account of leaking roofs. The Master Roofers and Manufacturers' Association proposes in the future to assist the Chief Building Inspector in enforcing the terms of Section 275 of the Building Laws relating to roof covering. An Inspection Committee has been appointed with the Association and its duty will be to report to the Board of Public Works any contractor who does not comply with the laws.

Legislation is necessary to the reorganization of the Master Roofers and Manufacturers' Association is affiliated with the Contractors and Dealers Association, the Constitution and By-laws of which require that all members of its affiliated associations must bid on contracts and perform to all plans and specifications that are signed by them. There is a strong determination among all specialty contractors to bring about a better quality of work in the Master Roofers, as it is generally believed that by so doing they will be able to assist in every way to uplift the entire business.

The following contractors were present and the social time of the evening was enjoyed by all:

Mr. Gilmore, of W. Bolte Asphalt Co.; Mr. Anderson, of Pioneer Roofing & Paving Co.; Mr. Bender, of J. W. Bender Roofing & Paving Co.; Mr. Malott, of Malott & Peterson; Mr. Nicol, of Enterprise Roofing Co.; Mr. Watson, of Watsonite Co.; Mr. Larkin, of Larkin Asphalt Co.; Mr. Butler, of Wisconsin Felt & Refining Co.; Mr. Hogan, of Hogan Lumber Co.; Mr. Hall, of H. D. Symonds Co.; Mr. Hall, of Pioneer Roofing Co.; Mr. Raphael, of Raphael Roofing Co.; Mr. Bender, of J. W. Bender Roofing & Paving Co.; Mr. Malott, of Malott & Peterson; Mr. Nicol, of Enterprise Roofing Co.; Mr. Watson, of Watsonite Co.; Mr. Larkin, of Larkin Asphalt Co.; Mr. Butler, of Wisconsin Felt & Refining Co.

THE WORK OF THE ENGINEER.

Students of history may be divided into two general classes. Those whose tendency it is to attribute events to moral, intellectual or spiritual movements, and those who look for underlying causes in physical or material facts. Those in the crusades the one sees only a great moral and religious movement, and the other as an underlying love for the ameliorating of the prince for new empire and the desire of the merchant to extend his commerce. The one sees the reformation as a religious movement only, the other finds secular and political forces predominating. The one sees in the Civil War between the states a great moral movement on the part of the North to compel the South to cease to maintain an immoral institution; the other sees nothing moral in the fact that the North did not keep slaves and desired to prevent the South from doing so, but attributes the underlying motives to economic conditions, and holds that the North kept no slaves because they did not pay in that climate, and that its desire to abolish the institution in the South was because the paid labor of the North could not compete with the free labor of the South.

While the intellectual movement has been great and there has been a great diffusion of knowledge throughout all classes, it seems doubtful if this is the cause as there have been great intellectual movements before without this result, and whatever effect this higher level of intelligence has had, it could not have been brought about without the works of the engineer. The engineer in his work has to deal with tangible things and facts, therefore, accustomed to attack his problems by material forces, and looks for tangible facts as the causes of events. The cause to which he would attribute this condition is, therefore, the increased ease of transportation and communication as brought about by the steam engine, the printing press, and the telegraph, and the consequent stimulus to commerce and the internationalization of capital.—George D. Snyder, in Engineering Magazine.

THE MINERAL INDUSTRY OF CALIFORNIA.

Report of The State Mineralogist.

Structural Materials Produced in 1911 to the Value of $17,194,057.

The statistics of production of structural materials in California for the year 1911 have been completed by the State Mining Bureau and show an increase of nearly $2,000,000 over the production of 1910. As usual, brick and lime lead in the list of products, while cement shows a most gratifying increase.

The following is given the production of structural materials in California for 1911 listed by counties, and the total value of the material produced:

Cement,		$8,[illegible]
Crushed Rock [illegible]		[illegible]
Brick, M.	$7,[illegible]	2,638,121

Limestone, tons	516,789	452,790
Lime, bbls	129,587	200,988
Granite, cu. ft	401,269	344,351
Clay, tons	224,576	247,752
Paving Blocks, M.	4,141	210,819
Sand tons, cu ft	275,315	127,314
Marble, cu. ft	20,201	51,103
Curbing, lin ft	54,045	11,391
Glass Sand tons	8,620	8,672
Feldspar, tons	740	4,560
Barytes, tons	309	2,207
Total Value		$17,194,057
Increase for 1911		$ 1,820,589

The list by counties, in the order of their importance in this branch of the mineral industry is as follows.

1.	Los Angeles	$2,040,314
2.	Contra Costa	583,921
3.	Riverside	582,561
4.	Alameda	566,245
5.	San Bernardino	3
6.	Fresno	347,111
7.	San Diego	269,188
8.	Placer	266,151
9.	Santa Cruz	258,143
10.	Kern	234,852
11.	Sacramento	203,915
12.	Marin	196,231
13.	Sonoma	184,025
14.	San Mateo	178,985
15.	Solano	144,274
16.	Tuolumne	134,007
17.	Napa	127,128
18.	San Francisco	119,636
19.	San Benito	107,558
20.	Amador	103,895
21.	Santa Clara	96,513
22.	Shasta	96,511
23.	Tulare	81,000
24.	Butte	78,208
25.	Madera	76,310
26.	San Joaquin	75,160
27.	Santa Barbara	74,083
28.	Colusa	66,729
29.	Glenn	51,150
30.	Merced	49,548
31.	Humboldt	44,573
32.	Monterey	37,967
33.	Inyo	32,555
34.	El Dorado	18,774
35.	San Luis Obispo	18,000
36.	Orange	15,605
37.	Calaveras	11,933
38.	Ventura	10,075
39.	Yuba	9,318
40.	Siskiyou	1,179
41.	Imperial	7,000
42.	Stanislaus	5,950
43.	Nevada	3,500
44.	Mendocino	1,600

UNAPPORTIONED.

Brick	$ 98,775
Cement	9,085,625
Feldspar	4,560
Glass Sand	8,672
Barytes	2,207

The cement and crushed stone industries show material increase because of the large number of concrete structures being built and activity in road work, breakwater construction, etc.

Decrease in brick output may possibly be due to some extent to the substitution of cement construction for brick. It is impossible to classify the figures for the several kinds of brick manufactured, but taking the State totals for the past two years, the average price per thousand was seven per cent lower in 1911 than in 1910. Several producers remarked that their decreased production was due to falling off in price. Two or three small plants were closed entirely in 1911, and almost without exception the larger ones reported a smaller output. Over production in 1910 is partly accountable for the above.

Lime also was about seven per cent per barrel lower in price in 1911 than in the previous year, and the output fell off in a manner exactly corresponding to the decrease in brick production. Several kilns were idle that had been previously producing.

Production of limestone also shows a decided decrease, due in part to the curtailing of the copper industry, and the consequent lessened demand for limestone as flux.

Production of marble was almost exactly the same as for the previous year. Sandstone increased somewhat and the granite output fell off to about the same extent.

Paving blocks were produced to about the same number as in 1910 and brought a slightly higher price.

Production of pottery-clays fell off materially, although the opening of 1912 has seen considerable activity in the establishing of new industries along these lines and the present year will probably show a large increase over the annual output of recent years.

Figures on production of petroleum and the metals are in preparation and will be published as soon as completed.

W. H. STORMS,
State Mineralogist.

TYPHOID LURKS IN WELLS.

United States Geological Survey Issues Reprint of Report on "Underground Waters for Farm Use."

The rural sections, long considered ideal so far as concerns the health of their inhabitants, have been dealt a blow by physician investigators who maintain that two-thirds of the cases of typhoid fever in the city owe their origin to insanitary conditions in the country and to polluted water supplies.

Farms, which are generally remote from towns, cities, or other areas of congested population, would seem to be almost ideally situated for obtaining pure and wholesome water, but in reality polluted water is exceedingly common on them and typhoid-fever rates are usually greater in country districts than in cities. Typhoid fever is now almost universally believed to be transmitted solely through drink or food taken into the stomach, and is especially liable to be communicated by polluted waters obtained from shallow wells near spots where the discharges of typhoid patients have been thrown upon the ground and subsequently carried down through the soil and to the wells, and it is doubtless principally this fact that accounts for the disease being so common in farming regions.

On a great many farms the well is located at a point that may be convenient to the dwelling, without any regard for the possibility of the pollution of the well water through seepage from barn or cesspool or through the circulation of water underground. Information relating to the underground movement of water is particularly valuable, and on this account the United States Geological Survey is distributing a report on the subject—Water-Supply Paper 255—"Underground Waters for Farm Use," by Myron L. Fuller. The demand for this publication has necessitated a third reprint. A copy of the report may be obtained by addressing the Director of the Survey at Washington, D. C.

CONSTRUCTIO.. WORK ON S. P. PROGRESSING.

SACRAMENTO, Aug. 3.—Construction work is in progress at many points along the Southern Pacific line between Sacramento and the Nevada State line. New projects, the development of old and the fact that the Southern Pacific is continuing its double tracking operations has kept many hundreds of men and teams at work on the main line of the railroad "over the hill."

Percy West of the Union Pacific reports from Truckee that the work of double tracking between Truckee and Reno, a distance of thirty-five miles, is being laid rapidly. A deep cut is being made near Floriston and with this finished it will be possible to finish the work soon. The line is now double tracked seven miles out of Reno and three miles east of Truckee.

Near Towles, the Southern Pacific is building a siding to carry machinery and other material for the construction of the Pacific Gas & Electric power plant near Smart. The siding is to be two or three miles in length and hundreds of tons of machinery will be moved over it.

Snow sheds through the section of the Sierras, where the fall is heavy are being repaired and placed in condition for Winter. The railroad officials are not expecting the gentle fall of snow that was experienced last season.

Auburn has been given quite an impetus because of the completion of the railroad to Cool, El Dorado County, across the river. One and two train loads of material for the cement plant at Cement, Solano County, is being taken from the quarry through Auburn daily.

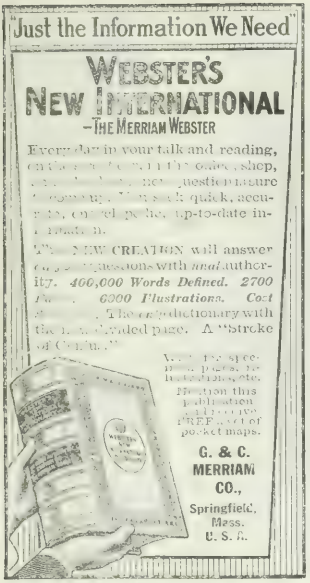
MAY MOVE CEMENT PLANT.

AUBURN (Placer Co.), August 2.—Representatives of the Pacific Portland Cement Company have been in this vicinity making investigations in the matter of clay deposits. Thus far only a limited amount of suitable clay has been found, but it is believed that the company will find the necessary quantity in a short time.

The Pacific Portland Cement Company owns large deposits of lime near this city and at present operates quarries on the El Dorado County side of the American River, three miles from Auburn. The lime is shipped to this city over the company's own railroad and from here transferred to the Southern Pacific and taken to Cement, near Suisun, where it is made into cement. It is freely stated by officers of the company that if the necessary clay can be found in the vicinity of Auburn, the plant at Suisun will be moved to Auburn or an entirely new plant be erected here. This would mean an addition of 1000 laboring men to Auburn.

At present the company is employing 250 men at the quarries near here and in Auburn. The company this week completed additional sidetracks at the loading house at the quarries, which would indicate that it is the intention of increasing the output of the quarries.

The amount of lime owned by the company is almost inexhaustible. The lime deposits extend from the American River to Butcher Ranch and on to Forest Hill.



OAKLAND STATION TO OPEN THURSDAY.

The Southern Pacific Company will [illegible] its new Suburban Station at the foot of Broadway, Oakland, on next Thursday. The original station at the depot was burned last summer and it is a California product throughout. According to the company, every piece of material in the building is native of the State. With the exception of the [illegible] tracks the structure is completed. These approaches will be [illegible] to avoid grade crossings and the [illegible] will be used. The depot will then use the covered platform, starting from the [illegible] side on both to the mole.

The new station is of steel and [illegible] construction, the exterior being [illegible] with granite [illegible] and terra cotta [illegible]. The building proper is [illegible] feet wide, [illegible] feet long, 60 feet in length.

$40,000 BONDS FOR COURTHOUSE.

[illegible], August 3. [illegible] $40,000 bond [illegible] for [illegible] Court House on petition [illegible]. The issue of $40,000 [illegible] and added to the cash [illegible] [illegible]. The [illegible] [illegible] will give a $75,000 County House, exclusive [illegible] [illegible].

There [illegible] opposition to [illegible] Court House [illegible] [illegible] [illegible] building [illegible] [illegible] [illegible]

Contractors' and Dealers' Association.

Official List of Members of San Francisco Local No. 2 of The Contractors' and Dealers' Association of California. Office 185 Stevenson St. Telephone Sutter 995. Meets every Monday at 1:30 P. M. at the Builders Exchange.

Discriminating Conduit Users Specify

CENTRAL RED

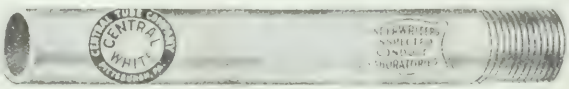
It Stands Out as the Best of Rigid Conduits

In the manufacture of this especially prepared conduit, we have taken advantage of every refinement known to the profession and have utilized the experience of producers of this class of material for the past twelve years, in evolving a coating for pipe that is an ABSOLUTE PREVENTATIVE of deterioration in the pipe under the most trying conditions.

The utmost care has been taken to thoroughly clean and to remove all scale and silicates before giving the pipe a coating of zinc by our own special process. This exterior coating is absolutely continuous, free from pin holes and other objectionable features. The coating of zinc prevents rust and insures against any deterioration in the pipe. Over the zinc exterior, two layers of our own especially prepared red enamel are coated, great care being observed to allow only a very thin layer to adhere to the threads, thus avoiding the necessity of recleaning them and to maintain perfect electrical contact. The red enameled interior provides a smooth, slippery raceway, facilitating fishing.

The salt air of sea coast cities, so injurious to all other classes of conduit, has no appreciable effect upon "CENTRAL RED," and we heartily recommend its use in these localities and wherever conditions are the most severe. It is especially adapted for use in CINDER CONCRETE.

"Try It Where Others Have Failed"



"CENTRAL WHITE"

is as good, if not better than competing brands of electro-galvanized conduit. Adequate protection from deterioration is insured by a heavy zinc coating. Couplings are removed during the electro-galvanizing, so that there may be no unprotected spots on the pipe.

"CENTRAL BLACK"

is especially recommended for its softness and easy working qualities. Our patented cleaning process gives us a product free from roughness.

APPROVED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS

Editorial Comment.

Building totals for the month of July show a general increase throughout the country. Reports from fifty different cities throughout the country made to the American Contractor, Chicago, show an increase over the same month of the previous year of 9 per cent. Similarly comparisons of the same cities for the first seven months of the year with the first seven months of 1911 leave about the same relative gain. Generally speaking the great cities of the country have shown a loss. New York, Chicago and Philadelphia going back a small per cent, which has in the main been made up by the smaller municipalities. Of these all the cities of the Pacific Coast states show a gain except Oakland. Particulars are to be found in the following table.

City.	July, 1912. Cost.	July, 1911. Cost.
Atlanta	$ 1,039,551	$ 554,368
Baltimore	781,909	434,865
Birmingham	422,538	291,543
Buffalo	1,318,000	1,626,000
Cedar Rapids	315,450	175,000
Chicago	10,265,800	11,200,000
Cincinnati	971,214	709,300
Cleveland	1,828,201	2,388,441

San Antonio	215,670	295,000
San Francisco	2,452,725	1,134,479
Scranton	124,527	75,000
Shreveport	149,569	78,738
South Bend	243,798	54,380
Spokane	226,125	153,500
Toledo	637,980	254,385
Wilkes-Barre	212,603	173,902
Worcester	652,192	389,417
Total	$86,255,681	$60,627,178

Omaha, July, 1911, one permit for office building, $1,000,000.

About the same ratio holds for the first seven months of the year, the total for the same cities amounting to $424,885,046 in 1912 as against $387,-565,561 in 1911. Altogether building conditions throughout the country are normal, the increase registering a natural growth and generally natural conditions.

Messina, which was destroyed by an earthquake in December, 1908, has just now begun to be rebuilt. The few survivors of the city with the aid of international philanthropy were able to erect temporary wooden structures. Only during the past year has there been a systematic attempt to remove the debris from the streets. It is said that plans for the rebuilding of the city are now under way and these plans include a raise in the level and an extension of the harbor front. Three years after the fire and earthquake here made a remarkable difference. But the differnece in the rebuilding is the differnce between Sicily and California, between Messina and San Francisco and the western world.

The city of San Francisco is being attacked and defended in mimic warfare by the soldiery of the country. From the south the national guard will make attack, impersonating a foreign foe, and the city will be defended by regular troops from the Presidio.

This is shadow fighting, to be sure, but the drill in maneuvers is the same as in actual warfare. And this military drill is no mere recreation as it used to be. Formerly the annual encampment of the militia was a mere outing. The ranks were often recruited by men who did not know the first movement of the manual of arms. The drilling was more or less of a farce.

The advanced science of war has changed all this. The complexity of modern weapons require a much greater training for the handling. And, instead of the detached drilling of State commands independently, there is now mobilization of militia and regulars, operating under the direction of experienced officers. The war game above all others is one that needs drill and practice and the mimic warfare that is being now acted is a proper kind of drill.

Mixtures of Portland Cement used as a Road Building Material.

By Logan Waller Page.

Director, Office of Public Roads. . . (A paper read before the Association of American Portland Cement Manufacturers.)

For some years, the best practice in city street construction has called for Portland cement concrete foundations. Used for this purpose, concrete has proved more satisfactory than any other material, and no improvement could reasonably be expected.

During the past ten years, probably more experiments with road materials have been made than in any other period in the world's history. The new traffic conditions brought about by the automobile have almost completely upset our standards for rural and suburban roads. During this time, much experimenting has been done with the object of making concrete available as a road material. Up to the last four or five years, however, I think it can be safely said that concrete as a road surfacing material was in most cases, not proved altogether satisfactory.

While this is true in general, yet there are isolated instances where concrete has been used for road construction with such a degree of success, that complete success seems to be almost insured. This fact alone, it seems to me, justifies an assumption that concrete can be made generally successful as a road material, provided sufficient care is used in the selection of materials, their mixing, laying and curing, all of which necessitate skilled supervision.

Probably no form of construction requires greater homogeneity than that of a road surface, as no other structure is subjected to more severe continual and plastical wear, and a successful road must wear uniformly and smoothly.

From the best information obtainable, it appears that great variation has existed in the construction of Portland cement concrete pavements up to the present time. Pavements have been laid in many cases in two courses, and in a considerable number of places, in but one course. A great variety of proportions have been used for the foundation course and for the wearing surface where two courses have been used; and almost as many variations in the proportions where a single course has been laid.

General Rules.—In the absence of definite information as to the behavior of these different mixtures, laid in one or two courses, it is yet too early to attempt to predict what will ultimately be found to be the best and most economical method of constructing these pavements. Portland cement concrete has been so successfully used in so many all forms of construction that it seems reasonable to expect that we cannot go far wrong in using concrete for a pavement if we adopt the best standard practice in use to-day for other types of construction.

(1) We would select only Portland cements which will conform in every respect to the standard specifications for that material adopted by the American Society for Testing Materials and all cement should be tested before it is used.

(2) Sand should be clean, sharp, coarse and well graded, and may contain not to exceed 5 per cent of loam or clay, provided organic matter is not present.

(3) The coarse aggregate should be composed of clean, hard sound rock of gravel of a good quality, or of hard dense, crushed blast-furnace slag. The coarse aggregate should be broken, or screened so as to be retained on a ¼-in. mesh. Clean water, free from strong acids and alkalis of course, should be used in making concrete.

A sufficient amount of cement should be used to a little more than fill the voids in the sand, and a sufficient amount of mortar should be used to a little more than fill the voids in the coarse aggregate. The mixing, of course, can be done either by hand or by machine.

No definite rule can be laid down for proportioning materials, but as a general proposition, probably a 1:2:4 or a 1:2½:5 mix will, in most cases, give satisfactory results.

It is evident that a great deal by careful experimentation is soon to rest upon the results of which will largely depend the economical construction of future concrete pavements.

Laying Concrete. Assuming that our foundation is as carefully prepared and as thoroughly drained and consolidated as would be necessary for the best kind of pavement, the concrete material is carefully placed, spread and compacted by tamping to a uniform thickness of 6 in. or more, the thickness depending upon the character of the foundation and the character of the traffic to which the pavement is subjected.

I believe one reason why many concrete pavements have failed is the fact is because the concrete has been improperly cured before traffic has been allowed upon it. We know that concrete cured under water attains a greater ultimate strength than that cured in air. For this reason I would recommend a fairly wet mix, and, for a period of from one to two weeks after the concrete has been laid, that the surface be kept thoroughly moistened by sprinkling. If provision can be made for keeping the sun from coming directly on the surface, this would prove very beneficial. This protection can be accomplished by covering the surface of the concrete with loam or other soil of which the shoulders of the roadbed are composed. These such protection will add to the expense of the pavement, but I believe the additional cost will be more than offset by the increased strength of the concrete. In the case of city pavements this protection might be accomplished by covering the surface with straw, sawdust or shavings.

It seems to me best further opportunity for the concrete to gain strength would be provided at slight expense if after the curing just mentioned has been completed and the loam or soil has been removed, and the surface allowed to dry, a thin coat of bituminous material be immediately applied. This method of construction was used at Ithaca, N. Y., by the Office of Public Roads, in 1909, and I am told, at Ann Arbor, Mich., for the past three seasons. It seems to me that it would materially lessen the shocks from traffic, and if only one bituminous coat were applied and allowed to wear off, it would be worth the additional cost as a protection to the new concrete.

Experiments indicate that concrete, upon drying, exhibits shrinkage, and at the end of six months, the shrinkage amounts to fully dry concrete to about 1 in. per foot. This is as much contraction as would be caused by a change in temperature of over 100 degrees F., showing that the effect of temperature in causing the cracking of concrete is certainly as great as, if not in excess of, that due to a change in temperature. If means could be provided for preventing the drying-out of the moisture, much of this shrinkage would be prevented. The consequence would be a more solid mass of concrete.

The bituminous top just described would prevent the rapid drying out of the concrete mass, and therefore prevent the formation of many of the cracks that would otherwise occur. Even if cracks did occur, the bituminous covering would be immediately over and close these cracks by traffic, and the cushioning effect of the bituminous top would prevent chipping and scaling of the concrete at these cracks.

Joints. Undoubtedly provision must be made for expansion and contraction. We are unable to state exactly what the allowance should be. The best practice up to the present time seems to call for a expansion joint ¾ to ½ in. in one side of the pavement at the curbing, in the case of streets, and a transverse expansion joint about every 50 feet. Experience may show us, however, that less transverse joints can be laid further apart.

My observation of concrete pavements so far laid has indicated that a recessed joint of a half-inch filled with tarvia paving pitch makes a satisfactory joint, and prevents chipping at the edges of the concrete.

On account of the dense surface, a crown of ¼ in. to the foot is probably sufficient for concrete pavements. Such a flat crown is very desirable on any pavement, on account of its tendency, to distribute the traffic over the entire width of the pavement. By the use of different kinds almost any kind of surface finish can be obtained. For ordinary traffic, of course, too smooth a surface is not desirable, on account of its tendency toward slipperiness.

Maintenance. One feature of the use of Portland cement concrete pavement that looks particularly interesting is the probable low cost of maintenance. I have reports from the City Engineer of Portland, Me., of 17 sections of concrete pavement built by

concrete roads over any macadam construction. It lacks action as an aid to sustain normal pressure.

Traffic to be Sustained.—Up to the present time, we have not been concerned greatly over the presence of heavy loads upon our roads. There is now, however, evidence that we cannot place an upper limit on the loads which are to be expected to travel almost any newly built road. The practice of delivering coal, for example, in large quantities by motor trucks is rapidly increasing. In the vicinity of cities it seems reason to believe that the practice may wholly supplant the delivery of coal by wagon in small lots. We must frankly admit that whatever method of transportation over roads proves the most economical will be adopted. It does not seem likely that in the long run restrictions upon the weight of loads will increase, and therefore it is evident that future road surfaces must be constructed with an ample factor of safety, in view of probable increase of traffic, both numerically and in unit tonnage.

From the comparisons made above between Portland cement concrete and plain macadam or bituminous macadam, it is evident that we may be practically assured that the Portland cement concrete road is far better able to meet the changing traffic conditions than either of the other surfaces. From our knowledge of the strength of Portland cement concrete, we can design a pavement of such material that will satisfactorily meet the requirements of practically any traffic.

In conclusion, I desire to state that I believe concrete roads can be built that will successfully meet all modern traffic conditions, if sufficient care is exercised in their construction. It may be too early to express an opinion on the maintenance costs of such roads; nevertheless, with proper supervision, I venture the prediction that they can be brought to a lower figure in this respect, under equal traffic conditions, than macadam roads.

Banquet To Halloway

Friends Do Honor to Popular Business Man.

About fifty staunch and loyal friends of Chas. J. Halloway, Jr., assembled at one of San Francisco's popular restaurants last Friday night to pay their respects to him and to wish him success in his new field of endeavor.

Mr. Halloway is now in Los Angeles to assume charge of the Los Angeles office of the Roebling construction Company.

W. S. Scott acted as toastmaster and kept the ball rolling so merrily that it was way past the midnight hour before the merry throng knew of dispersing.

Among those who told stories and expressed their high esteem of the guest of honor were Mr. Tidwell, who came to Mr. Halloway's aid in the case of the Avalon Pier; Mr. Lee, of Los Angeles; Mr. Edgerly, also of Los Angeles; O. B. Drumheller, of the San Pedro Lumber Co.; D. Ross Clark and a wonderful song of "Bonnie Lassie". J. Stack of Smith & Johnson, W. J. Gilmore, Richard Lamon, Joe Kaiser, Fred Hueber, M. Sherman, J. J. Feilbach, Charles O'Kane, J. Radford, cashier of the Roebling Construction Co., Mr. Roebling, Mr. Spencer, of the Parrott Co., Architect Henry C. Smith, J. D. Hamm, R. McLelland, Joe Odgers, O. E. Drumheller, Percy R. Stuart, Mr. Walters and L. A. Larsen. The Knickerbocker Quartet also sang several selections.

It is seldom that any business man can draw to himself his competitors, but that is just what Mr. Halloway has done. His competitors love and respect him as highly as his clients and employers do.

Merrit will always win recognition, and the affair of last night was a fitting tribute to the industry and ability of the guest of honor.

The Roebling Construction Co. is to be congratulated for having such an able representative.

A FEATURE ISSUE.

The next issue of the Building and Industrial News, which will appear on August 29th, will contain four special plates devoted to the new Oakland Auditorium, and the development of a Civic Center. These plates will show aerial outlines of the proposed Civic Center site, elevations and floor plans of the new Municipal Auditorium, a full number thousand dollar structure designed by Architect J. J. Donovan and elevations of the proposed Public Library and Art Museum.

The Washington Star has set out to rid the District of Columbia of the fly pest and this is the second year of the crusade. This year the city of Washington has been completely organized, and daily in the year the streets and yards were cleaned and garbage stored in tight cans and places where the insects could not breed and feed. When the fly began to come in May the swatting began and the school children were enlisted in an army that conducted a ceaseless slaughter in the ranks of the invading insects. Now it is said that in many places of the city the pest are practically extinct.

A count has been kept of the number of flies killed and the results are astounding. One boy is credited with killing 2,22000 flies with others nearly a like amount. The total score for the week was 1,676,100.

Perhaps nothing in the world is more feared and cursed as the common house fly. Born in the refuse and child of animal life it starts its career among disease germs. During its short period of existence in the part of the world it [illegible] and when it [illegible] bacteria is blown into [illegible] and [illegible] [illegible] [illegible]

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment house, 3 story and base frame, stucco. Architect noted. Owner, J. Sockler, O. Fernell and Steiner Sts., S. F. The building will cover an area of 34x120 feet and has been designed to contain 11 apartments which will be divided in suite of 3 and 4 rooms each. Each apartment will have private bath and wash beds. The interior work will be of pine throughout. There will be steam heat. The exterior will be covered with brick veneer and metal lath and plaster. Plans are complete and the work will be done by Day Labor.

San Francisco.—Apartment house, 3 story and base, frame, stucco. Architect, none. Owner, A. M. Gow, 614 Sacramento St., S. F. The house will occupy a site 29x120 feet. There will be 8 apartments of 3 and 4 rooms each with bath. There will be steam heat and wall beds. The interior will be furnished in pine and redwood. The exterior of the building will be covered with staple. Plans are complete and the work will be done by Day Labor.

San Francisco.—Apartment house, 3 story and base, frame, stucco. Architects, C. M. and A. F. Rousseau, Shedmick Bldg., S. F. Owner's name withheld. The building will be erected on Polk St. near Jackson, and will contain 12 apartments of 3 and 4 rooms each. All apartments will be equipped with wall beds and a private bath. There will be steam heat. The interior will be finished in pine and redwood. There will be marble wainscott and composition flooring. The exterior of the building will be covered with metal lath and plaster. Plans are complete and figures are being taken.

Oakland, Cal.—Apartment house, 3 story and base, frame, $12,000. Architect, George H. Cuig, 101 E. 10th St., Oakland, Cal. Owner A. J. Crow. The building will contain a number of small apartments, all of which will have wall beds and connecting baths. The interior trim will be of pine and redwood. There will be steam heat and a vacuum cleaning system. The exterior of the building will be covered with cement on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Apartments and flats, 1 story and base, frame, stucco. Architects, Hunt & Dover, Lee Building, Oakland. Owner, Mrs. Mary Kinder. The building has been designed for two stores and two small apartments in the rear. The interior trim will be of pine throughout. There will be modern plumbing and electrical work. The exterior of the building will be covered with brick veneer and cement plaster. Plans are complete and work will be done by Day Labor.

Los Angeles, Cal.—Apartment house, 1 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, A. W. Ross. The building is now planned to contain about 50 room which are to be arranged in suite of from two to four rooms each. There will be connecting baths, wall beds, steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with paving brick, trimmed with terra cotta. Plans are in the hands of the owner and he will receive figures on all parts of the work.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, F. M. Tyler, Hibernian Bldg., L. A. Owner, A. W. Ross. This building will be similar in all points of design to another apartment house structure described in these columns for the same owner. There will be 66 rooms in this building which will also be arranged in suites of two and three rooms each. There will be connecting baths, wall beds, elevator service and steam heat. The exterior of the building will be faced with grazed pressed brick trimmed with artificial stone. Plans are complete and the owner will receive figures for the work.

Santa Barbara, Santa Barbara Co., Cal.—Apartment house, 3 story and base. Frame, $65,000. Architect, A. B. Benton, 111 N. Spring St., L. A. Owners, West Coast Apartment House Co. The building will contain 120 rooms which are to be divided into 50 apartments all of which will have connecting baths and wall beds. The building will have a frontage of 221 feet with a wing at each end extending back 105 feet. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the first story will be faced with a little red of brick veneer and the second story with shingles. Plans are complete and bonds are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, C. P. Rittenhouse, Wilcox Bldg., L. A. Owners, H. Starke Benedict and G. H. Narbonne. The building has been designed to contain 62 room which will be arranged in suites of two and three rooms each. There will be wall beds, steam heat, trunk lift and a vacuum cleaning system. The interior trim will be of pine and stained Oregonite. Tiles will be used in the bath rooms. The exterior of the building will be faced with pressed brick. Plans are complete and segregated contracts will be let.

Los Angeles, Cal.—Apartment house, 12 story and base. Class A construction. $50,000. Architect, Fred R. Dorn, Douglas Bldg., L. A. Owner, Robert M. [illegible]. The preliminary plans only [illegible] prepared for this building and it will be some time before details of the construction can be given. The site of the structure is 93x115, and located at the southwest corner of 6th street and Benton Way. The present sketches show nearly 200 rooms which are to be arranged in suites of two, three and more rooms. There will be a steel frame and reinforced concrete walls and floors. SCHOOLS.

San Francisco—School, 2 story and base, Concrete and frame, $60,000. Architect, Architects' Department, Temporary City Hall. Owners City and County of San Francisco. The building will be erected on Vermont Street between 18th and 19th streets and has been designed for a primary school. There will be eight class rooms. The construction will be of the slow burning type. The exterior will be covered with cement plaster on metal lath. All stairways will be of concrete. Plans are also complete and bids are being taken for furnishing blacksmith shop equipment for the Polytechnic High School and manual apparatus at the Lowell High School. Bids for these three jobs will be opened on August 11th.

Centerville, Alameda Co., Cal.—School, 1 story and base, reinforced concrete, $15,000. Architect, John J. Donovan, Mechanics Bldg., S. F. Owners Centerville School District. Plans on the building are now completed and bids taken. Bids were opened on August 1 and a complete list of the bids will appear in the next issue of the Building and Industrial News.

Oakland, Cal.—Schools, 2 buildings, concrete and steel, $100,000 and $75,000. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Supervising Architect J. J. Donovan is preparing plans for both the Fremont High School and the 13th Avenue School. Original plans for both of these buildings were to have been prepared by Architect Louis Stone, but some changes have been made, and this work is now being done by the Supervising Architect. The 13th Avenue School will be two story and basement, reinforced concrete building containing 20 class rooms, only 8 of which will be completed at this time. The cost is $75,000. The work provided for in the Fremont School calls for an expenditure of $100,000.

Haywards, Alameda Co., Cal.—School, 2 story and base, reinforced concrete, $? ?. Architect Henry C. Smith, Humboldt Bank Bldg., S. F. Owners Hayward School District. Plans are complete for this work, which has been fully described here before. Bids will be opened on August 21th. Plans and specifications may be obtained from the architect or from the clerk of the board of education.

Austin School District, Santa Clara Co., Cal.—One room school frame construction, $5000. Architect, F. D. Wolfe, Smoot Bldg., San Jose. Owners, Austin School District. The building has been designed for an open air school. The exterior will be covered with cement parget and rustic. Plans are complete and bids will be opened in about two weeks. Plans can be secured from the architect.

Santa Barbara, Santa Barbara Co., Cal.—School, 2 story and base, reinforced concrete. Cost no. stated. Architect State Dept. of Engineering, Sacramento, Cal., State of California. No bids were received to the effect that the bids for the construction of the main Library Building of the State Normal School at Santa Barbara have been rejected. The lowest figure received was so far in excess of the appropriation that an adjustment was necessary on both sides. Plans will be revised.

The interior of the first floor and mezzanine will be handsomely finished in hardwoods, tile and marble. The upper floors will contain the storage space and repair shop. There will be elevator service and steam heat. The exterior of the building will be faced with artificial stone. Plans are complete, and as soon as the approval of the eastern owners is secured bids will be put out for figures.

Garage—1 story and base, brick, $5,000. San Francisco. Architect, none. Owner, E. Purdon, 1737 Mason St. This building has been designed for a concrete garage and repair shop. The building will cover a large area. There will be a cement floor. The exterior will be faced with stock brick. Plans are in the hands of the owner, and he is now taking figures on the work.

Light and Fog Station and Repairs to Keeper's Quarters—$120,000. Eighteenth Light House District, Cal. Architect, Architectural Dept U. S. Light House Service, Washington, D. C. Owner, U. S. Government. Provision has been made in the Omnibus Bill appropriating $100,000 for the establishment of a light and fog station on or near the North Farallon Island and $30,000 for repairs and additions to the keeper's quarters at Point Pinos Light Station, and for changing this light from a fixed signal to a flashing light.

Hotel—6 story and base, brick and steel, $100,000. San Francisco. Architects, Miller & Colmesnil, Lick Bldg., S. F. owner, Mrs. Anna E. Faxon. The building will be erected at the corner of the old Mission streets and will have nearly an equal frontage on each of these streets. The first floor will contain several stores besides the main hotel lobby and office. The upper floors will be divided into 110 guest rooms, a large percentage of which will have connecting baths. There will be steam heat, elevator service, a vacuum cleaning system and other modern conveniences. There will be a steel frame and exterior walls of brick faced with pressed brick. Plans are complete and figures are being taken.

Hotel Addition—2 story, frame. Cost not stated. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, John E. Hill. The work will consist of the construction of two additional stories to the present one story building. The first floor will contain stores. There will be about 18 rooms to the floor in the newer portion. The exterior of the building will be covered with shiplap. Plans are complete and the work will be done by Day Labor.

Hotel—3 story and base, brick, $20,000. San Francisco. Architect, none. Owner, F. H. Masow, Monadnock Bldg., S. F. The building will be erected south of Market street, and will contain in the neighborhood of 50 room. The foundations will be of old brick Exterior walls will be of brick faced with White Medusa cement plaster. The interior trim will be of pine throughout. There will be gas steam radiators. There will be several toilets and baths on each floor. Plans are complete and the owner will do the work by Day Labor.

Hotel—3 story and base, brick $20,000 Architects, C. M. and A. F. Rousseau, Monadnock Bldg., S. F. Owners, Rousseau Realty Co. This building has been designed for a rooming house and will cover an area of 2587 feet. The interior will be subdivided into about 35 rooms and a number of baths. The interior will be finished in pine and redwood with marble wainscoting in the entry vestibule. The exterior of the building will be faced with pressed brick. There will be steam heat and hot and cold running water in all rooms. Plans are complete and figures are being taken.

Power Station—2 story reinforced concrete and steel, $100,000. San Francisco. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Union Iron Works. Plans for this building, which has been mentioned here before, are complete and awaiting the approval of the President of the Union Iron Works, who will not return before August 22. The building is the first step in an elaborate plan for improvement at the company's works in this city. The complete plant is to be electrized. Bids will be called for the later part of this month.

Stores and Lofts—3 story and base, brick and steel, $45,000 San Francisco. Architect, Washington J. Miller, 45 Kearny St., S. F. Owners, Crellin Estate. This entire building has been leased for a long term of years to the Peter's Cartridge Co. The structure will be 50x105 feet, and has two street frontages. The first floor will be used for offices and shipping rooms, while the second and third floors will contain storage space. There will be elevator service. The exterior will be faced with pressed brick. Plans are complete and figures are being taken

School—2 story and base, concrete and frame, $60,000. San Francisco. Architect, Architectural Dept., Temporary City Hall. Owners, City and County of San Francisco. This building will be erected on Vermont street, between 18th and 19th streets, and has been designed for a primary school. There will be eight class rooms. The construction will be of the slow burning type. The exterior will be covered with cement plaster on metal lath. All stairways will be of concrete. Plans are now complete and bids are being taken for furnishing blacksmith shop equipment for the Polytechnic High School and for an aquarium at the Lowell High School. Bids for these items will be opened on August 14th.

Contracts Awarded.

Hotel—7 story and base, reinforced concrete and steel, $70,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, Jean Mac Contractor, H. S. Williams, Hearst Bldg. S. F. Contract price, $50,000.

TO BUILDERS AND CONTRACTORS.

A First Class General or Carpenter Foreman, Architectural Draftsman and Estimator, with planing mill experience listing and detailing, is open for position with progressive firm of Contractors who require the services of an all around man with technical training, who placed in possession of plans for any class of construction will suffice to interpret and direct to completion without further comments. Expert in reinforced concrete construction including design, floor, loads, etc. Offers invited. Supervision of speculative building not entertained. Address E. G., 568 Golden Gate Ave., Apartment 21, S. F. Phone Franklin 7619.

OAKLAND AND ALAMEDA COUNTY.

Residence—2 story and [illegible] frame, $3,500. Oakland, Cal. Architect, none. Owner, J. P. Whalen, 1417 Broadway, Oakland. The house has been designed for a 6 room dwelling with bath and hooding porch. The interior will be finished in pine throughout. Some oak floors will be used. Tiles will be open fire places and tile or brick mantels. The exterior will be covered with redwood siding and the work will be done by Day Labor.

Bungalow—1 [illegible] and [illegible] frame, $1,500. Oakland, Cal. Architect, none. owner, J. T. Hall, [illegible] Broadway, Oakland. The house will contain 5 rooms, bath. The interior will be finished throughout, oak floors will be used in one room. Tiles will be open fire places and tile or brick mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and basement, frame, $4,000. Oakland, Cal. Architect, none. Owner, R. C. Jenson, 704 25th St., Oakland, Cal. The dwelling will contain 7 rooms, bath and sleeping porch. All interior trim is to be of pine or redwood. Oak floors will be used in the main rooms. There will be open fire places and brick mantels. The exterior of the dwelling will be covered with rustic. Plans are complete and bids are being taken.

Residence—2 story and basement, frame, $3,000. Oakland, Cal. Architect, none. Owner, W. A. Kenwell, 1110 Broadway, Oakland. The house has been designed for a six room dwelling with bath and sleeping porch. There will be open fire places, open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. Plans are complete and bids are being taken.

Residence—2 story and basement, frame, $3,000. Oakland, Cal. Architect, none. Owner, W. A. Kenwell, 1110 Broadway, Oakland. The house has been designed for a six room dwelling with bath and sleeping porch. There will be open fire places, open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. Plans are complete and bids are being taken.

Residence—2 story and basement, frame, $3,000. Oakland, Cal. Architect, none. Owner, W. A. Kenwell, 1110 Broadway, Oakland. The house has been designed for a six room dwelling with bath and sleeping porch. There will be open fire places, open fire places and tile or brick mantels. The exterior of the house will be covered with rustic. Plans are complete and bids are being taken.

Residence—2 story and basement, frame, $8,000. Oakland, Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owners, C. L. Lewis. This house will contain eight rooms, baths, sleeping porch and laundry. The interior trim will be of pine, redwood and oak. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick and tile. Composition flooring will be used in the bath rooms. Tile will be used in the kitchen and baths. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and now out for figures.

Residence—2 story and basement, frame, $5,000. Oakland, Cal. Architect, none. Owner, M. C. Bolles, 2330 San Jose Ave., Oakland. The house has been designed to contain six rooms, bath and sleeping porch. The interior finish will be of pine and redwood with some oak floors. There will be open fire places and brick mantels. Tile will be used in the bath and kitchen. The exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

Residence—2 story and basement, frame, $2,500. Berkeley, Alameda Co., Cal. Architect, none. A. W. Bouner, 2808 Piedmont Ave., Oakland. There will be seven rooms, bath and laundry in this dwelling. The interior finish will be largely of pine with some elm panels. Oak will be used for the floors of the principal rooms. There will be coal grates and tile or brick mantels. The exterior of the house will be covered with metal lath and cement plaster. Plans are in the hands of the owner and the work will be done by Day Labor.

Residence—2 story and basement, frame, $3,500. Oakland, Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner's name withheld. The house will contain seven rooms, bath, sleeping porch and laundry. The interior of the rooms will be finished in pine, redwood and oak. The floors of the principal rooms will be of oak. There will be furnace heat and open fire places. Tile and composition floors will be used in the bath. All mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the architect is taking fig-

ures on the work.

Residence—2 story and base, frame, $4,500. Berkeley, Alameda Co., Cal. Architect, A. Merrill Bowser, 1007 Bacon Bldg., Oakland. Owner, W. J. Mortimer. The dwelling has been designed for an eight-room house with attic sleeping porches and a laundry. The interior will be finished in pine and redwood. Floors in the principal rooms will be of oak. The bath room will be covered in tile and will have a composition floor. There will be furnace and steel open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residences—15, 2 story and base, frame, $4,000 each. Piedmont, Alameda Co., Cal. Architects, Hutchinson Bros., 470 13th St., Oakland. Owner, George H. Haly, Union Savings Bank Bldg., Oakland. These dwellings have been designed to contain seven rooms, bath and sleeping porch. The interior finish will consist of pine, redwood and some hardwoods. Floor throughout will be of oak except in the bath rooms which will have linoleum floors. There will be 3 large fire and open fire places. The mantels will be of brick and tile. Tile will be used in the kitchens. The exteriors of the houses will vary, some being covered with cement plaster on metal lath and others with brick veneer, shingles or shiplap. Plans are now completed and the work will be done by Day Labor.

Bungalow—1½ story and base, frame, $2,400. Oakland, Cal. Architect, same. Owner, E. W. Larmer, 631 Fremont St., Oakland. The bungalow will contain six rooms and bath. The interior finish will be of pine and redwood with oak floors in the principal rooms. There will be coal grates. The mantels will be of brick. The exterior of the house will be covered with rustic and shingles. Plans are complete and the work will be done by Day Labor.

Residences—3, 2 story and base, frame, $4,000 each. Berkeley, Alameda Co., Cal. Architects, Hutchinson Bros., 470 13th St., Oakland. Owner George H. Haly, Union Bank of Savings Bldg., Oakland. Each of these houses has been designed for seven rooms with bath and sleeping porch. The interiors will be finished in pine, redwood and gum. Oak floors will be used throughout. There will be furnace heat and open fire places. The mantels will be of tile and brick. All bath rooms will have composition floors. The exteriors of the dwellings will be covered with metal lath and plaster. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $2,500. Oakland, Cal. Architect, none. Owner, C. H. Kinney, 5788 Vicente Ave., Oakland. The house has been designed to contain seven rooms and bath. All interior finish will be of selected Oregon pine. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the bath and kitchen. The exterior of the house will be covered with rustic. Plans are in the hands of the owner and the work will be done by Day Labor.

Apartment House—2 story and base, frame, $12,000. Oakland, Cal. Architect, George H. Chris, 104 E-10th St., Oakland. Owners, J. J. Crow. The building will contain a number of small apartments, all of which will have wall beds and connecting baths. The interior trim will be of pine and redwood. There will be steam heat and a vacuum cleaning system. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Apartments and Store—1 story and base, frame, $5,000. Oakland, Cal. Architects, Haar & Davis, 1520 Broadway, Oakland. Owner, Mrs. Mary Krushe. This building has been designed for two stores and two small apartments in the rear. The interior trim will be of pine throughout. There will be modern plumbing and electric work. The exterior of the building will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

Bank—3 story and base, brick and steel, $30,000. Oakland, Cal. Architect, A. T. Ehrenpfort, Russ Bldg., S. F. Owner's name withheld. Plans are complete and figures have been taken for the construction of this building. The first floor will contain banking offices and will be finished in hardwoods, marble and tile. The two upper floors will be arranged for offices and rooms. The exterior will be faced with tapestry brick. A contract will be awarded within a few days.

Garage and Club Rooms—2 story and base, brick, $10,000. Oakland, Cal. Architect, Clay N. Burrell, Central Bank Bldg., Oakland. Owner's name withheld. This building will be erected on Broadway and will cover an area of 150x200 feet. The first floor has been arranged for a commercial garage and sales rooms. The interior of these rooms will be handsomely finished. The second floor will contain large light club rooms fitted up for special purposes. The interior will be finished in pine and hardwoods. The exterior of the building will be faced with cement plaster. Plans are now being prepared for this work.

Auditorium—2 story and base. Class A construction, $500,000. Oakland, Cal. Architect, J. J. Donovan, Supervising Architect, associated with Hornbostel of New York. Owners, City of Oakland. Supervising Architect J. J. Donovan of Oakland has submitted a report to the City Council relative to the construction of the Oakland Auditorium building, in which he states that plans for the foundation work and steel will be ready for figures by August 15th, and that his office will be in a position to let a general contract not later than September 1st. In connection with the auditorium an effort has been made to develop a Civic Center, provision being made for a future public Library and a future Art Meseum. The site of the building is on the shores of Lake Merit, and the plan for the proposed Civic Center involves a treatment of the south side of Twelfth street as well. The auditorium building itself will cover a site 150x200 feet. The height at the center portion of the building will be 75 feet. The general scheme is one large building which contains an arena with overall dimensions of 265x180 feet. This room will have a seating capacity of 10,000 people, while to the west of the arena is a stage which connects with another large room 100x100 feet, and which will have a seating capacity of 3,000 people. These two large rooms may be connected with a resulting seating capacity of 13,000 people exclusive of standing room. The facade fronting on the lake is the most important, and this elevation has been developed so as to be the most interesting, and forming a dignified scheme for the rectangular structure at the rear. This facade is constructed of granite 420 feet in length and 55 feet in height, pierced with seven arches, 30 feet in diameter and which form the frame for the niches. Each of these niches have three windows which provide an abundance of light for the corridors, and will be constructed of artificial stone. On account of the straight forwardness of the design of both the interior and exterior the estimated cost of the building is well within the appropriation which calls for an expenditure of $500,000.

School—1 story and base, reinforced concrete, $15,000. Centerville, Alameda Co., Cal. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, Centerville School District. Plans for this building have been completed and figures taken. Bids were opened on August 12th and a complete list of the bids will appear in the next issue of the Building and Industrial News.

Schools—2 buildings, reinforced concrete and steel, $100,000 and $75,000. Oakland, Cal. Architect, Supervising Architect J. J. Donovan, Oakland. Owners, City of Oakland. Supervising Architect J. J. Donovan is preparing plans for both the Fremont High School and for the 13th Avenue School. Original plans for both of these buildings were to have been prepared by Architect Louis Stone, but some changes have been made, and this work is now being done by the Supervising Architect. The 13th Avenue School will be two-story and basement, reinforced concrete building containing 18 class rooms, only 8 of which will be completed at this time. The cost is $75,000. The work provided for at the Fremont School calls for an expenditure of $100,000.

School—2 story and base, reinforced concrete, $75,000, Haywards, Alameda Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Haywards School District. Plans are complete for this work, which has been fully described here before. Bids will be opened on August 24th. Plans and specifications may be obtained from the architect or from the Clerk of the Board of Education.

Building Contracts Awarded.

LOS ANGELES AND SOUTHERN CALIFORNIA.

Apartment House—1 story and basement, brick. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, A. W. Ross. The building has been designed to contain about 50 rooms which are to be arranged in suites of from two to four rooms each. There will be connecting baths, wall beds, steam heat, elevator service, vacuum cleaning system. The exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are in the hands of the owner, and are well nearly complete on all parts of the work.

Apartment House—3 story and basement, frame. $65,000. Santa Barbara, Santa Barbara Co., Cal. Architect, A. B. Benton, 334 N. Spring St., L. A. Owners, West Coast Apartment House Co. The building will contain 120 rooms which are to be divided into 40 apartments, all of which will have connecting doors and wall beds. The building will have a frontage of 231 feet with a wing at each end extending back 108 feet. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the first story will be faced with a blue pressed brick veneer and the second story with shingles. Plans are complete and bids are being taken.

Hotel—6 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architect, Fred H. Dorn, Douglas Bldg., L. A. Owner, William I. Kno... The building will contain 100 guest rooms and 15 private bath rooms in addition to the general bath rooms on each floor. There will be a large lobby with tile floor and Scagliola columns and wainscot in the first story, and an amusement hall and billiard rooms in the basement. The construction will be of reinforced concrete, plastered exterior, composition roof, galvanized iron and wire glass skylights, plate glass front windows, fire escapes, metal frame and sash. The interior trim will be of pine, stained mahogany. There will be hollow tile partitions, freight and passenger elevators, steam heat, vacuum cleaning system, tile floors in bath rooms. Plans are now being prepared.

Apartment House—3 story and basement, brick. Cost not stated. Los Angeles, Cal. Architect, C. C. Rittenhouse, Wilcox Bldg., L. A. Owners, H. Stanley Forquer and G. H. Nersonne. The building has been designed to contain

Wesco
Cold Water Paint

The most economical paint on the market. When you buy it you pay only for **paint** and not for high priced oils. Can be used on exterior and interior surfaces. Does not turn yellow with age. **Wears well,** looks well.

Wesco Concrete Paint

The **best** paint to use on damp places. It sticks where others fall off. Very durable and does not decompose or decay. We just sold a carload of it to the California Drug Co. of Los Angeles. The largest shipment of concrete paint ever made.

Both Paints Come In All Colors. Send For Samples.

PORTLAND AND OREGON.

Apartment House—3 story and brick. Cost not stated. Portland, Ore. Architect, Goodrich & Goodrich, Portland. Owners, ——— withheld. The building will cover an area of 82x66 feet and will contain 18 apartments of two, three and four rooms and bath each. Tiled floors, disappearing beds, built-in china closets, elevator service and other modern conveniences. The exterior of the building will be faced with pressed brick. Plans are complete and bids are being taken by the owners.

Apartment House—3 story and base. brick. Cost not stated. Portland, Ore. Architect, C. A. Dyke, Portland. Owners, Hildebrand and Lamson. This building will cover a site 100 feet square, and is to be located on an important corner. Present plans provide for 51 apartments of two, three and four rooms. All suites will be equipped with gas, coal and private baths. The interior of the house will be handsomely finished in pine and hardwoods, with composition floors in the bath rooms. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and the architects are taking bids on the work.

Hotel—4 story and base, brick and concrete. $50,000. Tillamook, Ore. Architect, Newton C. Gould, Portland. Owners, Tillamook Hotel Co. While all plans and specifications for this building have been completed it is impossible to give a detail description of the work before being taken by the architect, as changes will be made of which I know not.

Library—1 story and [illegible] brick. $25,000. Oregon City, Ore. Architect, L. L. Mackenzie, Portland. Owners, [illegible] The building will contain [illegible] reading room, book room, librarian's office and cottage and the council room. The site for which will be located in Canemah. There will be [illegible] warm air system of heating. The exterior of the building will be faced with pressed brick. Plans will be ready for bids on August 20th and bids will close September 1st.

Contracts Awarded.

Bank and Offices—[illegible] reinforced concrete, $50,000. Alaska, Ore. Architect, W. P. Benz, Portland. Owners, First National Bank of Astoria. Contract has been let to [illegible] Co., Portland. Contract price not given.

Hearst, we may [illegible] can [illegible] ford, [illegible] for half page [illegible] that Woodrow Wilson could [illegible] to the front of the Democratic party at Baltimore and [illegible] the best candidate of them all. The real [illegible] Hearst is for one and one alone, Hearst is for Hearst, and he can [illegible] entitled to speak and [illegible] when he says he cannot [illegible] to kick Hearst and Murphy out of the convention [illegible] and build a platform [illegible] The platform was adopted and the candidate nominated in spite of them, all that Hearst can do is throw mud at the nominee and it will go in the Democratic party as the Republicans go, and those who are progressive and sincere and who believe the Hearst and Wilson [illegible] indicate.

The [illegible] Golden Gate Avenue and Franklin street had [illegible] conclusively demonstrated by the use of the high pressure salt water fire protection system. A pressure of 200 pounds per square inch was developed which is sufficient to knock the building to pieces. When the system is completed it will be the most effective in the world. Tests together with the regulations of the building laws and the employment of modern construction will in the future should make San Francisco one of the most fireproof cities in the country. Fire risks should therefore be comparatively low and insurance rates accordingly less.

Mahoney Bros., the general contractors on the Geary street railroad, state that the road will be finished by the sixth of next month. This will enable them to claim the maximum bonus, and with [illegible] in the [illegible] the [illegible] for the completion of the [illegible] at the earliest possible date. The [illegible] good work and [illegible] in the [illegible] Hetch Hetchy water supply and the Home telephone are going after in a similar manner, the city can well be proud of its achievements.

THE COAL RESOURCES OF WYOMING.

The United States Geological Survey estimates the quantity of coal in the ground in Wyoming as exceeding that of any other State in the Union, with the possible exception of North Dakota. This great quantity is due in the first place, to the large number of coal-bearing formations in the State, second, to the great number, and thickness of the coal beds, and third, to the size of the coal fields, about 50 per cent of the area of the State being underlain by coal-bearing formations.

The largest coal field of the State is that of Powder River, which lies in the basin or trough between the Black Hills and the Bighorn Mountains and extends from North Platte River to the Montana line. This field is the southern extension of the great Ford Union coal region of Montana and North Dakota, and embraces in Wyoming an area of about 15,000 square miles.

Of this area at least 11,000 square miles are underlain by coal beds known to be more than 3 feet thick, and the remainder not in places contain beds thick enough to work.

Wyoming is the second largest coal-producing State in the Rocky Mountain region, Colorado ranking first; and if production in Wyoming continues to increase within the next few years as it has done in the past it will soon rival Colorado for the first place. The coal mined in Wyoming is bituminous and lignitic varieties. More than half of the product comes from the Kemmerer district, in Uinta County, and from the Rock Springs field, in Sweetwater County.

The United States Geological Survey's estimates give Wyoming credit for a larger original coal supply than any other State except North Dakota, which is estimated to have contained originally 1,900,000,000 short tons of coal. The coal in North Dakota is, however, all lignite, but while the coal in Wyoming is partly bituminous or semibituminous, Wyoming's supply is estimated to have been 171,958,000,000 short tons, compared with which the aggregate production to the close of 1910 (37,234,864 short tons) appears insignificant. The total exhaustion of the beds up to the close of 1910 amounted to 146,000,000 short tons, or thirty-four thousandths of 1 per cent of the total estimated supply.

TIN DEPOSITS IN ALASKA.

The United States uses between 40 and 50 per cent of the world's production of tin, yet American manufacturers are almost wholly dependent upon foreign mines for their supply of raw material. Alaska may make up a very small part of this deficiency, according to a report on the "Tin Resources of Alaska" by Frank L. Hess, recently published as Bulletin 520-B by the United States Geological Survey.

Tin was first discovered in Alaska on Buhner Creek, Seward Peninsula, in 1900. The next year, stream tin was found on Buck Creek, which is separated from Buhner Creek, by a low divide. In 1903 tin oxide was found on Cassiterite Creek, a triboutary of Lost River, 20 miles from Buck Creek and about 100 miles northwest of Nome. Later discoveries of stream tin were made at several other places

in the Territory.

Of the tin placers none have shown much importance except those of Buck Creek. In the gravel of the creek bed the content of steam tin carrying about 65 per cent metallic tin has been found to be as high as 100 pounds per cubic yard in rich spots, though the average is under 30 pounds. Figures furnished by Geological Survey, the gold in the gravels has been estimated at 40 cents per cubic yard, at $60 per ton of stream tin, and at other amounts. Nuggets of gold valued at $20 or more have been found. When compared with the Australian and Malayan gravels, where the "black tin" content is in many places from 1½ to 5 pounds per cubic yard, the gravels of Buck Creek appear very rich, but the climate makes the conditions hard for placer working. The season is short, little or nothing can be done before June 15, and the freeze-up is apt to come by September 15. There are many storms, with cold, heavy rains, but, on the other hand, the country is very healthful. A dredge working in this district last year from September 10 to October 15 saved 92 tons of stream tin averaging 66 per cent tin, or an equivalent of 101 tons carrying 60 per cent tin, and sold for $52,000.

A copy of the report may be obtained free on application to the Director of the Geological Survey, Washington, D. C.

SEWER BOND ISSUE.

COLFAX (Placer Co.), July 2.—The sewer bond issue carried Tuesday on a vote of 115 to 48, a surprising small vote. The issue is for $15,000, and the bonds will be prepared and floated at once, as it is desired to have three miles of the system constructed this Fall.

A septic purification plant is to be installed, and a near-by rancher has signified his intention of submitting an offer for the institution of a sewage farm.

PARCELS POST AND COST OF LIVING.

This measure would do more to solve the cost-of-living question than any other. Our whole transport system makes no provision for the small shipment. We have provision for wholesale, not for retail transportation. Yet the things the farm produces are finally sold in small retail lots and the things it buys are mainly bought in retail lots. How many consumers buy 100 pounds of butter or ten cases of eggs in a lot? The consumer wants three pounds of butter and one dozen eggs at a time. We have transportation facilities and rates adjusted to the purpose of moving the 100-pound or 100-ton shipment, but not the three-pound one. Now note the result of that system.

Our trouble is that neither the producer nor the consumer deals in wholesale lots. In order to utilize the wholesale transportation facilities there must be middlemen in the country to assemble these small lots, and distribute the incoming bulks into small packages for the consumer. What we need is a provision to assimilate together the steam railroad conduit, the delivery system of the Postoffice conduits in the city, the rural delivery and collection system it operates in the country, and make a single operation, a single accounting system, a single directing intelligence, run the whole thing.

See what that costs. A farmer doesn't save the crates of eggs. If he saved up till he could fill a crate he'd spoil his whole trade. That is the way it would work in Farm and Fireside.

EL DORADO COURT HOUSE COMPLETED.

PLACERVILLE (El Dorado Co.), Aug. 7.—The stone work on the new court house here is practically finished, only remaining the roof to be put on. The wood work, all but the seats, are completed Saturday and the painting left off.

The building is now in the hands of the plasterers, and the steel partitions are being put in.

SAN FRANCISCO ARCHITECTURAL CLUB.

126 Post Street.

On Friday evening, August 9, 1912, there will be a lecture on the Architecture of Italy by Mr. Edward T. Foulkes, which will be illustrated with stereopticon.

This subject should be a very interesting one to all, particularly to the Atelier members.

All members are invited to be present.

ROUNDHOUSE AND WATER REFINERY.

PHOENIX (Ariz.), Aug. 7.—Definite announcement was made today by officials of the Southern Pacific Railroad that work would begin immediately on the $200,000 roundhouse and shops for the company to be located here.

In order to avoid the alkaline properties in the water, which are so destructive to engine boilers, the company will erect a water refining plant six miles north of Phoenix and pipe the refined product to the shops.

LAND COMPANY ORGANIZED.

OROVILLE (Butte Co.), Aug. 7.—Articles of incorporation have been filed for the California Land Properties Company. It is capitalized at $500,000 and the life of the company is fifty years.

The Directors of the company are Charles L. Brown of Oakland, George L. Walker of Alameda, Lewis A. Hilborn of Oakland, H. Moody and H. W. Hartman of San Francisco. The first three are members of the Brown-Walker-Hilborn syndicate here which owns a large tract of land near Wyandotte.

CONCRETE BRIDGES TO REPLACE WOODEN ONES.

FAIRFIELD (Solano Co.), Aug. 7.—The Board of Supervisors yesterday decided to build three new concrete bridges on the county roads to replace the same number of wooden structures which have become useless by reason of wear.

The wooden bridges and culverts on the roads in this county are gradually giving way to the concrete structures, several of the latter having been built during the last two years.

OPEN BIDS FOR NATIVE SONS' HALL

NAPA (Napa Co.), Aug. 6.—Bids for the construction of the Native Sons of the Golden West hall were opened here Saturday night. The lowest bid for the steel work was $7,761 by the Ralston Iron Company, while the Marshall Doty Company of Yolo County had the lowest bid for the rest of the work, the offer being $25,500.

The matter has been taken under advisement.

METAL PRODUCTION IN NEVADA.

Mine Production of Gold, Silver, Copper, Lead and Zinc in 1911 was Valued at $33,952,529.

The value of the metal content of gold, silver, copper, lead and zinc in Nevada in 1911, according to W. C. Hopkins, of the United States Geological Survey, was $33,952,529, against $34,142,148 in 1910, a decrease of $189,619, or less than 1 per cent.

Decrease in Gold Production.

The production of gold in 1911 was valued at $8,102,295, a decrease of $685,195. There were increases in gold in several districts, notably Manhattan, but large decreases in National and Goldfield. Of the gold output in 1911 the output came from placer mines in the Reese River, Manhattan and Manhattan districts; in Nye County, $47,124.81 came from placer mines, 21,841.27 ounces from copper ores, 29.66 ounces from lead ores, and small amounts from zinc ores and from lead-zinc ores. Silver ores yielded over 96 per cent of the silver production. From placer mining 2,243,811.00 ver mills was recovered [illegible] ounces, concentrates produced $1,097.61 fine ounces, and crude ore millions. In smelters contained 20,000 fine ounces. The leading county in gold was Esmeralda, which produced $11,198,60[illegible] metals from the Goldfield district. Nye county produced $[illegible] 276, of which the Tonopah mines yielded $2,366,195. The Comstock mines of Storey County produced $[illegible] gold, against $[illegible] in 1910. More than half the total value of the state's output of precious metals is in gold.

Silver Output Breaks Record.

The production of silver in Nevada in 1911 was more than [illegible] per cent greater than in any previous year, being [illegible] fine ounces, valued at $6,98[illegible] ounces more than the previous record, which was produced in 1910. About 97 per cent of the silver came from ores. Nye County produced 10,918,263 ounces of silver, of which the output [illegible] Tonopah district. Lincoln County produced 10,868,286 ounces, or 87[illegible] per cent of the entire silver production of the state. Storey County (Comstock) produced 618,006 ounces.

Copper Shows an Increase.

Copper production increased in Nevada from 64,350,398 pounds, valued at $8,177,613 in 1910, to 67,[illegible] pounds, valued at $8,[illegible] in 1911. The increase was produced principally by the [illegible] at Ely in the Robinson district. Ash Pan County, which yielded [illegible] pounds, or 20.19 per cent of the entire State production.

Lead Output Decreased.

The production of lead in Nevada in 1911 was 3,263,657 pounds, valued at $145,865, against 4,871,130 pounds, valued at $214,320, in 1910, a decrease of about 33 per cent. Lead decreased in all counties but Clark and Lincoln. The mines of Clark County, the largest producer, yielded 1,629,571 pounds, an increase of 339,887 pounds over the production of 1910.

Crude ore shipped to smelters contained all but 67,480 pounds of the total lead output of Nevada in 1911.

Increase in Zinc.

The zinc production of Nevada was [illegible],045,027 pounds, valued at $[illegible] in 1911, against 2,707,071 pounds, valued at $[illegible], in 1910. This was almost [illegible] the ratio between a lead-zinc [illegible] the same ore. Concentrates [illegible] 2[illegible] pounds and crude ore [illegible] pounds.

There were 661 mines producing [illegible] copper, lead, or zinc in Nevada in 1911, compared with 608 in 1910. Of these 7[illegible] were placer mines. The total weight of ore sold or treated in Nevada in 1911 was 1,132,721 tons, an increase of 175,946 tons.

CONTRACTS FOR GRAPES CLOSED.

VISALIA (Tulare Co.), Aug. 10.—The grape grape market opened in earnest this week, several big contracts being [illegible] each, covering between the [illegible] the growers. From all [illegible] the market is from $11 to $15 [illegible] Thompsons and $8 to $10 [illegible] Muscats delivered.

The largest contracts reported are [illegible] the Standard and the McCampbell [illegible] sold to Rocking Bros. & H. A. W. [illegible] buying extensively [illegible] Growers have options on [illegible] Thompsons and Muscats [illegible] are to be shipped [illegible] No price has been [illegible] the grapes.

[illegible] from $90 to $'00 per acre [illegible] Thompsons on the vine [illegible] tons for none of [illegible] were noted at this figure [illegible] have received offers of $18 a [illegible] Thompson seedless

FAVOR BRIDGE BONDS.

[illegible] (Nev.), Aug. 5.—The [illegible] Board of Trade held a [illegible] Friday night for the ex[illegible] purpose of electing [illegible] the matter of [illegible] proposition of bond[illegible] to be issued [illegible] to the people of [illegible] for the construction of [illegible] to be constructed [illegible] across the Sacra[illegible] at Reno, at a point [illegible] Reno, and [illegible] Kennett.

[illegible] taken in an effort [illegible] the State Highway across [illegible] at Lincoln instead of at Antioch [illegible] opened by the [illegible] Highway Commission.

[illegible] has been at Reno [illegible] up the east side for a [illegible] to avoid the only differ[illegible] that Kennett is anxious to [illegible] crossing place, instead of having [illegible] and cross at Antioch. The [illegible] at the latter place would [illegible] the State Highway. [illegible] were present favoring [illegible] as the cross[illegible] and also to call a meeting [illegible] at Tracy in Stanislaus [illegible] at which meeting plans to [illegible] session before the [illegible] will be taken up. It is planned [illegible] to submit the [illegible] bonding bonds for some[illegible] in the neighborhood of $150,000 [illegible] two States.

PACIFIC HIGHWAYS ASSOCIATION CONCLUDES ITS SESSIONS.

The Pacific Highways Association [illegible] session last Wednesday, [illegible] Yuma over as the meeting [illegible] next year and elected its [illegible] The new officers are as follows:

President, Judge J. T. Ronald, Seattle.

Secretary, Frank M. Eretwell.

Senior Vice-President for Alaska, Falcon Joslyn of Fairbanks, Alaska.

Senior Vice-President for British Columbia, A. E. Todd, of Victoria and F. R. McD. Russell, of Vancouver.

Vice-President for Canadian Yukon, Alfred Thompson, Dawson.

Senior Vice-President for California, A. G. Briggs, San Francisco, F. W. Jackson, San Diego.

Senior Vice-President for Oregon, Frank E. Riley.

Senior Vice-President for Washington, Samuel Hill of Maryville.

A celebration and luncheon was held in San Mateo at which the visitors were guests. The event marked the first actual work to be done in California's new $18,000,000 highway through the State. The delegates will leave for Los Angeles tomorrow in their automobiles on a pleasure trip.

SANTA MARIA COMPANY GETS BOND PERMIT.

The Railroad Commission has rendered a decision granting the application of the Santa Maria Gas and Power Company for permission to issue bonds in the sum of $20,000 and to extend its service to the city of Arroyo Grande. The proceeds of the bonds will be used in the purchase of pipes and mains for the extension from Santa Maria to Arroyo Grande, for additional machinery and to refund floating obligations of $10,000. The Commission, commending the ability of the officers in stating facts in its application, decided that "applicants will find that a full and frank disclosure of their affairs will not only expedite the Commission's decisions but will also materially aid the Commission in rendering decisions which shall be wise and just for all concerned."

IRRIGATION COMPANY STARTS BUILDING.

MAXWELL (Colusa Co.), Aug. 2.—The Sacramento Valley Irrigation Company has commenced actual construction work on the tract which it has platted here. It has plans made for an [illegible] modern hotel, office building and ten cottages.

Considerable building material is now being unloaded at the railroad and a force of carpenters and [illegible] at work preparing the foundations for the buildings. It is stated that the hotel, when it is built, will cost $[illegible] and will be the best building of its kind [illegible].

The Delevan tract, which has yet to be put on the market, the last new [illegible] was opened up for sale last week. The presumption is that the company will reserve portions of the Willows tract for the new town to be laid out as soon as the buildings are ready for occupancy, and that the sale of the Delevan unit will be made from this point, instead of Willows as heretofore. Thirty acres of citrus trees have been planted on the south, adjoining the town.

CONTRACT LET FOR AUBURN BANK.

AUBURN (Placer Co.), Aug. 9.—The Directors of the Placer County Bank at a meeting held here yesterday afternoon, let the contract for the erection of the home for the bank to George Heidal, of this city. The amount of his bid was $16,664.

There were seven other [illegible] The

Discriminating Conduit Users Specify

CENTRAL RED

It Stands Out as the Best of Rigid Conduits

In the manufacture of this especially prepared conduit, we have taken advantage of every refinement known to the profession and have utilized the experience of producers of this class of material for the past twelve years, in evolving a coating for pipe that is an ABSOLUTE PREVENTATIVE of deterioration in the pipe under the most trying conditions.

The utmost care has been taken to thoroughly clean and to remove all scale and silicates before giving the pipe a coating of zinc by our own special process. This exterior coating is absolutely continuous, free from pin holes and other objectionable features. The coating of zinc prevents rust and insures against any deterioration in the pipe. Over the zinc exterior, two layers of our own especially prepared red enamel are coated, great care being observed to allow only a very thin layer to adhere to the threads, thus avoiding the necessity of recleaning them and to maintain perfect electrical contact. The red enameled interior provides a smooth, slippery raceway, facilitating fishing.

The salt air of sea coast cities, so injurious to all other classes of conduit, has no appreciable effect upon "CENTRAL RED," and we heartily recommend its use in these localities and wherever conditions are the most severe. It is especially adapted for use in CINDER CONCRETE.

"Try It Where Others Have Failed"

"CENTRAL WHITE"

is as good, if not better than competing brands of electro-galvanized conduit. Adequate protection from deterioration is insured by a heavy zinc coating. Couplings are removed during the electro-galvanizing, so that there may be no unprotected spots on the pipe.

"CENTRAL BLACK"

is especially recommended for its softness and easy working qualities. Our patented cleaning process gives us a product free from roughness.

APPROVED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS

Editorial Comment.

The Contractors' and Dealers' Association is perfecting its local organization. It is already in operation at Sacramento and has done a good work there. Its objects and aims are for the uplift of the business generally, and if thoroughly organized it will do more to secure fairer conditions than anything else could do.

A cardinal principle of the organization "insists that all members of the affiliated associations must fulfill all contracts and conform to all plans and specifications signed by them." This is to insist on honest work, and, as a necessary corollary payment of bills and honest debts. These are the essential features of all good business and it is the only sound basis upon which any business can be honestly conducted or can long endure.

Just as when the present lien law was passed there was a great hue and cry among money lenders that it was a law being railroaded through to hold up the owner for the benefit of the builder, so now it is asserted in some places that the specialty contractors and dealers are combining to raise prices and hold up the public. In the case of the lien law the pubuic has been proved to have benefitted by the measure. So in this organization, if it effects its object both the public and the builders will have benefitted greatly by its work.

It is an axiom of business that honest men have to pay the price for those who fail to pay their debts. Any man in business must sell his goods at enough profit to offset any losses he may sustain through bad debts. Otherwise he would not remain long in business. If he is guaranteed that all his accounts are good, he can figure on a smaller margin of profit, his business is more secure, and this increased confidence gives a buoyancy and life to the whole scheme. So it is with the contractor. If he knows that everybody must live up to his contract and that he will get a square deal he can figure at a smaller profit and will do better work, for in conditions as they now exist in some lines, about the only fellow that makes any money is the fellow that skins the job and puts in inferior material.

When a premium is placed on trickery and dishonest work, the inevitable result is to demoralize and degrade the business. The general contractor who lies like a Cretan and peddles his bic from Peter to Paul profits at the expense of his honest competitor and the man to whom he sublets his work. The subcontractor who slights his work and fails to perform his contract pulls his whole craft into the mire. And the dealer who sells inferior materials and substitutes shoddy stuff forces his competitors to do likewise and demoralizes the whole thing.

This organization if it effects its object will fulfil a long felt want. It will put business on an honest basis. It will insure honest work. It will insure payments of honest debts. It will put the peddler of bids into the ash can where he naturally belongs ,and put a premium upon honesty rather than trickery and charlatanism. The new lien law has simplified matters a great deal. This organization will uplift the business. In modern industrial life there is but one way to accomplish anything and that is by organization. This is organized along the right lines. There should be no question as to its success if the builders have any community of interest or expect to prosper in a legitimate way.

At the convention just closed at Chicago when Roosevelt and Johnson were nominated a big banner was unfurled bearing the inscription:

ROOSEVELT AND JOHNSON.
New York and California.
Hands across the continent.
For there is neither East nor West
Border, nor breed, nor birth,
When two strong men stand face to face,
Though they come from the ends of the earth.

Which puts the question exactly. They are men of similar type, of sighting ability, and positive character. Of the two men Johnson is the most eloquent speaker. Roosevelt is a publicist and unequaled advertiser. With these two men in the field there should be a political campaign that will be of surprising interest. Both have something to say and are not afraid to say it. Both have gained and kept the confidence of the great mass of the people. And it safe to say that when they speak they will be heard.

The sentiment against canal tolls for coastwise shipping seems to be so pronounced that even Great Britain is changing her attitude. So Senator Root, ex-Secretary of State and great patriot of the country, savior of the standpatters, and chief engineer of the steam roller is likely to be left advocating the course of a foreign power against his own country when even the foreign power has abandoned it. But the interests pay Root and he is nothing if not a faithful servitor.

The San Francisco Call is very liable to become afflicted with strangulated hernia of the intellect if it continues daily to overstrain itself with those Himalayan editorial efforts against Governor Johnson.

Chief Engineering Features and Industrial Significance of the Great Dam Across the Mississippi River at Keokuk, Iowa.

Of special interest to engineers and others who are interested in the industrialism of the Mississippi Valley, is the mammoth project now being carried into execution for developing from 200,000 to 300,000 horse-power at the Des Moines Rapids of the Mississippi river, by means of a dam from Keokuk, Iowa, to Hamilton, Ill.

The bed of the river as stated in the "Iowa Engineer," has a fall of 23 feet in the 12 miles between Montrose and Keokuk, forming what is known as the Des Moines Rapids. The foundation conditions for construction purposes are particularly favorable. The river bed is of solid limestone formation, practically smooth, and, with a stream flow at a mean depth of 7 feet, offers unusual opportunities for using the cofferdam method for laying dry the sections of the river bed.

The dam will raise the water level about 35 feet at the dam, drown the Keokuk Rapids, submerge a large area of flat land along the banks, and create a still-water pool extending up the river about 60 miles. About two-thirds of the submerged area is on the Iowa side, where it will be necessary to raise the tracks of the Chicago, Burlington & Quincy R. R. for a distance of about 9 miles. The normal working head on the turbines will be 32 feet, but the head may be made to vary from 21 feet at high water to 39 feet at low water.

The project of utilizing the power of the river fall at the Des Moines Rapids is an old one, and dates back to 1848. The earlier schemes provided for using only a part of the flow by means of wing dams. During the early '90's, the Keokuk & Hamilton Water Power Co. was organized to build a wing dam and power canal on the east side of the river. Congress granted the necessary authority in 1901, subject to the approval of the War Department. Circumstances then arose which resulted in the Company's being unable to finance any of its projects, and the matter remained almost at a standstill until a few years later, when Hugh L. Cooper, consulting engineer, of New York City, proposed to dam the entire river below the rapids, as had been suggested by other engineers who had investigated the project. For this purpose a new company was organized, which took over the rights of the original company. The actual raising of the necessary funds and the prosecuting of the enterprise have been due to the perseverance, energy, and engineering ability of Mr. Cooper. His plan received the approval of the War Department and of the Chief of Engineers of the U. S. Army. In 1905, Congress passed a bill giving authority to the company to proceed with the construction of the proposed works.

The development has now been undertaken by the Mississippi River Power Co. of Boston, Mass., of which Edwin S. Webster is president and Hugh L. Cooper vice president and chief engineer.

Allowing for a transmission distance of 220 miles, the plant will be at the center of population of more than 5 millions of people. The present low water construction will provide for an output of 120,000 horse-power, and a 99-year contract has already been made for supplying 60,000 horse-power to the street-railway and electric light and power companies of the city of St. Louis, Mo.

The main dam is of plain concrete and is 4,778 feet in length. The dam is being built first-class throughout, consisting of a series of 119 arches each 75 feet long on piers 6 feet thick, carrying a bridge 20 feet wide on the top. The structure will also be converted into a dam by closing each 75-foot opening to the spillway elevation by means of a weir, so built as to rest clear. At 4,778 feet there will be a total of 2,380 feet of pillway section. The elevation of the water level above the spillway crest will be regulated by leaf gates on the 75-foot opening up to the springing line of the arches. The gates will be so arranged that they will fold up and lie in a groove in the side of the pier, and will be operated from a traveler running on a track laid on the bridge. The 50-foot openings are of ample size to provide for any help from the river that may be needed in the form of steamers in the latter stages of navigation. Steamers will be locked through the dam at the Lock. The lock will be 56 feet wide by 360 feet apart in the clear, and will have on the upper end a lift of 38 feet, and on the lower end a lift of 19 feet. The lock will be provided with a guard gate at each end, and will be 29 feet deep over the sills. The tailwater will be [illegible] feet above the sills, and the headwater will be 59 feet above the sills. The lock will be 600 feet long between the gates.

The dam will be founded on solid limestone throughout. A cofferdam will be built across the river at the head of the lock, and another cofferdam will be built across the river at the foot of the lock. The upper part of the cofferdam will be built of timber cribs filled with stone, and the lower part will be built of earth and stone. The cofferdams will be built in sections, so that the water will be let through the dam as the work progresses. The cofferdam will be built from the shore to the pier at the end of the lock, and will be 100 feet wide at the top and 200 feet wide at the bottom. In order to get a depth of 7 feet below the top of solid rock, the rock will be removed at the work progresses from the shore to the pier at the end of the lock. The cofferdam

is responsible, more than anything else, for the extremely rapid progress which is being attained. The organization of this immense work is so complete and systematic that it is now several months ahead of schedule, and the cost is running under the original estimates, notwithstanding that the overhead charges at so large that speed is subservient to cost in many instances.

One of the unique incidents connected with this work has to do with civic affairs. The cities of Keokuk and Hamilton had appropriated and paid to the promoting corporation $2,500 and $1,500 respectively to use in its preliminary work. After the company was turned over to the Mississippi River Power Co., which paid this $4,000 as a part of the total expenses, these appropriations were returned to the city treasuries.

It is believed by students of municipal government that this incident is without parallel in this country. But it is perfectly illustrative of the spirit which has actuated everybody connected with this enterprise from the beginning to the present moment. Almost every one of the two million dollars worth of land submerged was bought from the many owners at an agreed price, without any being taken by condemnation proceedings.

The construction of this great power unit marks a new era in the industrial life of the Middle West. The plant is in the center of the Mississippi Valley now fundamentally an agricultural district) with its immense consumption of all kinds of manufacturing goods. The Mississippi gives an outlet to the Panama Canal and the Gulf seas for export trade. The river navigation controls freight rates and keeps them low for domestic shipments. The economic values resulting from the building of this water power should increase very appreciably the assets of the commonwealths adjacent to it.

As to what kinds of manufacturing can profitably be carried on within a reasonable power transmission distance, few problems are presented. Proximity of nearly all raw materials, cheap rates and adequate transportation, and the location in the center of the Mississippi Valley market, with a water route to the ocean, are essentials to most all forms of manufacturing.

Install Largest Electric Sign.

Fifteen Thousand Dollars Paid for Installation of Display on Roof of Lincoln Building.

Within the next three months San Francisco will have, with one exception the largest electric sign in the world. This huge advertising enterprise is to be handled by the Lincoln-Shaw Co., who have obtained space on the roof of the Lincoln Realty Building, at the southeast corner of Market and Fifth streets, and will expend over $15,000 in the construction of the sign.

The sign is what is known among operating advertising men as a spectacular electric display, and signs of this character have been designed by Hugh [illegible] and will be erected by the Electric Sign Co. [illegible] Pacific Coast Co. A steel frame structure will be erected to carry the sign, which is to be 150 feet in length and 30 feet in height. The many elaborate features incorporated in the mechanical part of the sign make a description difficult, but in a general way the working parts may be described by the designer as follows: There will be approximately sixty monograms, mounted on a steel frame and arranged in two rows, giving the most perfect view of the sign when looking from Powell street. Monograms are to be of the Brown patent type 3½ feet in height and 30 inches in width, each containing 27 Tungsten lamps of the treadle power type. These monograms will be operated by the Brown patent keyboard.

The keyboard is similar in its action to a typewriter keyboard and places the action of the monograms absolutely under the control of the operator. This feature of control will enable the operator to flash out any special news of the day, press reports, etc., which will aid in drawing and holding the attention of the public to the sign. The monogram part of the sign, in the spectacular sense, will be a small feature as compared with the spectacular electric display surrounding the monogram. This display will require 12,000 lamps and 20,000 electrical connections per minute on the mechanical flasher operating the lamps, and with the exception of the Chariot Race in New York, which contains 20,000 lamps, is the largest electric display in this country.

The spectacular display will consist of the following features: A two foot border to surround monogram in five colors. The wheels will revolve and change direction. The crosses in center of wheel will shrink and expand from the center and then revolve with the wheel. This border in itself will be a most magnificent spectacular arrangement, operating continuously. A fan at the top center portion of the sign will not be visible until the time comes for it to operate.

First the center blade of this fan will start from the bottom and travel upwards until the top is reached, when it will proceed to open out in full. When each extremity has been reached it will close again. Then the center blade will fall down and create a blaze of light at fuse of mortar, which in turn will be set off and start a star which will travel over the sign and fall into the urn at side of the sign. This causes an explosion in the urn. A sheet of flame will shoot upward from the urn, followed by revolving stars, which will gradually move upward for about 30 feet, and then fall, changing colors as they go. This feature representing the explosion of roman candles.

At this point the blade of the fan will go to the opposite side of the sign and the other mortar will go through the same operation as described above. After the second operation is completed the fan will open in full and wave as if being blown by a breeze. Both urns continuing to shoot out blazing stars. This display will remain for a few seconds, then go out leaving border and monogram illuminated.

The sign will be constructed by the Lincoln-Shaw Co. of this city and the patents of all advertising will be in charge of George K. Porter, general electrical engineer.

A Letter To General Contractors.

Secretary of Contractors' and Dealers' Association Sends Communication to Contracting Firms.

The Contractors' and Dealers' Association of California is perfecting its organization in San Francisco. Its object is to secure better conditions and better work among the specialty contractors and uplift the business generally. To clarify the situation and to set at rest any doubt that may be as to the aims and objects of the organization, the Secretary has sent out the following letter to the general contractors of the city:

Dear Sir:

Enclosed please find a list of the members of the association affiliated with the Contractors' and Dealers' Association of San Francisco. A cardinal principle of this Association, as set forth in the by-laws, is that the Association insists that all members of the affiliated associations must furnish all contracts and conform to all plans and specifications that are signed by them.

A perusal of the names on the enclosed list will show that nearly all of the responsible specialty contractors are members of this Association, and we are safe in guaranteeing that they will "make good" in all instances. If at any time a firm whose name appears on this list fails to fulfill its contract or conform to the plans and specifications as signed you will confer a favor upon this Association if you will notify us to that effect.

This Association is not organized to create discord but on the contrary is organized to promote harmony and to uplift the building business. We believe it is destined to be of great benefit to responsible general contractors of this city for the reason that every thing will be conducted on the square and every one will be bearing on the same level.

If every general contractor knows that his competitor is going to observe the same conditions that he does he can figure with some degree of safety.

The trouble is now that a few specialty contractors in the various lines are slighting their work ridiculously, whereas the conscientious general contractor, by doing business with these men, depend upon a 'snide' roof, poor plastering, lack of cement in mortar, inferior paint, etc., to secure an unfair advantage over their honest competitor which makes it necessary for the responsible general contractor to meet figures of these men who have no with the intention of doing good work.

Hoping you will co-operate with us in securing the best conditions and with every best wish we are

Very respectfully yours,
CONTRACTORS' AND DEALERS' ASSOCIATION,
W. S. SCOTT, Secretary.

SECOND DIVIDEND DECLARED.

The Board of Directors of the General Contractors' Association Declares a Second Dividend of Twenty-five Dollars on the Capital Stock of the Corporation.

At the meeting of the Board of Directors of the General Contractors' Association, held on the 12th instant a dividend of twenty-five dollars was declared on the capital stock of the corporation, payable September 1st, 1912.

The following periods for the declaration of dividends have been set for the first hundred and twenty days:

This [illegible] in the next [illegible]

WATERFRONT OWNERSHIP ENDORSED.

General Contractors' Association Approves Project for San Francisco to Own Its Own Water Front.

At the meeting of the Board of Directors of the General Contractors' Association, held on the 12th instant the following resolution was adopted:

RESOLVED by the General Contractors Association of San Francisco, California, that this organization does hereby promise its aid and assistance, and does hereby give its enforcement to any measure which may be introduced in the Legislature of the State of California at its session to be held in 1913, wherein is contemplated the granting of the tide lands and water front of San Francisco from the State to the San Francisco municipal government, similar in manner to the grant made by the Legislature at its session of 1911 to the cities of Los Angeles, Oakland, San Diego and Long Beach, and this body does furthermore strongly request and urge candidates for the Legislature from this county on same to pledge themselves, if elected, to vote for the passage of such measure, and we do hereby declare that it is our belief that any improvement or development in the shipping and marine interests of San Francisco will redound to the benefit and advantage of this county and its people, for the reason that whatever will promote and add to the extent of the commerce and foreign trade of any of the ports of the State will benefit the entire State."

GENERAL CONTRACTORS ASSOCIATION.
Signed by C. A. DAY, President.
Attested by WM. E. HAGUE, Secretary.

The Board feels that the time has arrived when the city of San Francisco should control and manage its own water front, for the reason that the growing commerce of the port and the approaching completion of the Panama Canal, by which the commerce will be still more rapidly increased, makes extensive improvements and developments necessary, which are provided for by the list of bonds voted by the State.

The fact that the water front of the city is owned by the State has made it a very difficult matter in the past to obtain the necessary money to make the desired improvements, as such moneys can only be obtained by an act of the Legislature of the State of California. Should the necessary bill be enacted at the next meeting of the Legislature, and this city is allowed to own its own water front, it will not mean any increase of taxes to our citizens, as the interest and sinking fund of all bonds for the improvement of the San Francisco water front are payable solely from the revenues of the same, and such revenues consist of the wharfage, and with the expansion of trade will further increase which will be brought about when the Panama Canal is completed, it is high time that this city was given a chance to make its water front second to none in the world.

It is to be borne in mind that the cities mentioned ceded to the cities of Los Angeles, San Diego, Long Beach and Oakland a control of the tide and their lands, but not a very difficult matter to have a similar transfer made to San Francisco.

Oakland's New Half Million Dollar Municipal Auditorium And The Development Of A Civic Center About The Shores Of Lake Merritt.

In the illustrated plates of this issue are contained a general plan, showing the contemplated development of a Civic Center for Oakland, perspective view of the proposed Auditorium, future Public Library, future Art Museum, floor plan drawings, sections and the north elevation of the Auditorium building as designed by John J. Donovan, Supervising Architect of the city of Oakland, associated with Henry Hornbostel, of the New York firm of Palmer & Hornbostel.

The present project has received the approval of the Oakland Council, and working drawings for the Auditorium building are now being prepared. It is earnestly hoped that the city can let a contract for the piling and foundation work by the latter part of the present month and a contract for the steel work shortly after. A general contract for the Auditorium will probably be let by the middle of September, calling for the completion of the building by September, 1913.

The following plates show the effort made to develop a Civic Center, and include the Auditorium with a suggested future Public Library and a future Art Museum, forming a square, with a large plaza leading up to the Auditorium, which fronts on Lake Merritt. Also a treatment of the south side of Twelfth street and the shores of the lake by means of an esplanade and steps leading to the water, with small pavilions at the ends of the steps which may be used for a Casino and Boat House purposes.

The play ground space back of the Auditorium covers an area of 500 by 1,200 feet, which gives ample room for a half-mile track, which in turn encloses a quarter-mile track and which provides sufficient space for a large Stadium. At the southeast corner of the playground space is shown the outline for a possible natatorium.

The Auditorium itself is 450 feet in length by 200 feet in width. The height at the center portion is 75 feet. The scheme is that of one large building which contains an arena of overall dimensions of 180 feet in width by 265 feet in length. The floor of the arena is 100 by 225 feet. This room will have a seating capacity of approximately 10,000 people, and to the west of the arena is the stage which connects with another large room styled the Lecture Hall, or smaller auditorium, which is 100x 100 feet, and which will have a seating capacity of 3,000 people. These two rooms may be connected with a resulting seating capacity of approximately 13,000 people, exclusive of standing room.

Separating the arena and the auditorium is the stage, which, as stated before, connects both, and which may be lowered to the level of the floors. Two asbestos curtains divide the arena from the auditorium and permit the use of the two rooms either jointly or as separate units.

Surrounding these rooms is an ample corridor, with large lobbies for both. The portion of the corridor towards the north has been developed as a hall for exhibits, well lighted ad containing booths or stalls for individual displays.

On the second floor, flanking the auditorium, are two large rooms with their staircases and lobbies and separate services, which may be used as lecture hall, art galleries, dance halls or banquet rooms.

The building has been well provided with an incline plane for the arena, thereby doing away with awkward stair cases. Executive offices, cloak rooms and toilets have been provided in view of the many uses of the building and a service entrance is shown at the rear of the building, leading to a large preparing room for scenery, dressing rooms etc.

Likewise a loft has been provided for, so that the auditorium will be available for constant use.

The skylight roof over the arena can be rolled back on the cantilever trusses so as to give a well ventilated and open air room for the arena.

As to the architecture of the building, the facade fronting on the Lake is the most important, and this elevation has been developed so as to be the most interesting and forming a dignified scheme for the rectangular structure on the back. This facade is constructed of a granite wall 420 feet in length by 55 feet in height, pierced with seven arches, 30 feet in diameter, and which form the frame for the niches; each of these niches have three windows which provide an abundance of light for the corridor, and will be constructed of artificial stone. The niches will contain monuments and fountains, emblematic of the industries of the State, such as forestry, horticulture, agriculture, fisheries, mining and transportation.

The illumination of these niches with concealed lights in the ring of the arch and lights behind the fountains will produce a festive appearance. The entire structure is to be crowned by an illuminating cresting, which will silhouette itself like a piece of luminous lace against the dark sky at night.

The interior of the building will be treated according to the character of the room. The arena will have concrete slopes, wooden floor, exposed ornamental roof trusses and panel walls. The auditorium, the two small rooms and corridor on the second floor will be treated in plaster, ornamented and decorated.

The conception has been to make the auditorium a most interesting building, unique in its plan, as well as in its elevation, so that it will prove an interesting monument for the visitor as well as for the residents of Oakland.

On account of the simple, straight-forwardness of the design of both the exterior and interior the estimated cost of the building is well within the appropriation which calls for an expenditure of $500,000.

615 Phelan Building, San Francisco

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

—APARTMENT HOUSES—

San Francisco—Apartment house, 6 story and base, brick and steel, $100,000. Architects, William Curlett and Son, Phelan Bldg., S. F. Owner, R. D. McElroy. This building will be erected on Sixth street near Howard and has been fully described in these columns before. Contracts for the excavating, piling and foundation work have been let. The concrete work is now being figured and a contract will be let within a day. Altogether parts of the work are to be segregated and plans will be figured at once. J. E. Scully, Phelan Bldg. is acting as superintendent but all contracts will be let through the architects' offices.

San Francisco—Apartment house, 3 story and base, frame, $20,000. Architect, Slyvain Schnaittacher, First National Bank Bldg., S. F. Owner's name withheld. The building will be erected at the corner of California and Gough streets and has been designed to contain 12 or 14 apartments of three rooms and bath each. There will be wall beds, steam heat and other conveniences. The interior will be finished in pine and oak. The exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

San Francisco—Apartment house, 3 story and base, frame, $10,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, Brizolara Estate. The building will occupy a corner site, covering an area of 28865 feet. Plans have been arranged for one six room apartment and 4 three room apartments. The large apartments may be divided into two smaller suites. The interior trim will be of pine and oak. There will be steam heat, wall beds and private baths. The exterior of the building will be covered with brick veneer to the second floor line and with cement plaster above that point. Plans are complete and a contract will be let this week.

Berkeley, Alameda Co., Cal.—Apartment house, 3 story and base, frame. Cost not stated. Architect, Joseph J. Rankin, 2705 Virginia St. Berkeley. Owner, Miss Bessie Gallagher. The house has been designed to contain five four room apartments all of which will have connecting baths and wall beds. The interior will be finished in pine and redwood with some oak floors. There will be coal grates. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Apartment house, 3 story and base, frame, $30,000. Architects, Robert Morgenier and Drow, 1644 Telegraph Ave., Oakland. Owner, C. A. Johnson. The building will contain 25 apartments which have been arranged in suites of two rooms and bath. There will be wall beds, steam heat and other modern conveniences. The interior trim will be of pine and redwood with some oak floors. The exterior of the building will be covered with pressed brick veneer trimmed with terra cotta. Plans are complete and have been placed in the hands of the owner who is now taking figures on the work.

Los Angeles, Cal.—Apartment house, 3 story and base, brick. Cost not stated. Architect, E. J. Borgmeyer, Stimpson Bldg., L. A. Owner, H. S. Baer. The building will cover an area of 70x165 feet and will contain 101 rooms arranged in suites of two and three rooms each. All apartments will have wall beds and private baths. There will be steam heat, elevator service and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Apartment house, 3 story and base, brick, $75,000. Architects, Garrett and Bixby, Currier Bldg., L. A. Owner, J. A. Anderson. The building will contain 50 rooms which have been arranged in suites of two and three rooms each. There will be wall beds, steam heat, connecting baths and a vacuum cleaning system. The exterior of the building will be faced with pressed brick. Plans are complete and bids are being taken by the architects.

Los Angeles, Cal.—Apartment house, 4 story and base, brick and steel, $50,000. Architects, Noonan & Kysor, Wright and Callender Bldg., L. A. Owner, W. A. Barker. The building will be erected on a corner and will cover a ground area of 60x115 feet. The interior has been arranged for suites of two and three rooms each, of which four will be twenty-four. All suites will have tile tub baths, wall beds and private entrances. The exterior will be finished in pine and hardwoods. There will be steam heat, elevator service and a vacuum cleaning plant. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

San Francisco—Apartment house, 4 story and base, brick and steel. Cost not stated. Architect W. H. Crim, 125 Kearny St., S. F. Owners, John Rosenfelds' Sons. Contractor, Braunton Bros., 102 Kearny St., S. F. general contract, Contract price not given. Medley and Collins, 102 Kearny St., brick and excavating.

Portland, Ore.—Apartment house, 4 story and base, brick and steel, $60,000. Architects, Doyle, Patterson & Pettis, Portland. Owner, Mr. Seeley. Contractors, Morgan, Fletcher & Boyer, Portland. Contract price, $55,000.

Los Angeles, Cal.—Apartment house, 3 story and three bays, $50,000. Architect, J. William Roberts, 2330 West 30th St., L. A. Owner, same. Contractor, E. H. McGibbon, Union Oil Bldg., L. A. Contract price, $46,500.

BANKS.

Madera, Madera Co., Cal.—Bank, 1 story and base, brick and steel, $25,000. Architects, Parker and Kenyon, 70 Kearny St., S. F. Owners, Bank of Madera. The design of this building shows a classic structure in the monumental type. The building will cover an area of 35x80 feet and is to be located exclusively to the use of the bank. There will be a large public room, general and private offices and safe deposit vaults. The interior will be finished in red-wood, marble and tile. The exterior of the building will be faced with pressed brick. Plans are complete and bids are being taken.

Contracts Awarded.

Whittier, Los Angeles Co., Cal.—Bank, 2 story and [illegible], $50,000. Architect, T. Beverley Keim, Jr., Title Insurance Bldg., L. A. Owners, Whittier Savings Bank. Contractors, Carl Leonardt, H. W. Helmes, Bldg., L. A. Contract price, $41,000. Note: The contract does not include [illegible] vaults, etc.

BRIDGES AND DAMS.

Seattle, Wash.—Bridges, reinforced concrete or steel [illegible]. City Engineering Dept., Seattle. Owners, City of Seattle. The [illegible] agreement between the City of Seattle and the War Department calls for the construction of six bridges across the Lake Washington Canal [illegible] time dredging is completed. This work will be completed on July 1, next year. The following bridges are to be constructed by the city: Fuhrman street and 3d avenue W., across the Canal; Aurora and Ewing, or Dexter and Fremont, one from Florentia to Ewing and Fremont to Westlake avenue; Stone Way and Ewing, one from Fremont to Canal; Lake to North Lake and 6th Avenue N.E., and one from 24th avenue N.E. and Lake to Montlake Park and the University campus.

Of the above only $50,000 has been provided for construction, each, [illegible] the concrete bridge from Florentia and Ewing to N. 34 Ewing and Fremont, bids for which were opened this year but no contract let. Of the six bridges to be constructed by the next 12 months bids to cost each of those at Ballard being estimated to cost between $150,000 and $200,000. The wooden bridge at Stone Way, cost $75,000, and to be replaced with concrete or steel would cost $100,000. The bridge to Montlake Park is estimated to cost $75,000 and those at Stone, Ewing and Nesbit to $50,000 each.

The railroad company has [illegible] bid contracts for $700,000 worth of bridge work and it is estimated that to comply with the Government regulations to which they also agreed an additional expenditure of $500,000 will be made.

—CHURCHES—

Lodi, San Joaquin Co., Cal.—Mausoleum, 1 story, concrete and granite, $75,000. Architects, Ohio Mausoleum Co. of California, Elk Bldg., S. F. Owner's name withheld. Plans for the work are complete and the contract want figures on the following materials and work:

Marble Vermont, footing tile, enamel, Deltoid reinforcing bars, sand, concrete work, crushed rock & gravel, stone, cement, roofer, & smooth granite, Mosaic floors, fine ornamental bronze doors & window gratings, rock faced stone, other than sand stone & interior decoration.

This is the first of several mausoleums work for [illegible] was contracted for in the vicinity of Lodi.

FACTORIES & WAREHOUSES.

Pearl Harbor, Hawaii—Warehouse, 2 [illegible] and base, reinforced concrete, $85,000. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans for a large fireproof building to be used as a general store house at the Naval Station at Pearl Harbor are complete and bidders are being taken. Bids will be opened on September 28. Plans can be secured from either the Bureau of Yards and Docks at Washington or from the Commandant at Pearl Harbor. For official Proposal see these columns.

Los Angeles, Cal.—Factory, 1 story [illegible] reinforced concrete. Cost not stated. Architects Parkinson & Bergstrom, Security Bldg., L. A. Owner, Pearl Motor Car Co. This is one of [illegible] buildings which the same owners are about to erect in various Pacific coast cities. The structure will be [illegible] feet and fire proof throughout. All [illegible] window sash and frames will be of metal. The exterior of the [illegible] will be faced with red brick trimmed with artificial stone and [illegible]. Plans are nearly complete and bids will be called for in a few days.

Contracts Awarded.

Georgetown, Wash.—Factory addition, [illegible] and 4 story brick buildings, $50,000. Architect, Carl Siebrand, Arcade Annex, Seattle. Owners, Seattle Packing and Mailing Co. Contractors, [illegible] Construction and Engineering Co., Lowman Bldg., Seattle. Contract has not been awarded.

FIRE HOUSES.

Los Angeles, Cal.—Fire house, 2 [illegible] and brick. Cost not stated. Architect, Chief Building Inspector Backus, L. A. Owners, City of Los Angeles. The city's Building Committee [illegible] the Chief Building Inspector to [illegible] to enter into contracts for the construction of this building. The structure will be erected on Western avenue, and will be 40x72 feet. The exterior will be faced with pressed brick, trimmed with artificial stone. Separate contracts will be let for all parts of the work.

Los Angeles, Cal. — Fire houses, 2 [illegible] story frame and brick, $4000 and $12,000 each. Architect, Chief Building Inspector Backus, L. A. Owners, City of Los Angeles. Plans for two buildings have been prepared and working drawings are now being prepared. One building will be erected on Central avenue and the other on Slauson avenue. It is [illegible] let separate contracts for each building as soon as plans are complete.

Seattle, Wash.—Fire houses, 2 [illegible] and brick, $40,000 each. Architect, [illegible] Plans and specifications for these buildings have been approved by the Chief of the Fire Department and construction will be started shortly. The buildings will be erected on the outskirts of the city and will vary in cost from $25,000 to $40,000 each. Plans are now being prepared.

FLATS.

San Francisco—Flats, 2 story and base, frame, $5,000. Architect, C. Fantoni, 4 Columbus Avenue, S. F. Owner, G. Pera. The building will be 25x61 feet. The upper two floors will be arranged for two flats of five and six rooms each with baths. The first floor will contain a store but will not be finished at the present time. Interior trim throughout will be of pine. There will be gas grates and tile mantels. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures are being taken.

San Francisco—Flats, 2 story and base, frame, $5,000. Architect, E. E. Young, 251 Kearny Street, S. F. Owner, Frank Grannis. The building will cover an area of 25x55 feet and has been arranged for two modern flats of five and six rooms each. There will be furnace heat, open fire places and gas water heaters. The interior trim will be of pine and elm with some oak floors. The exterior of the building will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 2 story and base, frame. Cost not stated. Architects, L. M. Weisman and Son, Pacific Bldg., S. F. Owner, Fred Ahrendth. The building will contain a store on the first floor and one large flat of seven rooms and bath on the upper floor. The interior finish throughout will be of pine and redwood. The store will probably be fitted up for a saloon. The exterior of the building will be covered with shiplap. Plans complete and the architects are taking figures.

Richmond, Contra Costa Co., Cal.—Flats, 3 story and base, frame, $9,500. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mrs. Peard. The building will be erected at a corner and will have two street frontages, one of 100 feet and the other of 50 feet. There will be six flats of four rooms and bath each contained in the building. The interior will be finished in pine and redwood with some oak floors. The exterior of the building will be covered with shingles. Plans are to be completed at once.

GARAGES.

San Francisco——Garage and sales rooms, 1 story and base, reinforced concrete, $100,000. Architect name, Owners, Masow and Morrison, Monadnock Bldg., S. F. This building has been mentioned here before when the lessee was first closed with the Cadilac Motor Car Co. Plans have been approved and actual work will be started at once. The site of the new building is the northwest corner of Van Ness Avenue and California street, the lot covering an area of 70x160 feet. The building will be Class A in all points of construction. The floor and mezzanine containing the sales rooms and offices will be finished in hardwoods, cork and tile. The exterior of the building will be faced with cement plaster. Construction will be carried on by the own-

ers who are now purchasing all materials.

Contracts Awarded.

Los Angeles, Cal.—Garage, 2 story and base, brick, $30,000. Architects, Hudson & Munsell, Simpson Bldg., L. A. Owner, J. F. Burkhard. Contractors, Alta Planing Mill Co., 830 McGarry St., L. A. Contract price, $27,400.

GOVERNMENT WORK AND SUPPLIES.

Navy Notices of Purchases.

The notices of proposed purchases issued weekly by the bureau of supplies and accounts, Navy Department, Washington, is mailed to 5,000 individuals and firms. As the list is constantly growing, the department has found it necessary to revise the list with the view of eliminating names of those not interested or not likely to bid. While it is the desire of the bureau to reach all persons interested in furnishing supplies for the Navy yet in the interests of economical administration it is essential that the mailing list be kept within reasonable limits. Firms failing to advise a renewal of their interest prior to September 1 will be dropped from the list. A notice to this effect is now being distributed by the paymaster general of the navy.

Projects Pending.

The following projects, bids for which were opened on dates indicated below, are pending at the office of the chief of the bureau of yards and docks, Navy Department, Washington, D. C.:

July 20, for the construction of pier No. 5 and dredging at Puget Sound, Wash.

August 3, for constructing commandant's quarters and two officers' quarters at the naval station, Pearl Harbor, H. T.

Distribution System.

The Secretary of the Interior has authorized the Reclamation Service to complete that portion of the distribution system of the Yuma irrigation project which is to supply lands in the Yuma Indian reservation on the California side of the river. The construction work is to be done by the Government forces or by contract. The main canal through the reservation has been completed during the past year. The total cost of the proposed work, including structures, is estimated at $135,000.

Special Gate for Balboa Dock.

The Isthmian Canal Commission will soon call for bids for constructing one miter ring steel dock gate of two leaves, with certain steel parts for same. The height of the gate will be 56 feet from the top of the dock wall to the top of the miter sill. It is for the dry dock at Balboa and similar to the gates furnished under canal circular No. 576.

Pearl Harbor, Officers' Quarters.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for the construction of commandant's quarters and five officers' quarters at the naval station, Pearl Harbor, H. T.:

Item 1, all quarters complete; 2, commandant's quarters; 3, officers' quarters, B, C, D, E, and F; 4, deduct from item 1 for omitting out houses; 5, deduct from item 1 for omitting screens; 6, add for substituting "Ohia" flooring in certain rooms.

Spalding Construction Co., Chamber of Commerce, Portland, Ore., item 1, $64,980; 2, $19,000; 3, $10,000; 4, $6,000; 5, $1,250; 6, $275.

W. N. Concannon Co., Monadnock Bldg., San Francisco, Cal., item 1, $68,758; 2, $18,415; 3, $10,219; 4, $5,000; 5, $1,000.

Honolulu Planing Mill, Ltd., Honolulu, H. T., item 1, $83,306; 2, $19,131; 3, $12,835; 4, $7,560; 5, $1,918; 6, $2,200. Telegram was received from commandant at Pearl Harbor stating that a bid had been forwarded by the Lord-Young Construction Co., which had not been received.

Naval Supplies.

The paymaster general of the navy will open bids August 27 for furnishing the following materials:

Schedule 4744—Yards and Docks.

Class 11. Pearl Harbor—Sewer pipe.

Class 12. Pearl Harbor—7,500 lbs soft sheet lead.

Class 13. Pearl Harbor—3,000 ft galvanized wire mesh.

Class 14. Pearl Harbor—660 lin ft hose.

Class 15. Pearl Harbor—6 manhole covers and frames and 3 cast-iron gratings.

Schedule 4746—Yards and Docks.

Class 16. Pearl Harbor — Cast-iron bell and spigot pipe.

Class 17. Pearl Harbor—Pipe and fittings.

Class 18. Pearl Harbor—Valves.

The same official will open bids on September 3 for furnishing the following materials.

Schedule 4758—Steam Engineering.

Class 11. Puget Sound—1 screw cutting engine lathe, 14-in, motor driven.

Schedule 4759—Steam Engineering.

Class 12. Mare Island—1 pipe expanding and flanging machine.

Class 13. Mare Island—1 improved pipe threading and cutting machine.

Class 14. Mare Island—2 belt-driven metal saws.

Class 15. Mare Island—1 cold metal, motor driven saw.

Naval Schedule Postponed.

The date for opening navy schedule 4722 for furnishing supplies at the naval station, Pearl Harbor, H. T., has been postponed from August 20 to September 10.

Prospective Bidders.

The following firms have applied to the Supervising Architect's office for plans and specifications of the Santa Barbara Post Office, bids for which are to be opened on August 27th:

King Lumber Co., Charlottesville, Va.

A. B. Stannard, U. S. Rubber Co.'s Building, New York city.

Eugene Schuler (the Northwestern Construction Co.), Wahperton, N. D.

Grant Fee, 2440 16th street, San Francisco, Cal.

Southwest Contractor and Manufacturer, Douglas Building, Los Angeles, Cal.

Thomas W. Dowd, Oakland, Cal.

Southwestern Construction Co., Central Building, Los Angeles, Cal.

Wm. Simpson Construction Co., San Diego, Cal.

HALLS AND SOCIETY BUILDINGS.

Richmond, Contra Costa Co., Cal.—Lodge Hall, 4 story and base, brick and steel, $35,000. Architect, James T. Narbett, Richmond. Owners, Richmond Elks' Hall Association. Plans for this building, prepared in competition with several other architects, have just been selected by the Building Committee. There will be stores on the first floor and a number of lodge rooms above. Complete plans will be prepared at once and a more detailed account of the building will then be given. There will be a central heating system, probably steam, elevator and the exterior will be faced with pressed brick.

Canby, Ore.—Lodge hall, 2 story and base, reinforced concrete. Cost not stated. Architect, Wayne L. Mills, Portland. Owners, Canby Masonic Hall Association. The building will contain two large stores on the first floor, seven offices in the front of the second floor and the lodge rooms. The exterior of the building will be faced with cement plaster. Plans have been out for figures and a contract will be awarded at once.

Contracts Awarded.

Corona, Riverside Co., Cal.—City hall, 2 story and base, brick, $25,000. Architect, Leo Kroneen, Corona. Owners, City of Corona. Contractors, F. M. Walton & Son, 1326 Estelle Ave., Hollywood. Contract price, $22,392.

—HOSPITALS—

Los Angeles, Cal.—Hospital addition, 1 story and base, frame. Cost not stated. Architect, Frank L. Stiff, Grosse Bldg., L. A. Owners, Westlake Hospital Association. The building will be 58x45 feet and will contain 5 bedrooms, kitchen, nurses' room and dining room. The exterior of the building will be covered with shiplap. Plans are being prepared.

Roberts, State Highway Commissioner, has been commissioned to act with the City Engineer in the planning of the city's sewer system. The sum of $400,000 is now available for this work and bids will be called for as soon as the plans can be completed.

Medford, Ore.—Sewer system extentions. Cost not stated. Engineer, City Engineer O. Arnspiger, Medford. Owners, City of Medford. Plans are being prepared for a two-mile extension of the city's present sewer system. There will be both 14 and 16 inch pipe used. Bids will be called for as soon as the plans are completed.

—STORE BUILDINGS—

San Francisco—Stores and offices, 15 story and base, Class A construction, $600,000. Architect, Willis Polk, Merchants' Exchange Bldg., S. F. Owners, Insurance BBrokers' Exchange. Plans for the excavating, foundation work and steel for this structure have been completed and are now out for figures. Plans for other parts of the work will be completed as rapidly as possible and bids will be taken. All work will be segregated.

Oakland, Cal.—Stores and offices, 15 story and base, Class A construction. Cost not stated. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owner's name withheld. This building will be erected on Broadway and an intersecting street. Particulars of the construction cannot be given at this time. It is understood that a bank will occupy the first floor and that the upper floors will be subdivided into about 300 offices. The construction will be fireproof throughout with a complete steel frame, reinforced concrete exterior walls, metal trim, concrete floors and hollow tile partitions. The mechanical equipment will include a complete power plant, steam heat and elevator service. Plans are now being prepared.

Burlingame, San Mateo Co., Cal.—Stores, 1 story and base, brick. Cost not stated. Architect, John J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building has been mentioned here before. There will be one store 30x90 feet which will be occupied by a candy manufacturing firm. There will be special store fixtures required. The exterior will probably be faced with white cement plaster. Plans are complete and figures will be called for shortly.

Sacramento, Cal.—Stores and lofts, 4 story and base, steel and reinforced concrete, $100,000. Architect, R. A. Herold, Brythe Bldg., Sacramento. Owners, Schaw-Batcher Co. This building will be erected on the site of the firm's present location on J street and will cover a ground area of 100x160 feet. The construction will be Class A throughout with a steel frame and reinforced concrete exterior walls. The floors will be of concrete. There will be metal trim, fire doors and metal sash and frames. The owners handle a large line of pine and heavy hardware, and the building will contain the offices and salesrooms on the first floor and storage space on the upper floors. The exterior will be faced with cement plaster. Working drawings are now being prepared.

Klamath Falls, Ore.—Stores and offices, 4 story and base, brick and steel, $55,000. Architect, John H. Powers, 160 Montgomery St., S. F. Owner's name withheld. The building will cover an area of 45x120 feet and will contain 2 large stores on the first floor and 24 offices to the floor above. There will be steam heat and an oil burning plant. Provision has been made for an elevator. Only two stories will be erected at this time. The exterior of the building will be faced with pressed brick. Plans are nearly complete and as soon as the owner signs leases for the stores bids will be called for.

Los Angeles, Cal.—Stores and lofts, 6 story and base, reinforced concrete. Cost not stated. Architect, E. C. Thorne, 631 So. Spring St., L. A. Owners, Chapman Bros. The building will cover a ground area of 50x100 feet and will be fire proof. The exterior walls will be of reinforced concrete and the roof slabs and floors of concrete. The window sash, frames and doors will be metal. There will be elevator service. The exterior of the building will be faced with glazed terra cotta. Plans are being prepared.

Seattle, Wash.—Stores, 4 story and base, reinforced concrete, $50,000. Architect not selected. Owners, Seattle Hardware Co. The building will adjoin the company's present building and is to be an addition to their plant. Other than the height of the building no particulars can be given until a selection of an architect is made.

BUILDING Sealed proposals indorsed "Proposals for General Storehouse" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. **September 28, 1912,** and then and there publicly opened for a reinforced concrete storehouse at the United States naval station, Pearl Harbor, Hawaii. Estimated cost, $85,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station, Honolulu, Hawaii. WM. M. SMITH, acting chief of bureau.

PROPOSALS FOR BRIDGE WORK.

NOTICE is hereby given by the Board of Supervisors of Sonoma County, California, that sealed bids will be received by the Clerk of said Board up to 12 o'clock noon **Thursday, September 5th, 1912,** for the construction of a bridge over Estero Creek on Moscow Road District, according to the plans and specifications adopted by the Board of Supervisors on August 9th, 1912, and now on file in the office of the Clerk of said Board.

All bids must be accompanied by a certified check for ten per cent (10 per cent) of the amount of the bid, payable to W. W. Pettit, Jr., County Clerk, and to be forfeited to the County of Sonoma should the successful bidder fail within ten days after the acceptance of said bid to enter into a contract therefor, and to give a good and sufficient bond for the faithful performance of said contract. Checks or unsecured bids will not be considered.

The Board reserves the right to reject any and all bids.

W. W. PETIT, JR., County Clerk.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—6 story and base, brick and steel, $100,000. San Francisco. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, R. D. McElroy. This building will be erected on Sixth street, near Howard, and has been fully described in these columns before. Contracts for the excavating, rock and foundation work have been let. The concrete work is now being figured and a contract will be let within a week or two. All other parts of the work are to be segregated and plans will be ready shortly. J. E. Scully, Phelan Bldg., is acting as superintendent for all contracts will be let through the architect's offices.

Apartment House—3 story and base, frame, $20,000. San Francisco. Architect, Sylvain Schnaittacher, First National Bank Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Cabrillo and Goughstreets and has been designed to contain 12 to 14 apartments of two rooms and bath each. There will be wall beds, steam heat and the exteriors will be finished with brick veneer to first floor and oak. The exterior of the building will be of brick with cement plaster or metal lath. Plans are now prepared.

Apartment House—3 story and basement, frame, $14,000. San Francisco. Architect, C. D. Clarke, Pearl Hyde, S. F. Owner, Pearl Hyde. The building will contain 12 apartments to cost $14,000. Plans are now prepared and bids will be received shortly. The building will be three stories and basement and will contain 12 apartments. The large apartments made be divided into two smaller suites. The interior trim will be of pine and oak. There will be steam heat, wall beds and private baths. The exterior of the building will be covered with brick veneer to the second floor line and with cement plaster above that point. Plans are complete and a contract will be let this week.

Flats—3 story and base, frame, $5,000. San Francisco. Architect, C. Fantoni, 4 Columbus Ave., S. F. Owner, G. Peri. The building will be 25x61 feet. The upper two floors will be arranged for two flats of five and six rooms each with baths. The first floor will contain a store, but will not be finished at the present time. Interior trim throughout will be of pine. There will be tile grates and tile mantels. The exterior of the building will be covered with shiplap and rustic. Plans are complete and permits are being taken.

Flats—2 story and base, frame, $5,000. San Francisco. Architect, E. E. Young, 251 Kearny St., S. F. Owner, Hibernia Banks. The building will cover an area of 25x55 feet, and has been arranged for two modern flats of five and six rooms each. There will be furnace heat, open fire places and gas water heaters. The interior trim will be of pine and elm with some oak floors. The exterior of the building will be covered with brick veneer and cement plaster. Plans are complete and the work will be done by Day Labor.

Flats—2 story and base, frame. Cost not stated. San Francisco. Architects, L. M. Weisman & Son, Pacific Bldg., S. F. Owner, Fred Atneroth. The building will contain a store on the first floor and one large flat of seven rooms and bath on the upper floor. The interior finish throughout will be of pine and redwood. The store will probably be fitted up for a saloon. The exterior of the building will be covered with shiplap. Plans are complete and the architects are taking names.

Warehouse—1 story and base, reinforced concrete, $85,000. Pearl Harbor, Hawaii. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Plans call for a large fire proof building to be used as a general storehouse at the Naval Station at Pearl Harbor. Plans are complete and figures are being taken. Bids will be opened on September 28. Plans can be secured from either the Bureau of Yards and Docks at Washington or from the Commandant at Pearl Harbor. For official proposal see these columns.

Garage and Sales Rooms—1 story and part reinforced concrete, $100,000. San Francisco. Architect, none. Owners, Mason and Morrison, Monadnock Bldg., S. F. This building has been mentioned here before when the lease was first closed with the Cadillac Motor Car Co. Plans have been approved and active work will be started at once. The site of the new building is the northwest corner of Van Ness avenue and California street, the lot covering an area of 70x100 feet. The building will be class A in all points of construction. The first floor and mezzanine containing the sales rooms and offices, will be finished in hardwoods throughout. The exterior of the building will be faced with cement plaster. Construction will be carried on by the owners, who are now purchasing all materials.

Hotel Alterations—2 story frame, $2,000, San Francisco. Architect, A. D. Nicholson, 20 Montgomery St., S. F. Owners, Salvation Army. This work will include exterior alterations as well as new plumbing, plastering, interior finish and electric work. Plans are complete and the work will probably be done by Day Labor under the direction of the owners.

Hotel Annex—6 story and base, brick and steel. Cost not stated. San Francisco. Architects, William Curlett & Son, Phelan Bldg., S. F. Owner, James D. Phelan. This work has been mentioned here a number of times before. Plans have been out for figures, and it is expected that contracts on several parts of the work will be awarded this week. The work has been delayed by the absence of R. D. McElroy, who is representing the owner. To date no lease has been signed between Mr. Phelan and the Argonaut Hotel Co.

Hotel—4 story and base brick and steel, $85,000, San Francisco. Architect, Woodworth Wethered, 143 Second St., S. F. Owner, John G. Bolker. This building will be erected on the south line of Mission street, between 5th and 6th streets. Plans provide for 160 rooms and 60 baths. There will be a large lobby and offices on the first floor. There will be steam heat, elevator service, steam heat and running water in all rooms. The frame will be largely of steel. The exterior walls will be faced with pressed brick and terra cotta. Entrance and lobby will be finished in marble and tile. Plans are complete and segregated figures are being taken.

Residence—2 story and base frame, $6,000. San Francisco. Architect, Theo. S. Boehm, Hewes Bldg., S. F. Owner, Harry C. Warwick. This work will consist of alterations to both the exterior and interior of the present building, and will include new plumbing, plastering, interior trim and electric wiring. The interior thim will be of pine, redwood, mahogany and oak. The owner is a well known contractor and the work will be done by Day Labor under his direction.

Residence—2 story and base, frame, $3,000. San Francisco. Architect, none. Owner, E. B. Hallett, 1259 12th Ave., S. F. The dwelling will contain six rooms and bath, with all modern conveniences. The interior will be finished in pine with oak floors in the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile with composition floors will be used in the bath rooms. The exterior of the house will be covered with cement plaster on metal lath. Plans are completed and the work will be done by Day Labor.

Residence—2 story and base, frame, $6,000. San Francisco. Architect, John S. Grove, 2911 Telegraph Ave., Berkeley. Owner, H. S. Heller. The dwelling has been designed for an eight-room house with baths and laundry. The interior finish will be of pine with oak floors throughout. There will be furnace heat and open fire places. The mantels will be of tile. Tile will be used in the bath and kitchen. The floor in the bath room, will be of composition. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

Stores and Offices—17 story and base, Class A construction. $600,000, San Francisco. Architect, Willis Polk, Merchants Exchange Bldg., S. F. Owners, Insurance Brokers Exchange. Plans for the excavating, foundation work and steel for this structure have been completed and are now out for bauies. Plans for other parts of the work will be completed as rapidly as possible and bids will be taken. All work will be segregated.

Contracts Awarded.

Apartment House—1 story and base, brick and stone, San Francisco. Cost not stated. Architect, W. H. Crim, 425 Kearny St., S. F. Owners, John Rosenfeld's Sons. Contractor, Braunton Bros., 402 Kearny St., S. F., general construction. Contract price not given. Mealey & Collins, 402 Kearny St., S. F., brick and excavating.

OAKLAND AND ALAMEDA COUNTY.

Apartment House—2 story and base, frame. Cost not stated. Berkeley. Alameda Co., Cal. Architect, Joseph J. Rankin, 2705 Virginia St., Berkely. Owned, Miss Bessie Gallagher. The house has been designed to contain five four-room apartments, all of which will have connecting baths and wall beds. The interior will be finished in pine and redwood with some oak floors. There will be coal grates. The exterior of the building will be covered with cement plaster on metal lath.. Plans are complete and figures are being taken.

Apartment House—3 story and base, frame, 30,000. Oakland, Cal. Architects, Robert Morgenier and Drow, 1644 Telegraph Ave., Oakland. Owner, C. A. Johnson. The building will contain 25 apartments, which have been arranged in suites of two rooms and bath. There will be wall beds, steam heat and other modern conveniences. The interior trim will be of pine and redwood with some oak floors. The exterior of the building will be covered with pressed brick veneer trimmed with terra cotta. Plans are complete and have been placed in the hands of the owner, who is now taking figures on the work.

Residence—2 story and base, frame,

$2,000. Berkeley, Alameda Co., Cal. Architect, C. Texdahl, 3035 Harper St., Berkeley. Owner, Mr. Nelson. The house will contain six rooms and bath. The interior trim will be of pine throughout. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. The exterior of the dwelling will be covered with rustic. Plans are being prepared.

Residence—1 story and base, frame, $4,500. Berkeley, Alameda Co., Cal. Architect, A. Merrill Bowser, 1007 Broadway, Oakland Owner, W. J. Mortimer. The dwelling will contain about eight rooms, bath and sleeping porch. The interior trim will be of pine and redwood with oak floors in the principal rooms. There will be furnace heat and coal grates. The mantels will be of tile or brick. The exterior of the house will be covered with cement plaster and shingles. Plans are now being prepared.

Bungalow—1 story and base, frame, $2,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, J. H. Bullock, 2341 McGee Ave., Berkeley. The dwelling has been designed for a five-room house with bath and sleeping porch. The interior trim will be of pine throughout. Oak floors will be used in the living room and dining room. There will be coal grates and brick mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Co., Berkeley National Bank Bldg., Berkeley. The house will contain seven rooms, bath and sleeping porch. The interior will be finished in pine and redwood with some oak floors. There will be open fire places and tile or brick mantels. Composition flooring will be used in the bath room. The exterior of the building will be covered with shingles. Plans are complete and the owners will do the work by Day Labor.

Bungalow—1 story and base, frame, $2,500. Oakland, Cal. Architect, none. Owner, B. R. Dexter, 2212 Grove St., Oakland. The bungalow has been designed for a six-room house with bath and sleeping porch. The interior will be finished in pine and redwood with oak floors in two rooms. Composition flooring will be used in the bath room. There will be open fire places and tile mantels. The exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Residences—2, 1 story and base, frame, $4,000 each. Berkeley, Alameda Co., Cal. Architect, none. Owners, Patrick-Nelson Co., 2025 Addison St., Berkeley. Each of these dwellings will contain six rooms, bath, sleeping porch and laundry. The interiors will be finished in pine, redwood and oak with hardwood and composition floors. There will be furnace heat and open fire places. The mantels will be of tile. Tile will be used in the bath rooms and kitchens. The exteriors of both houses will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,000. Oakland, Cal. Architect, A. W. Smith, 1004 Broadway, Oakland. Owner, Franke. This house will contain five rooms, bath and sleeping porch. A frame garage will also be erected on the lot. The interior finish will be of pine and redwood with oak floors in two rooms. There will be open fire places and brick mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work is now being figured.

Bungalow—1 story and base, frame, $2,000. Oakland, Cal. Architect, none. Owner, H. A. Hanson, 2211 Ellsworth, Berkeley. The dwelling has been arranged for five rooms, bath and sleeping porch. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be open fire places and brick mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Residence—2 story and base, frame, $6,000. Alameda, Alameda Co., Cal. Architect, John H. Powers, 460 Montgomery St., S. F. Owner, Robert D. Hunter. The dwelling has been designed for an eight-room house with bath, sleeping porch and laundry. The interior finish will be of pine, redwood and elm. Oak will be used in the floors of the principal rooms. Tile will be used in the bath and kitchen. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be finished in shingles. Plans are complete and the architect is now taking figures on the work.

Residence—2 story and base, frame, $9,000 Berkeley, Alameda Co., Cal. Architect, Edwin B. Mead, 2543 Piedmont Ave., Berkeley. Owner, Mrs. Macomber. This dwelling will contain nine rooms, baths, sleeping porch and a laundry. The interior finish will be of pine, redwood and hardwoods. Hardwood floors will be used in the principal rooms. Floors of the baths will be of composition. There will be a central heating system and open fire places. The mantels will be of tile. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $8,000. Adams Point, Alameda Co., Cal. Architect, Claud B. Barton, Security Bank Bldg., Oakland. Owner, Mrs. Olive M. Gross. Plans for this dwelling provide for eight rooms, baths, sleeping porch and laundry. The interior finish will be of pine, elm and redwood. There will be oak floors in the principal rooms and the floors of the bath rooms will be of composition. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, W. C. Kelly, 6605 Shattuck Ave., Berkeley. The house will contain six rooms and bath. The interior finish will be of pine throughout. There will be open fire places and tile or brick mantels. Oak floors will be used in the principal rooms. Tile will be used in the bath. The exterior of the dwelling will be covered with rustic. Plans are complete and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,200. Alameda, Alameda Co., Cal. Architect, Pacific Architect and Engineering Co., 251 Kearny St., S. F. Owners, Bryan and Randall. The bungalow will contain five rooms and bath. The interior trim wil be of pine throughout. There will be open fire places and tile mantels. Oak floors will be used in the dining and living rooms. The exterior of the bungalow will be covered with shingles. Plans are complete and figures are being taken.

Bungalows—2, 1 story and base, frame, $2,500 each. Oakland, Cal. Architect, none. owner, H. C. Pfrang, 5535 Taft Ave., Oakland. Each of these dwellings will contain 6 rooms and bath. The interior trim will be of pine and redwood. There will be open fire places and tile mantels. The exterior will be covered with shingles. Plans are in the hands of the owners and the work will be done by Day Labor.

Bungalow—1 story and base, frame, $2,500. Oakland, Cal., Architect, none. Owner, Louis Johnson, 1732 Ward St., Berkeley. The house has been designed for a six room bungalow with bath and laundry. The interior will be finished in pine and redwood. There will be open fire places and tile or brick mantels. Oak will be used in the floors of the living and dining rooms. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Lamor.

Schools—2, 2 story and base, frame, and concrete. Cost not stated. Oakland, Cal. Architect, J. J Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Supervising Architect, J. J. Donovan, of Oakland, informs us that there is no truth in the report that figures are being taken for the San Pablo Ave., school. Plans for this building will not be out for at least ten days, while plans for the Fremont school will be placed in the hands of contractors in about the same time.

Chemical Laboratory.—2 story, frame, cost not stated, Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, First National Bank Bldg., Berkeley. Owner, Mr. Vaygouny. The building has been designed as a private laboratory and will contain a number of special features. The interior will be plastered and finished in redwood. There will be a large coal grate. The exterior will be covered with rustic. Plans are complete and being figured.

School—1 story, and base, reinforced concrete, $16,000, Centerville, Alameda Co., Cal. Architect, John J. Foley, Monadnock Bldg., S. F. Owners, Centerville School District. The following bids have been received for this work, and a contract has been awarded to James J. McLaughlin, 244 Kearny St., S. F.: Phil. Sheridan, Berkeley, $16,429; Hughes, $19,285, Erwin, $17,507, Louis, $17,529; Knox, $18,000; Ackerman Son, $18,517; Jas. J. McLaughlin, $15,975.

School—2 story and base, frame, Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Galen Howard, 604 Mission St., S. F. Owners, Regents of the University of California. The following bids for this work have been opened and taken under advisement. A contract will be awarded at the next meetnig of the Regents: D. J. Duffy, 3673 17th St., S. F., $8,800; G. C Nelson, $11,561; Schnebly, Hostrawser & Pedgrift, Okland, $12,126; Pringle-Dunn

Co., 338 Pine St., S. F., $13,272; R. H. Van Sant, 1st National Bank Bldg., Oakland, $13,702.

Stores and Offices—15 story and base. Class A construction. Cost not stated. Oakland, Cal. Architect, Benj. G. Mc Dougall, Sheldon Bldg., S. F. Owner's name withheld. This building will be erected on Broadway and an intersecting street. Particulars of the construction can not be given at this time. It is understood that a bank will occupy the first floor and that the upper floors will be sub-divided into about 300 offices. The construction will be fireproof throughout with a complete steel frame, reinforced concrete exterior walls, metal trim, concrete floors and hollow tile partitions. The mechanical equipment will include a complete power plant, steam heat and elevator service. Plans are now being prepared.

University Bids Are Opened.

Alteration Work for Architectural Building at Berkeley to Be Awarded.

Five bids were received by the Regents of the University of California on August 12th for the construction of the alterations to the Architectural Building on the Campus at Berkeley. Plans for this work were prepared by Architect John Galen Howard, 604 Mission street, San Francisco. The following is a complete list of the figures received:

D. J. Duffy, 3673 17th St., S. F.	$8,800
G. C. Nielson	11,561
Schnebly - Hostrawser & Pedgrift, 1443 Broadway, Oakland	12,126
Pringle-Dunn Co., 338 Pine St., S. F.	13,272
R. H. Van Sant, First National Bank Bldg., Oakland	13,702

All figures were taken under advisement by the Regents and furthed action will be taken at their next meeting, which will be held some time this week.

LOW BID ON ARCHITECTURAL BUILDING AT U. C. GROUNDS, BERKELEY.

The bid of B. J. Duffy for the construction of the alterations to the Architectural Building at the University of California should have been reported at $10,920. Mr. Duffy's full bid is as follows:

General construction	$8,800
Seats in lecture room	1,600
Tin work	225
Concrete	295
Total	$10,920

In our report it was made to appear that the item of general construction covered everything. His address is 3673 17th street, San Francisco.

SAN JOSE & SANTA CLARA VALLEY.

Residence—2 story and base, frame, $15,000. Menlo Park, San Mateo Co., Cal. Architect, J. Cather Newsom, Monadnock Bldg., S. F. Owner, D. S. Dorn. This dwelling will contain in the neighborhood of 15 rooms, four baths, sleeping porch and laundry. The interior will be finished in pine and redwood with hardwood floors throughout. Bath rooms will be finished in tile and will have composition floors. There will be a hot water heating system installed, besides large coal grates. The mantels will be of brick and tile. A vacuum cleaning system will be installed. The exterior of the house will be covered with shiplap. Plans are now being prepared.

Stores—1 story and base, brick, cost not stated. Burlingame, San Mateo Co., Cal. Architect, John J. Foley, Monadnock Bldg., S. F. Owner's name withheld. The building has been mentioned here before. There will be one store 30x90 feet, which will be occupied by a candy manufacturing firm. There will be special store fixtures required. The exterior will probably be faced with white cement plaster. Plans are complete and figures will be called for shortly.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

Lodge Hall—1 story and base, brick and steel, $35,000. Richmond, Contra Costa Co., Cal. Architect, James T. Narbett, Richmond. Owners, Richmond Elks' Hall Association. Plans for this building prepared in competition with several other architects, have just been selected by the Building Committee. There will be stores on the first floor and a number of lodge rooms above. Complete plans will be prepared at once, and a more detailed account of the building will then be given. There will be a central heating system, probably steam, and an elevator. The exterior will be faced with pressed brick.

Hotel—3 story and base, frame, $25,000. Richmond, Contra Costa Co., Cal. Architect, J. W. Bagley, Hearst Bldg., S. F. Owner, Louis Reggazini. The building will contain in the neighborhood of 75 rooms besides the baths and toilets. The interior will be finished in pine and redwood. There will be a large open fire place with brick mantel. The lobby will have a mosaic floor. The exterior of the building will be covered with shiplap and rustic. Plans are complete and figures are being taken.

Residence—2 story and base, frame, $7,500. Martinez, Contra Costa Co., Cal. Architects, Wilde & Schaefer, Albany Bldg. Oakland. Owner, L. N. Buttner. This dwelling has been mentioned here before. There will be 8 rooms, bath and laundry. The interior will be finished in pine, redwood and hardwoods. Oak floors will be used throughout. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Flats—3 story and base, frame, $9,500. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mrs. Peard. The building will be erected at a corner and will have two street frontages, one of 100 feet and the other of 40 feet. There will be six flats of four rooms and bath each, contained in the building. The interior will be finished in pine and redwood with some oak floors. The exterior of the building will be covered with shingles. Plans are to be completed at once.

Building Contracts Awarded.

The building will be 38x45 feet and will contain 5 bedrooms, kitchen, nurses room and dining room. The exterior of the building will be covered with asphalt. Plans are being prepared.

Hotel—3 story and base. Class A construction, $250,000. Balboa Beach, Orange Co., Cal. Architect, R. C. Forsell, L. A. Owners, Laguna Cliff House Co., California Bldg., L. A. The hotel is to be designed for a summer resort and will contain in the neighborhood of 100 rooms. The project is entirely prospective as yet. As soon as working plans are started a description will be given of the building.

Hotel and Stores—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owner, H. E. Huntington. The building will be 130x165 feet and has been arranged for 7 stores on the first floor and 132 guest rooms on the upper floors. There will be steam heat. A number of the rooms will be arranged for two room suites, with connecting baths and wall beds. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

Apartment House—3 story and base, brick, $50,000, Los Angeles, Cal. Architect, J. William Roberts, 2340 West 30th St., L. A. Owner, same. Contractor, E. H. McGibbon, Union Oil Bldg., L. A. Contract price, $46,200.

Bank—2 story and base, brick, $20,000, Whittier, Los Angeles Co., Cal. Architect, T. Beverley Keim Jr. Co., Title Ins. Bldg., L. A. Owners, Whittier Savings Bank. Contractor, Carl Leonardt, H. W. Hellman Bldg., L. A. Contract price, $14,940. Note—This contract does not include bank fixtures, vaults, etc.

Garage—2 story and base, brick, $30,000, Los Angeles, Cal. Architects, Hudson & Munsell, Stimpson Bldg., L. A. Owner, J. F. Burkhard. Contractor, Alta Planing Mill Co., 830 McGarry St., L. A. Contract price, $27,400.

City Hall—2 story and base, brick,, $25,000. Corona, Riverside Co., Cal. Architect, Leo Kroneen, Corona. Owners, City of Corona. Contractors, F. M. Walton & Son, 1326 Estelle Ave., Hollywood. Contract price, $22,392.

Hotel—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg, L. A. Owner, F. W. Wachter. Contractor, Frank L. Spaulding., 1460 Dana St., L. A. Contract price, $23,000.

PORTLAND AND OREGON.

Stores and Offices—1 story and base, brick and steel, $55,000. Klamath Falls, Ore. Architect, John H. Powers, 460 Montgomery St., S. F. Owner's name withheld. The building will cover an area of 85x120 feet and will contain two large stores on the first floor and 24 offices to the floor above. There will be steam heat and an oil burning plant. Provision has been made for an elevator. Only two stories will be erected at this time. The exterior of the building will be faced with pressed brick. Plans are nearly complete and as soon as the owner signs leases for the stores bids will be called.

Sewer System — $200,000. Eugene, Ore. Engineer, City Engineer Forneri, Eugene. Owners, City of Eugene. Complete plans and specifications for the construction of an entire new city sewerage system have been completed and the Board of City Trustees are calling for bids. Plans can be secured from the City Engineer. Bids will be opened on September 9th.

Sewer System Extensions—Cost not stated. Medford, Ore. Engineer, City Engineer O. Arnspiger, Medford. Owners, City of Medford. Plans are being prepared for a two-mile extension of the city's present sewer system. There will be bout 11 and 16 inch pipe used. Bids will be called for as soon as the plans are completed.

Lodge Hall—2 story and base, reinforced concrete. Cost not stated. Canby, Ore. Architect, Wayne L. Mills, Portland. Owners, Canby Masonic Hall Association. The building will contain two large stores on the first floor, seven offices in the front of the second floor and the lodge rooms. The exterior of the building will be faced with cement plaster. Plans have been out for figures and a contract will be awarded at once.

Hotel and Stores—3 story and base, brick. Cost not stated. Portland, Ore. Architects Bridges & Webber, Portland. Owner, George W. Bates. The building will cover a ground area of 50x90 feet. The first floor will be arranged for stores and the hotel lobby. The upper two floors will be sub-divided into 38 rooms and four baths. There will be steam heat and running water in all rooms. The exterior will be faced with pressed brick. Plans are now being figured and bids will be opened on Sept. 2.

Contracts Awarded.

Apartment House—4 story and base, brick and steel, $50,000, Portland, Ore. Architects, Doyle, Patterson & Beach, Portland. Owner, Mr. Sealey. Contractors, Morgan, Fliedner & Boyce, Portland. Contract price, $50,000.

Hotel—5 story and base, brick and steel. Cost not stated. Roseburg, Ore. Architect, Earl A. Roberts, Portland. Owners, Provident Trust and Investment Co. Contractors, W. C. Arthur & Sons, Portland. Contract price, $48,039. Note—This contract does not include plumbing, electric work, ornamental iron or the installation of the elevators.

SEATTLE AND WASHINGTON.

Sewer System—$400,000. North Yakima, Wash. Engineer, W. J. Roberts, associated with the City Engineer, North Yakima. W. J. Roberts, State Highway Commissioner has been commissioned to act with the City Engineer in the planning of the city's sewer system. The sum of $400,000 is now available for this work and bids will be called for as soon as the plans can be completed.

Stores—4 story and base, reinforced concrete, $50,000. Seattle, Wash. Architect not selected. Owners, Seattle Hardware Co. The building will adjoin the company's present building and is to be an addition to their plant. Other than the height of the building no particulars can be given until a selection of an architect is made.

Bridges—6, reinforced concrete or steel, $750,000, Seattle, Wash. Engineer, City Engineering Dept., Seattle. Owners, City of Seattle. The existing agreement between the city of Seattle and the War Department calls for the construction of six permanent bridges over the Lake Washington Canal by the time dredging is completed This work will be complete by July of next year. The following bridges are to be constructed by the city: From Thurman St. and 13th Ave, W. to Shilshole Ave., and 14th Ave. NW., one at Aetna and Ewing to Ewing and Phinney; one from Florentia and 4th Ave. N to Ewing and Fremont; one from Westlake Ave. to Stone Way and Ewing; one from Fuhrman and Eastlake Ave. to Northlake and 6th Ave NE. and one from 24th Ave N. and Louisa to Moultlake Park and the University campus. Of the above only $50,000 has been provided for construction work, that of the concrete bridge from Florentia and 4th Ave. N. to Ewing and Fremont, bids for which were opened last year but no contract let. Of the six bridges

to be constructed in the next 12 months this is the least expensive, those at Ballard being estimated to cost between $150,000 and $200,000. The wooden bridge at Stone Way cost $35,000, and to be replaced with concrete or steel would cost $100,000. The bridge to Moltke Park is estimated to cost $75,000 and those at Shilshole, Ewing and Northlake, $100,000 each. The railroad companies have already let contracts for $500,000 worth of bridge work and it is estimated that to comply with the government regulation to which they also agreed, an additional expenditure of $500,000 will be made.

Fire Houses—2, 1 story and base, [illegible] brick, $32,000, Seattle, Wash. Architect, Superintendent of Building Ober, Seattle. Owners, City of Seattle. Preliminary sketches for these buildings have been approved by the Chief of the Fire Department and construction will be started shortly. The buildings will be erected in the outskirts of the city and will vary in cost from $2,500 to $10,000 each. Plans are now being prepared.

Hospital—1 story and base, reinforced concrete or brick and steel. $100,000. Seattle Wash. Architects, Willatzen & Bryne, Henry Bldg., Seattle, Owners, City of Seattle. Supt. of Buildings Ober announced the selection of the above named architect recently. No plans have been prepared for the building as yet and details of the work cannot be given for some time. As soon as progress is made on the work a description will be given in these columns.

Railroad Construction. — $1,000,000. Seattle to Tacoma. Engineers not selected. Owner, William D. Hall and others. New York Bldg., Seattle. Mr. Hall has announced that he, with several other capitalists, will construct an interurban road connecting the cities of Seattle, Tacoma and Olympia within the next year.

Contracts Awarded.

Factory Additions—2, 3 story brick buildings, $50,000. Georgetown, Wash. Architect, Carl Siebrand, Arcade Annex, Seattle. Owners, Seattle Brewing and Malting Co. Contractors, Sound Construction and Engineering Co., Lowman Bldg., Seattle. Contract price not stated.

REPORT OF STATE FORESTER.

State Forester Homans has returned from the Mount Shasta region, in Siskiyou County, where he has been inspecting and investigating the cut-over land of the several big lumber companies. He reports that the Weed and McCloud companies have been burning their slash or waste from logging thus creating fire risks, but in most of the cases the burning has been carelessly done, and the young trees, or second growth, have been unnecessarily destroyed. He also reports that logging operations have been too close, leaving nothing for future reproduction. Chaparral is growing on these cut-over lands, where sugar pine, white pine and douglas fir should be the timber reproduced, he says.

In speaking of the results of his investigation Homans said that it is apparent the large lumber mills are on their last legs, because the supply is diminishing much faster than the growth. The lumber of the future in this region, he said, would be a portable affair with capacity not beyond the rate of reproduction.

He indicated that in his report to the Governor on cut-over land conditions he would recommend that every lumber company should be obliged to burn its slash every year for the purpose of reducing timber fire risks.

WANT RESERVOIR ON CARSON WATERSHED.

DAYTON (Nev.), Aug. 13.—At the present time the Carson River, usually containing plenty of water, even in the summer months, is nearly dry, and the farms are suffering. Fearing that it will be the usual thing in the future, the farmers along the river are signing a petition to be forwarded to Senator Newlands, asking him to take the matter up with the Government and have large dams constructed near the head of the river for the conservation of the water. In this way they believe the water can be saved during the winter months and be used during the summer.

MORE S. P. CONTRACTS AWARDED.

TRUCKEE (Nevada Co.), Aug. 13.—A contract was awarded last Friday to the Utah Construction Company for the grading and construction work double-tracking the Southern Pacific from Iceland to Winsted, the latter place three miles from Truckee. This will be sub-contracted to Chadwick & Sykes, who are now engaged in the work near Floriston, where the use of machinery is making the roadbed look greatly improved from a few weeks ago.

A contract was also let for work on the Southern Pacific between Colfax and Blue Canyon, operation to begin immediately.

NEW LINE TO RICHMOND.

RICHMOND, Aug. 14.—The Southern Pacific Company today commenced the work of extending its electric system into Richmond. A work train and 150 men started grading at the junction of Twenty-third street and the Cutting boulevard. The B. W. Perrin Company has the contract for the work, which will cost $1,085,000, and will be completed in ten months. The extension, including the loop line in Richmond, will be nine miles long. The new line will connect with the Ninth street line at its terminus in Albany.

The line will run from the Southern Pacific station in Pullman at the base of El Cerritto hill, westward on Cutting boulevard to Washington avenue in Point Richmond. The proposed loop line, for which the company is now seeking a franchise, will run from the corner of Washington avenue and Cutting boulevard through West Richmond back to the main line tracks of the Southern Pacific at Albany. The streets in the addition in which it is proposed to extend the line have not yet been named.

NEW HOTEL FOR LODI.

LODI (San Joaquin Co.), Aug. 14.—The new hotel for Lodi is practically assured now. J. Gilbeau asked the Trustees last night if he would be granted a liquor license provided he built a new modern hotel on the corner of Sacramento and Elm streets. The hotel will cost about $35,000 and Gilbeau has a prospective tenant.

NEW RIVER BOAT NEARLY FINISHED.

SACRAMENTO, Aug. 14.—Work on the steamer Fort Sutter, a new boat being built by the California Transportation Company for service on the Sacramento River, as the sister ship of the Capital City, has progressed very near to the close and it is believed that the craft will be on the water in a comparatively short time. The steamer will be in operation before the end of the year, at the latest, it is reported.

The new craft is being built in South San Francisco, and will be a credit to the principal inland waterway of the State in every particular, its builders declare.

It is estimated that the cost of the Fort Sutter will run $10,000 higher than that of the Capital City, making the total $190,000. The Capital City is now by far the most expensive boat operating on the Sacramento. The additional $10,000 to be put into the Fort Sutter will be spent mainly on details of finish.

BIG BUILDING ON OLD EQUITABLE SITE.

NEW YORK, Aug. 14.—The Equitable Life Assurance Society has sold to a syndicate headed by General T. Coleman Dupont of Wilmington, Del., the block known at 120 Broadway, the site of the society's old home, which was destroyed by fire last winter. The purchasers will locate a thirty-six-story office building on the site. The new structure will be known as the Equitable building, and the Equitable Life Assurance Society will make its home there. No definite figures can be named, but it is known that the Equitable has been asking $14,000,000 for the property.

SAN JOAQUIN RESIDENTS AGAINST SUISUN BRIDGE.

CHRISTIAN COLONY (San Joaquin Co.), Aug. 14.—At the meeting of the Northern San Joaquin County Protective Congress at Lavella School House, the committee appointed to solicit fruit and other farm products for the exhibit at the State Fair reported that large amount of fruit and other products had been promised.

The Congress passed a resolution opposing the proposed railroad bridge across the head of Suisun Bay. Assemblyman J. W. Struckenbruck was appointed to go to San Francisco as a representative of the Protective Congress in support of the resolution.

The main objection to the construction of such a bridge is that it will be a detriment to navigation and injure the shipping facilities between Stockton and San Francisco, and would result in loss of time in getting produce to the markets, thereby increasing the rates of transportation to San Francisco.

SCHOOL BONDS SOLD.

ALTURAS (Modoc Co.), Aug. 15.—The additional $7,500 issue of Alturas school bonds was bought in by an Ohio firm slightly above par today. This gives funds for the completion of the building which, thoroughly modern in every respect, contains eight large, thoroughly lighted, class rooms. The building is of stone, cement, brick and

metal with maple flooring, and is situated on one of the best sites in town.

ELECTRIC HEATING IN SWEDEN.

(From Consul Douglas Jenkins, Gottenborg.)

According to the director of the Gottenborg municipal gas and electric power station, the experiments carried on in Gottenbor last winter prove that it is practicable to use electricity for general heating purposes, and formal notice is now being given to the effect that the city is prepared to dispose of a certain amount of electrical energy for this purpose. (These proposed experiments were referred to at some length in a report by Consul Fuller, published in Daily Consular and Trade Reports for Jan. 6, 1912.)

Since the current for heating can be supplied only between certain hours in the night, it is necessary to have the heat stored in accumulators of some sort to prolong it into the day. For this purpose the ordinary Swedish tile stoves are used, as well as specially constructed accumulators made of pot stone or similar material.

Results of the Experiments.

In the 22 experiments arrangements were made for heating 86 rooms, 55 ordinary tile stoves being fitted with the necessary apparatus, averaging 1.42 kilowatts, and 19 smaller stoves with an average of 1.72 kilowatts each. In the experiments 87,473 kilowatts were consumed. The results were found to be rather different in different apartments, much depending on the arrangement of the different heating devices. In 7 of the experiments the cost of the energy consumed was calculated at 3 ore (ore equals $0.00268) per kilowatt, while in five instances it was between two and 3 ore and in 10 cases less than 2 ore per kilowatt.

Price of Electricity for Heating Purposes.

The director of the municipal plant informs the city council that as a result of the experiments he is convinced that heating living apartments by means of electricity is economically feasible at a price of 3 ore per kilowatt, provided proper arrangements are made for installation and storing. At his suggestion the price to the consumer has been fixed per kilowatt year, with an additional price per kilowatt hour to prevent wasting.

The city is therefore offering electric energy for heating purposes during at least 8 hours per night at 25 crows ($6.70) per maximum kilowatt year plus 1 ore per consumed kilowatt hour. It is said that nearly everyone who used the experimental heating apparatus during the past winter was satisfied with the system and results. Its management is very simple because connection and disconnection are made automatically. The consumer has only, in case of need, to regulate the effect. The system is clean and hygienic, and can be used in many cases where other methods of heating would be impracticable or impossible.

FOREST FIRE IN PLUMAS.

GREENVILLE, Aug. 15.—Women and children are striving tonight with the men of this town in an effort to subdue a forest fire that has swept more than ten acres of fine timber land.

Assistance has been summoned from surrounding settlements for the fire is far from being under control, and is running toward the Peck Valley.

The fire is two miles from Greenville and unless the wind changes there is no danger for the town. So far the damage will approximate $15,000.

Govrnor Wilson, in his letter of acceptance of the Democratic nomination for President, states that within three years the routes of commerce of the world will be changed for all time. In that change San Francisco hopes to benefit and to ultimately come to its own. In commemoration of this great event the city is preparing to celebrate the event by a great exposition on the greatest harbor of the Pacific Coast. And the city and state naturally expects that expansion and growth which will come from the routing of the world's commence through the north Pacific and the cutting in two of the distance around Cape Horn.

Many people do not see where the canal is to benefit this city or the state. According to their view the increase of transportation facilities and the cheapening of freight rates will also cheapen the cost of manufactured articles, and, as our standard of wages is higher here, it will militate against the upbuilding of manufactures here on this coast. So also they argue that the class of immigrants to come will lower the standard of living and in the main not be desirable acquisitions to the several classes to which they will ultimately belong.

In answer to these views it may be said that San Francisco, having one of the finest harbors in the world is also the key to the Pacific ocean. These geographical facts should be borne in mind. It is further from San Francisco to Panama than it is from San Francisco to New York. Also that when the master mariner charts his course from Panama to the ports of the Orient the shortest route takes him within 200 miles of San Francisco. This city is therefore a natural station in the world's line of commerce.

More than this the country of the great west has vast undeveloped resources. Its climate is superior to any in the world. Its productivity is limited only by the water supply and that is daily being made more abundant by conservation, reclamation and irrigation. The vast water power of the roof of the continent is being rapidly harnessed. Cheap power means cheap production and increased production in every department of industry. It means irrigation to the farmer, power to the manufacturer and cheaper transportation to all.

California produces three-fifths of the oil of the United States. This solves in a measure the long felt want of fuel, one of the chief drawbacks to the establishment of manufactures on this coast.

The labor question in some instances will have to be adjusted. Generally speaking the laborer's condition here is better than elsewhere. Other places should be raised to the same standard. There are certain instances of classes of labor that are paid wages out of all proportion to other trades and these will have to be readjusted if we are to compete in any degree with other places.

The land is being subdivided into small tracts and intensive farming is the natural result of the increase of population. This means the reclamation of larger and larger areas of land, the increase in the production of farm products by many fold. The mountains still contain the precious metals and vast stretches of land scarcely know the imprint of the white man's foot.

This country is capable of great development. It will come by addition to population. The canal itself will tend to bring immigration and from increased commerce, increased transportation facilities, and in the advertisement that increased travel will give, population will tend to rapidly increase. The canal will naturally shorten the distance round the world. The products of the state will find a ready market and the market will increase the production. From all these things it looks safe to predict that the exposition of 1915 will find the city and state well on the road to great development and that the exposition will not be followed by a depression in any degree comparable with that which has followed expositions in other places which have not had the reasons for substantial growth behind them.

Los Angeles and Pasadena have armed a hunter with a wide mouthed shotgun and sent him out in the early morning to exterminate the English sparrow. It has not been reported with what success he is meeting, but it is safe to infer that the sparrows have made themselves scarce around in his immediate locality. This is a step in the right direction for next to the common housefly the sparrow is an unmitigated pest. He lives in the street, eats from the gutter, and has a voice and song that is far from musical. He is a tough citizen and like the hoodlums of the city goes about in bands and exterminates the song birds. He may be better than no bird at all but that is very doubtful, and certainly he is not worth the sacrifice of all the native song birds that make the day glad with song and their symbolism of the season.

It is related that some woman imported the English sparrow from Europe as a pet. Now, like the thistle and the cockle bur he has become a pest. Not only in the cities is the bird a persistent denizen of every nook and alley, but he has invaded the country and destroys the fruit and products of the orchard. He brings on birds to his level which is the lowest and instead of the pleasant and inspiring bird song, the only thing we hear is the raucous twitter on the brick walls, in the gutters and on the pavements.

Other cities should take the example of Los Angeles and Pasadena and exterminate him from the parks and open places. The crusade against him. As the school boy orators used to say: "The English sparrow must go."

In the Continental Building and Loan Associations' case [illegible] for the board of directors [illegible] rushed into court and secured an injunction restraining the Building and Loan Commissioner from taking charge of the institution. [illegible]

ground that the officer had no right to interfere and that the law is unconstitutional.

The Attorney General comes forward with a different proposition to offer. He says that the law is mandatory, that when the Building and Loan Commissioner finds such an institution insolvent he must at once take charge. This he has found in the case of this association. So that, as the Attorney General has pointed out, the question is for the Board of Directors to assume the burden of proof and not the officer a tax the discharge of his duty imposed upon him by law.

The proposition will then be tried on its merits, the commissioner acting in accordance with law and the Board of Directors showing cause why he should not proceed to liquidate the affairs of the Association. This puts a different phase to the matter as the law will be constitutional until declared otherwise by the courts as is the proper course to pursue.

All this agitation about the recall and the return of government to the people is having a salutary effect. In affairs like this where it has been the custom of the powerful to get favors and restraining orders from courts when it puts poor litigants at a disadvantage is being improved. In other days such an injunction no doubt would have issued and it would have been up to the commissioner to prove the constitutionality of the law before he could have taken charge.

It may be that the association is solvent and that everything that the Board of Directors assert is true. If that is so it can be proven. In any case the Building and Loan Commissioner has acted upon the report of his accountants and is within the law. It is no more reasonable for the general public to accuse him of ulterior motives than to make the same accusation against the management of the bank.

Progress in the matter of wireless communication is being registered daily by the active inventor. The Federal Telegraph Company which has for some time been doing commercial work in direct competition with the Western Union and Postal Telegraph systems has just completed a station at Honolulu and will from now on be able to be in direct competition with cable lines. The system used is the Poulsen system, a Danish invention for which the company claims many possibilities with apparent ability to absolutely demonstrate.

Wireless telegraph is surely becoming an important factor in the industrial life of the world. The capacity to send messages at a high rate of speed and with absolute secrecy is demonstrated every day by the work which the Federal Telegraph does which includes all kinds of commercial and newspaper service. The cost of establishing stations and of maintenance is comparatively small. If the intangible ether can be harnessed and used as a means of electrical transmission without the necessity of any other conductor a remarkable advance has been made in the field of science.

Land sales in California continue unabated. Last week the J. G. James tract, comprising many thousands of acres, was sold to capitalists who intend to subdivide it into small farms. Lesser sales of country land are recorded every day throughout the state, particularly in Superior California.

The railroads have agreed to keep the tourists' rates on the transcontinental railways all the year round and from the action that is being taken it looks like California is surely, if slowly, coming into its own and each year will see a goodly number of desirable homeseekers added to its population and more and more land reclaimed to cultivation.

The rapid development of power industries means cheap power for irrigation, transportation, and manufactures and it means the reclamation of more and more land from the desert and from the floods of the rivers and swamps.

The great problem of the future is the reclamation of the arid lands of the west. The vast stretches of the desert whose level leagues for miles lie, a barren waste and stretching to the sky, await only the life-giving water to make them the most productive regions of the world. In many of these places where water is not available, irrigation is possible from deep wells and cheap power will furnish the means of bringing it to the surface. The soil and climate are there and wherever the means is solved to get water a desert is changed into a garden and a desolate land teems with prosperous cities and blossoms with the flowers of culture. The magic word of prosperity for all the west is irrigation and intensive farming and on these lines will develop the future of the great land that lies west of the Rockies.

A distinguished scientist of Paris has come forth with a proposition that the French government convert the Sahara desert of Africa into an inland sea. He claims that about one-quarter of the whole desert lies below sea level, and that by the construction of a canal some fifty miles long from the Balearic Islands of North Africa an inland sea of half the size of the Mediterranean would be created that would help to transform the most sterile and forbidding area of the world into a fertile land.

According to his prophetic vision the consequences of such an undertaking would be gigantic. All the upland not covered by water would be transformed into productive areas as rich as any of Southern Europe, and the sea itself would furnish a means of transportation and trade with an hitherto unknown country.

This is a great scheme and seems to be feasible. The engineering features are not as hard to solve as was that of Panama. And the prospect of opening to settlement half of the second largest continent in the world is certainly a problem big enough to attract the energies of the greatest men of the world.

The Sahara has always been the land of mystery. The hot and shifting sands, the dreaded simoons and the lack of water of this great region have interposed almost impassible barriers to the explorer and the geographer. From the earliest time the maps of the world have called it an unknown land and peopled it with horned hippogriffs and cinnamon drive. It has always been and still is one of the most interesting places in the world. And the only wonder is that it has not received more attention from geographers and explorers instead of the wastelands of the world and the frozen zones.

A great deal has been conjectured about the probable effect of flooding this area on its probable effect in changing the present center of gravity of the earth and its influence on the climate of Southern Europe. Neither of these seems to have any real merit, but the only question is the feasibility of the enterprise. It is a great problem, the solution of which the world will watch with interest.

The Call goes into spasms over the fact that somebody at Democratic rink made the assertion that Johnson and the Progressive party aided woman suffrage, and points a big headline saying "Hoch on Aid Women." Bah! Persons at last have "bah" again. The only allusion that was made was when a woman spoke, and it was her statement as much as anything else that Johnson and the Progressives were the active proponents of woman suffrage.

It would have perhaps been highly appropriate for the Governor to get up and dispute what was said. It cannot be denied that Johnson did advocate woman suffrage. He did not make it a prominent issue in his speeches, but gave it active and unqualified support, and was responsible to more than all the noise that such papers as the Call could raise.

The fact is that those hireling papers are looking around for something that they can make capital of for themselves that people may put little attention to them. The Call made a great to do about votes for women, but it is alleged in private that the Democratic would have carried by just as large majority if it were on the other side of the fence.

The following is the text of the Nelson Manufacturing Company vs. The Veterans Home A. C. case, over which in the superior court and before a jury which has just rendered a verdict of $1,000 in favor of the plaintiff, as the case seems to appeal the case may go up to a higher court for the final verdict on the direct law, there is not the case will run its course.

There is soon to come into operation of and order and filing of briefs in the case. The original action involved a great deal of notoriety through the newspapers, and the action now taken is said to signify well pleased.

The law is working satisfactorily to all concerned. When the people and the lawyers and judges find out what is really meant by the law there will be no difficulty in its application and everybody will profit by knowing exactly what to expect in a given case. It has simplified procedure. It is definite and fair to all concerned.

Los Angeles is having plans drawn for a municipal railroad between the center of the city and the port of San Pedro and proposes to issue bonds for the construction of the twenty-two mile line.

Until the present railroad commission cut the rate for this haul the charge was a great hardship between Los Angeles and San Pedro

as it was between Los Angeles and San Diego and those cities are the distance of 125 miles apart.

Municipal ownership is the most effective means of breaking up private monopolies. In Pasadena the municipal lighting plant has served to reduce the cost of light for the southern cities to about one-half of what it used to be.

The city has come forward with a proposition to buy the property of the Spring Valley Water Company for $38,000,000. This is $2,000,000 more than the company offered to sell for in 1909. However it is considered that the figure is a fair valuation, and it is a certainty that it is all the property is worth. The report of Engineer Freeman has furnished the basis for and actual basis upon which to make the offer. For years past the city has been fighting over the proposition of using the Lake Tahoe supply. That supply is ample and adequate under the permit granted, and it was less objectionable in every degree less available than the Hetch-Hetchy. There is now a definite plan of acquiring the water, and the mayor and officials are going ahead in a legal and systematic manner. It is high time that something was done. The city is growing by leaps and bounds and must have water for present needs let alone looking to the future

MR. ARCHITECT, Give Your Owner the BEST

Discriminating Conduit Users Specify

CENTRAL RED

It Stands Out as the Best of Rigid Conduits

In the manufacture of this especially prepared conduit, we have taken advantage of every refinement known to the profession and have utilized the experience of producers of this class of material for the past twelve years, in evolving a coating for pipe that is an ABSOLUTE PREVENTATIVE of deterioration in the pipe under the most trying conditions.

The utmost care has been taken to thoroughly clean and to remove all scale and silicates before giving the pipe a coating of zinc by our own special process. This exterior coating is absolutely continuous, free from pin holes and other objectionable features. The coating of zinc prevents rust and insures against any deterioration in the pipe. Over the zinc exterior, two layers of our own especially prepared red enamel are coated, great care being observed to allow only a very thin layer to adhere to the threads, thus avoiding the necessity of recleaning them and to maintain perfect electrical contact. The red enameled interior provides a smooth, slippery raceway, facilitating fishing.

The salt air of sea coast cities, so injurious to all other classes of conduit, has no appreciable effect upon "CENTRAL RED," and we heartily recommend its use in these localities and wherever conditions are the most severe. It is especially adapted for use in CINDER CONCRETE.

"Try It Where Others Have Failed"

"CENTRAL WHITE"

is as good, if not better than competing brands of electro-galvanized conduit. Adequate protection from deterioration is insured by a heavy zinc coating. Couplings are removed during the electro-galvanizing, so that there may be no unprotected spots on the pipe.

"CENTRAL BLACK"

is especially recommended for its softness and easy working qualities. Our patented cleaning process gives us a product free from roughness.

APPROVED BY THE NATIONAL BOARD OF FIRE UNDERWRITERS

Honest samples of our product furnished on request.

MANUFACTURED BY THE

CENTRAL TUBE COMPANY

Editorial Comment.

A great deal of discussion is going on about San Francisco owning its own water front. The newspapers are giving it notoriety and the speakers generally are for the proposition. This thing should be given the fullest publicity on both sides of the case. The water front of San Francisco means much not only to San Francisco but to the whole state and for that matter the whole west. Other ports are local. This is the port of the great interior valleys.

This agitation comes now when the water front is in the hands of the people. After great improvements have been made. When charges have been reduced and the administration has been taken from the hands of the Southern Pacific Company, who has for a generation controlled it for its own purposes. During all those years there was never a movement started for the city to acquire control. The cause is championed by newspapers that are notoriously against the people and the tool of the railroads and the interests. So that this question of city ownership comes before honest men handicapped by being championed by those who have ever been the servile tools of railroad interests and willing to suppress the truth and stand for any kind of a program.

The water front of San Francisco is the one big prize for the railroads to win. If it is controlled by local politics the corporations probably figure that they can control it in any event and in all probability they could. Let there be the fullest discussion of the matter and let the side of the state be fully presented. And if the city is to control the water front let us figure out who is going to control the city when that time comes.

Alva Udell has come out with a petition to recall Governor Johnson. It is a remarkable thing how some insignificant nincompoops can get their names in the papers. If a bank fails Alva Udell has a lot of circulars printed and rushes into print to save the depositors. If there is anything happens he comes into court with some longwinded petition that has about as much relation to the thing at hand as it would to a treatise on astronomy.

And generally the printer isn't even paid for the printing of the various handbills and announcements. What particular notoriety Udell expects to achieve in this instance is hard to see. Probably some reactionary will put up the expense money just to keep the thing going and if possible saddle the state with some expense.

The Continental Building & Loan Association is in the courts. What with injunctions and court orders it looks like it is likely to stay there for some time to come. In the meantime the political powers behind the management seems to be so great as to prevent any criminal action against any one in the concern.

The facts seem to be beyond a question that the Association did not make good and that the Board of Directors if they did nothing else loaded the thing down with salaries that prevented it from making money. This at least does not show good business sense and the blackguarding of the Building & Loan Commissioner and accusing him of ulterior motives comes with poor grace from such a Board. It is also reported that the entire Board held less than 100 shares of the participating stock of the institution. And yet they were holding out every inducement in the world to tempt the poor to put their little savings into the institution. Gavin McNab says they will all be paid. They may be, but in the sweet bye and bye.

Two new ships of the Navy the battleships "Nevada" and "Oklahoma" are to burn fuel oil exclusively. This is of interest to naval officers, the country generally and California in particular. For California produces the great majority of the fuel oil of the country. The advantages are many. Fireroom weights have been reduced about 300 tons, a decrease in the weight of fuel for giving steaming radius as compared to coal and a decrease in the firemen force of about 50 per cent. Storage space is also saved and economics effected in many particulars. These are the big modern dreadnoughts of the Navy and the use of fuel oil will mean a distinct advantage just as it has to the merchant ships.

Senator Penrose, the pet and purchasable tool of Standard Oil, is using his position in the Senate of the United States to cast insinuations concerning the actions of Ex-President Roosevelt.

After the development of the Chicago convention it is not to be wondered at anything that may be said or done by the kind of conventions that control the nominations. Furthermore it would take a good deal to convince any honest and intelligent man of the truth of anything they might say. And the newspapers that are printing pages of stuff that is dictated by people who probably would believe might as well fill their pages with patent medicine ads. It would be more profitable and [illegible] interesting.

The Action of Alkali on Cement Pipe Lines.

By Will L. Brown.

It might be of interest to some of our water companies and individuals and also to some of our contractors in this kind of irrigation, to know some of the effects of alkaline water on cement pipe. A knowledge of when not to use any material is far more useful to that material than to condemn it entirely because it has failed in some instance when it should never have been used at all.

My attention was called some time since to a cement pipe line in the upper San Bernardino Valley, California city that had become "rotten" and failed. In company with two other engineers, I made an examination of the line in question and was much surprised at what we found.

The pipe was about 1,000 feet long, ten inches inside diameter and made and laid under contract as a drain from a pump put situated in a low wet tract of land. The ground water in this tract was from three feet to five feet below the surface in summer, and in winter, water stands in all depressions. The soil itself is coarse grained fine sand and clay, quite heavily charged with those mineral salts commonly termed "alkali."

The "alkali" from this particular locality has never been analyzed as far as I have been able to learn, but is probably of the same composition as other white alkalies of Southern California, viz., the sulphates of calcium and magnesium, together with smaller quantities of sodium chloride, bicarbonate and generally some carbonate. Although it makes a very caustic active solution especially the portion at or near the surface, yet for many seasons the waters working up from below have been found safe with them, and then evaporated, during the succeeding dry seasons, have left excessive quantities of the salts as a white incrustation or efflorescence.

The pipe was a good average cement pipe made under and to specification, and although no especial pains were taken, either in mixing the aggregate or in the process of curing, it would pass inspection without serious objection. It was covered nicely with a neat cement wash to close its porosity. The line was laid from four to eight feet deep, with considerable difficulty, because of water entering trench. Some of the joints were made with plaster paris, but the coating was seldom water-tight.

The third year after having expressions appeared over the line and during the fourth year several large pipes formed some of them eight feet across and of various lengths. In several instances where the earth dropped tunnels were observed extending along the pipe. This soil was caused by ground water entering the pipe two ways, one over a pipe joint. In the fifth year the pump was entirely useless and a new line of vitrified clay pipe was constructed.

An examination of many fragments of pipe taken from the line showed the cement to have almost entirely disappeared from the outer portions of the pipe wall. The sand could be readily crumbled with the fingers, it often being nothing more than a sandy mud. What cement-like material still remained had no life or strength at all.

The inner part of the pipe wall where the cement wash had penetrated about five-eighths of an inch was less affected and retained its form, though possessing little strength. These fragments when allowed to dry in air crumbled and often fell apart.

The disintegration of cement in the action of alkaline solutions has been very carefully investigated by the chemical department of the Montana Agricultural Experimental Station, and also by the Colorado Agricultural College. The results of these independent investigations show a remarkably close agreement, and with a number of samples before me I can come to no other conclusion than that the use of cement pipe in alkaline soils is likely to be a failure of the most unbusinesslike material.

The chemical reactions taking place when the alkaline ground water comes in contact with the cement are very complex. The liberation of calcium hydrate during the process of setting and later hardening of the cement mortar is continued indefinitely even after all water will dissolve and carry away. What we give here is a brief outline taking place in the presence of strong alkaline solutions. [illegible] Montana Experimental Station, [illegible] of M. W. P. Hayden, chemist of the Montana Experimental Station, mentions a couple of cement tiling removed from a [illegible] after being laid only eight or nine months.

These tiles, [illegible] solution, exposed to the [illegible] air to the percolating waters, thus constantly exposing new surfaces, and it is only a question of time when the tiles fail. This affords a ready test to establish the life of cement in irrigation pipe with, and in intermittent flow.

All the ground waters of the Southwestern United States carry a considerable content of these alkali compounds, especially magnesium and calcium sulphates. All sulphates are very active in their action on cement and magnesium sulphate is the most active of all. The water coming from the gravelly mountain cañons this year is very low in proportion. Its action on cement can be clearly observed in every cement lined conduit carrying these waters and a cement mortar lining nine inches thick can often be found to have all dropped away after two or three years of contact with the waters.

More interesting and complete discussions of this subject are given in Bulletin No. 132 of the Colorado Agricultural College, and in Bulletins 69 and 81 of the Montana Agricultural Experiment Station.

Quoting from Circular No. 8, issued by the Montana Experiment Station: "We recognize this as a cement age, but this fact does not warrant its use in important structures by people who have not given it some special study. With our present knowledge we could not advise the use of cement pipes for drains or sewers where they are to be laid in alkaline ground. When prepared as the boundary methods we believe that concrete should not be used where solutions of alkali will come in contact with it. In such pipes or drains the pressure of the ground water tends to force the alkali through the concrete and hasten the disintegrating action."

Here in Southern California where hundreds of thousands of dollars in crop values depend on irrigation, the users of this kind of pipe should investigate this matter for each location or system, as the failure of a pipe line during a critical period in our dry summer might mean the loss of many times the cost of a more durable material.—Cement and Engineering News.

CIVIC CENTER PLAN.

The accompanying plan and perspective view by N. W. Mohr, Architect, is a copy of that submitted to the Mayor and Board of Supervisors July 12, 1912, and suggests a comparatively slight alteration of the Scheme B plan of the Civic Center for San Francisco. Mr. Mohr contention is that this plan, in addition to premitting the completion of the Civic Center in a much shorter time and being superior in aesthetic and utility values, will render the following financial saving for the city:

$365,000 saved by forsaking "Scheme B."	
Market street 175 ft. at $3000 saved	$525,000
Improvements not wanted..	135,000
City Hall Ave. given up, 100 ft. at $500	200,000
City Hall Ave. Improvements avoided	105,000
$965,000 gained	
Hall of Records saved	$ 75,000
Removal of foundations saved	30,000
Foundations gained for auditorium	40,000
Street paving, sewering, etc. done	150,000
$100,000 gained by Difference between McAllister street lands which is replaced by cheap values along Franklin street	$400,000
$1,100,000 Condemnation of large costly buildings not torn down or done away with	$1,100,000
$2,760,000 Total savings	$2,760,000

Dealers' and Contractors' Association News.

San Francisco Local Seats Metal Men.

(By Major W. S. Scott).

The regular meeting of the Contractors' and Dealers' Association was held Monday as usual in the Assembly Hall of the Builders' Exchange. President J. E. Steere presided. All of the affiliated associations were represented. Numerous matters of importance to the business were discussed and disposed of. The Master Sheet Metal Contractors' Association was elected to membership and their delegates will be seated at the next meeting. Owing to next Monday being Labor Day the next regular meeting will be held Wednesday, September 4th, at 1:30 P. M., in the Assembly Room of the Builders' Exchange.

The regular meeting of San Francisco Local No. 2, of the Contractors' and Dealers' Association, was held as usual in the Builders' Exchange on Monday afternoon. This organization now consists of the Master Plumbers, Master Painters and Decorators, Masons and Builders, Contracting Plasterers, Electrical Contractors, Master Roofers and Manufacturers, Contractors Lathers, Master Steam and Hot Water Fitters, and the Contracting Dampproof Painters' Associations; aggregating a membership of 500 of the leading specialty contractors of the city. All of these associations were represented at the meeting.

The Executive Committee reported that they had held a meeting with the Executive Committee of the Master Sheet Metal Workers' Association, and that the latter committee had decided to recommend that their Association affiliate with the Central Body. The Executive Committee recommended the following plan of procedure for the Association.

Contractors' and Dealers' Association,
San Francisco, California.

Gentlemen: Your Executive Board, to which was referred the task of devising a suitable plan under which the card system could be enforced, beg leave to submit the following report:

That it is the sense of this Board that the card system be put into effect on September 1st, 1912, in the following manner.

That the Association consider all members of the various Affiliated Associations and all persons, firms and corporations engaged in the building business, not members of the Association, fair at the outset, and that no member of any Association or any person, firm or corporation not a member of the Association be considered unfair until a trial is had and the person, firm or corporation declared unfair in the manner prescribed by the Constitution and By-Laws of this Association.

That this Board also recommends that this Association furnish to each member of every Affiliated Association a rubber stamp bearing the inscription, "Member of Contractors' and Dealers' Association." Same rubber stamp to be furnished to the members at cost and to be loaned to each member with the understanding that the stamp can be recalled at any time that the member may be declared unfair by the Central Body, in accordance with the terms of the Constitution and By-Laws. This stamp to be used in lieu of the sticker called for in Section 8 of Article II of the By-Laws and that every member be compelled to affix this stamp on all bids and stationery, and that failure to affix such stamp be punishable under the terms of Article III, Section 1 of the By-Laws.

It is the opinion of this Board that this will be a very effective and satisfactory manner of putting into effect the card system, for the Association will then be in a position to know that all the members of its affiliated crafts are in good standing in their various associations and will put the Association on good terms with everybody and gain the confidence of the public, and in case of infractions of the rules the Association could take hold of the individual infractors and give them a fair and impartial trial, and if it were found that they were not complying with the rules to admonish them to do so, and if the admonition did not have the desired effect the Association would use its full force to compel the party accused to comply with the rules; and if necessary the members of all crafts would be ordered to refuse to work with such men or to submit figures to general contractors, owners or architects who persist in dealing with such person, firm or corporation, and that the Association would go further if necessary and notify everybody that such person, firm or corporation was unfair. It is the opinion of this Board that by taking hold of individual cases in this manner the card system will gradually come into effect without friction and eventually all members of all Associations will be in good standing and will thoroughly understand the objects of the Association, and at the same time those outside the Association will see the benefit to be derived by being members and they can be brought into the fold with little trouble.

Respectfully submitted.
JOSEPH AHLBACH,
Chairman Executive Board.

The report of the Executive Committee was unanimously adopted and the Secretary was instructed to supply the various affiliated associations with copyrighted rubber stamps of the Central Body.

The Organization Committee reported that they were busy organizing other associations and that in the near future they expected to add twelve new crafts' associations affiliated with the Central Body. The Steering Committee reported that it had all arrangements made to confer with the Mayor and the Advisory Board of Architects on the following day, at which time they proposed to show conclusively to the Mayor and the Board that it would be better and cheaper to segregate future city work for the reason that if the work were let segregated the city would have the benefit of competition from all of the leading specialty contractors, and that with the guarantee of the Contractors' and Dealers' Association that all members would fulfil all contracts and conform to all plans and specifications signed by them the city would be certain of having its work rushed to a speedy conclusion in a satisfactory manner. The Secretary reported that he had written a letter to all the general contractors in the city informing them of the aims and objects of the Association, and assuring them that it would be to their advantage to encourage its growth by co-operating for the general good of the business.

News Of The Sacramento Local D. and C. Association.

(By Frank Shilts).

Sacramento, Cal., Aug. 22, '12.

The Contractors and Dealers Association of California is forging right to the front, the different associations report a healthy increase in membership, which is very gratifying to the officers and shows the interest manifested by the specialty contractors throughout the State. It is the intention of the Executive Board to place an organizer in the field as soon as satisfactory arrangements can be made.

Stockton Local No. 4, the last to join our forces, has completed the organization and has the card system in effect. Secretary Collins reports that every thing is moving along nicely.

San Francisco Local No. 2 reports increasing membership and is looking forward to having the Sheet Metal Workers' Association affiliate within a few days. Major Scott, the congenial Secretary of the S. F. Local, with the assistance of Mr. J. E. Steere, President, is busy interesting the different associations to affiliate with the state organization. Sacramento friends are pleased to note that the Major is running way ahead on the ticket for Assemblyman of the 28th district, and agree with a member of the San Francisco Local who paid us a visit a few days ago, that there will be no doubt of the Major's success at the primaries. The State Association, as enclosed the Major's candidacy.

The Oakland specialty contractors have withdrawn from the Builders' and Builders' Association in that city, and are very much interested in the plans of this association. We expect to have them organize under our rules and to put the card system in force at an early date. Presidio Chief, Los Angeles and other cities are knocking at the door for admittance.

Sacramento Local No. 1 is thoroughly organized, the card system is working to the satisfaction of all, the [illegible] being used [illegible] the merits of [illegible] other cities [illegible] to our members.

Mr. George Herbst, manager of the Builders' Association of [illegible]

debate for Supervisor of the Second District, Sacramento Local No. [illegible] endorsed the candidacy of Mr. Herndon and we know he will receive a unanimous vote.

First Lutheran Church, Berkeley, masonry. Architect [illegible] Berkeley, will receive bids for [illegible] concrete church, [illegible] to cost about $[illegible]. Plans are [illegible] Berkeley Bank Building [illegible] and [illegible] cost.

Mr. George L. Herndon, the popular and successful [illegible] Second [illegible] was in San Francisco the latter part of the week. Mr. Herndon is a candidate for Supervisor in the Second Supervisorial District of Sacramento County. He has the best wishes of all the contractors in San Francisco, all of whom are well acquainted and all say that he will be elected. As he is a man of large [illegible] who is [illegible] and [illegible] we feel sure everyone who [illegible] will be pleased to cast their vote for him. The building [illegible] Nob Hill [illegible] cost [illegible].

Firms desiring news on special classes of buildings such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again reported under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

San Francisco.—Apartment [illegible] story and [illegible] Lyon [illegible] Avenue, between Walker & Eliot, Western Addition Block Permit No. [illegible], Owner, S. P. Dollar. The building will be constructed [illegible] a frontage of [illegible] feet and a depth of [illegible] feet. The building will be [illegible] three stories [illegible]. There will be wall [illegible] and steam heat. The exterior will be finished in pressed brick. The [illegible] plastering and [illegible] Plans are [illegible] pages [illegible].

San Francisco.—Apartment [illegible] stories and [illegible] reinforced concrete, [illegible] Avenue, between Mallorca Way and Ulloa Street, [illegible] Owner, P. A. Nelson. Mr. Meyer [illegible] and the [illegible] will be [illegible] the [illegible]. All [illegible] will be [illegible] and [illegible] providing [illegible] covering [illegible] will be [illegible] Plans will be [illegible] Mattanovich.

San Francisco.—Apartment [illegible] stories and [illegible] reinforced concrete, [illegible] Avenue, between Lake and [illegible] Streets. S. P. Owner, [illegible] Architect [illegible] 28 apartments will be [illegible] in suites of [illegible] bedroom, [illegible] dining room and kitchen. There will be [illegible] steam heat. The exterior will be finished with [illegible] The estimated cost will be [illegible] Plans will be prepared [illegible] plaster on metal lath. Plans are [illegible] the present.

San Francisco.—Apartment [illegible] stories and [illegible] reinforced concrete, [illegible] Avenue, between H Street and [illegible] Street. Owner, [illegible] Architect [illegible] Building [illegible] Francisco. The building will contain [illegible] rooms and [illegible] bath. There will be [illegible] steam heat. The exterior will be finished in [illegible] plaster. Plans are now being prepared.

Oakland, Cal.—Apartment house, [illegible] story and [illegible] brick, [illegible] Avenue, between [illegible] Avenue and [illegible] Street. Owner, A. [illegible] Architect, [illegible] Building, San Francisco. The building will contain [illegible] apartments of [illegible] rooms each. All suites will have [illegible] and there will be [illegible] steam heat and a vacuum cleaning system. The exterior will be finished with [illegible] plaster. Plans are [illegible] taken.

Los Angeles, Cal.—Apartment [illegible] and [illegible] Cost not [illegible] Avenue, between [illegible] & [illegible] Building, L. A. Owner, [illegible] Hotel Co., [illegible] Building, L. A. Owner. The building will [illegible] and will contain [illegible] rooms which will be [illegible] suites of [illegible] rooms each. There will be [illegible] and private baths. The [illegible] equipment of the building will be steam heat, both freight and passenger elevators and a vacuum cleaning plant

BRIDGES, DAMS AND HARBOR WORK.

Marysville, Yuba Co., Cal.—Bridge, steel or concrete, $30,000. Engineer, County Surveyor, Marysville. Owners, Yuba County. Bids for the construction of a steel or reinforced concrete bridge at Parks Bar were opened and have been taken under advisement. The following is a complete list of the figures submitted: F. A. Cantlume, San Francisco, concrete, $34,500; Mervyn-Elwell Co., Oakland, steel, $28,045; Dundons Iron Works, San Francisco, steel, $28,200, concrete, $28,000. Ross Construction Co., Sacramento, steel, $25,940, concrete, $39,947. Chico Construction Co., Chico, steel, $29,800; Portland Concrete Pile Co., Portland, concrete, $31,600; Burrell Bridge and Construction Co., Oakland, steel, $28,-770.

Seattle, Wash.—Harbor development, buildings, wharfs, etc., $5,000,000. Engineer not selected. Owners, Pacific Holding Corporation.

The following information was secured from a member of the Holding Corporation, which is composed of W. A. Starrett, of Thompson-Starrett Construction Co., of New York; Paul Starrett, Vice-President of the Fuller Construction Co., of New York; R. F. Ayers, formerly of the Bush Terminal Co., Chas. Fenn, Leary Bldg., Seattle, and Palmer Woodbury, of New York.

It is also reported that the Holding Corporation has selected a Seattle architect who will be placed in charge of the architectural department without delay.

The Corporation agrees to erect the following list of buildings, which is substantially the same as when the proposition was first placed before the public:

Six story warehouse, $480,000. 30 1 story warehouses, 75X100 feet, $90,000. 20 1 story warehouses, 100X100 feet, $120,000, 10 miles of railroad, $100,000, harbor equipment, tugs, lighters, etc., $115,000; rail equipment, engines and flat cars, $170,000; 4 industrial buildings, $1,200,000, bulkheads, $300,000. Two piers 1400 feet long will be built by the company at once at a cost of $1,000,000.

CHURCHES.

Oakland, Cal.—Church, steel and brick construction, $150,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, First Methodist Church of Oakland. Reports from reliable sources state that the total of the subfigures received by Schneibly-Hostrawser & Pedgrift for the construction of the First Methodist Church in Oakland are some $30,000 above the estimate. Chairman Morton of the Building Committee has notified Architect Norman F. Marsh and he will either prepare new plans or make extensive reductions. In either case the construction will still be handled by Schneibly-Hostrawser & Pedgrift on a percentage basis.

Seattle, Wash.—Church, 1 story brick and frame, $35,000. Architect, David J. Myers, Central Bldg., Seattle. Owners, Westminster Church. A recent competition, held to secure plans for this work, resulted in the selection of Architect Myers. Only the preliminary plans have been worked out and complete details of the building will be published later.

FACTORIES & WAREHOUSES.

Oakland, Cal.—Warehouse, 6 story and base, reinforced concrete, $60,000. Architect not selected. Owners, Bekins Van and Storage Co. This firm has recently purchased a lot on Grove street which they intend to improve with a fireproof building. The structure will be 140X150 feet and designed for large storage space and smaller concrete storage apartments. Full particulars of the work will be given as soon as an architect is selected.

Los Banos, Santa Clara Co., Cal.—Abattoir, 1 story, reinforced concrete, $70,000. Engineer, Chief Engineer, Miller & Lux, Merchants' Exchange Bldg., S. F. Owners, Miller & Lux. The building will cover an area of 75X81 feet and will be entirely of reinforced concrete. Special machinery and sanitary equipment will be installed. Bids have been taken and are now under advisement.

Seattle, Wash.—Factory, 3 story and base, reinforced concrete. Cost not stated. Architect, none. Owners, C. C. Pierce and associates. Contractors, Franklin Engineering Co., Arcade Annex Bldg., Seattle. Contract price not stated. The present work includes the construction of the above mentioned building and a one-story reinforced concrete mixing building. Other work will be undertaken shortly, and the ultimate expenditure of the company will reach $500,000.

FIRE HOUSES.

San Francisco—Fire house, 2 story and base, brick and steel. Cost not stated. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the North Beach station, which is to be erected on Greenwich street, have been approved and are now in the hands of the Board of Public Works. Bids will be opened for the construction on September 11th. The exterior of the building will be faced with pressed brick. Plans can be seen or from the Architectural Dept. F. official proposal see under Sealed Proposals in this issue.

Reedley, Fresno Co., Cal.—Fire house, 1 story brick. Cost not stated. Architect's name not given. Owners, City of Reedley. The building will contain space for one company with living rooms in the rear. The exterior will be faced with pressed brick. Plans can be secured from the Secretary of the Reedley Fire District. Bids will be opened on August 31st.

Contracts Awarded.

San Francisco—Fire house, 1 story and base, frame and concrete, $6,000. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. The following bids were opened at the last meeting of the Board of Public Works for the construction of Chemical Engine House No. 12: Elder Carlson $4,795 Commany & Peterson $8,150 Monson Bros. $8,150 Pringle-Dunn Co. $8,975 Frank Gallagher, $8,490; M. M. Finlayson, $7,-750 Heckenmeyer & Scott, $7,900. Weil & Kohn, $7,965. J. W. Carr, $7,900.

FLATS.

San Francisco—Flats, 2 story and base, frame, $5,000. Architect, none. Owners, Rueg Bros., 636 Pacific Bldg., S. F. The building will cover a lot 25X61 feet and has been designed to contain four flats of five rooms each. The interiors will be finished entirely in pine. There will be large bath rooms and open fire places. The exterior will be covered with sculptap. Plans are complete and the work will be done by Day Labor.

San Francisco—Flats, 3 story and base, frame, $7,000. Architect, none. Owner, Forest Wayman, 140 Cole St., S. F. The building will be erected on Haves street and will contain three large flats of six and seven rooms each with baths. The interiors will be finished in pine and redwood with some hardwood floors. Tile will be used in the bath rooms. There will be gas grates and tile mantels. The exterior will be covered with shingles. Plans are being prepared by the owner.

San Francisco—Flats, 2 story and base, frame, $10,000. Architects, H. Geilfuss & Son, 46 Kearny St., S. F. Owner, name withheld. The building will be erected in one of the best districts of the city and will contain two large residential flats. Each flat will contain seven rooms, bath and laundry. The interiors will be finished in pine, redwood and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. Both bath rooms will have composition floors. The exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are now being prepared.

San Francisco—Flats, 3 story and base, frame, $7,500. Architect, William Mooser, Nevada Bank Bldg., S. F. Owner's name withheld. The building will be erected at Powell and Johns streets, and will contain three flats of four and five rooms each. There will be modern plumbing, gas grates and pure trap. The exterior of the building will be covered with sculptap. Plans are complete and figures are now being taken.

Oakland, Cal.—Flats, 2 story and base, frame, $6,000. Architect, A. W. Smith, 1060 Broadway, Oakland. Owner, P. Lacomber. The building has been designed to contain two flats of five rooms and bath each. The interior will be finished in pine and redwood with some oak floors. There will be open fire places. The sum of $90 has been allowed to make it. The exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

San Francisco—Flats, 2 story and base, frame, $2,000. Architect, none. Owner, John P. Swenson, 181 Lily St. The building will contain two flats of four and five rooms each with bath. The interiors will be finished in redwood and pine. There will be modern plumbing and sewer connections. The exterior will be covered with shingles and stucco. Plans are complete and the work will be done by Day Labor.

GARAGES.

San Francisco—Garage, 1 story and [illegible] $6,000. Architect, none. Owner, Marian L. [illegible]

Gas Water Heaters

Automatic -- Instantaneous

The "Pittsburg"
The "Bungalow"
The "Lion"

A heater of any size within the purchase price of the masses. "Quick Hot Water at the turn of the Faucet"

and Investment Co. The building will be erected at the corner of Pine and Van Ness. The first floor has been arranged for sales rooms, office and storage space. The upper floor will contain a large repair shop. The interior of the offices and sales room will be finished in marble, mahogany and oak. The exterior of the building will be faced with cement plaster. Plans are complete and the work will be done under the supervision of the Northern Construction Co., Mills Bldg. This firm is now taking sub-figures on all parts of the work.

Los Angeles, Cal.—Garage, 1 story and base, frame. Cost not stated. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Lewellyn A. Parker. The building will cover an area of 50x85 feet, and has been designed for a commercial garage. There will be a cement floor over the entire area. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Colon Water Supply.

In connection with the plans for new water works and purification plant for Colon, Panama, the Canal Record has this to say:

It is proposed to install in the pumphouse the steam pump and boiler equipment in the present pumping station, using to furnish water for all normal consumption. In addition, there will be installed two 3,000 gallon per minute centrifugal pumps, electrically driven, so arranged that by simply throwing the pumps into operation, by closing a switch, 6,000 gallons of water a minute can be delivered into the mains at a pressure, at the lower end of Colon, of 70 pounds to the square inch and providing for from 5 to 18 streams of water in case of fire, it being planned to use these pumps only in times of fire. The steam pumps are so arranged as to pump automatically into the main the required amount of water to maintain pressure at all times, except during a fire, of approximately 45 pounds to the square inch, and, in case of the fire pumps being thrown on the line, the steam pumps will automatically close down, and with the throwing off of the main of the electric fire pumps, the steam pumps will automatically start up.

It is planned to construct the clear-water basin and the power house, and to install the electric fire pumps as soon as possible, also, to so arrange the present standpipe and steam pumps at Mount Hope that there will be available approximately 900,000 gallons of water for use, at high pressure, in case of a fire in the quantity of approximately 6,000 gallons per minute. The shortage of water at Colon during the past dry season, when the Brazos Brook reservoir practically went dry, and water had to be carried in barges to Cristobal from Gatun, or pumped from the Mindi River, itself an uncertain source of supply, makes an adequate and permanent store imperative for the next dry season. At the present time over 3,000,000 gallons of water each day is required for Cristobal and Colon, including wash water for the pressure filters. The new plant has been designed with a view of supplying, if necessary, twice this amount. The present pipe line between Brazos Brook and the plant at Mount Hope, with the reservoir at elevation 48 feet, would furnish the maximum amount needed for Colon at present, but future increases would require the laying of an additional pipe line.

The estimate of cost for the new filtration plant, exclusive of land, is about 18,000 per million gallons of filtered water capacity, and on the same basis, the original cost of the Agua Clara plant at Gatun was about $16,300. The difference between the cost per million gallons for Agua Clara, and the proposed plant, is accounted for by twice the length of the sedimentation and the aeration of the water, together with the fact that he foundation of the filter building at Mount Hope will be on piles. It is believed from past experience that thorough aeration of the water will result in an approximate saving of about 15 per cent of aluminum sulphate, or a saving, taking 6,000,000 gallons as a basis of about $2 a day.

In drawing up the plans for the new plant, estimates were prepared of both the mechanical gravity and pressure type of filter plants. With a pressure plant, it is necessary to force the water through the filter at an approximate net pressure of 10 pounds to the square inch. The additional daily cost in fuel oil alone for this additional work, based on the present operation at Mount Hope, would amount, on 6,000,000 gallons a day, to $4,175 a year, or, based on the average of 3,000,000 gallons of water a day, with a plant having a maximum capacity of 6,000,000 gallons a day, the daily additional cost would be $.58 a day, or $3,131.70 a year. This amount represents the saving to be effected by the mechanical gravity type, which would be practically 8 per cent on the additional investment.

Bureau of Yards and Docks; Pending Projects.

The following projects, bids for which were opened on dates indicated below, are pending in the office of the chief of the bureau of yards and docks:

July 20—For the construction of pier No. 5 and dredging at the Puget Sound navy yard.

Aug. 3—For the construction of commandant's quarters and five officers' quarters at the naval station, Pearl Harbor, H. T.

Prospective Bidders.

The following firms have received plans and specifications for the construction of the U. S. Post Office at Santa Barbara:

King Lumber Co., Charlottesville, Va.

A. B. Stannard, U. S. Rubber Co.'s Building, New York city.

Eugene Schuler (the Northwestern Construction Co.), Wahpeton, N. D.

Grant Fee, 2440 16th street, San Francisco, Cal.

Southwest Contractor and Manufac-

turer, Douglas Building, Los Angeles, Cal.

Thomas W. Dowd, Oakland, Cal.

Wm. Simpson Construction Co., San Diego, Cal.

Wuster Construction Co., Rock Springs, Wyo.

John M. Williamson, P. O. Box 202, Santa Barbara, Cal.

Somers & Lund, Security Building, Los Angeles, Cal.

F. O. Engstrum Co., 5th and Seaton streets, Los Angeles, Cal.

J. H. Wiese, Bellingham, Wash.

Raymond Stone Co., 791 Lyon street, Los Angeles, Cal.

J. H. Wiese, Omaha, Neb.

Reinforced Concrete Storehouse.

The chief of the bureau of yards and docks will receive bids until September 28 for a reinforced concrete storehouse at the naval station, Pearl Harbor, Hawaii. The estimated cost of the structure is $55,000. It is to be 252 feet 6 inches long by 61 feet 4 inches wide. It is to have reinforced concrete beams, girders, columns and floor slabs, except first floor, which shall be plain concrete laid on soil, hollow tile plastered partitions and walls and steel sash, and shall be supplied with an exterior elevator. The roof shall consist of a 3-inch concrete slab with round rod reinforcement. The elevator to be furnished and installed, complete, is to be an electrically operated freight elevator, operated by 3-phase, 60-cycle, 220-volt induction motor. It shall have a lifting capacity of 5,000 pounds at a speed of 50 feet per minute and travel a distance of 24 feet.

Reclamation Machinery.

The Secretary of the Interior has authorized the Reclamation Service to purchase the necessary machinery and erect a sand-cement plant at the Lahontan dam site, Truckee-Carson irrigation project, Nevada, where a large amount of concrete will be required. This concrete will be similar in composition to that approved for use in the Arrowrock dam in Idaho and the Eagle dam in New Mexico, except that in this case the inert material to be pulverized and blended with Portland cement is a fine silicious silt instead of sandstone. The cost of the regrinding and blending plant, consisting of tube mill, motors, elevators, conveyors, storage bins, buildings, etc., is estimated at $11,100, and the net saving, it is estimated, will be about $10,000.

HALLS & SOCIETY BLDGS.

Sacramento, Cal.—Armory, 2 story and base, brick and steel. Cost not stated. Architect State Department of Engineering, Sacramento. Owners, State of California. A recent communication form the State Department of Engineering states that all bids for the Armory Building at Sacramento have been rejected except that of the Ransome Concrete Co., who have been awarded the contract for mason work. All other parts of the work will be handled by Day Labor and informal contract with some changes in the specifications.

Portland, Ore.—Club house, 4 story and base, brick. Cost not stated. Architects, Whitehouse & Foulhoux, Portland. Owners, University Club. The building will be 88x84 feet and will be devoted to the club's use. There will be a large number of bed rooms, banquet hall, lounging rooms, library, etc. The building will be heated by steam. The exterior will be faced with red pressed brick trimmed with terra cotta. The interior will be finished in hardwoods. Plans are complete and bids will be opened on August 29th.

Ashland, Ore.—Armory, 2 story and base, reinforced concrete. Cost not stated. Architect, W. C. Knighton, Salem. Owners, State of Oregon. The building will be 89x135 feet, and will provide for a large drill hall, banquet rooms, offices and a rifle range. The construction will be of reinforced concrete throughout. The exterior will be faced with cement plaster. There will be a hot water system of heating. Plans are complete and can be secured from the State Architect at Salem or from Adj. Gen. Finzer of Portland. Bids will be opened on September 7th.

Contracts Awarded.

Fresno, Fresno Co., Cal.—Lodge hall, 3 story and base, brick, $40,000. Architects, Starbuck & Clark, Fresno. Owners, Woodmen of the World. The following contracts have been awarded on this building: De Chant & Son, Fresno, brick work; Newman & Johnson, Fresno, plumbing; Valley Electrical Supply Co., Fresno, wiring; George Churcher, Fresno, painting; Barrett-Hicks Co., Fresno, sheet metal work; Burnett Foundry, Fresno, steel and iron work, Callaert, Oakland; ornamental cement work.

HOSPITALS.

San Francisco—Hospital work, electric installation. Cost not stated. Architectural Dept., Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids will be opened on September 11th for the installation of the unfinished electric work at the San Francisco City Hospital and for some extra work not provided for in the original plans and specifications. Plans can be secured for the Architectural Department.

Oakland, Cal.—Flats, 2 story and base, frame, $8,000. Architect, A. Merrill Bowser, 1067 Broadway, Oakland. Owner's name withheld. The building will be arranged for four or five room flats. The interiors will be finished in pine and redwood with some hardwood floors. There will be open fire places and tile mantels. Composition flooring will be used in the bath rooms. The exterior of the house will be covered with metal lath and cement plaster. Plans are complete and bids are being taken by the architect.

Santa Barbara, Santa Barbara Co., Cal.—Hospital group of semi-fireproof buildings, $200,000. Architect, George F. Costerisan, associated with J. F. Kavanaugh, California Bldg., L. A. Owners, Santa Barbara County. The above architects were the successful competitors for the new Santa Barbara Hospital buildings, and besides the first prize of $500 cash received the commission to prepare the plans and specifications for the new group of buildings, which will cost $200,000. It is possible the architects say that the construction will be changed from semi-fireproof to Class A. If this is done the cost will be increased to $350,000. The main or administration building will be 220x56 feet in size, three stories and basement, and will contain the general administrative quarters, private wards, chapel, dining rooms and kitchen department, help's quarters, etc. On the other side of the main building will be two, three-story ward buildings and two two-story wings for isolated patients all connected to the central building by enclosed and open corridors. Each of the larger wings will be 200x28 feet in size and will have bedroom space for thirty-two patients on each floor, besides nurses' rooms, private kitchens, toilet rooms and baths. The power house, garage and morgue will be in separate buildings situated in the rear of the main group. The construction as now specified will be semi-fireproof with exterior walls of brick, floor slabs of reinforced concrete and roof of clay tile and composition. The first story will be covered with face brick, the two upper stories cement plastered. There will be an electric elevator, dumb waiters, tile bath rooms and toilets, steam heating and vacuum cleaning.

Bakersfield, Kern Co., Cal.—Hospital, 3 story and base, brick, $50,000. Architect, Orville Clark, Brower Bldg., Bakersfield. Owners, Sisters of Mercy. The building will be 48x80 feet and will have accommodations for 50 people in the wards besides a number of private rooms. A separate building, 30x32 feet, will house the mechanical equipment and laundry. A complete surgical equipment will be installed. There will be steam heat. The exterior of the building will be faced with pressed brick. Plans are complete and out for figures. Bids will be opened in about a week.

HOTELS.

San Francisco—Hotel, 7 story and base, brick and steel, $100,000. Architect, R. L. Holt, 727 Alcatraz Ave., Berkeley. Owners, Somers Estate, Mills Bldg., S. F. The building is projected for the northeast corner of Taylor and O'Farrell strets. The entire project depends upon the signing of a lease, and no information of the construction can be obtained until this is done. If the owners and the tenant fail to agree on terms of the lease, Mr. Somers states that the building will not be erected.

Oakland, Cal.—Hotel, 4 story and base, Class A construction. Cost not stated. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, R. W. Kinney. The building will be erected at the corner of 10th and Washington streets. There will be in the neighborhood of 150 rooms and a large percent of which will have connecting baths. There will be steam heat, elevator service and hot and cold running water in all rooms. The exterior will be faced with pressed brick. Plans are complete and figures are now being taken.

Los Angeles, Cal.—Hotel, 6 story and base, reinforced concrete. Cost not stated. Architect, Fred H. Dorn, Douglas Bldg., L. A. Owner, William I. Kaes. The building will contain 190 guest rooms, and 75 baths besides the main lobby and office. The interior will be finished in red Vera Cruz marble, tile and scagliola used. There will be hollow tile partitions and metal sash and frames. The mechanical equipment will include steam

heat and elevator service and a vacuum cleaning plant. The exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel, 3 story and base, brick, $40,000. Architects, Noonan & Kysor Wright and Callender Bldg. L. A. Owners, Bryan and Pradt ad. The building will cover an area of 75x120 feet. There will be store on the first floor and sixty rooms and twenty baths on the upper floors. There will be steam heat. Running hot and cold water has been provided for all rooms. The exterior of the building will be faced with pressed brick. Plans are being prepared.

Los Angeles, Cal.—Hotel, 3 story and base, brick. Cost not stated. Architect, A. E. Petterstonhaugh, Ferguson Bldg., L. A. Owner, Joseph H. Call. The building has been designed for 56 rooms besides the office and lobby. There will be steam heat and running hot and cold water in all rooms. The interior will be finished in pine. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Los Angeles, Cal.—Hotel, 4 story and base brick. Cost not stated. Architects, Garrett & Bixby, Carrier Bldg. L. A. owner, L. L. Bowen. The building will cover a ground area of 55x100 feet. The upper floors have been subdivided into 62 rooms and 18 baths. Five stores will occupy the ground floor. There will be steam heat. Running water will be supplied to all rooms. The exterior of the building will be faced with pressed brick. Plans are complete and the work will probably be done by Day Labor.

Contracts Awarded.

Torrance, Los Angeles Co., Cal.—Hotel, 3 story and base, brick, $20,000. Architect, Irving J. Gill, Title Insurance Bldg. L. A. Owners, Dominguez Land Co. Contractor, J. M. Thomas, Douglas Bldg., L. A. Contract price, $16,894.

RESIDENCES.

San Francisco—Residence, 2 story and base, frame, $5,000. Architect, none. Owner, Mr. Rudolph Mohr, Crocker Bldg., S. F. The dwelling will contain seven rooms and bath. The interior will be finished in pine, redwood and Jenesero. Floors of all rooms will be of oak except in the bath which will be of tile with tile wainscotting. There will be open fire places with tile mantels. A gas water heater will be installed. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

San Francisco—Bungalow, 1½ story and base, frame, $2,500. Architects, Smith & Stewart, 244 Kearny St., S. F. Owner, Dr. Girley. The dwelling will contain six rooms and bath. The interior trim will be of pine and redwood with oak floors in the living and dining room. Tile will be used in the bath room. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with shingles. Plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, $3,500. Architect, A. J. Marquette, 1572 Broadway, Oakland. Owner, John M. Lankadin. The house has been designed for a seven-room dwelling with bath. The interior will be finished in pine and redwood. Oak will be used in the floors of several of the rooms and composition flooring in the bath room. There will be coal grates and brick or tile mantels. The exterior of the house will be covered with rustic. Plans are complete and figures are being taken.

San Francisco—Residence, 2 story and base, frame, $6,000. Architect, Hermar Barth, 12 Geary St., S. F. Owner, Mrs. P. S. Beel. The dwelling will contain about seven rooms and baths. The interior will be finished in pine, redwood and oak. Oak will be used in the floors of the principal rooms. The bath room will have composition floor and tile wainscotting. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior will be covered with shingles. Plans are complete and figures are being taken.

Oakland, Cal.—Residence, 2 story and base, frame, $2,000. Architect, none. Owner K. M. Sheridan, 5140 Boulevard, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. The interior trim will be of pine throughout. Oak will be used in the floors of the living and dining rooms. There will be open fire places and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame $2,500. Architect, none. Owner, K. M. Sheridan, 5140 Boulevard, Oakland. The dwelling has been designed for a six-room house with bath and sleeping porch. The interior trim will be of pine throughout. Oak will be used in the floors of the living and dining rooms. There will be open fire places and tile mantels. The exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $3,000. Architect, Olin S. Grove, 2911 Telegraph Ave., Berkeley. Owners, Junk-Riddell Investment Co. The dwelling has been designed for a shingled house but will be finished only. The interior trim will be largely of pine and hardwoods with oak floors throughout. There will be furnace heat and open fire places. Mantels will be of brick. Tile and composition flooring will be used in the bath room. The exterior of the house will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Berkeley, Alameda Co., Cal.—Bungalow, 1½ story and base, frame, $2,500. Architect, none. Owner, Samuel Logasa, Hanford Bldg., S. F. The bungalow will contain five rooms and bath. The interior finish will be of pine and redwood with oak floors in the principal rooms. There will be a large open fire place in the living room with an attractive brick mantel. The exterior of the house will be covered with shingles or cement plaster. Plans are being prepared and when complete the work will be done by Day Labor.

Oakland, Cal.—Residence alterations, 2 story and base, frame, $4,000. Architect, William C. Hays, Foxcroft Bldg., S. F. Owner, A. H. Markwart. This work will include new interior finish, plumbing and electric work. Also extensive exterior alterations which will be of cement plaster on metal lath. Plans are complete and figures are being taken.

Piedmont, Alameda Co., Cal.—Residence, 2 story and base, frame, $6,000. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, W. W. Saint. The dwelling has been designed for a nine-room house with bath, sleeping porch and laundry. The interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. Bath room floor will be composition. Tile will be used in the bath and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the architect is taking figures on the work.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $3,500. Architect, Ernest Coxhead, Hearst Hearst Bldg., S. F. Owner, Mrs. A. W. Kibber. The dwelling has been designed for a seven-room house with bath, sleeping porch and laundry. The interior will be finished in pine and redwood with some oak panels. The floors will be of oak throughout except in the bath where composition will be used. There will be furnace heat and open fire places. The mantels will be of brick. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Berkeley, Alameda Co., Cal.—Residence, 2 story and base, frame, $11,000. Architect, Hiram K. Lovell, 1617 Felton St., Berkeley. Owner, Dr. L. H. Ginno. This dwelling will contain 11 rooms, baths, sleeping porch and laundry. The interior trim will be of pine and redwood. Oak floors will be used in all principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Elm panels will be used in the living and dining rooms. Composition flooring is specified in the bath rooms. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Piedmont, Alameda Co., Cal.—Residence, 2 story and base, frame, $4,000. Architect, none. Owner, Lester B. Reiff, 1098 Grand Ave., Oakland. The house will contain seven rooms, bath and sleeping porch. The interior will be finished in pine, redwood and elm. Oak will be used in the floors. There will be a hot water heating system and open fire places. The mantels will be of tile. Cement plaster on metal lath will cover the exterior of the building. Plans are in the hands of the owner and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $4,000. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, Mr. Kerns. The dwelling will contain seven rooms, bath and sleeping porch and laundry. The interior will be finished in pine and redwood with oak floors throughout. The mantels will be of tile. Tile will be used in the bath room and kitchen. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being

taken by the architect.

Oakland, Cal.—Residence, 2 story and base, frame, $3,500. Architect, none. Owner, A. J. Yerrick, 860 36th St., Oakland. The dwelling will contain seven rooms, bath and sleeping porch. There will be pine and redwood interior finish, oak and composition floors and tile wainscotting in the bath room. The dwelling will be heated by a warm air furnace. The exterior will be covered with shingles. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $4,000. Architects, Haar & Davis, 1520 Broadway, Oakland. Owner, C. C. McCapwell. The dwelling has been designed for a seven room house with all modern conveniences. The interior finish will be of pine and redwood. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. The mantels will be of brick. Tile wainscotting and composition floors will be used in the bath room. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland, Cal.—Residences, 15, 1½ and 2 story and base, frame, $4,000, $5,000 and $6,000 each. Architect, Sidney B. Newsom, Nevada Bank Bldg., S. F. Owner, Mark Anthony. These dwellings will mark the opening of a new tract. All will be finished in pine and redwood with some hardwood in the dining and living rooms. The arrangement will vary from six to nine rooms. There will be furnace heat in the more expensive houses and tile bath rooms. All will have open fire places with either brick or tile mantels. The exteriors will be of cement plaster, shingles and rustic. When plans are complete the work will be done by Day Labor.

San Leandro, Alameda Co., Cal.—Residence, 2 story and base, frame, $3,000. Architects, Haar & Davis, 1520 Broadway, Oakland. Owner, Mrs. A. Edwards. The dwelling will contain seven rooms, bath and sleeping porch. The interior will be finished in pine and redwood with oak floors in the principal rooms. There will be a warm air furnace and open fire places. The mantels will be of brick. The exterior of the house will be covered with cement plaster on metal lath. Plans are complete and out for figures.

Elmhurst, Alameda Co., Cal.—Residence, 2 story and base, frame, $5,000. Architect, C. S. McNally, Mechanics' Institute Bldg., S. F. Owner, Mrs. Rider. The dwelling will contain 7 rooms and bath. The interior will be finished in pine and hardwood. Oak will be used in the floors of the principal rooms. There will be furnace heat and open fire places. The mantels will be of tile. The exterior of the house will be covered with shiplap. Plans are complete and figures will be called for shortly.

Oakland, Cal.—Residence, 2 story and base, frame, $4,000. Architects, Hutchinson Bros., 470 13th St., Oakland. Owner, R. A. McWilliams. This house has been designed for an eight-room dwelling with bath and sleeping porch. There will be pine, redwood and hardwood interior finish. The dwelling will be heated by a warm air furnace. There will be open fire places and tile or brick mantels. Floors in the bath rooms will be of composition. The exterior will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Residence, 2 story and base, frame, $4,000. Architect, A. Merrill Bowser, 1007 Broadway, Oakland. Owners, W. J. Mortimer Co. The dwelling will contain seven rooms and bath. The interior will be finished in pine and redwood with oak floors in the principal rooms. The bath room will have composition floor. There will be furnace heat and open fire places. The mantels will be of brick or tile. The exterior of the house will be covered with shingles. Plans are being prepared.

Piedmont, Alameda Co., Cal.—Residence, 2 story and base, frame, $12,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Mr. Higgins. The dwelling will contain in the neighborhood of 12 rooms, 2 baths, sleeping porches and laundry. The interior trim will be of pine and redwood. Oak floors will be used throughout the first floor. The bath rooms will have composition floors. There will be furnace heat and open fire places. The mantels will be of brick. Tile will be used in the baths and kitchen. The exterior of the house will be covered with brick veneer and rustic. Plans are complete and figures are being taken.

Madera, Madera Co., Cal.—Residence, 2 story and base, frame, $5,000. Architects, A. C. Swartz & Son, Fresno. Owner, John High. The dwelling has been designed for an eight-room house with bath and sleeping porch. The interior will be finished in pine and redwood. There will be open fire places and tile or brick mantels. Tile will also be used in the bath and kitchen. The exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Fresno, Fresno Co., Cal.—Residence, 2 story and base, frame, $5,500. Architects, A. C. Swartz & Son, Fresno. Owner, Mrs. M. I. Lowden. The dwelling will contain in the neighborhood of seven rooms and bath. The interior will be finished in pine throughout. Oak will be used for the floors in the principal rooms. There will be open fire places and tile or brick mantels. The exterior of the house will be covered with cement plaster. Plans are complete and a contract will be let at once.

SCHOOLS.

Oakland, Cal.—School, 2 story and base, concrete and frame. Cost not stated. Architect, J. J. Donovan, Security Bldg., Oakland. Owners, City of Oakland. Plans and specifications for this building are complete and bids for the construction will be opened on September 16th. The work called for is in the nature of extensive alterations and repairs to the Fremont School and has been estimated to cost $80,000. For official proposal see under Sealed Proposals in this issue. This work is the first of a large number of Oakland schools which is to be figured, and others will be advertised for very shortly. All work will be done under the direction of Supervising Architect J. J. Donovan.

Santa Barbara, Santa Barbara Co., Cal.—School, 2 story and base, steel and reinforced concrete. Architect, State Department of Engineering, Sacramento. Owners, State of California. This work has been figured before, but, as was stated in these columns, all bids were too high and plans have been revised. These plans are now on file at this office or may be secured from the department at Sacramento.

Los Angeles, Cal.—School, 3 story and base, brick and steel, $250,000. Architect, A. F. Rosenheim, H. W. Hellman Bldg., L. A. Owners, City of Los Angeles. This building is one of the largest of the new schools being built in Los Angeles, and will cover a ground area of 225x192 feet with a wing for gymnasium purposes 60x150 feet. A separate building will house the heating system. All floors will be of fireproof material with a maple surface. Stairways will be of concrete. Interior partitions are to be of metal lath and plaster and hollow tile. The trim will be of oak. The exterior of the building will be faced with pressed brick. Plans are complete and bids will be opened on September 12th. Bids will be opened on September 5th for the construction of the sixteen-room school building to be erected at Wadsworth and 38th avenues. Plans for this building were prepared by Architect A. H. Daum, acting as Supervisor of Construction for the Los Angeles Board of Education. Plans for both of these buildings may be secured from William A. Sheldon, Secretary of the Board, Security Bldg., L. A.

Los Angeles, Cal.—Convent school, 3 story and base, brick. Cost not stated. Architect, A. C. Martin, Higgins Bldg., L. A. Owners, Convent of the Good Shepard. This work has been mentioned here before. Plans for the building are now complete and figures are being taken. The new building will contain the administrative offices and accommodations for 150 girls. The interior trim will be of pine and oak. There will be steam heat, a vacuum cleaning system and special kitchen equipment. The exterior will be faced with gold pressed brick trimmed with terra cotta.

El Modena, Orange Co., Cal.—School, 1 story and base, brick, $20,000. Architect, H. M. Patterson O. T. Johnson Bldg., L. A. Owners, El Modena School District. The building will contain six class rooms, principal's office and teachers' room. There will be pine trim and maple floors. A modern system of heating and ventilation will be installed. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

Glendale, Los Angeles Co., Cal.—School, 1 story and base, brick. Cost not stated. Architect, A. H. Fairchild, 405 So. Maryland St., Glendale. Owners, Glendale School District. The building will have a frontage of 165 feet, and will contain four class rooms, auditorium, teachers' rooms and principal's office. There will be a warm air system of heating. The exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

Heppner, Ore.—School, 2 story and base, brick, $40,000. Architect, E. D. McClure, Portland. Owners, Heppner School District. Contractors, Wakeland Building and Engineering Co., Portland. Contract price, $40,000.

—STORE BUILDINGS—

San Francisco.—Store 1 story, brick and mezzanine, brick and concrete, $10,000. Architect, John Ettler, 601 Mission St., S. F. Owners, Bothin Estate. The building is to be erected at the corner of Polk and Green streets, and has been designed with foundation and walls of sufficient strength to carry several additional stories. The intention of the owners is to construct a modern apartment house on this site. For the present, however, only the one story will be erected. The exterior will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

Oakland, Cal.—Stores and offices 12 story and base. Class A construction. Cost not stated. Architect C. W. Dickey, Central Bank Bldg., Oakland. Owners, Surety Mortgage and Building Co. This building will be erected at the gore of 17th and Telegraph Aves. and will practically adjoin the 15 story building, plans for which are now on the boards in Architect Benj. G. McDougall's offices. The owners have just approved the preliminary studies and details of the construction cannot be given in these columns yet.

Los Angeles, Cal.—Stores 1 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Hibernian Bldg., L. A. Owner, Dr. William Bull, 965 So. Hill St., L. A. The building will cover a site of 100x165 feet. There will be a number of retail stores with patent store fronts. The interior will be finished in pine. A cement floor will cover the entire area. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and he is now taking figures.

Los Angeles, Cal.—Stores 1 story and base, brick. Cost not stated. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Engineers' Fireproof Building Co. The building is to be 80x137 feet and will contain seven stores. There will be pine and hardwood interior finish, patent store fronts and large skylights. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

Aberdeen, Wash.—Stores and lofts, 2 or 3 story and base reinforced concrete. Cost not stated. Architect, J. A. Creutzer, Haight Bldg., Seattle. Owner, N. G. Wheeler. The building will contain two stores on the first floor and lofts on the upper floors. A five story party wall is to be constructed as the owners of the adjoining property have commissioned Architect Creutzer to prepare plans for a structure of this height for them. Both sets of plans will be complete about the same time and figures will be taken for the joint construction of the two buildings.

Seattle, Wash.—Stores 1 story and base brick, $20,000. Architect James H. Schack, Downs Bldg., Seattle. Owner, Joseph Leibly. The building will cover an area of 45x120 feet and will contain two stores and a sub-mezzanine. There will be steam heat. The exterior will be faced with pressed brick. Plans are complete, and bids will be called for at once.

Seattle, Wash.—Stores and offices 16 story and base. Class A construction, $900,000. Architects, Gaggin & Gazzam, University Block, Syracuse, N. Y. Owner, Burt Smith. Information has been received by a close associate of Burt Smith, son of the late L. C. Smith, which states that the present Pacific Block at the corner of Yesler Way and Occidental Avenue is to be replaced within a short time with a modern 36 story Class A structure. The information further states that plans are well advanced and that actual construction will be undertaken as soon as the L. C. Smith building at 2nd and Yesler Way is completed.

Contracts Awarded.

Wenatchee, Wash.—Stores and offices, 2 story and base reinforced concrete, $50,000. Architect, J. A. Creutzer, Haight Bldg., Seattle. Owners, Gregg Land Co. Contractor, George C. Dettra, Globe Bldg., Seattle. Contract price, $50,000.

Canby, Ore.—Department store, 2 story and base, reinforced concrete. Cost not stated. Architect, Wayne L. Mills, Portland. Owners, Carlton and Rosengraus. Contractor, Frank E. Dodge, Canby. Contract price not stated. Note: The building will cover an area of 100x100 feet.

THEATRES.

Roseburg, Ore.—Theatre and stores, 2 story and base brick, $30,000. Architect, Earl A. Roberts, Portland. Owners, Elvadene Trust Co. The building will be 100x110 feet. The theatre will be modern in all its equipment and will contain a stage 26 feet wide. There will be steam heat and a modern system of ventilation. The interior of the theatre will be finished in ornamental plaster. Besides the theatre the building will contain two stores. The exterior will be faced with pressed brick. Plans are being prepared and bids will be called for by September 1st.

Stores—1 story and base brick. Cost not stated. Los Angeles, Cal. Architect Frank M. Tyler, Hibernian Bldg., L. A. Owner, Dr. William Bull, 965 So. Hill St., L. A. The building will cover a site of 100x165 feet. There will be a number of retail stores with patent store fronts. The interior will be finished in pine. A cement floor will cover the entire area. The exterior of the building will be faced with pressed brick. Plans are in the hands of the owner and he is now taking figures.

Stores—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Austin & Pennell, Wright and Callender Bldg., L. A. Owners, Engineers' Fireproof Building Co. The building is to be 80x137 feet, and will contain seven stores. There will be pine and hardwood interior finish, patent store fronts and large skylights. The exterior will be faced with pressed brick. Plans are complete and figures are being taken.

SEALED PROPOSALS.

PROPOSALS FOR ELECTRIC WORK.

OFFICE of the Board of Public Works of the City and County of San Francisco. Sealed proposals will be received at this office between the hours of 9 o'clock a. m. and 3 o'clock p. m. on **Wednesday, the 11th day of September, 1912,** for doing the following work, during the furnishing of the necessary labor and materials therefor, to wit:

The additional and finishing electrical work, San Francisco Hospital.

Progressive payments will be made.

Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within three hundred (300) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at $2,500.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Proposal forms will be furnished gratuitously upon application at the office of the architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL, Secretary.

S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps of engineers, U. S. army, general purchasing officer.

PROPOSALS FOR BUILDING.

NOTICE is hereby given that the Board of Fire Commissioners, of the Reedley Fire District, will receive sealed bids for the erection of a one-story brick building on Lot No. 10, of Block No. 37, of the Town of Reedley, State of California, in accordance with plans and specifications, which may be seen at the place of business of J. E. Saile, Reedley, Cal.; such sealed bids to be addressed to F. S. Knauer, Secretary of Reedley Fire District, Reedley, Cal. Each bid shall be accompanied by a certified check of not less than 10 per cent of the amount of the bid, the same to be returned to unsuccessful bidder, and that of the successful bidder to be retained until contract is signed and surety bond of 50 per cent of contract price is furnished; said bids to be opened at 10 o'clock a. m. **Saturday, the 31st day of August, 1912,** at the store of J. E. Saile, Reedley, Cal.

The Board of Fire Commissioners reserve the right to reject any and all bids.

J. E. SAILE,
F. S. KNAUER,
J. W. SHIPE,
Board of Fire Commissioners of Reedley Fire District.

PROPOSALS FOR CONSTRUCTING BUILDING.

THE BOARD OF EDUCATION of the City of Oakland, State of California, request and will receive proposals or bids for the furnishing of all the Materials, Labor and Workmanship required in connection with the construction and completion of Two (2) Story and Basemene Frame Additions or Wings, containing Neighborhood Room, Library, Cafeteria, Pantry, Closets, Lavatories, Six (6) Class Rooms, Teachers' Rooms, Music, Commercial, Physics, Chemistry and Study Rooms, Laboratories, Corridors, Etc.; together with certain changes, alterations, replacements, etc. of Plumbing, Heating, Ventilating, Electrical and other equipment and arrangements in the present building; all to be erected upon the grounds of and to be joined to the present structure of the Fremont High School which is located on the northerly side of Foothill Boulevard between Forty-fifth (45th) and Forty-seventh (47th) Avenues, in the City of Oakland, California.

All said Materials, Labor and Workmanship is to consist of that required by, and be in accordance with the Plans, Drawings and Specifications prepared therefor and on file in the office of John J. Donovan, the Supervising Architect of the City of Oakland, to which said Plans and Specifications reference is hereby made.

All proposals shall be made upon and conform to the requirements of the forms of Proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for Additions to Fremont High School," addressed to the Board of Education, and deposited by the bidder, or his agent, with the Board, while in session, between five o'clock and six o'clock p. m. Pacific Time, on the **16th day of September, 1912,** in the rooms of the Board in the City Hall Annex, No. 1728 Broadway, Oakland, California, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Board.

The Contract for the furnishing of all labor and materials entering into the construction and completion of the work, icluding Plumbing, Heating, Ventilating, Electric Work, Blackboards, and other Equipment indicated on the drawings or called for in the specifications, is to be let or awarded as a whole, or General Contract, but each bidder, in his Proposal shall set opposite each and every one of the followings named groups, or branches of the work, the estimated amounts for all the items included in such groups, which taken together, shall make up the aggregate of the entire Proposal, viz:

1. Preparation of Site; 2, Structural Iron and Steel; 3, Concrete, Plain and Reinforced; 4, Brickwork; 5, Roofing; 6, Rough Carpentry, Mill Work and Stair Building; 7, Plumbing and Gas Fitting; 8, Heating, Ventilating and Vacuum Cleaning; 9, Electric Work and Lighting Fixtures; 10, Finished Hardware; 11, Sheet Metal; 12, Architectural Metal; 13, Vault Lights; 14, Marble and Tiling, 15, Linoleum and Corrugated Rubber, 16, Glass and Glazing; 17, Lathing and Plastering; 18, Painting; 19, Blackboards.

The bidder shall also set forth opposite each and every one of the foregoing groups or branches the name or names of the subcontractors to whom the Bidder proposes to sublet the work included in each such group. Each and every such proposed subcontracting person, firm or corporation, must be actually engaged in the execution manufacture or installation of work similar to that required hereunder, and shall be able to refer to work of similar character, successfully and satisfactorily performed by him or them. No change or substitution of such subcontractors will be allowed the successful Bidder without the written consent of the Board of Education and the approval of the Supervising Architect. J. W. McCLYMONDS,

Secretary of the Board of Education of the City of Oakland.

PROPOSALS FOR CONSTRUCTING BUILDING.

OFFICE of the Board of Public Works of the City and County of San Francisco.—Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on **Wednesday, the 11th day of September, 1912,** for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

The construction of the North End Police Station, situated on Greenwich street between Pierce and Scott streets.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within two hundred and forty (240) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at $8,756,00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works. F. J. CHURCHILL,
Secretary.

PROPOSALS FOR PILE DRIVER.

PILE DRIVER—U. S. Engineer Office, Portland, Ore.,—Sealed proposals for constructing and delivering one floating pile driver will be received at this office until 11 a. m. **September 4, 1912,** and then publicly opened. Information on application. J. M. McINDOE, major, engineers.

Firms desiring news from certain localities like San Francisco, Los Angeles Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

Apartment House—3 story and base, frame, $35,000. San Francisco. Architects, Welsh & Carey, Metropolis Bank Bldg., S. F. Owner, S. Dolliver. This building has been mentioned here before in connection with a larger structure which is to be erected in another location for the same owner. The building will contain about 24 apartments of 2 and 3 rooms each. There will be wall beds, private baths, elevator service and steam heat. The interior will be finished in pine and redwood. The exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Apartment House—6 story and base, steel and reinforced concrete, $100,000. San Francisco. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, F. A. Meyers. Mr. Meyers has had two sets of plans prepared for this work and has taken figures on the same. All bids have been rejected and a third set of plans will be prepared providing for a larger structure covering an additional piece of property which he has just purchased. The plans will be prepared by Architect Mattanovich.
